**SOLICITATION NUMBER: COR61615**  
**Addendum Number: 1**

---

The purpose of this addendum is to modify the solicitation identified as COR61615 ("Solicitation") to reflect the change(s) identified and described below.

**Applicable Addendum Category:**

- Modify bid opening date and time
- Modify specifications of product or service being sought
- Attachment of vendor questions and responses
- Attachment of pre-bid sign-in sheet
- Correction of error
- Other

**Description of Modification to Solicitation:**

1. Responses to vendor questions attached with Exhibits 1 through 3.
2. Mandatory pre-bid meeting sign-in sheets attached.
3. Revised drawings attached.
4. The bid opening remains 7/23/13 at 1:30 pm.

**Additional Documentation:** Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

**Terms and Conditions:**

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.
2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

## ATTACHMENT A

### Questions:

Q1: The window access in Quillians 1 and 2 was in question. Will we be permitted to cut out the cross-member and the outer security banding to allow for material to be brought into the work areas (as long as the window is secured properly at the end of each day.)? To allow for enough clearance for the size of materials needed to be installed, the cross member will have to be removed (and can be rewelded/replaced at the end of the project), and the outer banding will have to be cut/removed to allow for any access through the window at all. Please let us know if this will be permitted.

A1: Yes.

Q2: Is there a more detailed coating/finishing specification than the one listed in the RFQ? If so, could you please provide?

A2: The items that are hot dipped galvanized will not need to be painted. The items that are not hot dipped galvanized must be painted the same color as the hot dipped galvanized metal. All welds must be painted with the same color as the hot dipped galvanized.

Q3: Phillip Farley had a picture of the security screen mesh at the pre-bid meeting. Could this also be provided to us?

A3: Please see Exhibit #1.

Q4: May we have an electronic copy of the picture Philip Farley showed us at the Pre-Bid Meeting that showed details of how the metal mesh is to be attached to the supporting structure.

A4: Please see Exhibit #1

### Clarifications:

C1: In the Specifications section of the RFQ on page 22, under Part I, Section 1.01(E), Subsection (1), please remove, "*This is area that is inside the metal beam structure.*" and replace with "*This is the distance of the outside of the beam structure.*"

- C2: In the Specifications section of the RFQ on page 22, under Part I, Section 1.01(F), Subsection (1), please remove, "*This is area that is inside the metal beam structure.*" and replace with "*This is the distance of the outside of the beam structure.*"
- C3: In the Specifications section of the RFQ on page 22, under Part I, Section 1.01(G), please remove, "*sixteen*" and replace with "*eighteen.*"
- C4: In the Specifications section of the RFQ on page 35, under Part II, Section 2.7, please remove, "*Lock Assembly for Doors.*" and replace with "*Mechanical Lock Assembly for Metal Cages 1 and 2.*"
- C5: Contractor must cover the inside glass windows by the entrance into the recreational yard area when doing any welding to protect the Correctional Officers that are in the control room and hallway.
- C6: The security door that goes into the recreational yard area currently has an electronic controlled lock. The drawings for metal cage 3 have been changed to a different security lock assembly. The changes have been made to drawings CS-1, A1-0, A2-3, A3-3, and A4-1A. The drawings are attached.
- C7: The security lock assembly for the door lock must have the following criteria and be tied into the existing locking control system. The conduit must be type rigid for the cables. See Exhibit #2 for template information.

Electronic/Mechanical Lock Assembly for Metal Cage 3:

- A. Manufacture for doors to the metal cage units:
1. Lock assembly for the doors to the metal cage 3.
    - a. Folger Adams Electronic/Mechanical Locks.
    - b. Or Equal.
  2. Description:
    - a. 120M Deadlatch, model 126.
    - b. Keyed on both sides.
    - c. Throw latch bolt must extend one (1") inches.
    - d. For door type: swinging.
    - e. For security level: maximum.
    - f. Lock Assembly must be welded to the metal doorframe.
    - g. It is the contractor's responsibility to size the door so install the lock assembly.
- C8: Please see Exhibit #3 for the pre-bid sign-in sheet.
