SOLICITATION NUMBER: DEP15988

Addendum Number: 01

The purpose of this addendum is to modify the solicitation identified as ("Solicitation") to reflect the change(s) identified and described below.

Applicable Addendum Category:

- Modify bid opening date and time
- Modify specifications of product or service being sought
- Attachment of vendor questions and responses
- Attachment of pre-bid sign-in sheet
- Correction of error
- Other

Description of Modification to Solicitation:

This Addendum is published for the: "Laurel Run #1" Project to publish and distribute the following information per the attachments.

1. Questions and answers from Pre-Bid meeting.
2. Revised Contractors Bid Sheet
3. Pre-Bid sign in sheet

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.
2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

ATTACHMENT A

Addendum #1 - Questions During Pre-Bid Meeting
 For DEP 15988
 Laurel Run #1

The following comments and questions were identified from the Pre-Bid Conference. The answers provided herein take precedence over verbal answers at the PBC should there be any conflict between the two.

Questions:

There was a question on backfilling the highwall on Site 1.

The material to be utilized for backfilling the highwall on Site #1 is available on Site #3. The Reclamation Plan has been designed such that excess material from regrading operations on Site #3 is to be hauled to Site #1 to complete the regrading operations on that site. (See attached earthwork quantity computation tabulations broken down per site.)

There was a question on the compaction requirements for excavated material placement.

The compaction requirement in Specification 8.3.2 should indicate 90% of Standard Proctor maximum dry density instead of 95%.

There was a question on the excavated material placement requirements where highwall vertical slopes exceed 1:1 or overhangs exist.

For areas along highwalls that are to be backfilled where these conditions exist, it would be difficult to attain proper compaction against the highwall. Therefore, in these difficult areas it may be necessary to break down the highwall from the top in order to eliminate the overhangs and be able to compact the backfilled material against the highwall properly.

There was a question regarding the Wet/Modified Mine Seals in the Plans.

The type of mine seal to be installed in each of the portal locations is suggested on the Plan, but whether it will actually be a Wet Seal or a Modified Seal will not be known definitely until the condition of the portal is determined from the mine seal installation during construction.

There was question regarding the power line on Site 3.

There is one utility pole that will need to be reset due to the earthwork operations on Site 3.

Specification 6.2.2 should indicate three (3) Tons per acre.

The project shall be bid in accordance with the attached **Revised Bid Schedule**. The Contractor shall have 210 days from the date of the Notice to Proceed to complete construction activities on the project. (This is extended from the original 150 days in the Specifications) The \$250.00 per day liquidated damages clause will be in effect after the 210 days. However, the total performance period will be 365 days from the date of the Notice to Proceed for invoicing purposes.

Laurel Run #1**DEP # 15988****Earthwork Volumes**

Site No.	Cut (cy)	Fill (cy)	Net (cy)	
1	1,374	21,284	19,910	fill
