WHEN RESPONDING TO SOLICITATION, INSERT NAME AND ADDRESS IN SPACE ABOVE LABELED 'VENDOR'

INSTRUCTIONS TO VENDORS SUBMITTING BIDS

1. **REVIEW DOCUMENTS THOROUGHLY:** The attached documents contain a solicitation for bids. Please read these instructions and all documents attached in their entirety. These instructions provide critical information about requirements that if overlooked could lead to disqualification of a Vendor's bid. All bids must be submitted in accordance with the provisions contained in these instructions and the Solicitation. Failure to do so may result in disqualification of Vendor's bid.
2. **MANDATORY TERMS:** The Solicitation may contain mandatory provisions identified by the use of the words "must," "will," and "shall." Failure to comply with a mandatory term in the Solicitation will result in bid disqualification.
3. **PREBID MEETING:** The item identified below shall apply to this Solicitation.

☐ | A pre-bid meeting will not be held prior to bid opening.

☐ | A **NON-MANDATORY PRE-BID** meeting will be held at the following place and time:

☒ | A **MANDATORY PRE-BID** meeting will be held at the following place and time:

November 1, 2012 at 11:00 A.M.

2019 Washington Street, East.

Charleston, WV 25305

(Capitol Complex - Building 15)

All Vendors submitting a bid must attend the mandatory pre-bid meeting. Failure to attend the mandatory pre-bid meeting shall result in disqualification of the Vendor's bid. No one person attending the pre-bid meeting may represent more than one Vendor.

An attendance sheet provided at the pre-bid meeting shall serve as the official document verifying attendance. The State will not accept any other form of proof or documentation to verify attendance. Any person attending the pre-bid meeting on behalf of a Vendor must list on the attendance sheet his or her name and the name of the Vendor he or she is representing. Additionally, the person attending the pre-bid meeting should include the Vendor's E-Mail address, phone number, and Fax number on the attendance sheet. It is the Vendor's responsibility to locate the attendance sheet and provide the required

information. Failure to complete the attendance sheet as required may result in disqualification of Vendor's bid.

All Vendors should arrive prior to the starting time for the pre-bid. Vendors who arrive after the starting time but prior to the end of the pre-bid will be permitted to sign in, but are charged with knowing all matters discussed at the pre-bid.

Questions submitted at least five business days prior to a scheduled pre-bid will be discussed at the pre-bid meeting if possible. Any discussions or answers to questions at the pre-bid meeting are preliminary in nature and are non-binding. Official and binding answers to questions will be published in a written addendum to the Solicitation prior to bid opening.

4. **VENDOR QUESTION DEADLINE:** Vendors may submit questions relating to this Solicitation to the Purchasing Division. Questions must be submitted in writing. All questions must be submitted on or before the date listed below and to the address listed below in order to be considered. A written response will be published in a Solicitation addendum if a response is possible and appropriate. Non-written discussions, conversations, or questions and answers regarding this Solicitation are preliminary in nature and are non-binding.

Question Submission Deadline: 11/7/2012 - 5:00 P.M.

Submit Questions to:

Alan Cummings

2019 Washington Street, East

P.O. Box 50130

Charleston, WV 25305

Fax: 304-558-4115

Email: Alan.W.Cummings@WV.Gov

5. **VERBAL COMMUNICATION:** Any verbal communication between the Vendor and any State personnel is not binding, including that made at the mandatory pre-bid conference. Only information issued in writing and added to the Solicitation by an official written addendum by the Purchasing Division is binding.
6. **BID SUBMISSION:** All bids must be signed and delivered by the Vendor to the Purchasing Division at the address listed below on or before the date and time of the bid opening. Any bid received by the Purchasing Division staff is considered to be in the possession of the Purchasing Division and will not be returned for any reason. The bid delivery address is:

Department of Administration, Purchasing Division
2019 Washington Street East
P.O. Box 50130,
Charleston, WV 25305-0130

The bid should contain the information listed below on the face of the envelope or the bid may not be considered:

SEALED BID

BUYER: _____
 SOLICITATION NO.: _____
 BID OPENING DATE: _____
 BID OPENING TIME: _____
 FAX NUMBER: _____

In the event that Vendor is responding to a request for proposal, the Vendor shall submit one original technical and one original cost proposal plus convenience copies of each to the Purchasing Division at the address shown above. Additionally, the Vendor should identify the bid type as either a technical or cost proposal on the face of each bid envelope submitted in response to a request for proposal as follows:

BID TYPE: ☐ Technical
 ☐ Cost

7. **BID OPENING:** Bids submitted in response to this Solicitation will be opened at the location identified below on the date and time listed below. Delivery of a bid after the bid opening date and time will result in bid disqualification. For purposes of this Solicitation, a bid is considered delivered when time stamped by the official Purchasing Division time clock.

Bid Opening Date and Time:

11/20/2012 - 1:30 P.M.

Bid Opening Location:

Department of Administration, Purchasing Division
 2019 Washington Street East
 P.O. Box 50130,
 Charleston, WV 25305-0130

8. **ADDENDUM ACKNOWLEDGEMENT:** Changes or revisions to this Solicitation will be made by an official written addendum issued by the Purchasing Division. Vendor should acknowledge receipt of all addenda issued with this Solicitation by completing an Addendum Acknowledgment Form, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.
9. **BID FORMATTING:** Vendor should type or electronically enter the information onto its bid to prevent errors in the evaluation. Failure to type or electronically enter the information may result in bid disqualification.

GENERAL TERMS AND CONDITIONS:

1. **CONTRACTUAL AGREEMENT:** Issuance of a Purchase Order signed by the Purchasing Division Director, or his designee, and approved as to form by the Attorney General's office constitutes acceptance of this Contract made by and between the State of West Virginia and the Vendor. Vendor's signature on its bid signifies Vendor's agreement to be bound by and accept the terms and conditions contained in this Contract.
2. **DEFINITIONS:** As used in this Solicitation / Contract, the following terms shall have the meanings attributed to them below. Additional definitions may be found in the specifications included with this Solicitation / Contract.
 - 2.1 **"Agency" or "Agencies"** means the agency, board, commission, or other entity of the State of West Virginia that is identified on the first page of the Solicitation or any other public entity seeking to procure goods or services under this Contract.
 - 2.2 **"Contract"** means the binding agreement that is entered into between the State and the Vendor to provide the goods and services requested in the Solicitation.
 - 2.3 **"Director"** means the Director of the West Virginia Department of Administration, Purchasing Division.
 - 2.4 **"Purchasing Division"** means the West Virginia Department of Administration, Purchasing Division.
 - 2.5 **"Purchase Order"** means the document signed by the Agency and the Purchasing Division, and approved as to form by the Attorney General, that identifies the Vendor as the successful bidder and Contract holder.
 - 2.6 **"Solicitation"** means the official solicitation published by the Purchasing Division and identified by number on the first page thereof.
 - 2.7 **"State"** means the State of West Virginia and/or any of its agencies, commissions, boards, etc. as context requires.
 - 2.8 **"Vendor" or "Vendors"** means any entity submitting a bid in response to the Solicitation, the entity that has been selected as the lowest responsible bidder, or the entity that has been awarded the Contract as context requires.

3. **CONTRACT TERM; RENEWAL; EXTENSION:** The term of this Contract shall be determined in accordance with the category that has been identified as applicable to this Contract below:

☒ **Term Contract**

Initial Contract Term: This Contract becomes effective on

 and extends for a period of year(s).

Renewal Term: This Contract may be renewed upon the mutual written consent of the Agency, and the Vendor, with approval of the Purchasing Division and the Attorney General's office (Attorney General approval is as to form only). Any request for renewal must be submitted to the Purchasing Division Director thirty (30) days prior to the expiration date of the initial contract term or appropriate renewal term. A Contract renewal shall be in accordance with the terms and conditions of the original contract. Renewal of this Contract is limited to successive one (1) year periods. Automatic renewal of this Contract is prohibited. Notwithstanding the foregoing, Purchasing Division approval is not required on agency delegated or exempt purchases. Attorney General approval may be required for vendor terms and conditions.

Reasonable Time Extension: At the sole discretion of the Purchasing Division Director, and with approval from the Attorney General's office (Attorney General approval is as to form only), this Contract may be extended for a reasonable time after the initial Contract term or after any renewal term as may be necessary to obtain a new contract or renew this Contract. Any reasonable time extension shall not exceed twelve (12) months. Vendor may avoid a reasonable time extension by providing the Purchasing Division Director with written notice of Vendor's desire to terminate this Contract 30 days prior to the expiration of the then current term. During any reasonable time extension period, the Vendor may terminate this Contract for any reason upon giving the Purchasing Division Director 30 days written notice. Automatic extension of this Contract is prohibited. Notwithstanding the foregoing, Purchasing Division approval is not required on agency delegated or exempt purchases, but Attorney General approval may be required.

- ☐ **Fixed Period Contract:** This Contract becomes effective upon Vendor's receipt of the notice to proceed and must be completed within days.
- ☐ **One Time Purchase:** The term of this Contract shall run for one year from the date the Purchase Order is issued or from the date the Purchase Order is issued until all of the goods contracted for have been delivered, whichever is shorter.
- ☐ **Other:** See attached.

4. **NOTICE TO PROCEED:** Vendor shall begin performance of this Contract immediately upon receiving notice to proceed unless otherwise instructed by the Agency. Unless otherwise specified, the fully executed Purchase Order will be considered notice to proceed
5. **QUANTITIES:** The quantities required under this Contract shall be determined in accordance with the category that has been identified as applicable to this Contract below.
 - | ☒ | **Open End Contract:** Quantities listed in this Solicitation are approximations only, based on estimates supplied by the Agency. It is understood and agreed that the Contract shall cover the quantities actually ordered for delivery during the term of the Contract, whether more or less than the quantities shown.
 - | | **Service:** The scope of the service to be provided will be more clearly defined in the specifications included herewith.
 - | | **Combined Service and Goods:** The scope of the service and deliverable goods to be provided will be more clearly defined in the specifications included herewith.
 - | | **One Time Purchase:** This Contract is for the purchase of a set quantity of goods that are identified in the specifications included herewith. Once those items have been delivered, no additional goods may be procured under this Contract without an appropriate change order approved by the Vendor, Agency, Purchasing Division, and Attorney General's office.
6. **PRICING:** The pricing set forth herein is firm for the life of the Contract, unless specified elsewhere within this Solicitation/Contract by the State. A Vendor's inclusion of price adjustment provisions in its bid, without an express authorization from the State in the Solicitation to do so, may result in bid disqualification.
7. **EMERGENCY PURCHASES:** The Purchasing Division Director may authorize the Agency to purchase goods or services in the open market that Vendor would otherwise provide under this Contract if those goods or services are for immediate or expedited delivery in an emergency. Emergencies shall include, but are not limited to, delays in transportation or an unanticipated increase in the volume of work. An emergency purchase in the open market, approved by the Purchasing Division Director, shall not constitute of breach of this Contract and shall not entitle the Vendor to any form of compensation or damages. This provision does not excuse the State from fulfilling its obligations under a One Time Purchase contract.
8. **REQUIRED DOCUMENTS:** All of the items checked below must be provided to the Purchasing Division by the Vendor as specified below.
 - | | **BID BOND:** All Vendors shall furnish a bid bond in the amount of five percent (5%) of the total amount of the bid protecting the State of West Virginia. The bid bond must be submitted with the bid.

- | | **PERFORMANCE BOND:** The apparent successful Vendor shall provide a performance bond in the amount of . The performance bond must be issued and received by the Purchasing Division prior to Contract award. On construction contracts, the performance bond must be 100% of the Contract value.

- | | **LABOR/MATERIAL PAYMENT BOND:** The apparent successful Vendor shall provide a labor/material payment bond in the amount of 100% of the Contract value. The labor/material payment bond must be issued and delivered to the Purchasing Division prior to Contract award.

In lieu of the Bid Bond, Performance Bond, and Labor/Material Payment Bond, the Vendor may provide certified checks, cashier's checks, or irrevocable letters of credit. Any certified check, cashier's check, or irrevocable letter of credit provided in lieu of a bond must be of the same amount and delivered on the same schedule as the bond it replaces. A letter of credit submitted in lieu of a performance and labor/material payment bond will only be allowed for projects under \$100,000. Personal or business checks are not acceptable.

- | | **MAINTENANCE BOND:** The apparent successful Vendor shall provide a two (2) year maintenance bond covering the roofing system. The maintenance bond must be issued and delivered to the Purchasing Division prior to Contract award.

- | | **WORKERS' COMPENSATION INSURANCE:** The apparent successful Vendor shall have appropriate workers' compensation insurance and shall provide proof thereof upon request.

- | | **INSURANCE:** The apparent successful Vendor shall furnish proof of the following insurance prior to Contract award:

- | | **Commercial General Liability Insurance:**

or more.

- | | **Builders Risk Insurance:** builders risk – all risk insurance in an amount equal to 100% of the amount of the Contract.

| |

| |

| |

| |

| |

The apparent successful Vendor shall also furnish proof of any additional insurance requirements contained in the specifications prior to Contract award regardless of whether or not that insurance requirement is listed above.

- | | **LICENSE(S) / CERTIFICATIONS / PERMITS:** In addition to anything required under the Section entitled Licensing, of the General Terms and Conditions, the apparent successful Vendor shall furnish proof of the following licenses, certifications, and/or permits prior to Contract award, in a form acceptable to the Purchasing Division.

The apparent successful Vendor shall also furnish proof of any additional licenses or certifications contained in the specifications prior to Contract award regardless of whether or not that requirement is listed above.

- 9. LITIGATION BOND:** The Director reserves the right to require any Vendor that files a protest of an award to submit a litigation bond in the amount equal to one percent of the lowest bid submitted or \$5,000, whichever is greater. The entire amount of the bond shall be forfeited if the hearing officer determines that the protest was filed for frivolous or improper purpose, including but not limited to, the purpose of harassing, causing unnecessary delay, or needless expense for the Agency. All litigation bonds shall be made payable to the Purchasing Division. In lieu of a bond, the protester may submit a cashier's check or certified check payable to the Purchasing Division. Cashier's or certified checks will be deposited with and held by the State Treasurer's office. If it is determined that the protest has not been filed for frivolous or improper purpose, the bond or deposit shall be returned in its entirety.
- 10. ALTERNATES:** Any model, brand, or specification listed herein establishes the acceptable level of quality only and is not intended to reflect a preference for, or in any way favor, a particular brand or vendor. Vendors may bid alternates to a listed model or brand provided that the alternate is at least equal to the model or brand and complies with the required specifications. The equality of any alternate being bid shall be determined by the State at its sole discretion. Any Vendor bidding an alternate model or brand should clearly identify the alternate items in its bid and should include manufacturer's specifications, industry literature, and/or any other relevant documentation demonstrating the equality of the alternate items. Failure to provide information for alternate items may be grounds for rejection of a Vendor's bid.
- 11. EXCEPTIONS AND CLARIFICATIONS:** The Solicitation contains the specifications that shall form the basis of a contractual agreement. Vendor shall clearly mark any exceptions, clarifications, or

other proposed modifications in its bid. Exceptions to, clarifications of, or modifications of a requirement or term and condition of the Solicitation may result in bid disqualification.

12. LIQUIDATED DAMAGES: Vendor shall pay liquidated damages in the amount

	for	

This clause shall in no way be considered exclusive and shall not limit the State or Agency's right to pursue any other available remedy.

13. ACCEPTANCE/REJECTION: The State may accept or reject any bid in whole, or in part. Vendor's signature on its bid signifies acceptance of the terms and conditions contained in the Solicitation and Vendor agrees to be bound by the terms of the Contract, as reflected in the Purchase Order, upon receipt.

14. REGISTRATION: Prior to Contract award, the apparent successful Vendor must be properly registered with the West Virginia Purchasing Division and must have paid the \$125 fee if applicable.

15. COMMUNICATION LIMITATIONS: In accordance with West Virginia Code of State Rules §148-1-6.6, communication with the State of West Virginia or any of its employees regarding this Solicitation during the solicitation, bid, evaluation or award periods, except through the Purchasing Division, is strictly prohibited without prior Purchasing Division approval. Purchasing Division approval for such communication is implied for all agency delegated and exempt purchases.

16. FUNDING: This Contract shall continue for the term stated herein, contingent upon funds being appropriated by the Legislature or otherwise being made available. In the event funds are not appropriated or otherwise made available, this Contract becomes void and of no effect beginning on July 1 of the fiscal year for which funding has not been appropriated or otherwise made available.

17. PAYMENT: Payment in advance is prohibited under this Contract. Payment may only be made after the delivery and acceptance of goods or services. The Vendor shall submit invoices, in arrears, to the Agency at the address on the face of the purchase order labeled "Invoice To."

18. UNIT PRICE: Unit prices shall prevail in cases of a discrepancy in the Vendor's bid.

19. DELIVERY: All quotations are considered freight on board destination ("F.O.B. destination") unless alternate shipping terms are clearly identified in the bid. Vendor's listing of shipping terms that contradict the shipping terms expressly required by this Solicitation may result in bid disqualification.

20. INTEREST: Interest attributable to late payment will only be permitted if authorized by the West Virginia Code. Presently, there is no provision in the law for interest on late payments.

21. PREFERENCE: Vendor Preference may only be granted upon written request and only in accordance with the West Virginia Code § 5A-3-37 and the West Virginia Code of State Rules. A Resident Vendor Certification form has been attached hereto to allow Vendor to apply for the preference. Vendor's

failure to submit the Resident Vendor Certification form with its bid will result in denial of Vendor Preference. Vendor Preference does not apply to construction projects.

22. **SMALL, WOMEN-OWNED, OR MINORITY-OWNED BUSINESSES:** For any solicitations publicly advertised for bid on or after July 1, 2012, in accordance with West Virginia Code §5A-3-37(a)(7) and W. Va. CSR § 148-22-9, any non-resident vendor certified as a small, women-owned, or minority-owned business under W. Va. CSR § 148-22-9 shall be provided the same preference made available to any resident vendor. Any non-resident small, women-owned, or minority-owned business must identify itself as such in writing, must submit that writing to the Purchasing Division with its bid, and must be properly certified under W. Va. CSR § 148-22-9 prior to submission of its bid to receive the preferences made available to resident vendors. Preference for a non-resident small, women-owned, or minority owned business shall be applied in accordance with W. Va. CSR § 148-22-9.
23. **TAXES:** The Vendor shall pay any applicable sales, use, personal property or any other taxes arising out of this Contract and the transactions contemplated thereby. The State of West Virginia is exempt from federal and state taxes and will not pay or reimburse such taxes.
24. **CANCELLATION:** The Purchasing Division Director reserves the right to cancel this Contract immediately upon written notice to the vendor if the materials or workmanship supplied do not conform to the specifications contained in the Contract. The Purchasing Division Director may cancel any purchase or Contract upon 30 days written notice to the Vendor in accordance with West Virginia Code of State Rules § 148-1-7.16.2.
25. **WAIVER OF MINOR IRREGULARITIES:** The Director reserves the right to waive minor irregularities in bids or specifications in accordance with West Virginia Code of State Rules § 148-1-4.6.
26. **TIME:** Time is of the essence with regard to all matters of time and performance in this Contract.
27. **APPLICABLE LAW:** This Contract is governed by and interpreted under West Virginia law without giving effect to its choice of law principles. Any information provided in specification manuals, or any other source, verbal or written, which contradicts or violates the West Virginia Constitution, West Virginia Code or West Virginia Code of State Rules is void and of no effect.
28. **COMPLIANCE:** Vendor shall comply with all applicable federal, state, and local laws, regulations and ordinances. By submitting a bid, Vendors acknowledge that they have reviewed, understand, and will comply with all applicable law.
29. **PREVAILING WAGE:** On any contract for the construction of a public improvement, Vendor and any subcontractors utilized by Vendor shall pay a rate or rates of wages which shall not be less than the fair minimum rate or rates of wages (prevailing wage), as established by the West Virginia Division of Labor under West Virginia Code §§ 21-5A-1 et seq. and available at <http://www.sos.wv.gov/administrative-law/wagerates/Pages/default.aspx>. Vendor shall be responsible for ensuring compliance with prevailing wage requirements and determining when prevailing wage

requirements are applicable. The required contract provisions contained in West Virginia Code of State Rules § 42-7-3 are specifically incorporated herein by reference.

- 30. ARBITRATION:** Any references made to arbitration contained in this Contract, Vendor's bid, or in any American Institute of Architects documents pertaining to this Contract are hereby deleted, void, and of no effect.
- 31. MODIFICATIONS:** This writing is the parties' final expression of intent. Notwithstanding anything contained in this Contract to the contrary, no modification of this Contract shall be binding without mutual written consent of the Agency, and the Vendor, with approval of the Purchasing Division and the Attorney General's office (Attorney General approval is as to form only). **No Change shall be implemented by the Vendor until such time as the Vendor receives an approved written change order from the Purchasing Division.**
- 32. WAIVER:** The failure of either party to insist upon a strict performance of any of the terms or provision of this Contract, or to exercise any option, right, or remedy herein contained, shall not be construed as a waiver or a relinquishment for the future of such term, provision, option, right, or remedy, but the same shall continue in full force and effect. Any waiver must be expressly stated in writing and signed by the waiving party.
- 33. SUBSEQUENT FORMS:** The terms and conditions contained in this Contract shall supersede any and all subsequent terms and conditions which may appear on any form documents submitted by Vendor to the Agency or Purchasing Division such as price lists, order forms, invoices, sales agreements, or maintenance agreements, and includes internet websites or other electronic documents. Acceptance or use of Vendor's forms does not constitute acceptance of the terms and conditions contained thereon.
- 34. ASSIGNMENT:** Neither this Contract nor any monies due, or to become due hereunder, may be assigned by the Vendor without the express written consent of the Agency, the Purchasing Division, the Attorney General's office (as to form only), and any other government agency or office that may be required to approve such assignments. Notwithstanding the foregoing, Purchasing Division approval may or may not be required on certain agency delegated or exempt purchases.
- 35. WARRANTY:** The Vendor expressly warrants that the goods and/or services covered by this Contract will: (a) conform to the specifications, drawings, samples, or other description furnished or specified by the Agency; (b) be merchantable and fit for the purpose intended; and (c) be free from defect in material and workmanship.
- 36. STATE EMPLOYEES:** State employees are not permitted to utilize this Contract for personal use and the Vendor is prohibited from permitting or facilitating the same.
- 37. BANKRUPTCY:** In the event the Vendor files for bankruptcy protection, the State of West Virginia may deem this Contract null and void, and terminate this Contract without notice.

- 38. HIPAA BUSINESS ASSOCIATE ADDENDUM:** The West Virginia State Government HIPAA Business Associate Addendum (BAA), approved by the Attorney General, is available online at <http://www.state.wv.us/admin/purchase/vrc/hipaa.html> and is hereby made part of the agreement provided that the Agency meets the definition of a Covered entity (45 CFR §160.103) and will be disclosing Protected Health Information (45 CFR §160.103) to the Vendor.
- 39. CONFIDENTIALITY:** The Vendor agrees that it will not disclose to anyone, directly or indirectly, any such personally identifiable information or other confidential information gained from the Agency, unless the individual who is the subject of the information consents to the disclosure in writing or the disclosure is made pursuant to the Agency's policies, procedures, and rules. Vendor further agrees to comply with the Confidentiality Policies and Information Security Accountability Requirements, set forth in <http://www.state.wv.us/admin/purchase/privacy/default.html>.
- 40. DISCLOSURE:** Vendor's response to the Solicitation and the resulting Contract are considered public documents and will be disclosed to the public in accordance with the laws, rules, and policies governing the West Virginia Purchasing Division. Those laws include, but are not limited to, the Freedom of Information Act found in West Virginia Code § 29B-1-1 et seq.
- If a Vendor considers any part of its bid to be exempt from public disclosure, Vendor must so indicate by specifically identifying the exempt information, identifying the exemption that applies, providing a detailed justification for the exemption, segregating the exempt information from the general bid information, and submitting the exempt information as part of its bid but in a segregated and clearly identifiable format. Failure to comply with the foregoing requirements will result in public disclosure of the Vendor's bid without further notice. A Vendor's act of marking all or nearly all of its bid as exempt is not sufficient to avoid disclosure and WILL NOT BE HONORED. Vendor's act of marking a bid or any part thereof as "confidential" or "proprietary" is not sufficient to avoid disclosure and WILL NOT BE HONORED. In addition, a legend or other statement indicating that all or substantially all of the bid is exempt from disclosure is not sufficient to avoid disclosure and WILL NOT BE HONORED. Vendor will be required to defend any claimed exemption for nondisclosure in the event of an administrative or judicial challenge to the State's nondisclosure. Vendor must indemnify the State for any costs incurred related to any exemptions claimed by Vendor. Any questions regarding the applicability of the various public records laws should be addressed to your own legal counsel prior to bid submission.
- 41. LICENSING:** In accordance with West Virginia Code of State Rules §148-1-6.1.7, Vendor must be licensed and in good standing in accordance with any and all state and local laws and requirements by any state or local agency of West Virginia, including, but not limited to, the West Virginia Secretary of State's Office, the West Virginia Tax Department, West Virginia Insurance Commission, or any other state agency or political subdivision. Upon request, the Vendor must provide all necessary releases to obtain information to enable the Purchasing Division Director or the Agency to verify that the Vendor is licensed and in good standing with the above entities.

42. ANTITRUST: In submitting a bid to, signing a contract with, or accepting a Purchase Order from any agency of the State of West Virginia, the Vendor agrees to convey, sell, assign, or transfer to the State of West Virginia all rights, title, and interest in and to all causes of action it may now or hereafter acquire under the antitrust laws of the United States and the State of West Virginia for price fixing and/or unreasonable restraints of trade relating to the particular commodities or services purchased or acquired by the State of West Virginia. Such assignment shall be made and become effective at the time the purchasing agency tenders the initial payment to Vendor.

43. VENDOR CERTIFICATIONS: By signing its bid or entering into this Contract, Vendor certifies (1) that its bid was made without prior understanding, agreement, or connection with any corporation, firm, limited liability company, partnership, person or entity submitting a bid for the same material, supplies, equipment or services; (2) that its bid is in all respects fair and without collusion or fraud; (3) that this Contract is accepted or entered into without any prior understanding, agreement, or connection to any other entity that could be considered a violation of law; and (4) that it has reviewed this RFQ in its entirety; understands the requirements, terms and conditions, and other information contained herein. Vendor's signature on its bid also affirms that neither it nor its representatives have any interest, nor shall acquire any interest, direct or indirect, which would compromise the performance of its services hereunder. Any such interests shall be promptly presented in detail to the Agency.

The individual signing this bid on behalf of Vendor certifies that he or she is authorized by the Vendor to execute this bid or any documents related thereto on Vendor's behalf; that he or she is authorized to bind the Vendor in a contractual relationship; and that, to the best of his or her knowledge, the Vendor has properly registered with any State agency that may require registration.

44. PURCHASING CARD ACCEPTANCE: The State of West Virginia currently utilizes a Purchasing Card program, administered under contract by a banking institution, to process payment for goods and services. The Vendor must accept the State of West Virginia's Purchasing Card for payment of all orders under this Contract unless the box below is checked.

☒ Vendor is not required to accept the State of West Virginia's Purchasing Card as payment for all goods and services.

45. VENDOR RELATIONSHIP: The relationship of the Vendor to the State shall be that of an independent contractor and no principal-agent relationship or employer-employee relationship is contemplated or created by this Contract. The Vendor as an independent contractor is solely liable for the acts and omissions of its employees and agents. Vendor shall be responsible for selecting, supervising, and compensating any and all individuals employed pursuant to the terms of this Solicitation and resulting contract. Neither the Vendor, nor any employees or subcontractors of the Vendor, shall be deemed to be employees of the State for any purpose whatsoever. Vendor shall be exclusively responsible for payment of employees and contractors for all wages and salaries, taxes, withholding payments, penalties, fees, fringe benefits, professional liability insurance premiums, contributions to insurance and pension, or other deferred compensation plans, including but not limited to, Workers' Compensation and Social Security obligations, licensing fees, *etc.* and the filing of all necessary documents, forms and returns pertinent to all of the foregoing. Vendor shall hold harmless the

State, and shall provide the State and Agency with a defense against any and all claims including, but not limited to, the foregoing payments, withholdings, contributions, taxes, Social Security taxes, and employer income tax returns.

- 46. INDEMNIFICATION:** The Vendor agrees to indemnify, defend, and hold harmless the State and the Agency, their officers, and employees from and against: (1) Any claims or losses for services rendered by any subcontractor, person, or firm performing or supplying services, materials, or supplies in connection with the performance of the Contract; (2) Any claims or losses resulting to any person or entity injured or damaged by the Vendor, its officers, employees, or subcontractors by the publication, translation, reproduction, delivery, performance, use, or disposition of any data used under the Contract in a manner not authorized by the Contract, or by Federal or State statutes or regulations; and (3) Any failure of the Vendor, its officers, employees, or subcontractors to observe State and Federal laws including, but not limited to, labor and wage and hour laws.
- 47. PURCHASING AFFIDAVIT:** In accordance with West Virginia Code § 5A-3-10a, all Vendors are required to sign, notarize, and submit the Purchasing Affidavit stating that neither the Vendor nor a related party owe a debt to the State in excess of \$1,000. The affidavit must be submitted prior to award, but should be submitted with the Vendor's bid. A copy of the Purchasing Affidavit is included herewith.
- 48. ADDITIONAL AGENCY AND LOCAL GOVERNMENT USE:** This Contract may be utilized by and extends to other agencies, spending units, and political subdivisions of the State of West Virginia; county, municipal, and other local government bodies; and school districts ("Other Government Entities"). This Contract shall be extended to the aforementioned Other Government Entities on the same prices, terms, and conditions as those offered and agreed to in this Contract. If the Vendor does not wish to extend the prices, terms, and conditions of its bid and subsequent contract to the Other Government Entities, the Vendor must clearly indicate such refusal in its bid. A refusal to extend this Contract to the Other Government Entities shall not impact or influence the award of this Contract in any manner.
- 49. CONFLICT OF INTEREST:** Vendor, its officers or members or employees, shall not presently have or acquire any interest, direct or indirect, which would conflict with or compromise the performance of its obligations hereunder. Vendor shall periodically inquire of its officers, members and employees to ensure that a conflict of interest does not arise. Any conflict of interest discovered shall be promptly presented in detail to the Agency.
- 50. REPORTS:** Vendor shall provide the Agency and/or the Purchasing Division with the following reports identified by a checked box below:
- ☒ Such reports as the Agency and/or the Purchasing Division may request. Requested reports may include, but are not limited to, quantities purchased, agencies utilizing the contract, total contract expenditures by agency, etc.

- [] Quarterly reports detailing the total quantity of purchases in units and dollars, along with a listing of purchases by agency. Quarterly reports should be delivered to the Purchasing Division via email at purchasing.requisitions@wv.gov.

51. BACKGROUND CHECK: In accordance with W. Va. Code § 15-2D-3, the Director of the Division of Protective Services shall require any service provider whose employees are regularly employed on the grounds or in the buildings of the Capitol complex or who have access to sensitive or critical information to submit to a fingerprint-based state and federal background inquiry through the state repository. The service provider is responsible for any costs associated with the fingerprint-based state and federal background inquiry.

After the contract for such services has been approved, but before any such employees are permitted to be on the grounds or in the buildings of the Capitol complex or have access to sensitive or critical information, the service provider shall submit a list of all persons who will be physically present and working at the Capitol complex to the Director of the Division of Protective Services for purposes of verifying compliance with this provision.

The State reserves the right to prohibit a service provider's employees from accessing sensitive or critical information or to be present at the Capitol complex based upon results addressed from a criminal background check.

Service providers should contact the West Virginia Division of Protective Services by phone at (304) 558-9911 for more information.

52. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open heath, basic oxygen, electric furnace, Bessemer or other steel making process.

The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:

- a. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total

contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or

- b. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

53. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a "substantial labor surplus area", as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products.

This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

ADDITIONAL TERMS AND CONDITIONS (Construction Contracts Only)

1. **CONTRACTOR'S LICENSE:** West Virginia Code § 21-11-2 requires that all persons desiring to perform contracting work in this state be licensed. The West Virginia Contractors Licensing Board is empowered to issue the contractor's license. Applications for a contractor's license may be made by contacting the West Virginia Division of Labor.

West Virginia Code § 21-11-11 requires any prospective Vendor to include the contractor's license number on its bid. Failure to include a contractor's license number on the bid shall result in Vendor's bid being disqualified. Vendors should include a contractor's license number in the space provided below.

Contractor's Name:

Contractor's License No.

The apparent successful Vendor must furnish a copy of its contractor's license prior to the issuance of a purchase order/contract.

2. **DRUG-FREE WORKPLACE:** W. Va. Code § 21-1D-5 provides that any solicitation for a public improvement contract requires each Vendor that submits a bid for the work to submit at the same time an affidavit that the Vendor has a written plan for a drug-free workplace policy. To comply with this law, Vendor must either complete the enclosed drug-free workplace affidavit and submit the same with its bid or complete a similar affidavit that fulfills all of the requirements of the applicable code. Failure to submit the signed and notarized drug-free workplace affidavit, or a similar affidavit that fully complies with the requirements of the applicable code, with the bid shall result in disqualification of Vendor's bid.
3. **AIA DOCUMENTS:** All construction contracts that will be completed in conjunction with architectural services procured under Chapter 5G of the West Virginia Code will be governed by the AIA A101-2007 and A201-2007 or the A107-2007 documents, as amended by the Supplementary Conditions for the State of West Virginia, in addition to the terms and conditions contained herein.
4. **SUBCONTRACTOR LIST SUBMISSION:** In accordance with W. Va. Code § 5-22-1, The apparent low bidder on a contract for the construction, alteration, decoration, painting or improvement of a new or existing building or structure valued at more than \$500,000.00 shall submit a list of all subcontractors who will perform more than \$25,000.00 of work on the project including labor and materials. This provision shall not apply to any other construction projects, such as highway, mine reclamation, water or sewer projects.

c. **Required Information.** The subcontractor list shall contain the following information:

- i. Bidder's name
 - ii. Name of each subcontractor
 - iii. License numbers as required by W. Va. Code § 21-11-1 et. seq.
 - iv. Notation that no subcontractors will be used if the bidder will perform the work
 - d. **Submission.** The completed subcontractor list shall be provided to the Purchasing Division within one business day of the opening of bids for review. Failure to submit the subcontractor list within one business day after the deadline for submitting bids shall result in disqualification of the bid.
 - e. **Substitution of Subcontractor.** Written approval must be obtained from the Purchasing Division before any subcontractor substitution is permitted. Substitutions are not permitted unless:
 - i. The subcontractor listed in the original bid has filed for bankruptcy;
 - ii. The subcontractor in the original bid has been debarred or suspended; or
 - iii. The contractor certifies in writing that the subcontractor listed in the original bill fails, is unable, or refuses to perform his subcontract.
5. **GREEN BUILDINGS MINIMUM ENERGY STANDARDS:** In accordance with § 22-29-4, all new building construction projects of public agencies that have not entered the schematic design phase prior to July 1, 2012, or any building construction project receiving state grant funds and appropriations, including public schools, that have not entered the schematic design phase prior to July 1, 2012, shall be designed and constructed complying with the ICC International Energy Conservation Code, adopted by the State Fire Commission, and the ANSI/ASHRAE/IESNA Standard 90.1-2007: *Provided*, That if any construction project has a commitment of federal funds to pay for a portion of such project, this provision shall only apply to the extent such standards are consistent with the federal standards.

ADDITIONAL TERMS AND CONDITIONS (Architectural and Engineering Contracts Only)

1. **PLAN AND DRAWING DISTRIBUTION:** All plans and drawings must be completed and available for distribution at least five business days prior to a scheduled pre-bid meeting for the construction or other work related to the plans and drawings.
2. **PROJECT ADDENDA REQUIREMENTS:** The Architect/Engineer and/or Agency shall be required to abide by the following schedule in issuing construction project addenda:
 - a. The Architect/Engineer shall prepare any addendum materials for which it is responsible, and a list of all vendors that have obtained drawings and specifications for the project. The Architect/Engineer shall then send a copy of the addendum materials and the list of vendors to the State Agency for which the contract is issued to allow the Agency to make any necessary modifications. The addendum and list shall then be forwarded to the Purchasing Division buyer by the Agency. The Purchasing Division buyer shall send the addendum to all interested vendors and, if necessary, extend the bid opening date. Any addendum should be received by the Purchasing Division at least fourteen (14) days prior to the bid opening date.
3. **PRE-BID MEETING RESPONSIBILITIES:** The Architect/Engineer shall be available to attend any pre-bid meeting for the construction or other work resulting from the plans, drawings, or specifications prepared by the Architect/Engineer.
4. **AIA DOCUMENTS:** Contracts for architectural and engineering services will be governed by the AIA document B101-2007, as amended by the Supplementary Conditions for the State of West Virginia, in addition to the terms and conditions contained herein when procured under Chapter 5G of the West Virginia Code.
5. **GREEN BUILDINGS MINIMUM ENERGY STANDARDS:** In accordance with West Virginia Code § 22-29-4, all new building construction projects of public agencies that have not entered the schematic design phase prior to July 1, 2012, or any building construction project receiving state grant funds and appropriations, including public schools, that have not entered the schematic design phase prior to July 1, 2012, shall be designed and constructed complying with the ICC International Energy Conservation Code, adopted by the State Fire Commission, and the ANSI/ASHRAE/IESNA Standard 90.1-2007: *Provided*, That if any construction project has a commitment of federal funds to pay for a portion of such project, this provision shall only apply to the extent such standards are consistent with the federal standards.

CERTIFICATION AND SIGNATURE PAGE

By signing below, I certify that I have reviewed this Solicitation in its entirety; understand the requirements, terms and conditions, and other information contained herein; that I am submitting this bid or proposal for review and consideration; that I am authorized by the bidder to execute this bid or any documents related thereto on bidder's behalf; that I am authorized to bind the bidder in a contractual relationship; and that to the best of my knowledge, the bidder has properly registered with any State agency that may require registration.

NOTE: This addendum acknowledgment should be submitted with the bid to expedite document processing.

SPECIFICATIONS

1. **PURPOSE AND SCOPE:** The West Virginia Purchasing Division is soliciting bids on behalf of any state agency that desires to utilize this contract to establish an open-end contract for School Buses. The Contract may be utilized by West Virginia State agencies and all political subdivisions of the State in all 55 counties.
2. **DEFINITIONS:** The terms listed below shall have the meanings assigned to them below. Additional definitions can be found in section 2 of the General Terms and Conditions.
 - 2.1 **“Desired Item” or “Desired Items”** means the list of buses identified on the pricing pages.
 - 2.2 **“Pricing Pages”** means the schedule of prices, estimated order quantity, and totals attached hereto as Exhibit B and used to evaluate the RFQ.
 - 2.3 **“RFQ”** means the official request for quotation published by the Purchasing Division and identified as SBUS13.
3. **GENERAL REQUIREMENTS:**
 - 3.1 **Desired Items and Mandatory Requirements:** Vendor shall provide the Agency with the Desired Items listed on the pricing pages on an open-end and continuing basis. Desired Items must meet or exceed the mandatory requirements as shown below.
 - 3.1.1 **Site Visits**
 - 3.1.1.1 The State of West Virginia and/or County Boards of Education reserve the right for representatives to visit production facilities of successful bidders prior to and/or during construction of the units for the purpose of observing production and quality control.
 - 3.1.1.2 School bus manufacturers will construct a pilot unit and provide expenses for approval by the West Virginia Executive Director, Office of School Transportation and/or his designee, prior to assembly line production of West Virginia school buses.

REQUEST FOR QUOTATION
SBUS13 - School Buses

3.1.2 Line Setting Tickets

- 3.1.2.1** Line setting tickets shall be furnished by the manufacturer for all vehicles.

3.1.3 Application for Title

- 3.1.3.1** Successful bidder will issue application for title at least 20 working days prior to the anticipated delivery date of completed units. A 5-day advance notification to the ordering agency must be given prior to the actual delivery date.

3.1.4 School Bus Requirements

- 3.1.4.1** School buses must conform to WEST VIRGINIA MINIMUM REQUIREMENTS FOR DESIGN AND EQUIPMENT OF SCHOOL BUSES (Title 126 Legislative Rule), 2007 REVISION attached hereto as Exhibit A and the specifications contained herein.

Any component supplied by a bidder as an equivalent (where equivalent is permitted in the Minimum Requirements) must have prior approval, in writing, from the Executive Director, Office of School Transportation. All requests must be presented to the Purchasing Division Directly via email to Alan.W.Cummings@WV.Gov prior to the Question and Answer deadline. Responses shall be issued by formal addenda.

- 3.1.4.2** All school buses shall be set for a maximum speed of 65mph and in the economy mode prior to delivery. County Transportation Directors may apply for a waiver to the West Virginia Department of Education's Executive Director of School Transportation.
- 3.1.4.3** Gear ratios shall be determined for the most economical mode and verified with the West Virginia Department of Education's Executive Director of School Transportation.
- 3.1.4.4** A maximum idle time shall be set at 10 minutes.

3.1.4.5 Brakes

- 3.1.4.5.1 ABS automatic traction control system shall be standard on units with air brakes.
- 3.1.4.5.2 Must be protected by a desiccant typed air dryer, with an ADIP or equal spin-on replaceable filter.
- 3.1.4.5.3 Must be a Schrader valve to charge the school bus air system in the event of a compressor failure shall be provided.
- 3.1.4.5.4 Park brake release shall not be affected by any electrical failure.
- 3.1.4.5.5 Must have at least 7" X 16 ½" brake blocks.
- 3.1.4.5.6 Must be equipped with MGM long stroke welded clevis air chambers or equivalent.
- 3.1.4.5.7 Must be equipped with ArvinMeritor slack adjusters or equivalent.
- 3.1.4.5.8 Rear axle shall be equipped with oil deflector (that will direct oil from the brake surface).
EXCEPTION: Vehicles under 35 passengers.

3.1.4.6 Differential

- 3.1.4.6.1 Purchaser shall specify differential ratios when order is submitted to chassis dealer.
- 3.1.4.6.2 Speed will not exceed 70 miles per hour.

3.1.4.7 Exhaust System

- 3.1.4.7.1 Exhaust pipe, After Treatment Device and tailpipe shall be outside the bus body and attached to the chassis, with hangers designed to accommodate expansion and contraction of the system without damage to the system or hanger(s).

REQUEST FOR QUOTATION
SBUS13 - School Buses

3.1.4.7.2 Tailpipe shall be constructed according to manufacturers' standard.

3.1.4.8 Fuel, Alternate

3.1.4.8.1 Shall be Compressed Natural Gas (CNG) or Propane

3.1.4.9 Horn(s)

3.1.4.9.1 Covers shall be provided to keep moisture out of horns.

3.1.4.10 Instruments and instrument panel

3.1.4.10.1 Must have Voltmeter with graduated scale to 16 volts. EXCEPTION: Ammeter may be substituted on Type AI, D and B vehicles under 35 passengers.

3.1.4.10.2 Must have an Automatic transmission temperature gauge. EXCEPTION: Type AI, D and B vehicles under 35 passengers.

3.1.4.10.3 Must have a Tachometer. EXCEPTION: Type AI, D and B vehicles under 35 passengers.

3.1.4.11 Power and Gradeability

3.1.4.11.1 Must be Diesel Power
Passenger Capacity 84 - 90
Minimum Gross Horsepower/ Torque
240HP/620

3.1.4.11.2 Warranty for the engine shall be 5 years/100,000 miles. All available warranty information must be provided to the purchaser.

3.1.4.11.3 Noise acoustical abatement package is recommended. EXCEPTION: Rear engine vehicles.

3.1.4.12 Construction

3.1.4.12.1 Bus body shall meet the Colorado Rack Test

3.1.4.13 Doors

3.1.4.13.1 Service door shall have minimum Horizontal opening of 24" and minimum vertical opening of 68".

3.1.4.14 Emergency Exits

3.1.4.14.1 Each emergency exit shall comply with FMVSS 217 and the present adopted version of the National School Transportation Specifications.

3.1.4.15 Glazing

3.1.4.15.1 Tinted glass may be installed in all doors, windows and windshield. Tinted plastic, which complies with all applicable standards, may be installed in windows to the rear of the operator's compartment.

3.1.4.16 Heaters

3.1.4.16.1 There shall be a water flow control method to control temperature installed for convenient operation by the operator.

3.1.4.17 Steps

3.1.4.17.1 The step tread shall have a 1.5" white, skid resistant, pebble type nosing that contrasts in color by at least 70% measured in accordance with the contrasting color specification in 36CFR, Part 1192, ADA of the current National School Transportation Specification and Procedure and is an integral piece without any joint extending to the leading edge of the nosing turndown. The vertical surface of the nose shall be smooth.

REQUEST FOR QUOTATION
SBUS13 - School Buses

3.1.4.18 Storage Compartment

3.1.4.18.1 Two metal compartments of adequate strength and capacity for storage of tire chains, tow chains, and such tools as may be necessary for minor repairs shall be provided. Such storage compartment shall be located outside passenger compartment. The dimensions of this compartment shall be approximately 25" long, 16" wide and 12" high, mounted. EXCEPTION: Type AII vehicles are not required to meet this standard.

3.1.4.19 Transmission

3.1.4.19.1 Warranty for the transmission shall be 5 yrs. unlimited mileage.

3.1.4.20 Windshield And Windows

3.1.4.20.1 Latch shall be designed to latch positively and securely.

3.1.4.21 Wiring

3.1.4.21.1 A There shall be a manual noise suppression switch installed in the control panel. The switch shall be labeled and alternately colored. This switch shall be an on/off type (shall not be momentary type) that de-activates body equipment that produces noise, including at least, the AM/FM radio, heaters, air conditioners, fans and defrosters. This switch shall not de-activate safety systems, such as windshield wipers or lighting systems.

3.1.5 Special Education School Bus

3.1.5.1 Fastening Devices

3.1.5.1.1 The floor anchorage track system shall consist of 4 tracks and shall be "L" type.

3.1.5.2 Fire Blanket

- 3.1.5.2.1** A fire blanket shall be provided with a storage pouch mounted to the wall conveniently located and identified as a fire blanket. The fire blanket shall meet CFR 16 part 1610 standard for flammability of clothing. Blanket shall be approximately 62 inches X 80 inches.

3.1.6 Liquefied Petroleum Gas (LPG) Buses

3.1.6.1 LPG Vessels on School Buses

- 3.1.6.1.1** The fuel system shall comply with NFPA 58-2011 Liquefied Petroleum Gas Code. The fuel system integrity shall meet the specified leakage performance standards when impacted by a moving contoured barrier in accordance with test conditions specified in FMVSS 301 and CMVSS 301.1 Fuel System Integrity for Liquefied Petroleum Gas.
- 3.1.6.1.2** Propane valves shall be protected by guards or expanded steel grating.
- 3.1.6.1.3** Steel vessels must have protective paint coating.
- 3.1.6.1.4** A manual shutoff valve for maintenance shall be installed. This shutoff valve shall be accessible to the operator, be protected from rocks and other form of debris, and be located on the curb side of the bus where possible. Shut-off valve location shall be clearly marked on the side of the bus. Wherever possible, the manual shut-off valve should be located as close as possible to the LPG vessels.

3.1.6.2 Fuel Lines

- 3.1.6.2.1** Fuel lines shall be permanently secured at intervals of not more than two feet.

REQUEST FOR QUOTATION
SBUS13 - School Buses

3.1.6.2.2 Shall be placed in such a manner as to minimize the possibility of damage due to vibrations, strains or wear.

3.1.6.2.3 A fuel line passing through, under or over a structural member shall be protected by grommets or tubing.

3.1.6.3 Fuel System Filtration

3.1.6.3.1 Fuel filter shall be a high capacity, high flow LPG specific filter which is rated at 5 microns.

3.1.6.4 Venting

3.1.6.4.1 All safety devices that discharge to the atmosphere shall be vented to the outside of the vehicle. The discharge line from the safety relief valve on all school buses shall be located at the rear of the vehicle on the driver's side with the relief nozzle pointing to the ground. Discharge lines shall not pass through the passenger compartment.

3.1.6.5 Vehicle Refueling Connection

3.1.6.5.1 The vehicle shall be equipped with a receptacle with ACME thread and dust cap.

3.1.6.5.2 The fueling systems shall be equipped with a backflow check valve that will prevent the return flow of propane fuel.

3.1.6.5.3 The fueling connection shall meet the standards of NFPA 58 -2011.

3.1.6.6 Labeling Requirements

3.1.6.6.1 Propane vessel shall be labeled per ASME requirements.

3.1.6.6.2 Engine compartment labels to include LPG warning and instructions to mechanics including the following:

1. System service pressure.
2. Installers name or company.

3.1.6.7 LPG Equipment

3.1.6.7.1 Manufacturers wishing to deal in LPG equipment in West Virginia must meet all applicable federal and state requirements.

3.1.6.8 Engine

3.1.6.8.1 Engine retarder is not required

3.1.6.8.2 An idle limiter is not required

3.1.6.9 Transmission

3.1.6.9.1 Allison 2300 series is acceptable

3.1.6.9.2 Ford 6R140 is acceptable

3.1.6.9.3 Retarder is not required

3.1.6.9.4 Synthetic fluid is not required

3.1.6.9.5 Warranty shall not be less than 5 years/100,000 miles

3.1.6.10 Differential

3.1.6.10.1 A limited slip differential is acceptable.

3.1.6.11 Air Compressor

3.1.6.11.1 The air compressor shall be rated at 13.2 cfm.

3.1.6.12 Blockheater

3.1.6.12.1 A block heater is not required.

REQUEST FOR QUOTATION
SBUS13 - School Buses

3.1.6.13 Exhaust System

3.1.6.13.1 The exhaust system shall meet the manufacturer's specification but shall not exceed 1° outside the bus body.

4. CONTRACT AWARD:

4.1 Contract Award: The Contract is intended to provide Agencies with a purchase price on all Desired Items. The Contract shall be awarded to the Vendor(s) that provides the Desired Item(s) meeting the required specifications.

Bids shall be accepted from all bidders who shall then be awarded contracts if they meet the state board's "Minimum Standards for Design and Equipment of School Buses." County boards of education may select from those bidders who have been awarded contracts and shall pay the difference between the state aid formula amount and the actual cost of bus replacement. Any or all bids may be rejected.

4.2 Pricing Pages: Vendor should complete the Pricing Pages by completing the field provided. The Vendor should complete the Pricing Pages in their entirety as failure to do so may result in Vendor's bids being disqualified.

The Pricing Pages contain a list of Desired Items. The Estimated quantity is 250 – 300 units. The estimated purchase volume for each item represents the approximate volume of anticipated purchases only. No future use of the Contract or any individual item is guaranteed or implied.

Notwithstanding the foregoing, the Purchasing Division may correct errors at its discretion. Vendor should type or electronically enter the information into the Pricing Pages to prevent errors in the evaluation. The Pricing Pages were created as a Microsoft Excel document and Vendor can request an electronic copy for bid purposes by sending an email request to the following address: Alan.W.Cummings@WV.Gov

4.3 Convenience Copies: Bidders are requested to send one convenience copy of their bid to the Purchasing Division.

5. ORDERING AND PAYMENT:

5.1 Ordering: Vendor shall accept orders by regular mail, facsimile, e-mail, or any other written forms of communication. Vendor may, but is not required to, accept

on-line orders through a secure internet ordering portal/website. If Vendor has the ability to accept on-line orders, it should include in its response a brief description of how Agencies may utilize the on-line ordering system. Any on-line ordering system must have the capability to restrict prices and available items to conform to the Catalog originally submitted with this RFQ. Vendor shall ensure that its on-line ordering system is properly secured prior to processing Agency orders on-line.

- 5.2 Payment:** Vendor shall accept payment in accordance with the payment procedures of the State of West Virginia. Payment in advance is not permitted under this Contract.

Payment by counties to the successful bidders will be made upon acceptance of completed units by county boards of education. (Acceptance means when a county has determined that ALL manufacturer responsibilities have been met.)

West Virginia Minimum Requirements for Design and Equipment of School Buses, 2007 revision may be obtained from:

Ben Shew, Executive Director
Office of School Transportation
WV Department of Education
1900 Kanawha Blvd., Bldg. 6, Room 215
Charleston, WV 25305
Phone - (304) 558-2711
FAX - (304) 558-8867

6. DELIVERY AND RETURN:

- 6.1 Delivery Time:** Vendor shall deliver standard orders within 120 working days after orders are received. Vendor shall ship all orders in accordance with the above schedule and shall not hold orders until a minimum delivery quantity is met.
- 6.2 Late Delivery:** The Agency placing the order under this Contract must be notified in writing if orders will be delayed for any reason. Any delay in delivery that could cause harm to an Agency will be grounds for cancellation of the delayed order, and/or obtaining the items ordered from a third party.

Any Agency seeking to obtain items from a third party under this provision must first obtain approval of the Purchasing Division.

- 6.3 Delivery Payment/Risk of Loss:** Standard order delivery shall be F.O.B. destination to the Agency's location. Vendor shall include the cost of standard order delivery charges in its bid pricing/discount and is not permitted to charge the

REQUEST FOR QUOTATION
SBUS13 - School Buses

Agency separately for such delivery. The Agency will pay delivery charges on all emergency orders provided that Vendor invoices those delivery costs as a separate charge with the original freight bill attached to the invoice.

6.4 Return of Unacceptable Items: If the Agency deems the Desired Items to be unacceptable, the Desired Items shall be returned to Vendor at Vendor's expense and with no restocking charge. Vendor shall either make arrangements for the return within five (5) days of being notified that items are unacceptable, or permit the Agency to arrange for the return and reimburse Agency for delivery expenses. All returns of unacceptable items shall be F.O.B. the Agency's location. The returned product shall either be replaced, or the Agency shall receive a full credit or refund for the purchase price, at the Agency's discretion.

6.5 Return Due to Agency Error: Items ordered in error by the Agency will be returned for credit within 30 days of receipt, F.O.B. Vendor's location. Vendor shall not charge a restocking fee if returned products are in a resalable condition. Items shall be deemed to be in a resalable condition if they are unused and in the original packaging. Any restocking fee for items not in a resalable condition shall be the lower of the Vendor's customary restocking fee or 5% of the total invoiced value of the returned items.

7. MISCELLANEOUS:

7.1 No Substitutions: Vendor shall supply only Desired Items submitted in response to the RFQ. Vendor shall not supply substitute items without Purchasing Division approval.

7.2 Vendor Supply: Vendor must carry sufficient inventory of the Desired Items being offered to fulfill its obligations under this Contract. By signing its bid, Vendor certifies that it can supply the Desired Items contained in its bid response.

7.3 Reports: Vendor shall provide quarterly reports and annual summaries to the Agency showing the Agency's items purchased, quantities of items purchased, and total dollar value of the items purchased. Vendor shall also provide reports, upon request, showing the items purchased during the term of this Contract, the quantity purchased for each of those items, and the total value of purchases for each of those items. Failure to supply such reports may be grounds for cancellation of this Contract.

- 7.4 Contract Manager:** During its performance of this Contract, Vendor must designate and maintain a primary contract manager responsible for overseeing Vendor's responsibilities under this Contract. The Contract manager must be available during normal business hours to address any customer service or other issues related to this Contract.

Exhibit A

**West Virginia Minimum Requirements for Design and Equipment of School
Buses (Title 126 Legislative Rule), 2007 Revision**

126CSR89

**TITLE 126
LEGISLATIVE RULE
BOARD OF EDUCATION**

**SERIES 89
WEST VIRGINIA MINIMUM REQUIREMENTS FOR DESIGN
AND EQUIPMENT OF SCHOOL BUSES (4334)**

§126-89-1. General.

1.1. Scope. -- This legislative rule provides that the components and construction of school buses be reviewed and updated periodically.

1.2. Authority. -- West Virginia Constitution, Article XII, §§2 and W. Va. Code 18-2-5 and 18-5-13.

1.3. Filing Date. -- September 14, 2007.

1.4. Effective Date. -- October 15, 2007.

1.5. Repeal of former rules. -- This legislative rule amends West Virginia 126CSR89, West Virginia Board of Education Policy 4334, "West Virginia Minimum Requirements for Design and Equipment of School Buses," filed February 9, 2006 and effective March 13, 2006.

§126-89-2. Incorporation by Reference.

2.1. A copy of the West Virginia Minimum Requirements for Design and Equipment of School Buses is attached. Copies may be obtained in the Office of the Secretary of State and in the West Virginia Department of Education, Division of Administrative Services.

2.2. Summary of rules and regulations.

2.2.1. The West Virginia Board of Education has responsibility to establish West Virginia Minimum Requirements for Design and Equipment of School Buses for the transportation of pupils in compliance with Chapter 18, Article 5, Section 13, Subsection 6, of the West Virginia Code. The West Virginia Department of Education endeavors to carefully consider the selection of components and construction procedures which contribute to the

safety, welfare and comfort of those being transported. The school buses are designed and equipped to extend educational opportunities to nearly all segments of society.

2.2.2. Student transportation is an integral part of a comprehensive educational program and a very significant part of the challenge to provide a thorough and efficient system of education.

2.2.3. The revision of the West Virginia Minimum Requirements for Design and Equipment of School Buses updates and makes corrections, deletions or additions to meet or exceed current federal highway safety standards and national standards for school buses.

§126-89-3. Severability.

3.1. If any provision of this rule or application thereof to any person or circumstance is held invalid, such invalidity shall not affect other provisions or applications of this rule.

MINIMUM REQUIREMENTS FOR DESIGN AND EQUIPMENT OF SCHOOL BUSES**2007 REVISED EDITION**

NOTE: Equivalency - Permission to use a device or material as an "equivalent" to that called for in the "requirements" must be requested in writing by the manufacturer or owner. Any item supplied as an "equivalent" must have prior approval, in writing, from the State Executive Director of School Transportation.

New Products - During the first year of production, new products will be subjected to the experimental and field test evaluation procedures with written evaluation provided to the State Executive Director of School Transportation.

Changes - Any changes in design or equipment by counties after receipt of the school bus must have prior approval in writing from the State Executive Director of School Transportation.

SCHOOL BUS CHASSIS**AIR CLEANER**

The engine intake air cleaner shall be dry element type and properly installed by the chassis manufacturer to meet engine specifications. Diesel chassis manufacturer shall provide air restriction indicator device. EXCEPTION: Type AI, D and B vehicles under 35 passengers, Type D vehicles with engine in rear are required to have an air restriction indicator mounted in the engine compartment, clearly visible from the rear of the bus.

AXLES

- A. The front and rear axles including suspension assemblies, and all frame to ground components, shall have a gross axle weight rating at ground at least equal to that portion of the load as would be imposed by the chassis manufacturer's maximum gross vehicle weight rating. In no case shall capacities be less than those listed below:

126CSR89

MINIMUM GROSS AXLE WEIGHT RATING

TYPE	PUPIL CAPACITY	FRONT GAWR SUSPENSION/AXLE	REAR GAWR SUSPENSION/AXLE
	Mfg. Rated	Or Other Front Suspension	Or Other Rear Suspension
AI, D	10-16	3,400	5,300
	17-24	3,850	7,000
B	16-23	4,000	7,900
	24-34	4,500	11,000
	35-36	5,000	12,000
	47-53	6,000	15,000
	59-60	7,000	17,000
	65-66	9,000	17,000
	71-76	9,000	19,000
	77	9,000	21,000
AI+C	16-23	4,000	7,900
	24-34	4,500	11,000
	35-36	5,000	12,000
	47-53	6,000	15,000
	59-60	7,000	17,000
	65-66	9,000	17,000
	71-76	9,000	19,000
	77	9,000	21,000
Transit (Front Engine)			
	47-54	12,000	15,000
	59-65	12,000	17,000
	71-72	12,000	19,000
	77-78	13,000	19,000
	83-90	13,000	21,000
Transit (Rear Engine)			
	47-54	9,000	19,000
	59-65	9,000	19,000
	71-72	9,000	22,000
	77-78	10,000	22,000
	83-90	12,000	22,000

B. All vehicles shall be equipped with appropriate GAWR axles or suspension systems and tires by chassis manufacturer.

C. Front axle shall be heavy duty bus type and equipped with oil bath (synthetic lubricant) wheel bearings. EXCEPTION: Type A buses.

BRAKES

- A. A braking system including service brake and parking brake shall be provided.
- B. Buses using an air-operated braking system shall be equipped with warning signals, readily audible and visible to the operator that will give a continuous warning when the air pressure available in the system for braking is 60 psi (pounds per square inch) or less. An illuminated gauge that will indicate to the operator the air pressure in pounds per square inch or the inches of mercury vacuum available for the operation of the brakes shall be provided. ABS automatic traction control system should be standard on units with air brakes.
 - 1. Air brakes shall be installed on all chassis, 35 passengers and above. EXCEPTION: Electric Powered Vehicle.
 - 2. All air-operated brake systems shall:
 - a. Have S-Cam type on all wheels incorporating long stroke brake chamber.
 - b. Use the same brand of automatic slack adjuster on all four wheels.
 - c. Have at least 12 CFM air compressor.
 - d. Be protected by a desiccant type air dryer, with a spin-on replaceable filter.
 - e. Be equipped with an engine brake. A manual control, clearly identified, shall be within easy reach of the operator, in addition to a modulated control through the brake treadle valve. A parking brake interlocking valve shall be used on all C and D school buses. This valve is to cause the brake to remain engaged until released by the driver pressing the foot brake pedal and disengaging the parking brake valve at the same time.
 - f. Have at least 7" X 16 ½" brake blocks.
 - 3. Any brake system dry reservoir shall be safeguarded by a check valve or equivalent device that in the event of failure or leakage in its connection to the source of compressed air or vacuum, the stored dry air or vacuum shall not be depleted by the leakage or failure.
- C. Buses using a hydraulic assist-booster in the operation of the brake system shall:
 - 1. be equipped with warning signals, readily audible and visible to the operator, that will provide continuous warning in the event of a loss of fluid flow from the primary source, or loss of electric source powering the back-up system.
 - 2. be equipped with source of hydraulic pressure, automatically initiated upon loss of power from primary source, and operating independently of the primary power source.
- D. All brake lines, power and booster-assist lines shall be protected from excessive heat and vibration, and be installed to prevent chafing.

126CSR89

- E. All brake systems shall be designed to permit visual inspection of brake lining wear without removal of any chassis components.
- F. Disc type brakes installed by chassis manufacturers are permissible.
- G. Exhaust and engine brakes, and retarders are an approved option for Type C and D school buses. Installation must be made by, or under the supervision of the vehicle manufacturer.
- H. When antilock brakes are used, a four channel system must be installed.

BRAKE, PARKING

Parking brake, when applied, shall remain in applied position despite exhaustion of source of energy used for application or leakage of any kind.

BUMPERS

All bumpers are to comply with National Congress on School Transportation Specifications.

CERTIFICATION

Chassis manufacturer shall certify to the State Executive Director of School Transportation that product meets all applicable federal requirements. Chassis seller shall certify to the State Executive Director of School Transportation that product meets all state requirements.

COLOR

- A. Chassis, including front bumper, shall be black. (Grille may be manufacturer's standard.)
- B. Hood, cowl, and fenders shall be National School Bus Glossy Yellow. (SBMI-008)
EXCEPTION: Hood may be painted low-luster yellow.

DIFFERENTIAL

- A. Manufacturer's traction control device is permissible. An operator controlled traction differential may be supplied on rear axles of 19,000 pound capacity or greater.
- B. Purchaser shall specify differential ratios when order is submitted to chassis dealer.
- C. Speed will not exceed 70 miles per hour.

DRIVE SHAFT

- A. Torque capacity of the drive shaft assembly shall exceed maximum engine torque as developed through lowest transmission gear reduction.
- B. Each drive shaft section shall be protected by a metal guard or guards around circumference of

drive shaft to prevent whipping through the floor or dropping to the ground if broken.

ELECTRICAL SYSTEM

A. Battery

1. Diesel Power: Three Group 31 batteries with minimum of 1950 CCA total or two Group 8D-900 with 430 reserve minutes measured per SAE 2-537H at 24 ampere rate. Two Group 8D-900 batteries are optional. EXCEPTION: Type B vehicles under 35 passengers shall have a dual battery system of a minimum of 500-CCA per each battery.
2. Battery cables of sufficient length without splices shall be provided by the chassis manufacturer.
 - a. All cables shall conform to SAE Standard J541 with respect to electrical resistance.
 - b. All cable assemblies shall conform to American Trucking Association-Truck Maintenance Council (ATA-TMC) RP105.
 - c. Manufacturer shall assure continuous ground integrity.
3. Batteries for Type B, C and D vehicles shall be mounted in the body skirt by the body manufacturer. In this case the chassis manufacturer shall temporarily mount the battery on the chassis frame, with proper cables of appropriate length for mounting in final location by body manufacturer. All cables, mounting, etc., shall conform to the SBMI Design Objectives Booklet, May 1990 edition. Body manufacturer will be responsible for final cable and connections between batteries. Buses shall be equipped with a body battery disconnect switch to allow the electrical source on the bus body to be turned off in case of an electrical short and when bus is not in use. EXCEPTION: Type D vehicles, rear engine, may have batteries mounted in engine compartment.
4. All batteries will be utilized during engine starting.

B. Alternator

1. Type AI and II below 35 passenger vehicles shall have a minimum 100 amperes hot rated per hour alternator. On buses equipped with power lift, alternator minimum shall be 100 amperes. Minimum charging rate at manufacturer's recommended engine idle speed shall be 45% of alternator capacity.
2. Type B vehicles less than 35 passengers, shall have a minimum 105 amperes hot rated per hour alternator with a minimum charging rate of 50 amperes at manufacturer's recommended engine idle speed.
3. All Type AI, B, C and D vehicles 35 passengers and above shall have an alternator with a minimum charging rate of at least 185 amperes (A/C and lift buses 200 amperes) hot rated (in accordance with SAE rating) with a minimum charging rate of 50 amperes at manufacturer's recommended engine idle speed (12 volt system), and shall be ventilated and voltage controlled and, if necessary, current-controlled. Alternator shall be mounted on a bracket that

126CSR89

conforms to ATA-TMC RP101, heavy duty truck alternator mounting and be accessible from top side of engine compartment for servicing.

4. Belt drive shall be capable of handling the rated capacity of the alternator with no detrimental effect on other driven components.
5. For estimated electrical current draw see Appendix B.

C. Lamps and Signals - See pages 26-29.

1. USA daytime running lamps are required and will not be activated until engine is started and/or parking brake is released.
2. Lamps and signals will not operate with the ignition key in the accessory position.

D. Wiring

1. All wiring shall conform to current applicable recommended practices of the Society of Automotive Engineers, with the capability of carrying a 10% overload without damage to wiring circuits. All wiring shall use a standard color coding and each chassis shall be delivered with a wiring diagram that coincides with the wiring of the chassis.
2. Chassis manufacturer shall install a readily accessible terminal so that body and chassis electrical load can be recorded through the chassis ampmeter without dismantling or disassembling chassis component(s).
3. Chassis voltmeter and wiring shall be compatible with generating capacity. Type AI, D and B vehicles under 35 passengers may have ammeter in lieu of voltmeter.
4. In addition to the main 100 amperes body circuit terminal, chassis manufacturer shall provide the following terminals for body connections:
 - a. Tail lamps.
 - b. Right turn signal.
 - c. Left turn signal.
 - d. Stop lamps.
 - e. Back-up lamps.
 - f. Instrument panel lamps. (Rheostat controlled)
 - g. Ignition circuit.

EXHAUST SYSTEM

- A. Exhaust pipe, muffler and tailpipe shall be outside the bus body and attached to the chassis, with

hangers designed to accommodate expansion and contraction of the system without damage to the system or hanger(s).

- B. Tailpipe shall be constructed of a corrosion-resistant tubing material at least equal in strength and durability to 16 gauge steel tubing.
- C. Tailpipe shall extend no more than 1" (one inch) beyond bumper.

Type A Vehicles,	Manufacturer's standard
------------------	-------------------------

Type B Vehicles (under 35 passengers) and Type D Rear Engine Vehicles	Manufacturer's standard
--	-------------------------

Type AI and B Vehicles 35 passengers and above, and Type C and D (FE) Vehicles (47 passengers and up)	Manufacturer's standard
---	-------------------------

EXCEPTION: The exhaust system on vehicles designed for the transportation of special education pupils shall be routed to the left of the right frame rail to allow for the installation of a lift on the right side of the vehicle. Federal standards may be met by exhaust exiting at the rear of bus to allow for luggage compartments.

- D. Size of tailpipe shall not be reduced after it leaves the muffler.
- E. Muffler shall be constructed of aluminized or equivalent corrosion-resistant material.

FENDERS, FRONT

- A. Type A and B vehicles shall be manufacturer's standard.
- B. Type C vehicles.
 - 1. Rubber fender extenders shall be provided unless fender design prevents spray from tires to the windshield and mirrors and deletion is approved by the State Executive Director of School Transportation.
 - 2. Front fenders shall be properly braced and free from any body attachment. Adequate clearance shall be maintained between tires and fenders so that contact will not occur under any condition.
 - 3. A fiberglass tilt hood shall be provided with wiring quick-disconnect in engine compartment, located at or near the radiator cradle. All electrical wiring between the fiberglass hood and the engine compartment shall pass through waterproof disconnect device(s) to facilitate removal and/or replacement of the hood.
 - 4. Mud flaps shall be furnished by body manufacturer.
 - 5. Fender/bumper design must prevent direct road spray between fender and front bumper, or a flap must be installed to prevent such spray.

126CSR89

FRAME

- A. Frame or equivalent shall have design and strength characteristics to correspond at least to standard practice for trucks of same general load characteristics which are used for highway service.
- B. Any secondary manufacturer that modifies the original chassis frame shall guarantee the performance of workmanship and materials resulting from such modification.
- C. Any frame modification shall not be for the purpose of extending the wheelbase.
- D. Holes in top or bottom flanges of frame side rail shall not be permitted except as provided in original chassis frame. There shall be no welding to frame side rails except by chassis or body manufacturers.
- E. Frame lengths shall be provided in accordance with SBMI Design Objectives, May 1990 edition.
- F. Frame rails less than 50,000 PSI must be reinforced to prevent cracking. EXCEPTION: Type AI and D vehicles.

FUEL TANK

- A. Fuel tank shall have a minimum capacity of 60 gallons with a 55 gallon actual draw, on all buses 47 passengers and above. It shall be filled and vented outside of the body. Construction will prevent the spillage or drainage of fuel on any part of the exhaust system. EXCEPTION: Type A vehicles - Fuel tank shall be manufacturer's standard. Type B vehicles under 35 passengers - Fuel tank shall be not less than 30 gallon, with 25 gallon actual draw. Otherwise shall meet requirements of Type C and D vehicles.
- B. No portion of the fuel system located to the rear of the engine compartment, except the filler tube, shall extend above the top of the chassis frame rail. EXCEPTION: Type A and B vehicles under 35 passengers.
- C. Fuel lines shall be mounted to obtain maximum protection from the chassis frame. Engine supply line shall be taken from top of tank.
- D. Fuel filter with replaceable element shall be installed between fuel tank and injector pump. Flexible gasoline-and-oil-proof connection shall be provided at engine end of fuel line.
- E. Drain plug of at least 1/4" pipe thread shall be located in center of bottom of tank. EXCEPTION: Type A and B vehicles under 35 passengers.
- F. Fill-pipe cap shall be designed to minimize spillage of fuel when bus turns corner in either direction. If venting of fuel tank is done other than through fill-pipe cap, cap shall be of non-vented type. (See provision for fuel systems in current Motor Carrier Safety Regulations.)
- G. Fuel tank installation shall be in accordance with Federal Motor Vehicle Safety Standards, (hereafter FMVSS) 301 and 303. EXCEPTION: On vehicles constructed with a power lift, the

fuel tank may be mounted on left chassis frame rail or behind rear wheel.

- H. A port shall be provided in the fuel tank for auxiliary equipment.

FUEL, ALTERNATE

- A. Alternate fuels are permissible provided they have been adequately tested for installation and use, both in the vehicle and in storage facilities, and meet all federal, state and industry safety requirements, regulations and standards.
- B. Compressed Natural Gas (CNG) - See Appendix C.
- C. Fuel - Bio Diesel (B5) meeting ASTM D6751 specifications.

GOVERNOR

- A. Chassis engine shall be provided with an Engine RPM Governor. EXCEPTION: Type A and B vehicles under 35 passengers.
- B. If chassis is powered by diesel engine, or engine is remotely located from operator, a tachometer shall be installed so engine speed may be known to the operator. EXCEPTION: Type A and B vehicles under 35 passengers.

HEATING SYSTEM, PROVISION FOR

- A. The chassis engine shall have plugged openings for the purpose of supplying hot water for the bus heater system. The opening shall be suitable for attaching 3/4" pipe thread/hose connector. The engine shall be capable of supplying water having a temperature of at least 170 degrees F, at a flow rate of 50 pounds per minute at the return end of 30 feet of one inch diameter automotive hot water heater hose. (SBMI Standard #001 - Standard Code for Testing and Rating Automotive Bus Hot Water Heating Ventilating Equipment.) EXCEPTION: Type AI and II vehicles.
- B. SAE 20R3 - Class D2 hose shall be used throughout the bus heating systems. Engine cooling system hose shall meet applicable SAE Standard.
- C. Chassis manufacturers shall supply "heater bibb" connection for bus body supply and return lines. Connection will accept one inch inside diameter hose.
- D. Chassis manufacturers shall supply clear firewall bulkhead area to insure body manufacturer's ability to comply with this section.

126CSR89

HORN(S)

- A. Bus shall be equipped with dual horns of standard make, capable of producing complex sound in bands of audio frequencies between 250 and 2000 cycles per second with a sound level of 110 db at three feet, per SAE Standard J-377. (Measurement shall be made with meter set at flat response - C weighting.)
- B. Air horns are permissible.
- C. Optional covers should be utilized to keep moisture out of horns.

INSTRUMENTS AND INSTRUMENT PANEL

- A. Lamps in lieu of gauges are not acceptable. Chassis shall be equipped with the following instruments and gauges:
 - 1. Speedometer.
 - 2. Odometer or trip meter which will give accrued mileage including tenths of miles.
 - 3. Voltmeter with graduated scale to 16 volts. EXCEPTION: Ammeter may be substituted on Type AI, D and B vehicles under 35 passengers.
 - 4. Oil pressure gauge with red warning lamp to warn of low pressure. If equipped with low oil pressure warning buzzer, the buzzer shall only be activated when ignition switch is in "ON" position.
 - 5. Water temperature gauge, with red warning lamp to indicate overheating.
 - 6. Fuel gauge.
 - 7. Upper beam head lamp indicator.
 - 8. Brake indicator gauge (air). Lamp indicator in lieu of gauge is permissible on vehicles equipped with hydraulic-assist power brake.
 - 9. Turn signal indicator.
 - 10. Automatic transmission temperature gauge. EXCEPTION: Type AI, D and B vehicles under 35 passengers.
 - 11. Tachometer. EXCEPTION: Type AI, D and B vehicles under 35 passengers.
 - 12. Glow plug indicator lamp where appropriate.
- B. All instruments shall be easily accessible for maintenance and repair.
- C. Instruments and gauges shall be mounted on instrument panel clearly visible to operator while in normal seated position.

- D. Instrument panel shall have lamps of sufficient candlepower to illuminate all instruments and gauges, and shift selector indicator for automatic transmission.
- E. Radiator shall be so equipped as to provide a visual fluid level inspection without removal of the radiator cap. The fluid level indicator must be positioned as to afford easy visibility from ground level.

OIL FILTER

Oil filter or replaceable element or cartridge type shall be provided, and shall be connected by flexible oil lines if it is not of built-in or engine-mounted design. Oil filter shall have a capacity of approximately one quart.

OPENINGS

All openings in floorboard or fire wall between chassis and passenger carrying compartment, such as gear shift lever and parking brake lever, shall be sealed.

PASSENGER LOAD

- A. GVW is the sum of the chassis weight, plus the body weight, plus the operator's weight, plus total seated pupil weight.
 - 1. For purposes of calculation, the operator's weight is 150 pounds.
 - 2. For purposes of calculation, the pupil's weight is 120 pounds.
- B. Actual GVW shall not exceed the chassis manufacturer's gross vehicle weight rating (GVWR) for the chassis.

POWER AND GRADEABILITY

- A. Gross vehicle weight (GVW) shall not exceed 185 pounds per certified net published horsepower of the engine at the manufacturer's recommended maximum number of revolutions per minute.

The following chart presents the minimum horsepower and/or torque requirements for engines to be used in chassis accommodating bus bodies of the respective capacities.

126CSR89

DIESEL POWER

Passenger Capacity	Minimum Gross Horsepower/Torque
Under 35	130 HP/420
35 - 46	175HP/520
47 - 64	190HP/520
65 - 77	210HP/520
78 - 83	225HP/620
84 - 90	245HP/620

1. All Type AI and B vehicles, 35 passengers and above, and Type C and D vehicles shall be equipped with positive locking hand throttle, or a fast idle control device.
2. All engines shall be equipped with an automatic engine cooling fan. Automatic shutters may be used and coordinated to cycle properly with automatic fan.
3. An engine block heater of 1000 watts minimum shall be provided. A recessed and covered receptacle for the block heater shall be mounted in the front bumper. EXCEPTION: Type AI, D and B vehicles under 35 passengers, manufacturer's standard. Type D vehicles, rear engine - receptacle shall be located in the rear. Type D vehicles, front engine - receptacle may be mounted to the bus body in front of the service door.
4. Electrical key shut down shall be required.
5. An original equipment, manufacturer's installed closed combustion fuel fired heater is permissible in lieu of a block heater if approved by an independent certified testing laboratory and with approval of the State Executive Director of School Transportation.
6. Warranty for the engine shall be 5 years/100,000 miles. All available warranty information must be provided to the purchaser.
7. Noise acoustical abatement package is recommended. EXCEPTION: Rear engine vehicles.

SHOCK ABSORBERS

Buses shall be equipped with front and rear double-action shock absorbers compatible with manufacturer's rated axle capacity, at each wheel location.

SPRINGS/SUSPENSION

- A. Air suspension systems are standard on rear axle only. EXCEPTION: Type AI, D and B vehicles under 35 passengers, unless offered by chassis manufacturer.
- B. Capacity of springs or suspension assemblies shall be equal to or exceed axle rating, except when otherwise specified in bid invitation.
- C. Rear springs are permissible; they shall be of progressive type.
- D. If leaf-type springs are used, stationary eyes shall be protected by full wrapper leaf.
- E. Wrapper leaves on rear springs are permissible.
- F. Clearance between springs and tire, and between tires, shall provide ample space for use of triple side dual chains.

STEERING GEAR

- A. All chassis shall be equipped with heavy duty power steering of integral type with integral valves. Design shall provide a means of lubrication for all wear points, if wear points are not permanently lubricated.
- B. Steering mechanism shall provide for easy adjustment for lost motion.
- C. No changes shall be made in steering apparatus which are not approved by chassis manufacturer.
- D. There shall be clearance of at least 2" between steering wheel and cowl instrument panel, windshield, or any other surface.
- E. All chassis accommodating 35 passenger bodies and above shall be equipped with a tilt steering wheel having a minimum diameter of eighteen (18) inches.

TIRES AND RIMS

- A. Standard profile tubeless tires and rims of proper size with load ratings that equal or exceed axle ratings in these requirements shall be provided. In no case shall the tire and rim sizes be less than those shown in the following:

STANDARD PROFILE TIRES

<u>PASSENGER CAPACITY</u>		<u>SIZE</u>	<u>LOAD RANGE (PLY)</u>	<u>RIM SIZE</u>
Type AI	16 - 34	225 x 75R16	D(8)	6.00
Type B	16 - 34	8 x R19.5	D(8)	6.00

126CSR89

Type AI and B & C	35 - 54	9 x R22.5	F(12)	6.75
	55 - 60	10 x R22.5	G(14)	7.50
	61 - 77	11 x R22.5	G(14)	8.25
Type D	47 - 60	10 x R22.5	G(14)	7.50
	61 - 89	11 x R22.5	G(14)	8.25
	90- up	11 x R22.5	H(16)	8.25

B. Low profile tubeless radial tires are permissible as an option. In no case shall the tire and rim sizes be less than those shown in the following:

LOW PROFILE TIRES

<u>PASSENGER CAPACITY</u>		<u>SIZE</u>	<u>LOAD RANGE (PLY)</u> <u>SIZE</u>	<u>RIM</u> <u>SIZE</u>
Type AI	16 - 34	LT 215/85R16	D(8)	6.00
Type B	16 - 34	225/70R19.5	F(12)	6.00
Type AI & B & C	35 - 66	255/70R22.5 265/75R22.5	H(16)	7.50
	67 Up	275/80R22.5 295/75R22.5	G(14)	8.25
Type D	47-54	275/80R22.5 295/75R22.5	G(14)	8.25
	59-72	275/80R22.5 295/75R22.5	G(14)	8.25
	77-90	275/80R22.5 295/75R22.5	H(16)	8.25

C. Dual rear tires shall be provided.

D. First line steel belted radial tires are required.

E. Mud and snow tires on rear axle are permissible.

F. Hub piloted wheels are standard. Stud piloted disk wheels are optional.

TOW HOOKS

Front tow hooks shall be installed by chassis manufacturer and shall be at least 200 degrees spiral, have a minimum inside diameter of 2 2 inches and mounted parallel to bus frame rail. EXCEPTION: Type B vehicles under 35 passengers.

TRANSMISSION

- A. Automatic transmissions shall be equivalent to either the Allison 2500 PTS—5 or 6 speed for buses of 35 to 76 passenger capacity inclusive or the 3000 PTS -5 or 6 speed for buses of 77 to 90 passenger capacity. Minimum fluid requirements for the automatic transmission 35 passenger and above is to be Transynd or TES 295 approved fluids synthetic fluids. Warranty for the transmission should be 5 yrs / unlimited mileage
- B. A retarder, integrated within an automatic transmission, is permissible.

TURNING RADIUS

- A. Chassis with a wheelbase of 264" or less shall have a right and left turning radius of not more than 42 2 feet, curb to curb measurement.
- B. Chassis with a wheelbase of 265" or more shall have a right and left turning radius of not more than 44 2 feet, curb to curb measurement.

UNDERCOATING

Chassis manufacturer shall coat undersides of all metal components with rust-proofing compound which meets or exceeds U. S. Department of Defense Specification MIL-C-62218A, using modified test procedures as defined under "Undercoating" of body requirements.

WEIGHT DISTRIBUTION

Weight distribution of fully loaded bus on level surface shall not exceed the manufacturer's gross axle weight rating on any axle.

APPROXIMATE WEIGHTS OF SCHOOL BUSES *

PASSENGER CAPACITY WEIGHT	CURB WEIGHT	LOADED
35/36	11,480 pounds	15,830 pounds
47/48	12,875 pounds	18,665 pounds
53/54	13,570 pounds	20,080 pounds
59/60	14,905 pounds	22,135 pounds
65/66	15,755 pounds	23,705 pounds
71/72 - Type C	16,475 pounds	25,145 pounds

126CSR89

71/72 - Type D	19,794 pounds	28,584 pounds
77/78 - Type C	17,483 pounds	26,843 pounds
77/78 - Type D	20,569 pounds	30,077 pounds
83/84	21,379 pounds	31,609 pounds
89/90	21,379 pounds	32,329 pounds

* Information for West Virginia bridge and road restrictions.

SCHOOL BUS BODY**AISLE**

- A. Minimum clearance of all aisles shall be 12".
- B. The seat backs shall be slanted sufficiently to give aisle clearance of 15" at tops of seat backs.

BATTERY

- A. Battery/batteries shall be furnished by chassis manufacturer.
- B. When battery/batteries is/are mounted as described in Electrical System, 1, battery/batteries, of chassis requirements, the body manufacturer shall securely attach battery/batteries on a slide-out tray in a closed, vented compartment in the body skirt, whereby battery/batteries may be exposed to outside for convenient servicing. Cable length and routing, including travel of tray, shall permit the battery/batteries to slide completely outside of body limits for convenient removal and installation. Battery compartment door or cover shall be hinged at front or top, and secured by adequate and conveniently operated latch or fastener. (Battery tray shall have a safety stop to prevent dropping battery at outer extremity of tray travel.) Battery/batteries may be located in the engine compartment in rear engine buses. (When two Group D batteries are used, connecting cables shall permit either or both battery tray(s) to slide to the full "OUT" position without damage to, or disconnecting, cables. Body manufacturer shall be responsible for final cable and connections between batteries. A lock for the battery/batteries compartment door(s) is permissible. EXCEPTION: Type A.

BUMPERS

See page 5.

CEILING

See Insulation and Interior, pages 25-26.

CHAINS

- A. Automatic tire chains are permissible.
- B. See Wheel Housings, page 44-45.

CHILD REMINDER SYSTEM

Alarm device that requires the operator to walk to the rear of the bus and operate a deactivation device within 30 to 60 seconds or the bus horn will begin blowing. A pre-warning device and mechanics service feature shall be included.

COLOR

- A. The school bus body shall be painted uniform "National School Bus Glossy Yellow" in compliance with National Congress on School Transportation Specifications.
- B. Primer shall be 3/4 - 1 mil and 1 2 - 2 mils of yellow paint.
- C. Reflective material shall be installed on the bus. Material shall be automotive engineering grade or better, meeting initial reflectance values in FHA FP-85 and retaining at least 50% of those values for a minimum of six years. Reflective materials and markings shall include any or all of the following:
 - 1. "SCHOOL BUS" Signs: shall be marked with reflective National School Bus Glossy Yellow material comprising background for lettering of the front and rear "SCHOOL BUS" signs.
 - 2. Sides of bus body - shall be marked with reflective National School Bus Glossy Yellow material at least 1 3/4" but not more than 2" in width, extending the length of the bus body and located (vertically) as close as practicable to the floor line. Emergency window exits shall be marked with no greater than 1 3/4" in width strip of reflective National School Bus Glossy Yellow material. Top, bottom and each side shall be outlined.
 - 3. White colored roof areas are permissible.

CONSTRUCTION

- A. Construction shall be of prime commercial quality steel or other material with strength at least equivalent to all steel as certified by body manufacturer. Fiberglass or other composite materials are acceptable provided the construction meets all federal standards and the manufacturer certify the materials to be of durable construction.

- B. Construction shall provide reasonably dust proof and water-tight unit.
- C. Floor shall be of prime commercial quality steel of at least 14 gauge or other material equivalent in strength to 14 gauge steel. (Type AI, D, van conversion, manufacturer's standard.) Floor shall be covered with approximately 19/32" thickness plywood, at least five ply, and shall equal or exceed properties of exterior type pressed wood or marine grade plywood, C-D Grade, as specified in standard issued by Department of Commerce. (Commercial Standard CS45-60, Douglas Fir Plywood: A Recorded Voluntary Standard at the Trade as amended.) Floor shall be level from front to back and from side to side, except in wheel housing, toe board and operator's seat platform areas.
- D. All openings between chassis and passenger-carrying compartment made due to alterations by body manufacturer must be sealed. See Openings, page 16.
- E. Floor Covering, see pages 22.
- F. Construction shall meet the National School Transportation Specifications (NSTS) for the Side Intrusion Test.
- G. Bus body shall meet NSTS for the Colorado Rack Test.

DOORS

- A. Service Door
 - 1. Service door shall be under control of operator, and designed to afford easy release and prevent accidental opening. On Type A buses, when hand lever is used, no part shall come together to shear or crush fingers. A power operated service door is required on Type B, C, and D buses.
 - 2. Service door shall be located on right side of bus opposite operator and within direct view of operator.
 - 3. Service door shall have minimum horizontal opening of 24" and minimum vertical opening of 68". Type AII vehicles shall have a minimum opening area of 1200 square inches.
 - 4. Service door shall be an outward opening door equipped with a grab handle on the outside of the door. Type A vehicle does not require a grab handle.
 - 5. There shall be no door to left of the operator on Type C and D vehicles. Type AI and II and B vehicles under 35 passengers may be equipped with chassis manufacturer's standard door.
 - 6. All doors shall be equipped with padding at the top edge of each door opening. Pad shall be at least 3" wide and 1" thick and extend the full width of the door opening.
 - 7. Service door shall be equipped with a vandal lock. EXCEPTION: Type AI and II van cutaway with lockable operator side door.

B. Emergency Door

1. A vandal lock shall be installed on all emergency doors. It shall be wired into the ignition and/or starting circuit to prevent starting of the engine with the door locked.

ELECTRICAL SYSTEM

- A. Battery - See pages 6 and 7.
- B. Alternator - See pages 6 and 7.
- C. Lamps and Signals - See page 7.
- D. Wiring - See page 7.

EMERGENCY EXITS

- A. Body shall be equipped with roof safety hatches that combine the following functions in each unit:
 1. Multi-position, fresh air ventilation without static vents.
 2. Release handle(s) permitting operation as emergency exit(s), accessible inside and outside the vehicle.
- B. Each emergency exit shall comply with FMVSS 217 and NSTS .

FASTENING DEVICES

- A. Belt Cutter – Each bus shall be equipped with a durable webbing cutter having a full width handgrip and a protected, replaceable or non-corrodible blade. The required belt cutter shall be mounted in a location accessible to the seated driver in an easily detachable manner.

FIRE EXTINGUISHER

- A. Each bus shall be equipped with at least one pressurized, dry chemical-type fire extinguisher of total metal construction, refillable, securely mounted with spring steel friction fit bracket. A pressure gauge shall be mounted on the extinguisher to be easily read without removing the extinguisher from its mounted position.
- B. The fire extinguisher shall be of a type approved by the Underwriters Laboratories, Inc., with a total rating of not less than 2A-10-BC. The operating mechanism shall be sealed with a type of seal which will not interfere with use of the fire extinguisher.

FIRST AID KIT

A. Bus shall have a removable, moisture and dust proof first aid kit mounted in full view in an accessible place within the operator's compartment. This place shall be properly identified.

B. The minimum requirement is a 35 unit kit with contents as follows:

Bandage Compress, (sterile gauze pads) 4"	5 units
Bandage Compress, (sterile gauze pads) 2"	6 units
Adhesive Absorbent Bandage (adhesive tape) 1"	5 units
Triangular Bandage, 40"	4 units
Gauze Bandage, 4"	5 units
Absorbent-Gauze Compress	6 units
Wire Splints	1 unit
Non Latex Gloves	1 unit
Kindergarten Scissors	1 unit
Mouth-to-Mouth Airway (plastic breathing shield)	1 unit

C. Mounting bracket shall be able to sustain a 20 G force load in any direction except upward.

D. Body fluid clean-up kit.

1. Each bus shall carry a Grade A metal or rigid plastic kit, mounted in an accessible place and identified as a body fluid clean-up kit with a directions-for-use sheet attached to the inside cover.
2. The kit shall be moisture resistant.
3. Contents shall include but not be limited to the following items:
 - a. One pair non latex gloves.
 - b. One pick-up spatula or scoop.
 - c. One face mask.
 - d. Infectious liquid spill control powder.
 - e. Anti-microbial hand wipes - individually wrapped.
 - f. Germicidal disinfectant wipes tuberculocidal.
 - g. Plastic bag with tie.

FLOOR

See section on Construction.

FLOOR COVERING

- A. Floor covering shall be of high quality, heavy duty elastomeric material with a rating of self-extinguishing (a burn rate of 0.1 mm or less) when tested in accordance with FMVSS302, paragraph S4.3 (b) meeting current NSTP. Floor covering shall have a smooth back.
- B. Floor covering shall be permanently bonded to the sub -floor and must not blister, crack or grow with reasonable use and maintenance. Bonding of adhesive material shall be waterproof and shall be of type recommended by the manufacturer of floor covering material. All seams or joints in flooring shall be sealed with waterproof sealer.
- C. Floor covering, in the aisle area, shall be ribbed, non-skid type. Minimum overall thickness shall be 0.187".
- D. Floor covering for under seat area, top of wheel housing, operator's compartment and toeboard shall be smooth non-skid type and shall have a minimum thickness overall of 0.125". Covering shall be securely bonded to contour of wheel housing.
- E. Cove molding shall be used along side walls and rear corners. Metal or equivalent aisle joint strips shall be used to protect joints of flooring. However, painstaking care must be exercised to assure joints are properly fitted and sealed prior to fitting strips or molding to floor. Aisle strips shall be so shaped that the edges of same shall be drawn and held firmly to the flooring material. Welded seam one piece construction is permissible.
- F. Floor construction shall provide a properly sealed opening for access to fuel gauge sending unit and/or in-tank fuel pump for all buses 35 passenger and above.
- G. Floor covering shall not be black in color. EXCEPTION: Molded wheel housing covers.

FUEL PORT DOOR

- A. Body manufacturer shall furnish a fuel port door on vehicles 35 passengers and above, and Type C and D vehicles.
- B. All diesel powered vehicles shall have a fuel door labeled "ULSD fuel" within six inches of the door.
- C. Locking device for door optional.

HEATERS

- A. School bus heating systems shall meet the following performance standards:
 - 1. Provide evenly distributed heat throughout the bus body.
 - 2. Provide defrosting for windshield and entrance door.

126CSR89

3. A mid-body heater of 50K BTU for buses that carry 65 passengers and up with the exception of special buses used for handicapped passengers.
- B. Heaters shall have capabilities of providing evenly distributed heat creating a temperature rise to 50 degrees Fahrenheit inside body shell when soaked in ambient temperature of 0 degrees Fahrenheit for 15 hours.
 - C. All rear engine transit type bus bodies must be equipped with a heater booster pump. If a parallel system, booster pump shall be located in the return line.
 - D. Heater water flow shall be controlled by the installation of water shutoff valves in an accessible location under the hood. Water shutoff valves shall require approval by the Office of School Transportation. Valves shall have minimum unrestricted 3/4" internal port. Heater hose entrance through firewall or floor shall be through prior approved fittings. Chassis manufacturer must provide a clear area to facilitate body manufacturer's installation. EXCEPTION: Type A-II and D vehicles, located at or near the engine.
 - E. Each heater is to be independently controlled by a switch.
 - F. Hose between heaters shall be protected by metal raceway or conduit.
 - G. Heater performance shall be measured:
 1. Temperature measurement taken 39" inward from side walls 39" inward from windshield and rear door, and 36" above floor. Heat shall be evenly distributed through the aisle area.
 2. Temperature must rise to 50 degrees Fahrenheit inside (when soaked in ambient temperature of 0 degrees Fahrenheit for 15 hours) in 20 minutes when 170 degrees Fahrenheit hot water is applied at the rate of three gallons per minute at a maximum of six psi pressure.
 3. Maximum current flow for heaters including defrosters shall not exceed 45 amperes.
 - H. Heater cores installed in school buses shall meet the following standards:
 1. Static Pressure Test - 150 psi
 2. Cycle Test - 20-50 psi hydraulic surge pressure 450,000 cycles minimum.
 3. Core Flow Restriction - Total heater system flow restriction shall be measured at a flow rate of three (3) gallons/minute at a maximum of six (6) psi pressure when measuring heater performance.
 - I. Defrosters - shall be included in the total electrical load for heaters and meet the following criteria:
 1. Shall be able to defrost total windshield area in a reasonable period of time under all normal driving conditions.
 2. Shall be directional to provide operator capability of defrosting in drive view area first.
 3. Shall provide means of defrosting service door glass independent of windshield.
 4. Defroster system shall have capability of mixing minimum 50% outside fresh air with

defrosting air.

5. Defroster system shall meet SAE Standard J381-J382 performance requirement.
6. At least one auxiliary fan, six inches in diameter shall be installed, suspended from above on the driver's side of the windshield., and can be adjusted for maximum effectiveness. The fan blade shall be covered with a protective cage. Each fan shall be controlled by a separate switch.
7. Auxiliary fans are not to be considered as part of the primary defrosting and defogging system

NOTE: All manufacturers shall demonstrate the capabilities of their heating and defrosting system at the time of pilot model inspection and by certified letter to the State Executive Director of School Transportation.

J. Heater Lines and Hose

1. Heater lines (pipe) shall be a minimum of 3/4" inside diameter.
2. All hose must be 1". EXCEPTION: Type AI & II vehicles.
3. Hose clamps shall be constant tension type clamp.
4. Hose shall be adequately supported to guard against excessive wear due to vibration.
5. Hose shall not dangle or rub against sharp edges, nor interfere with or restrict the operation of any engine function.
6. All hose shall conform to SAE 20R3 - Class D2.
7. Heater cores and lines on the interior of bus shall be shielded to prevent scalding of passengers.
8. Any heater line or hose routed outside of bus body shall be insulated for the entire length of hose exposed to outside temperature.

K. There shall be a water flow regulating valve installed for convenient operation by the operator. EXCEPTION: Type AI and II and D vehicles - located at or near the engine.

L. An accessible service entrance to heaters shall be provided by an outside removable body panel or removable heater cover. Type C vehicles shall provide access to heater components on operator's side through outside access panel, if not readily accessible from interior of bus.

M. Each heater shall be attached to a separate circuit breaker or an FET.

HEIGHT, INSIDE

Inside body height shall be 72" or more, measured from the finished floor to the ceiling at any point on longitudinal center line from front vertical to rear vertical bow. Inside body height of Type AII vehicles shall be 62" or more.

HORN(S)

126CSR89

- A. If air horns are used, they shall be mounted above operator's window or under the floor on left side of bus.
- B. All buses shall be equipped with audible electrical warning device, automatically actuated when bus is in reverse gear. Device shall be of 112db, meeting SAE-J99. Device shall be mounted behind rear axle, between frame rails, and shall emit intermittent sound. Variable sound is permitted.

IDENTIFICATION

- A. Body shall bear words "SCHOOL BUS" in black letters at least 8" high on both front and rear of body. Lettering shall be placed as high as possible without impairment of its visibility. Lettering shall conform to "Series B" of Standard Alphabet for Highway Signs. Decals or vinyl lettering are permissible. "SCHOOL BUS" signs shall be marked with reflective National School Bus Glossy Yellow comprising background for lettering of the front and/or rear "SCHOOL BUS" signs.
- B. Every bus shall be lettered "..... COUNTY SCHOOLS", on both sides of bus, and numbered on both sides and rear. Numbers on both sides shall be near front, in line with lettering. Lettering and numbering on sides of bus shall be at least 6" high. Decals or vinyl lettering are permissible.
- C. The number of the bus shall be 5" in height, in white or yellow, displayed on either the front bumper or the crossing arm.

INSULATION

- A. Ceiling, walls, and bulkhead or bow cavities shall be fully insulated with proper material applied inside of outside panels by spray to deaden the sound.
- B. Ceiling and walls shall be fully insulated with a thermal insulation that is fire resistant, UL approved, with a minimum R-value of 5.5. Insulation shall be installed so as to prevent sagging.
- C. Additional interior noise abatement /acoustical package are permissible over and above.

INTERIOR

- A. Interior of bus shall be free of all unnecessary projections likely to cause injury. This requires inner lining on ceilings and walls. If ceiling is constructed so as to contain lapped joints, forward panel shall be lapped by rear panel and exposed edges shall be beaded, hemmed, flanged, or otherwise treated to minimize sharp edges.
- B. Cowl shall not be modified, or accessories installed, to interfere with operator's visibility of gauges on instrument panel.
- C. Flammability of interior materials shall meet FMVSS 302.
- D. Interior color of seats, panels, head bumpers, and floor covering shall not be black.

- E. Every school bus shall be constructed so that the noise level taken at the ear of the occupant nearest to the primary vehicle noise source shall not exceed 85 dBA when tested according to the procedure found in the Noise Test Procedure - National Minimum Requirements.
- F. Full length acoustical ceiling shall be provided.

LAMPS AND SIGNALS

- A. All lamps, including installation shall conform to current standards and recommendations of SAE, West Virginia Motor Vehicle Law and FMVSS 108. Light emitting diodes (LED) lamps and Lexan lens lamps are permissible.

- B. Head Lamps

USA Daytime Running Lamps will not activate until the engine is started. Head and tail lamps shall be combined on a single circuit, served by a separate circuit breaker or field effect transistors, (hereafter FET). There shall be no other electrical load added to the head lamp circuit.

- C. Clearance and Side-Marker Lamps

Clearance, side-marker, and identification lamps shall be protected or flush mounted and combined in a circuit controlled by the same switch.

- D. Tail and Stop (Brake) Lamps

Manufacturer standard.

- E. Back-Up Lamps

Must meet FMVSS number 108.

- F. Interior Lamps

1. Interior lamps shall include two rows of dome lamps installed on two circuits so that lamps in front half and lamps in rear half of bus is on separate circuits.
2. A stepwell light which adequately illuminates stepwell shall be provided. It shall be connected in the clearance lamp circuit and activated when the service door is opened.

- G. School Bus Alternately Flashing Signal Lamps

- a. The bus shall be equipped with two red lamps at the rear of the vehicle and two red lamps at the front of the vehicle, in addition to the four red lamps, four amber lamps shall be installed, so that 1 amber lamp is located near each red signal lamp the same level but closer to the vertical centerline of the bus. The system of red and amber signal lamps shall be wired so that amber lamps are energized manually. The red lamps are automatically energized and amber lamps are automatically de-energized when stop signal arms are extended or when the bus entrance door is opened. An amber pilot lamp and a red pilot lamp shall be installed adjacent to the driver controls for the flashing signal lamp to indicate to the driver which

126CSR89

lamp system is activated.

- b. Red lamps shall flash any time stop signal arm is extended.
- c. All flashers for alternately flashing red and amber signal lamps shall be enclosed in the body of a readily accessible location.
 1. Each school bus shall be equipped with a system consisting of four red signal lamps designed to conform to SAE Standard J887, and four amber signal lamps designed to that standard except for color, and except that their candlepower shall be at least 2 2 times that specified for red signal lamps. This system, stop arm, and crossing arm shall be wired through a master switch, but NOT through vehicle ignition switch.
 2. Shields over lamps, painted black are permitted.
 3. The system shall be wired so that the amber signal lamps are activated only by hand operation and, if activated, are automatically deactivated, and red signal lamps are automatically activated when the bus entrance door is opened.
 4. There shall be an indicator lamp which shall go on when the respective amber or red systems are actuated. The pilot lamp shall either go out or flash at an altered rate in the event the system is not functioning normally.
 5. Signal lamp system shall operate as follows:
 - a. With master switch on, entrance door closed, depress hand switch. Red pilot lamp and amber signals shall go on.
 - b. Open entrance door. Amber pilot lamp and amber signal lamps shall go off, and red pilot lamp and red signal lamps shall go on. Stop arm, if air or electrically powered, shall automatically extend.
 - c. Close entrance door. Red pilot lamp and signal lamps shall go off, and stop arm, if air or electrically powered, shall retract immediately.
 - d. Open entrance door without depressing hand switch. Red pilot lamp and red signal lamps shall go on. Stop arm, if air or electrically powered, shall automatically extend.
 - e. With master switch off, depressing hand switch shall not actuate the amber signal system, nor shall opening entrance door actuate the red signal system and stop arm.
 - f. The signal lamp system shall operate with the vehicle ignition switch in either the on or off position.
 6. Installation Requirements
 - a. Each flashing signal lamp shall be mounted with its axis substantially parallel to longitudinal axis of vehicle.

- b. Front and rear alternately flashing signal lamps shall be spaced as far apart laterally as practicable.
- c. Alternately flashing signal lamps shall be mounted at the front above the windshield and at the rear so that the lower edge of lens is not lower than top line of the side window.
- d. Vertical and lateral vision of the front and rear alternately flashing warning lamps shall not be obstructed by any part of the body or lamphouse insofar as standard bus body construction shall permit.
- e. Area around each lamp shall have readily visible black border for contrast purposes.
- f. A separate fuse, circuit breaker, or FET adequate to prevent damage to the system in the event of a dead short, shall be provided between the power source and the master switch.

H. Roof Mounted Strobe Lamp

A strobe lamp, white in color, shall be mounted on the roof of the school bus. The lamp shall be a maximum of 5" in height, located on the center line of the roof four to six feet from the rear of the bus, and rear of the roof hatch. The strobe lamp shall be a double flashing Class 2, with a minimum of 10 joules.

I. Turn Signal Lamps

- 1. Shall meet the NSTS standard.
- 2. Type AI, B, C and D vehicles shall have a protected lamp mounted on right side behind service door and on left side behind stop arm signal, wired in the turn signal circuit.

J. Emergency Warning Device

Each school bus shall be supplied with a minimum of at least three reflective triangle road warning devices in a container supplied but not mounted by the body manufacturer.

K. Exterior skirt mounted landing lamp at entrance door.

Fog lamps installed by original bus manufacturer are permissible.

METAL TREATMENT

- A. All metal used in construction of bus body shall be zinc coated, aluminum-coated, or treated by equivalent process before bus is constructed. Excluded are such items as door handles, grab handles, interior decorative parts, and other interior plated parts.
- B. All metal parts that will be painted shall be, in addition to other requirements, chemically cleaned, etched, zinc phosphate coated, and zinc chromate or epoxy primed or conditioned by equivalent process.

126CSR89

- C. In providing for these requirements, particular attention shall be given lapped surfaces, welded connections of structural members, cut edges, punched or drilled hole areas in sheet metal, closed or box sections, unvented or undrained areas, and surfaces subjected to abrasion during vehicle operation.
- D. As evidence that above requirements have been met, samples of materials and sections used in construction of bus body, when subjected to 1000-hour salt spray test as provided for in latest revision of ASTM designation; B-117 "Standard Method of Salt Spray (Fog) Testing", shall not lose more than 10% of material by weight.

MIRRORS**A. Interior Mirror**

Interior mirror shall be either clear view laminated glass or clear view glass bonded to a backing which retains the glass in the event of breakage. Mirror shall be a minimum of 6" x 30".
EXCEPTION: Type AI and II vehicles may be 6" x 16".

B. Exterior Mirrors

- 1. All exterior mirrors, are to be heated and must conform to FMVSS 111.
- 2. Remote controlled external rear view mirrors are permissible.

MOUNTING

Body to chassis mounting shall:

- A. Meet the NSTS standards. Provide adequate body to chassis insulation with permanently installed insulators.

MUD FLAPS

- A. Mud flaps or guards are required and shall be provided by the body manufacturer for both front and rear wheels. They shall be constructed of heavy duty multi-ply mud flap material.
- B. Front mud flaps or guards shall be of adequate size to protect body areas vulnerable to road debris from wheels, and mounted to be free of wheel movement at all times.
- C. Rear mud flaps or guards shall be comparable in size to width of rear wheel housing, and shall reach within approximately 9" of the ground when bus is empty. They shall be mounted at a distance from the wheels that will permit free access to spring hangers for lubrication and maintenance, and to prevent their being pulled off while vehicle is in reverse motion, or damaged by tire chains.

OVERALL LENGTH

Overall length of bus shall not exceed 45 feet

OVERALL WIDTH

Overall width of bus shall not exceed 102", excluding authorized safety equipment.

PUBLIC ADDRESS SYSTEMS

Public address systems and combination radio and tape players on school buses are permissible for directing and disciplining passengers. Inside speakers shall be recessed or flush mount. Speaker electrical terminals shall be installed or insulated to prevent grounding. No internal speakers other than the driver's communication system may be installed within 4 feet of the driver's seat back in its rearmost upright position..

RADIO SYSTEMS

Two-way radio communication is recommended.

A. Mobile Unit Recommendations

1. FM-UHF 450-470 MHZ with capability of transmitting and receiving on at least three channels.
2. Units shall be equipped with tone squelch (CTCSS).
3. Transmit power shall be no less than 25 watts and transmitter should meet EIA RS-152B standards.
4. Receiver sensitivity shall be no less than .25uV (12dBSINAD) and receiver should meet EIA RS-204C standards.

B. Base/Control Station Configuration - should be compatible with recommended equipment and designed as required to cover specified service area.

RUB RAILS

A. There shall be at least three black rub rails located as follows:

1. One at seat level.
2. One at floor level.
3. One at bottom of body skirt. EXCEPTION: Type AII vehicles.

B. Rub rails shall extend from the rear of the entrance door completely around the bus to point of curvature near outside cowl on left side. At least one rub rail will extend around rear of bus. EXCEPTION: Type D vehicles with rear engine.

C. Rub rails shall be one piece except where broken by emergency door, wheel housings, battery box, access panels, corner of bus, etc. All ends shall be capped.

126CSR89

- D. Rub rails shall be securely attached at least twice to each body post and upright structural member within their length.
- E. Rub rails shall be 4" or more in width, of 16 gauge steel or suitable material of equivalent strength, and constructed in corrugated or ribbed fashion.
- F. Rub rails shall be applied outside body or outside body posts. Pressed-in or snap-on rails do not satisfy this requirement.

SEAT BELT FOR OPERATOR

A type 2 lap belt/shoulder belt shall be provided for the operator. On buses where the driver's seat and upper anchorage for the shoulder belt are both attached to the body structure, a driver's seat with an integrated Type 2 lap/shoulder belt may be substituted. On buses where the driver's seat and upper anchorage for the shoulder belt are separately attached to both body and chassis structures (i.e., one attached to the chassis and the other attached to the body), a driver's seat with an integrated Type 2 lap/shoulder belt should be used. The assembly shall be equipped with an emergency locking retractor for the continuous belt system. On all buses except Type A that are equipped with a standard chassis manufacturer's driver's seat, the lap portion of the belt system shall be guided or anchored to prevent the driver from sliding sideways under the belt system. The lap/shoulder belt shall be designed to allow for easy adjustment in order to fit properly and to effectively protect drivers varying in size from 5th percentile adult female to 95th percentile adult male.

SEATS

- A. All seats shall have minimum depth of 15".
- B. All seating height shall conform to the National Congress on School Transportation Standard. Seat back height shall be 24" from the seat reference point.
- C. All seats must comply with all other requirements of FMVSS no. 222.
- D. No bus shall be equipped with jump seats or portable seats.
- E. Integrated child safety seats are permissible.
- F. Forward-most pupil seat on right side of bus shall be located to not interfere with operator's vision, not farther forward than guard rail behind operator, or rear of operator's seat when adjusted to its rear-most position.
- G. A modesty panel will be provided under the right front crash barrier.
- H. All restraining barriers and passenger seats shall meet the criteria contained in FMVSS 302.
- I. Operator's seat shall be of the high-back type air ride with a minimum seat back adjustment of 15 degrees and with a head restraint to accommodate a 95 percentile adult male (95 percentile adult male as defined in FMVSS 208). It shall have an adjustment clip on the integrate 3-point belt that will adjust to any size driver. The seat shall have a lumbar support. EXCEPTION: Type A and

B vehicles under 35 passengers.

- J. Type A-II vehicle bodies shall be equipped with restraining barriers conforming to FMVSS 222 "School Bus Passenger Seating - Crash Protection."

STEPS

- A. The first step at the entrance door shall be not less than 10 inches and not more than 14 inches from the ground when measured from the top surface of the step to the ground, based on standard chassis specifications, except that on Type D vehicles, the first step at the entrance door shall be 12 inches to 16 inches from the ground. An auxiliary step may be provided to compensate for the increase in ground to first step clearance. The auxiliary step is not required to be enclosed.
- B. Step risers shall not exceed a height of 10 inches. EXCEPTION: When plywood is used on a steel
- C. A skidplate in front of stepwell is required on all Type D vehicles.
- D. Steps shall be enclosed to prevent accumulation of ice and snow.
- E. All steps, floor or step, the riser height may be increased by the thickness of the plywood including floor line platform area, shall be covered with 3/16" skid resistant pebble type elastomeric floor covering or other material equal in wear resistance and abrasion resistance to top grade rubber."
 - 1. Step covering shall be permanently bonded to steel or a durable backing material that is resistant to corrosion. Metal back of tread, minimum 24 gauge cold roll steel, shall be permanently bonded.
 - 2. The step tread shall have a 1.5" white nosing that contrasts in color by at least 70% measured in accordance with the contrasting color specification in 36CFR, Part 1192, ADA of the current National School Transportation Specification and Procedure and is an integral piece without any joint extending to the leading edge of the nosing turndown. The vertical surface of the nose shall be smooth.
- F. Steps shall not protrude beyond side body line when entrance door is closed.
- G. Stainless steel grab handle, sufficiently anchored, not less than 20" in length, designed with smooth contour to prevent catching of belts or articles of clothing shall be provided on the rearward side of the service door entrance. EXCEPTION: Type A vehicles.

STOP SIGNAL ARM AND CROSSING CONTROL ARM

- A. There shall be a stop signal arm installed on the left outside of the body which shall be equipped with a wind guard. Arm shall be of an octagonal shape with white letters and border, a red background, and be of reflective material. Two alternately flashing, high intensity, red strobe lamps (LED are permissible) visible from both sides of the sign shall be provided. The stop signal arm shall be air operated. The stop signal arm shall be capable of instantly reversing directions at anytime during its cycle and immediately returning to the open or closed position in response to the operators command through the operation of the door.

126CSR89

- B. A solid piece crossing control arm, mounted to the right front bumper of the bus, shall be required. The device shall be air powered. The crossing control arm shall be wired in conjunction with the stop signal arm and the alternately flashing signal lamp. Crossing arm shall be equipped with an electromagnetic or other device to hold the arm to the bumper when the arm is not activated.

STORAGE COMPARTMENT

Metal compartment of adequate strength and capacity for storage of tire chains, tow chains, and such tools as may be necessary for minor repairs shall be provided. Such storage compartment shall be located outside passenger compartment. The dimensions of this compartment shall be approximately 25" long, 16" wide and 12" high, mounted in right side of body skirt below floor located in front of rear axle assembly properly drained. EXCEPTION: Type AII vehicles are not required to meet this standard.

A door with locks keyed alike, as well as a proper latch, shall be provided. Such compartment shall be constructed of highly non-corrosive metal, and provision for drainage of water resulting from snow and ice on tire chains shall be provided. EXCEPTION: Special Education bus compartment may be on left or right.

SUN SHIELD

Interior adjustable, transparent, tinted sun shield approximately 6" x 30" shall be provided. Sun shield must be capable of being turned to an angle of 180 degrees when not in use. EXCEPTION: Type A and B vehicles under 35 passengers, manufacturer's standard.

TOW HOOKS

- A. Chassis manufacturer shall provide front tow hooks on Type C vehicles.
- B. Body manufacturers shall provide rear tow hooks on all vehicles.

UNDERCOATING

- A. Entire underside of bus body, including floor sections, cross member, and below floor line side panels, shall be coated with rust-proofing compound for which compound manufacturer has issued notarized certification of compliance to bus body builder that compound meets or exceeds all performance requirements of United States Department of Defense Specification MIL-C-62218A using modified test procedures* for following requirements:
1. Salt spray resistance - pass test modified to 5% salt and 1000 hours.
 2. Abrasion resistance - pass.
 3. Fire resistance - pass.

* Test panels are to be prepared in accordance with paragraph 4-6.12 of TT-C-520b with modified procedure requiring that tests be made on a 48 hour air cured film at thickness recommended by

compound manufacturer.

- B. Undercoating compound shall be applied with suitable airless or conventional spray equipment to recommended film thickness and shall show no evidence of voids in cured film.

VENTILATION

- A. Body shall be equipped with suitable, controlled ventilating system of sufficient capacity to maintain proper quantity of air under operating conditions without opening of windows except in extremely warm weather.
- B. Static-type non-closable exhaust ventilation shall be installed in low-pressure area of roof.
- C. Air conditioning which meets all applicable federal standards is an approved option.
- D. At least one auxiliary fan shall be installed, suspended from above at the driver's side of the windshield, where it can be adjusted for maximum effectiveness. The fan blade shall be covered with a protective cage. The fan shall be controlled by a separate switch. Location must adhere to manufacturer's standard.

WHEEL HOUSINGS

- A. Wheel housings shall be of full open type.
- B. Wheel house openings shall allow for easy tire removal and service.
- C. Wheel housings shall be designed to support seat and passenger loads, and shall be attached to floor sheets in such manner to prevent any dust or water from entering the body.
- D. Inside height of wheel housings above floor line shall not exceed 12".
- E. Wheel housing shall provide clearance for installation and use of tire chains on single or dual power-driving wheels.
- F. Rubber fenders that adequately protect sides of body from tire spray shall be provided.

WINDSHIELD AND WINDOWS

- A. All glass in windshield, windows, and doors shall be of approved safety glass (current Safety Code for Safety Glazing Motor Vehicles Operating on Land Highways Z-26.1) so mounted that permanent mark is visible, and of sufficient quality to prevent distortion of view in any direction. All glazing materials shall comply with FMVSS-205 and FMVSS-219.
- B. Windshield shall have horizontal gradient band starting slightly above operator's line of vision and gradually decreasing in lamp transmission to 20% or less at top of windshield. EXCEPTION: Type AI and II, B and D vehicles may use tinted windshield if gradient band is not available.
- C. All buses are required to be equipped with split-sash windows.

126CSR89

- D. Glass in all side and rear windows shall be of AS-3 grade or better, as specified by American Standards Association, Code Z-26.1.
- E. Each full window shall provide unobstructed emergency opening of 9" high [but not more than 13 inches high] and 22" wide, obtained by lowering of window. One window on each side of the bus may be less than 22 inches wide.
- F. Latch shall be designed to latch positively and securely, with ease of release that would enable pupils to open in an emergency.
- G. Window drip rail which does not interfere with size of window opening shall be furnished.
- H. The operator's window shall be of sliding type. Double glazing is strongly recommended. EXCEPTION: Type AI and II vehicles, manufacturer's standard.

WINDSHIELD WASHERS

- A. A windshield washer reservoir shall be furnished, and shall be at least three (3) quart capacity unless space restrictions limit size of container. A collapsible bag is not acceptable except on Type A vehicles.
- B. Solvent shall be directed onto windshield through jets in the wiper arm. EXCEPTION: Type AII vehicles.

WINDSHIELD WIPERS

Bus shall be equipped with intermittent-speed wipers. Windshield wipers shall be powered by motor(s) on all vehicles. (Must meet SAE standard J198)

WIRING

- A. All wiring and lamps shall conform to current SAE standards and FMVSS 108.
- B. Chassis to body current shall be controlled through a continuous duty or ECS solenoid of at least 105 ampere capacity.
- C. All wiring shall have an ample capacity of exceeding design load of at least 25 percent.
- D. Body wiring diagram, sized to be easily read, shall be furnished with each bus body or affixed to an area convenient to the electrical assessor's control panel.
- E. Each wire passing through metal openings shall be protected by a grommet.
- F. Wires not enclosed within the body shall be fastened securely at intervals of not more than 18 inches. All joints shall be soldered or joined by equally effective connectors which shall be water and corrosion resistant.
- G. Circuits

1. Wiring shall be arranged into at least the following circuits:

- a. Head, tail, stop (brake) and instrument panel lamps.
 - b. Clearance, stepwell and body control panel. Stepwell lamp shall be activated when service door handle is in the unlatched position. Control panel lamps may be on separate rheostat from instrument panel lamps.
 - c. Dome lamps.
 - d. Starter motor.
 - e. Ignition, emergency door signal and continuous duty solenoid or an electronic control system (ECS).
 - f. Turn signal lamps.
 - g. Alternately flashing red signal lamps.
 - h. Horns.
 - I. Heater #1.
 - j. Heater #2.
 - k. Heater #3.
 - l. Electric wipers.
 - m. Strobe lamp.
 - n. Crossing arm.
- 2. Any of the above combination circuits may be subdivided into additional independent circuits.
 - 3. Heaters and defrosters shall require at least one additional independent circuit for each heater.
 - 4. Whenever possible, all other electrical functions (such as electric-type windshield wipers) shall be provided with independent and properly protected circuits.
 - 5. Each body circuit shall be color coded, and a diagram of the circuits shall be attached to the body in a readily accessible location.
 - 6. All accessories, excluding lamps, such as heaters, defrosters, etc., shall be wired to a continuous heavy duty solenoid or electronic control system (ECS) (minimum 105 ampere) activated or energized through the ignition switch and can be tested through the accessory side of the ignition switch.
- H. A separate circuit breaker or FET shall be provided for each circuit except starter motor and

126CSR89

ignition circuits.

- I. There shall be a manual noise suppression switch installed in the control panel. The switch shall be labeled and alternately colored. This switch shall be an on/off type that de-activates body equipment that produces noise, including at least, the AM/FM radio, heaters, air conditioners, fans and defrosters. This switch shall not de-activate safety systems, such as windshield wipers or lighting systems.

- J. Buses may be equipped with a 12 volt power port in the driver's area.

NOTE: All available warranty information must be provided to the purchaser and to the State Executive Director of School Transportation as part of the bid package or upon receipt of the bus.

126CSR89

TRAINING REQUIREMENTS

IN THE EVENT MAJOR CHANGES ARE MADE IN SYSTEMS OR SUBSYSTEMS, THE SUCCESSFUL BIDDER MAY BE REQUIRED TO PROVIDE TRAINING FOR COUNTY SCHOOL BUS MECHANICS AND SUPERVISORS. SUCH TRAINING, IF REQUIRED, WILL BE SPECIFIED IN INVITATIONS TO BID, AND WILL INDICATE THE TYPE, EXTENT AND LOCATION OF CLASSES TO BE CONDUCTED.

126CSR89

SPECIAL TRANSPORTATION VEHICLE
INTRODUCTION TO SPECIAL EDUCATION
SCHOOL BUS OR MPV

The specifications in this section are intended to be supplementary to specifications in the chassis and body sections. In general, special transportation buses must meet all the requirements of the preceding sections, plus those listed in this section. Since it is recognized by the entire industry that the field of transportation for exceptional students is characterized by special needs for individual cases and by a rapidly emerging technology for meeting those needs, a flexible, common-sense approach to the adoption and enforcement of specifications for these vehicles is prudent.

By federal regulations, buses, including school buses, are defined as vehicles designed to carry ten or more passengers. Vehicles with less than ten passenger positions (including the operator) cannot be certified as buses. For this reason, the federal vehicle classification Multipurpose Passenger Vehicle, or MPV, must be used by manufacturers in some cases for these vehicles in lieu of the classification school bus. In determining passenger capacity, wheelchair positions are counted as passenger positions. This classification system while requiring compliance with a different set of federal standards for school buses does not preclude the use of National School Bus Glossy Yellow paint or school bus warning lamp systems.

GENERAL REQUIREMENTS

- I. Vehicles constructed for transporting students with special transportation needs shall comply with current FMVSS 222 and U126CSR89, West Virginia Board of Education Policy 4334, Minimum Requirements for Design and Equipment of School Buses.
- II. Bodies may, at the option of the manufacturer, incorporate a section approximately 35", or 9" in addition to the standard 28" section if necessary to provide maximum utilization of space for seats and wheelchairs. Proper bracing shall be added as specified in the body standards.
- III. Any school bus that is used specifically for the transportation of students who are confined to a wheelchair and/or other mechanical restraining devices prohibiting their use of the regular service entrance shall be equipped with a power lift.
- IV. Lift shall be located on the right side of the body, in no way attached to the exterior sides of the bus but confined within the perimeter of the school bus body when not extended. (Rear emergency door lift may be installed only with written permission from the State Executive Director of School Transportation.)
- V. A vehicle equipped with a power lift must contain adequate space and proper restraining devices for a minimum of one wheelchair bound passenger.
- VI. Each securement system location shall have a minimum clear floor area of 30" x 48". Additional floor area may be required for some applications. Consultation between the user and the manufacturer is recommended to ensure adequate area is provided.

AISLE

Aisle leading to emergency door from wheelchair area shall be of sufficient width to permit passage of wheelchairs (30" minimum). This aisle should be to an emergency door and the lift area. All wheelchair positions will be afforded the same available access.

FASTENING DEVICES**A. Wheelchair Restraints**

1. All mobile seating must be in a forward facing direction secured with a four point tie-down system with two tie-downs at the rear and two tie-downs at the front of the device.
2. The wheelchair securement system including all hardware (attachment bolts, track, etc.) shall have been successfully tested to meet minimum impact forces of a 20 G, 30 MPH deceleration to simulate a frontal impact on the transport vehicle per Society of Automotive Engineers (SAE) J2249, Wheelchair Tiedowns and Occupant Restraint Systems for Use in Motor Vehicles.
3. All attachments or coupling systems which are designed to be connected and disconnected frequently must be operable by an adult person without the use of tools or other mechanical assistance.
4. All hardware and components of the securement system must be free of sharp or jagged areas and be made of corrosion resistant material or treated to resist corrosion.
5. All tie-downs used in the securement system for a mobile seating device must meet manufacturer=s specifications and be of the automatic retractable type.
6. All tie-downs used in the securement system for a mobile seating device must be capable of adjustment in useful length of from 18" minimum to 34" maximum in order to provide sufficient flexibility to fit a majority of possible applications.
7. All tie-downs used in mobile seating devices must be manufactured using synthetic fiber woven webbing capable of being cut to release the mobile seating device in case of an emergency condition which would preclude using the normal release function of the tie-downs.
8. All securement straps for mobile seating devices must be marked indicating that they meet the requirements of SAE J2249.

B. Occupant Restraints

1. An occupant restraint must be included as part of each securement system. The occupant securement must consist of a retractable pelvic restraint and upper torso restraint.
2. The occupant restraint system including all hardware (attachment bolts, track, etc.) shall have been successfully tested in combination with a mobile seating device securement system to meet minimum impact forces of 20 G., 30 MPH deceleration to simulate a frontal

126CSR89

impact on the transport vehicle per SAE J2249.

3. All attachment or coupling systems designed to be connected and disconnected frequently must be operable by an adult person without the use of tools or other mechanical assistance.
 4. The mobile seating device restraint should be retractable and independent of the occupant restraint and designed so that the weight of the wheelchair is not absorbed by the occupant.
 5. Adjustment devices, quick release buckles and webbing, used in the construction of the occupant restraint system must meet requirements of applicable sections of FMVSS 209 and 222.
 6. The pelvic restraint must be easily adjusted to fit a range of occupant sizes and contain a quick release buckle. The upper torso restraint must be adjustable to fit a range of occupant sizes and be easily attached and disengaged from the pelvic restraint.
- C. The manufacturer of the restraint systems must supply detailed instructions regarding the installation and use of the system, including mounting of attachment hardware or track, suggested angles for attaching tie-downs and proper placement and positioning of the occupant restraint.
- D. Padding or elimination of projections of structure or other similar elements must be considered in areas adjacent to the securement area of the mobile seating device.
- E. Restraining Devices - Seat frames shall be equipped with attachments or devices to which belts, restraining harnesses, or other devices may be attached. Attachment framework or anchorage devices, if installed, shall conform to FMVSS 210.

GLAZING

Fire Blanket

A fire blanket shall be provided with a storage pouch mounted to the wall conveniently located and identified as a fire blanket. The fire blanket shall meet CRR 16 part 1610 standard for flammability of clothing. Blanket shall be approximately 62 inches X 80 inches.

Tinted glass may be installed in all doors, windows and windshield. Tinted plastic, which complies with all applicable standards, may be installed in windows to the rear of the operator's compartment.

HEATERS

- A. Bus bodies shall have a minimum of one heat exchanger in rear section of bus.
- B. Bodies may also be equipped with an auxiliary, diesel fuel fired/air or coolant heater.
1. All auxiliary heaters must comply with Federal Motor Vehicle Standard 301 and be approved by an independent certified testing laboratory.
 2. All auxiliary heaters shall utilize a low pressure, single fuel line system drawing fuel directly

from the existing bus fuel tank.

3. All auxiliary heaters shall be equipped with a resettable dual overheat cut-out.
4. All auxiliary heaters shall have both low voltage cut-out and high voltage cut-out.
5. Auxiliary coolant heaters on Type C and D vehicles shall have a high thrust circulation pump.
6. Auxiliary coolant heaters on Type C and D vehicles shall have a dual ignition system, utilizing both electronic spark and glow plug.
7. Auxiliary coolant heaters on Type C and D vehicles shall be equipped with a high-temperature automatic monitoring switch with a temperature range of 178 degrees Fahrenheit to 194 degrees Fahrenheit for passenger comfort.
8. Auxiliary coolant heaters shall provide the following heat output requirements:
 - a. Type A Vehicles - Minimum 17,000 BTU.
 - b. Type B Vehicles, under 35 passengers - Minimum 24,000 BTU.
 - c. Type B Vehicles, 35 passengers and above, Type C and D Vehicles - Minimum 41,000 BTU.

C. See Heaters, pages 29-31.

POWER LIFT

The lift, its design, installation and operation shall comply with United States Department of Transportation Rules and Regulations 49CFR, Part 38 from The Americans with Disabilities Act of 1990 and NHTSA Rules 403 and 404. The wheelchair lift must comply with the requirements for public use lifts and the requirements for all lifts. The wheelchair lift shall bear a label with the words "DOT-Public Use Lift".

A. Requirements

A visual and audible warning must activate if the platform is more than 1" below the platform threshold area and portions of a passenger's body or mobility aid is on the threshold area.

1. The visual warning must be a red beacon.
2. The audible warning must be a minimum of 85 db.

B. Operational requirements

1. During the range of passenger operation the velocity of the lift shall not exceed 6" per second.
2. During the stow and deploy operations the velocity shall not exceed 12" per second.

126CSR89

3. During the range of passenger operation acceleration of the platform must be equal to or less than 0.3g.
4. The maximum noise level may not exceed 80 dba.

C. Platform requirements

1. The platform shall have a minimum usable width of 32" measured at the platform surface.
2. The platform surface may not have protrusions which rise more than 0.25" above the platform surface.
3. Any vertical surface transition may not exceed 0.25" when at the ground level or vehicle level loading position.
4. When the platform is at the ground or vehicle level loading position, the slope of any surface over which a passenger may traverse to enter or exit the platform must have a rise to run not greater than 1:2 on the portion of the rise between 0.25" and 0.50" and 1:8 on the portion of the rise between 0.5" and 3.0". The rise of any sloped surface may not be greater than 3.0".
5. When the inner roll stop or any outer barrier is deployed, any gap between the inner roll stop and the lift platform and any gap between the outer barrier and lift platform must prevent passage of a 0.625" test block.
6. When the platform is at the vehicle floor or ground level loading position any horizontal gap over which a passenger may traverse to enter or exit the platform must prevent passage of a 0.5" sphere.
7. Any gap between the platform sides and edge guards which move with the platform must prevent passage of a 0.5" sphere.
8. The angle of the deployed platform, when stationary, and loaded with a standard load (600lbs), must not exceed 4.8 degrees with respect to the vehicle floor and must not exceed 3 degrees with respect to the platform's unloaded position.
9. The platform must have edge guards that extend continuously along each side of the lift platform to within 3.0" of the edges of the platform that are traversed while entering and exiting the platform both at the ground and vehicle floor level loading positions.
10. The lift must have a means of retaining a wheelchair. After the appropriate Impact Test mandated by FMVSS 403 the test wheelchair must remain upright with all of its wheels on the platform surface throughout the range of passenger operations.
11. The retention device must be capable of withstanding a 1600 lb force as required.
12. The retention device must be deployed when the platform is 3" above the ground.
13. The lift platform must have an inner roll stop that will prevent any portion of a wheelchair,

when tested as required, from passing over the edge of the platform at the ground level loading position.

14. The lift must have a handrail located on each side of the lift. The graspable portion of each handrail may not be less than 30 " and not more than 38 " above the platform surface, measured vertically. The cross section of the graspable portion of each handrail may not be less than 1.25 " and more than 1.5 " in diameter or width and may not have less than a 0.125 radii on any corner. The vertical projection of the graspable portion of each handrail must intersect two planes that are perpendicular to the platform reference plane and to the direction of travel of a wheelchair on the lift when entering or exiting the platform, and are 8" apart. The handrails must move such that the position of the handrails relative to the platform surface does not change.
 - a. Each handrail must withstand a 100 lb force applied at any point in any direction without more than 1" displacement. After removal of the force the handrail shall exhibit no permanent deformation.
 - b. Each handrail must withstand a 250 lb force applied at any point and in any direction without sustaining any failure, such as cracking, separation, fracture, or more than 4" of displacement of any point on the handrails relative to the platform surface.
 - c. Throughout the range of passenger operations all edges of the platform surface must be outlined. The outlines must be 1" wide and of a color that contrasts with its background by 60%.
 - d. Platform lighting must provide 5 lm/sq ft of luminance on all portions of the platform surface throughout the range of passenger operations.
 - e. Platform slip resistance must have a coefficient of friction, in any direction, of any part of a wet platform surface of not less than 0.65

D. Structural integrity.

1. Fatigue endurance. The lift must remain operable when operated through a total of 15,600 cycles: 7800 unloaded raise/lower and stow/deploy and 7800 loaded raise/lower operations.
2. Proof load. The platform must be capable of holding three (3) times the standard load (1800lbs) without separation, fracture or breakage of any vehicle or lift component.
3. Ultimate load. The platform lift must be capable of holding four (4) times the standard load (2400lbs) without separation, fracture or breakage of the platform, supporting structure, or lifting mechanism.

E. Platform free fall limits.

In the event of any single-point failure of systems for raising, lowering or supporting the platform, any portion of the platform loaded with 600lbs may not fall vertically faster than 12" per second or change angular orientation more than 2 degrees from the orientation prior to the failure. This requirement applies whenever the lift is under primary power source operation or

manual backup operation.

F. Control systems.

1. The platform lift must have a switch that enables and disables the lift control switches. This function must be labeled "POWER". The Power function must have two states: ON and OFF. The ON state must allow platform lift operation. When the POWER function is in the ON state an indicator light on the controls must illuminate. The OFF state must prevent lift operation and must turn off the indicator light.
2. The platform lift must have a switch that moves the lift from a stowed position to an extended position or to one of the two loading positions. This function must be identified as "DEPLOY" or "UNFOLD" on the control.
3. The platform lift must have a switch that lowers the lift platform. This function must be identified as "Down" or "Lower" on the control.
4. The platform lift must have a switch that raises the lift platform. This function must be identified as "Up" or "Raise" on the control.
5. The platform lift must have a switch that moves the lift from a position within the range of passenger operation to a stowed position. This function must be identified as "Stow" or "Fold" on the control.
6. Except for the power function the functions specified must activate in a momentary fashion by one switch or by a combination of switches. Verification with this requirement is made throughout the lift operations when tested as required.
7. Except for the POWER function the control panel switches must prevent simultaneous performance of more than one function. Verification with this requirement is made throughout the lift operations when tested as required.
8. Any single point failure in the control panel switches may not prevent the operation of any of the interlocks.
9. Identification of operating functions.
 - a. Each operating function of each platform lift control must be identified with characters that are at least 0.1" in height.
 - b. The characters must be illuminated when the vehicle's headlights are illuminated.
10. Except for the backup operation all control panel switches must be positioned together and in a location such that the lift operator has a direct, unobstructed view of the platform lift passenger and the passenger's mobility aid, if applicable. Verification with this requirement is made throughout the range of passenger operations. Additional controls may be placed in other locations.
11. Operating instructions. Simple instructions regarding the platform lift operating

procedures, including backup operations must:

- a. Be located near the controls.
 - b. Have characters with a minimum height of 0.1" and written in English.
 - c. Include the statement "DOT-Public Use Lift".
- G. Jacking prevention. Except when the platform lift is operated in backup mode the control system or lift design must prevent the raising of any portion of the vehicle by the lift system when lowering the lift is attempted while the lift is at the ground level loading position both with and without a standard load (600lbs) on the lift.

H. Backup operation.

- 1. The platform lift must be equipped with a manual backup operating mode that can, in the event there is a loss of primary power source for lift operation or a lift malfunction can:
 - a. Deploy the lift.
 - b. Lower the loaded platform to the ground level loading position.
 - c. Raise the unloaded platform to the vehicle floor loading position.
 - d. Stow the lift.
- 2. During backup operation the wheelchair retention device and inner roll stop must be manually deployable and stowable.
- 3. The operating instructions near the lift control and in the vehicle owner's manual insert must contain information on manual backup operation which must include manual operation of the wheelchair retention device and inner roll stop during backup operation of the lift.

I. Interlocks

- 1. Except when the platform is operated in the backup mode the interlock requirements must be met, both with and without a standard load (600 lbs) on the lift.
- 2. The platform lift must have interlocks or operate in such a manner as to prevent:
 - a. Forward or rearward mobility of the vehicle unless the platform is stowed.
 - b. Operation of the platform lift from the stowed position until forward or rearward mobility of the vehicle is inhibited, by means of placing the transmission in park or placing the transmission in neutral and actuating the parking brake or the vehicle service brakes by means other than the operator depressing the vehicle's service brake pedal.
 - c. Stowing of the platform lift when occupied by portions of a passenger's body, and/or a mobility aid. Verification of this requirement is made by placing a 6x6x12 " rigid box

126CSR89

- weighing 50lbs on any portion of the platform surface that coincides with the unobstructed platform operating volume. Attempt to fold the lift using the operator control. The interlock must prevent the platform from stowing.
- d. When the platform reaches a level where the inner roll stop is designed to deploy, the platform must stop unless the inner roll stop has deployed.
 - e. Movement of the platform up or down throughout the range of passenger operation, when the platform is above a horizontal plane 3 " above the ground level loading position unless the wheelchair retention device is deployed.
 - f. In the case of a platform that is equipped with an outer barrier, deployment of the outer barrier when occupied by portions of a passenger's body or mobility aid.
 - g. Deployment of any inner roll stop when the inner roll stop is occupied by portions of a passenger's body or mobility aid.
- J. Operations counter. The platform lift must have an operation or cycle counter that records each complete up/down operation.
- K. Vehicle owner's manual insert. The lift manufacturer must provide with the lift, inserts for the vehicle owner's manual that provide specific information about the lift. This insert must be written in English and must include:
- 1. A maintenance schedule that includes maintenance requirements that has, as a minimum, some dependency on the number of cycles on the operations counter.
 - 2. Instruction regarding the platform lift operating procedures, including backup operations.
 - 3. The owner's manual insert must also include:
 - a. The statement "DOT- Public Use Lift" on the front cover page.
 - b. The statement "DOT- Public Use Lift verifies that this lift meets the requirements of FMVSS 403."
- L. Installation instructions. The platform lift manufacturer must include installation instructions with each lift. Information must be included that identifies:
- 1. The vehicles on which the lift is designed to be installed.
 - 2. Procedures for operational checks that the vehicle manufacturer must perform to verify that the lift is fully operational. Such checks include, but are not limited to, platform lighting, the threshold warning signal, and interlocks, including those that interface with vehicle systems.
 - 3. Any informational material or labels that must be placed on or in the vehicle in order to comply with FMVSS 403. Labels must be of a permanent nature that can withstand the elements of the outside environment.

4. The installation instructions must contain the statement "DOT- Public Use Lift" on the front cover.
 - a. Installation instructions must contain the statement "Public use vehicle manufacturers are responsible for complying with the lift lighting requirements in FMVSS 404, Platform lift installations in Motor Vehicles".

RESTRAINING DEVICES, PASSENGER SEATS

Seat frames shall be equipped with attachments or devices to which belts, restraining harnesses, or other devices may be attached. Attachment framework or anchorage devices, if installed, shall conform with FMVSS 210.

SEATING ARRANGEMENTS

Flexibility in seat size and spacing to accommodate special devices shall be permitted due to the constant changing of passenger requirements. All seating shall be forward facing.

SPECIAL SERVICE ENTRANCE

- A. The opening, with doors open, shall be of sufficient width to allow the passage of wheelchairs. The minimum clear opening shall be 43" in width, and 57" " in height. Entrance shall be of sufficient width and depth to accommodate various mechanical lifts and related accessories as well as the lifting platform.
- B. A drip molding shall be installed above the opening to effectively divert water from entrance.
- C. Door posts and headers for entrance shall be reinforced sufficiently to provide support and strength equivalent to the areas of the side of the bus not used for service doors.

SPECIAL SERVICE ENTRANCE DOORS

- A. All doors shall open outwardly.
- B. Lift doors shall have devices to hold doors in the open position.
- C. All doors shall be weather sealed. On buses with double doors, they shall be so constructed that a flange on the forward door overlaps the edge of the rear door when closed.
- D. Door materials, panels and structural strength shall be equivalent to the conventional service and emergency doors. Color, rub rail extensions, lettering and other exterior features shall match adjacent sections of the body.
- E. Lift door shall have a window within one inch of the lower line of adjacent sash.
- F. Door(s) shall be equipped with a device that will actuate a flashing visible signal located in the operator's compartment when door(s) is not securely latched or open in any position other than locked and ignition is in "ON" position.

126CSR89

- G. A switch shall be installed so that the lifting mechanism will not operate when the lift platform door(s) is closed.
- H. When frame mounted power lift is used, door panels shall extend to bottom of body skirt.

126CSR89

**SPECIFICATIONS
FOR
MULTI-FUNCTIONAL SCHOOL ACTIVITY BUS (MFSAB)**

The vehicle must comply with the Definition of a Multifunction School Activity Bus in the Federal Motor Vehicle Safety Standards as listed in 49 CFR Part 571, which is the National Highway Traffic Safety Administration's Final Rule on this vehicle. This primary purpose of this vehicle will be to transport children, and as such, it must comply with all applicable Federal Motor Vehicle Safety Standards (FMVSS) for this type of vehicle and West Virginia Minimum School Bus Specifications. It must be purchased or leased as a new bus and may only be used for extracurricular activities. These buses may not be used to transport students to and from schools or between schools for the purpose of attendance. In addition, the vehicle must have been tested at and received a satisfactory evaluation from the West Virginia Department of Education. The MFSAB must also meet all other Federal (to include the Americans with Disabilities Act of 1990) and applicable West Virginia laws for passenger vehicles of this type. Vehicles shall be of the latest model year in standard production and, of which, parts are stocked and warranty service is available at one or more points in West Virginia or border cities.

The MFSAB is designed to provide all of the crash safety standards that can be found on a traditional school bus, but without the "flashers and signs" that traditional school buses need for frequent pick-up and drop-off at school bus stops. The vehicle will not have the specialized warning devices such as stop signs and warning lights, and they will not be school bus yellow.

The following exceptions to the West Virginia Minimum Specifications for School Buses for regular route buses shall be allowed for these vehicles:

BRAKES: Shall meet standards set forth in school bus standards for size of vehicle.

COLOR: The local school with school system approval may determine the color of the activity bus. The color scheme may utilize any combination of up to THREE colors. This combination may be in addition to an optional white roof. The color National School Bus Yellow (SBMTC-008 Publication) shall not be used as a part of the color scheme. School systems and/or vendors shall submit preliminary color schemes to the West Virginia Department of Education, Office of School Transportation for approval prior to the purchase or manufacture of a MFSAB.

IDENTIFICATION:

1. The bus body shall bear the words "ACTIVITY BUS" in a contrasting color at least 8 " high in the area where "school bus" is normally positioned. Lettering and numbering shall conform to FMVSS and West Virginia Minimum Specifications and shall meet reflectivity standards. Bus numbering on this bus may be of a contrasting color.
2. The name of the school system shall be displayed in *at least five-inch* letters on both sides of the bus in the beltline area. NO SIGNS OR LOGOS shall be applied to any area of the bus including the bumpers. The name of the school may be displayed in the beltline area. No signs, logos, or other items shall be displayed on the windows of the bus.

LIGHTING AND WARNING DEVICES:

All activity buses shall meet state and federal standards for normal school bus lighting and warning device requirements with the following exceptions: MFSABs may not be equipped with alternately flashing amber or red signal lamps used for loading and unloading students. MFSABs may not be

equipped with stop arm signals or crossing control arms.

SEAT BELTS:

3 point lap-shoulder belts will be supplied for any MFSAB with a GVWR of 10,000 lbs and under. Shoulder belts supplied must be fully retractable and the anchorage must meet FMVSS-210.

SEATING:

All MFSAB buses shall have seats that comply with FMVSS-222. If the GVWR is 10,000 lbs and under, then it must also be equipped with 3 point lap-shoulder belts certified to meet appropriate FMVSS standards. School systems and/or vendors shall submit preliminary seating schemes to the West Virginia Department of Education, Office of School Transportation for approval prior to the purchase or manufacture of a MFSAB. Successful vendor shall coordinate with the agency issuing the purchase order in the selection of material and color and type of seats.

APPENDIX A

HIGHWAY SAFETY PROGRAM STANDARD NO. 17

Pupil Transportation Safety

I. SCOPE

This standard establishes minimum requirements for a state highway safety program for pupil transportation safety; including the identification, operation, and maintenance of school buses; training of personnel; and administration.

II. PURPOSE

The purpose of this standard is to reduce, to the greatest extent possible, the danger of death or injury to school children while they are being transported to and from school.

III. DEFINITIONS

"Type 1 school vehicle" means any motor vehicle with motive power, except a trailer, used to carry more than 16 pupils to and from school. This definition includes vehicles that are at any time used to carry school children and school personnel exclusively, and does not include vehicles that only carry school children along with other passengers as part of the operations of a common carrier.

"Type 2 school vehicle" means any motor vehicle used to carry 16 or less pupils to or from school. This does not include private motor vehicles used to carry members of the owner's household.

IV. REQUIREMENTS

Each state, in cooperation with its school districts and its political subdivisions, shall have a comprehensive pupil transportation safety program to assure that school vehicles are operated and maintained so as to achieve the highest possible level of safety.

ADMINISTRATION

- A. There shall be a single state agency having primary administrative responsibility for pupil transportation, and employing at least one full-time professional to carry out its responsibilities for pupil transportation.
- B. The responsible state agency shall develop an operating system for collecting and reporting information needed to improve the safety of school vehicle operation, in accordance with Safety Program Standard No. 10, "Traffic Records," ' 204.4.

IDENTIFICATION

Each state shall establish and maintain compliance with the following requirements for identification and equipment of school vehicles. The use of stop arms is at the option of the state.

A. Type 1 school vehicles shall:

1. be identified with the words "SCHOOL BUS" printed in letters not less than 8" high, located

between the warning lamps as high as possible without impairing visibility of the lettering from both front and rear of the vehicle;

2. be painted National School Bus Glossy Yellow, in accordance with the colorimetric specifications of Federal Standard No. 595a, Color 13432, except that the hood shall be either that color or lusterless black, matching Federal Standard No. 595a, Color 37038;
 3. have bumpers of glossy black, matching Federal Standard No. 595a, Color 17038; unless, for increased night visibility, they are covered with a retroreflective material;
 4. be equipped with a system of signal lamps that conforms to the school bus requirements of Federal Motor Vehicle Safety Standard 108, 49 CFR 571.21; and
 5. have a system of mirrors that will give the seated operator a view of the roadway to each side of the bus, and of the area immediately in front of the front bumper, in accordance with the following procedure: When a rod, 20" long, is placed upright on the ground at any point along a traverse line 1 foot forward of the forward-most point of a school bus, and extending the width of the bus, at least 7 2@ of the length of the rod shall be visible to the operator, either by direct view or by means of an indirect visibility system.
- B. Any school vehicle meeting the identification requirements of A. 1-4 (above) that is permanently converted for use wholly for purposes other than transporting pupils to or from school shall be painted a color other than National School Bus Glossy Yellow, and shall have the stop arms and equipment required by section A. 1-4 (above) removed.
- C. Type 1 school vehicles operated on a public highway and transporting primarily passengers other than school pupils shall have the words "SCHOOL BUS" covered, removed, or otherwise concealed, and the stop arms and equipment required by section A. 4 (above) shall not be operable through the usual controls.
- D. Type 2 school vehicles shall either:
1. Comply with all the requirements for Type 1 school vehicles; or
 2. Be of a color other than National School Bus Glossy Yellow, have none of the equipment specified (Identification - A. 4) and not have the words "SCHOOL BUS" in any location on the exterior of the vehicle, or in any interior location visible to a motorist.

The state shall establish conditions under which one or the other of the above two specifications for Type 2 vehicles shall apply.

OPERATION

Each state shall establish and maintain compliance with the following requirements for operating school vehicles:

A. Personnel

1. Each state shall develop a plan for selecting, training, and supervising persons whose primary duties involve transporting school pupils, in order to assure that such persons will attain a high degree of competence in, and knowledge of, their duties.

126CSR89

2. Every person who drives a Type 1 or Type 2 school vehicle occupied by school pupils shall, as a minimum:
 - a. has a valid state operator's license to operate such a vehicle(s);
 - b. meet all special physical, mental, and moral requirements established by the state agency having primary responsibility for pupil transportation; and
 - c. be qualified as an operator under the Motor Carrier Safety Regulations of the Federal Highway Administration 49 CFR 391, if he or her employer is subject to those regulations.

B. Pupil Instruction

At least twice during each school year, each pupil who is transported in a school vehicle shall be instructed in safe riding practices, and participate in emergency evacuation drills.

C. Vehicle Operation

1. Each state shall develop plans for minimizing highway use hazards to school vehicle occupants, other highway users, pedestrians, and property, including but not limited to:
 - a. careful planning an annual review of routes for safety hazards;
 - b. planning routes to assure maximum use of buses, and avoid standees;
 - c. providing loading and unloading zones off the main traveled part of the highway, wherever it is practicable to do so;
 - d. establishing restricted loading and unloading areas for school buses at, or near schools;
 - e. requiring the operator of a vehicle meeting or overtaking a school bus that is stopped on a highway to take on or discharge pupils, and on which the red warning signals specified (Identification - A. 4) are in operation, to stop his vehicle before it reaches the school bus and not proceed until the warning signals are deactivated; and
 - f. prohibiting, by legislation or regulation, operation of any vehicle displaying the words "SCHOOL BUS," unless it meets the equipment and identification requirements of this standard.
2. Use of flashing warning signal lamps while loading or unloading pupils shall be at the option of the state. Use of red warning signal lamps for any other purpose, and at any time other than when the school vehicle is stopped to load or discharge passengers shall be prohibited.
3. When vehicles are equipped with stop arms, such devices shall be operated only in conjunction with red signal lamps.
4. Seating
 - a. Seating shall be provided that will permit each occupant to sit in a seat in a plan view lateral location, intended by the manufacturers to provide seating accommodation for a person at least as large as a 5th percentile adult female, as defined in 49 CFR 57.3.

- b. Bus routing and seating plans shall be coordinated so as to eliminate standees when a school vehicle is in motion.
- c. There shall be no auxiliary seating accommodations such as temporary or folding jump seats in school vehicles.
- d. Operators of school buses equipped with lap belts shall be required to wear them whenever the vehicle is in motion.
- e. Passengers in Type 2 school vehicles equipped with lap belts shall be required to wear them whenever the vehicle is in motion.

VEHICLE MAINTENANCE

Each state shall establish and maintain compliance with the following requirements for vehicle maintenance:

- A. School vehicles shall be maintained in safe operating conditions through a systematic preventive maintenance program.
- B. All school vehicles shall be inspected at least semiannually, in accordance with Highway Safety Program manual Vol. 1, published by the U. S. Department of Transportation January 1969. School vehicles subject to the Motor Carrier Safety Regulations of the Federal Highway Administration shall be inspected and maintained in accordance with those regulations (49 CFR Parts 393 and 396).
- C. School vehicle operators shall be required to perform daily pretrip inspections of their vehicles, and to report promptly and in writing any defects or deficiencies discovered that may affect the safety of the vehicle's operation or result in its mechanical breakdown. Pretrip inspection and condition reports for school vehicles subject to the Motor Carrier Safety Regulations of the Federal Highway Administration shall be performed in accordance with those regulations (49 CFR 392.7, 392.8, and 396.7).

V. PROGRAM EVALUATION

The pupil transportation safety program shall be evaluated at least annually by the state agency having primary administrative responsibility for pupil transportation. The National Highway Traffic Safety Administration shall be furnished a summary of each evaluation.

126CSR89

APPENDIX B
SCHOOL BUS TYPE
DEFINITIONS

TYPE A

A Type "A" school bus is a conversion or bus constructed utilizing a cutaway front-section vehicle with a left side driver's door. This definition shall include two classifications: Type A-I, with a Gross Vehicle Weight Rating (GVWR) 14,500 pounds or less; and Type A-II, with a GVWR of greater than 14,500 and less than or equal to 21,500 pounds.

TYPE B

A Type "B" school bus is constructed utilizing a stripped chassis. The entrance door is behind the front wheels. This definition includes two classifications: Type B-1, with a GVWR of 10,000 pounds or less; and Type B-2, with a GVWR greater than 10,000 pounds.

TYPE C

A Type "C" school bus is constructed utilizing a chassis with a hood and front fender assembly. The entrance door is behind the front wheels; also known as a conventional school bus. This type also includes cutaway truck chassis or truck chassis/cab with or without a left side door and a GVWR greater than 21,500 pounds.

TYPE D

A Type "D" school bus is constructed utilizing a stripped chassis. The entrance door is ahead of the front wheels; also known as transit style school bus or forward control bus.

SPECIALLY EQUIPPED

A school bus designed, equipped, or modified to accommodate students with special needs.

APPENDIX C

SPECIFICATIONS FOR COMPRESSED NATURAL GAS (CNG) BUSES

CNG - FUEL CONVERSION

Conversion and maintenance is to be performed only under the supervision of an individual who has satisfactorily completed a training program provided by a CNG original equipment manufacturer. A training program shall involve the mechanics of installation, maintenance, repair, trouble shooting and safety procedures.

CNG VESSELS ON SCHOOL BUS

- A. Each CNG fuel supply vessel shall be constructed and inspected in accordance with ANSI/NFPA 52-1992 standards and shall have a rated service pressure of not less than 3000 psi at 70 degrees Fahrenheit. The fuel supply vessel shall not be filled beyond the working pressure stamped on the vessel neck and displayed on a label near the filler connection; corrected for the ambient temperature at time of filling as prescribed by ANSI/NFPA 52-1992 Edition, Sec. 2-4.1.1, 2-4.2, 2-4.4, and 2-4.5.
- B. Shall be fitted with ANSI/NFPA 52-1992, Sec. 2-5 and 2-9 and ANSI/AGA NGV2-1992, Sec. 1-10, approved vessel valves with an approved fused burst disc for the DOT approved vessel.
- C. Vessel valves shall be protected by guards or expanded steel grating of 3/16" minimum.
- D. Steel vessels must have protective paint coating.

MOUNTING VESSELS TO SCHOOL BUS

All safety devices that may discharge shall be vented to the outside of the vehicle as follows:

- A. Fuel supply vessels installed within a closed compartment shall be vented to the outside of the vehicle with a flexible bag. Such bag shall be constructed of material that is non-flammable or self-extinguishing. The bag shall be shielded or installed in a protected location to prevent damage from unsecured objects and abrasion.
- B. The vent or vents for the bag shall have an opening area of not less than three square ", and shall not exit into the wheel well.
- C. Bolts - 5/8" diameter grade eight bolts shall be used for brackets holding vessels to main frame, body or channel iron.
- D. There shall be a minimum of two bolts per bracket assembly. Nuts with suitable locking washers, aircraft type steel locking nuts or nuts with safety wire capability shall be used.
- E. If channel iron is used minimum specifications are 4" x 5/16".
- F. Channel iron to be attached to main frame with body clamps or U-bolts and 5/8" bolts, grade eight steel.
- G. Vessels are to be installed with as much road clearance as practicable, but not lower than the

center line of the drive axle. If CNG vessels are mounted inboard of frame rails in the vicinity of the drive shaft, protective drive shaft loops shall be installed within 12" of the universal joints.

FUEL LINES

Fuel lines shall be permanently secured at intervals of not more than two feet with aviation type clamps, and:

- A. Shall be placed in such a manner as to minimize the possibility of damage due to vibrations, strains or wear.
- B. Any fuel line passing through, under or over a structural member shall be protected by rubber grommets or tubing. Loops in the fuel lines shall be provided at appropriate stress points.
- C. All fuel lines shall meet or exceed SAE heavy duty hydraulic brake line specifications with a minimum working pressure of 3600 psi and a maximum burst pressure of at least 10,000 psi, hydrostatically tested.
- D. An automatic natural gas shutoff valve or solenoid shall be provided as an integral part of the regulator package assembly.
- E. A manual shutoff valve shall be installed between the vessels and the regulator. This shut-off valve shall be readily accessible to the operator, be protected from rocks and other forms of debris, and be on the curb side of the bus where possible. Such shut-off valve shall be clearly marked with reflective material. If access is gained by cutting a hole in the side of the bus, suitable protective material shall be placed around the edge of the hole. Wherever possible, the manual shut-off valve should be located as close as possible to the CNG vessels.
- F. Vapor hose from regulator to mixer shall have a rating of at least 20 psi and be wire or fiber reinforced and flame tested.
- G. First stage regulator shall have an inlet rating of at least 3000 psi and a pressure safety factor of at least four.

VEHICLE REFUELING CONNECTION

- A. The fueling systems shall be equipped with a backflow check valve that will prevent the return flow of gas from vessel(s) to the filling connection.
- B. All school buses shall be fitted with a refueling interlock system to prevent the bus from being moved on its own power during a refueling operation.
- C. The fueling connection shall meet the standards of ANSI/NFPA 52-1992, Sec. 2-11.1 through 2-11.4.
- D. The filler hose vent valve on the refueling probe shall be directed away from the operator.

REFUELING

- A. Shall be done only by trained operators and personnel.
- B. Engine must be shut off during refueling.
- C. No source of ignition or flame within 20 feet during refueling.

FITTINGS

All fittings or attachments shall be inspected monthly for leaks, wear, tightness or undue stress as applicable, and records maintained of the same. Soap water solution or portable leak detectors are recommended for CNG fittings.

LABELING REQUIRED

- A. CNG vessel area labels showing CNG vessel I.D., hydrostatic test data and CNG vessel master manual shut-off valve location.
- B. Engine compartment labels to include CNG warning and instructions to mechanics including the following:
 - 1. CNG fueled vehicle.
 - 2. System service pressure.
 - 3. Installers name or company.
 - 4. Vessel retest date(s) or expiration.
 - 5. Total vessel water volume in gallons (liters).

CNG EQUIPMENT

Manufacturers wishing to deal in CNG equipment in West Virginia must meet all applicable federal and state requirements.

LIMIT OF FLAMMABILITY

Natural gas introduced into any system covered by this standard shall have a distinctive odor potent enough for its presence to be detected down to a concentration in air of not over 1/5 of the lower limit of flammability.

VENDOR PREFERENCE CERTIFICATE

Certification and application* is hereby made for Preference in accordance with **West Virginia Code**, §5A-3-37. (Does not apply to construction contracts). **West Virginia Code**, §5A-3-37, provides an opportunity for qualifying vendors to request (at the time of bid) preference for their residency status. Such preference is an evaluation method only and will be applied only to the cost bid in accordance with the **West Virginia Code**. This certificate for application is to be used to request such preference. The Purchasing Division will make the determination of the Resident Vendor Preference, if applicable.

1. **Application is made for 2.5% resident vendor preference for the reason checked:**
☐ Bidder is an individual resident vendor and has resided continuously in West Virginia for four (4) years immediately preceding the date of this certification; **or**,
☐ Bidder is a partnership, association or corporation resident vendor and has maintained its headquarters or principal place of business continuously in West Virginia for four (4) years immediately preceding the date of this certification; **or** 80% of the ownership interest of Bidder is held by another individual, partnership, association or corporation resident vendor who has maintained its headquarters or principal place of business continuously in West Virginia for four (4) years immediately preceding the date of this certification; **or**,
☐ Bidder is a nonresident vendor which has an affiliate or subsidiary which employs a minimum of one hundred state residents and which has maintained its headquarters or principal place of business within West Virginia continuously for the four (4) years immediately preceding the date of this certification; **or**,
2. **Application is made for 2.5% resident vendor preference for the reason checked:**
☐ Bidder is a resident vendor who certifies that, during the life of the contract, on average at least 75% of the employees working on the project being bid are residents of West Virginia who have resided in the state continuously for the two years immediately preceding submission of this bid; **or**,
3. **Application is made for 2.5% resident vendor preference for the reason checked:**
☐ Bidder is a nonresident vendor employing a minimum of one hundred state residents or is a nonresident vendor with an affiliate or subsidiary which maintains its headquarters or principal place of business within West Virginia employing a minimum of one hundred state residents who certifies that, during the life of the contract, on average at least 75% of the employees or Bidder's affiliate's or subsidiary's employees are residents of West Virginia who have resided in the state continuously for the two years immediately preceding submission of this bid; **or**,
4. **Application is made for 5% resident vendor preference for the reason checked:**
☐ Bidder meets either the requirement of both subdivisions (1) and (2) or subdivision (1) and (3) as stated above; **or**,
5. **Application is made for 3.5% resident vendor preference who is a veteran for the reason checked:**
☐ Bidder is an individual resident vendor who is a veteran of the United States armed forces, the reserves or the National Guard and has resided in West Virginia continuously for the four years immediately preceding the date on which the bid is submitted; **or**,
6. **Application is made for 3.5% resident vendor preference who is a veteran for the reason checked:**
☐ Bidder is a resident vendor who is a veteran of the United States armed forces, the reserves or the National Guard, if, for purposes of producing or distributing the commodities or completing the project which is the subject of the vendor's bid and continuously over the entire term of the project, on average at least seventy-five percent of the vendor's employees are residents of West Virginia who have resided in the state continuously for the two immediately preceding years.
7. **Application is made for preference as a non-resident small, women- and minority-owned business, in accordance with West Virginia Code §5A-3-59 and West Virginia Code of State Rules.**
☐ Bidder has been or expects to be approved prior to contract award by the Purchasing Division as a certified small, women- and minority-owned business.

Bidder understands if the Secretary of Revenue determines that a Bidder receiving preference has failed to continue to meet the requirements for such preference, the Secretary may order the Director of Purchasing to: (a) reject the bid; or (b) assess a penalty against such Bidder in an amount not to exceed 5% of the bid amount and that such penalty will be paid to the contracting agency or deducted from any unpaid balance on the contract or purchase order.

By submission of this certificate, Bidder agrees to disclose any reasonably requested information to the Purchasing Division and authorizes the Department of Revenue to disclose to the Director of Purchasing appropriate information verifying that Bidder has paid the required business taxes, provided that such information does not contain the amounts of taxes paid nor any other information deemed by the Tax Commissioner to be confidential.

Under penalty of law for false swearing (West Virginia Code, §61-5-3), Bidder hereby certifies that this certificate is true and accurate in all respects; and that if a contract is issued to Bidder and if anything contained within this certificate changes during the term of the contract, Bidder will notify the Purchasing Division in writing immediately.

PURCHASING AFFIDAVIT

West Virginia Code §5A-3-10a states: No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

EXCEPTION: The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

Under penalty of law for false swearing (*West Virginia Code §61-5-3*), it is hereby certified that the vendor affirms and acknowledges the information in this affidavit and is in compliance with the requirements as stated.
