Questions for DEP15704

Mapping Services for Northern Counties of West Virginia

Q. 1) On page 3 of the scope of work it says to provide three sets of color 9" x 9" aerial photographs (contact prints) is performing this work digitally acceptable.

A. Yes, it is actually preferred.

Q.2) Will digital photography be accepted in lieu of analog photography?

A. Yes, since digital is the method commonly used now.

Q.3) You are requiring 400 neg analog, would 500 neg analog be acceptable?

A. This is probably a moot issue since digital is the preferred method.

Q.4) We are reviewing your requirements and have a question on the bidding schedule under item 3.0 What should be included in this as a "unit price"? We are guessing the cost of the aerial flight along with the production of contact prints.

A. First and foremost, the term "sheet" needs to be clearly defined. As it is it is not clear whether a sheet is considered to be the resulting print on 24" x 36" paper as per some specified scale, or the negative produced for stereo modeling by a click of the camera, or a single contact print, or something else altogether. Second, all costs associated with aerial photography need to be included in the unit price for this item. This would include the cost of the aerial flight along with the production of the photographs. The cost for digitizing should be included in Item 4.0, "Topographic Mapping Using Aerial Photography" which is proposed to be sub-contracted.

Q.5) Is the use of survey-grade GPS equipment acceptable in: (a) establishing the horizontal and vertical control, (b) establishing ground control for aerial mapping, and (c) topographic surveying?

A. Yes.

Q.6) Would the use of ground-based high definition scanning (HDS) be an acceptable means of performing topographic surveys or to supplement conventional surveying and aerial mapping? This would be beneficial for areas not captured by aerial mapping where access or safety might be an issue (i.e. highwalls, unstable ground or other unsafe conditions). Using this technology would allow the areas to be surveyed from a safe and suitable location.

A. Yes, the comment provided above is absolutely correct.
