purchasing agency tenders the initial payment to Vendor.

- 43. Vendor's signature on its bid also affirms that neither it nor its representatives have any interest, nor shall acquire any interest, direct or indirect, which would compromise the performance of its services hereunder. Any such interests shall be promptly presented in detail to the Agency.

The individual signing this bid on behalf of Vendor certifies that he or she is authorized by the Vendor to execute this bid or any documents related thereto on Vendor's behalf; that he or she is authorized to bind the Vendor in a contractual relationship; and that, to the best of his or her knowledge, the Vendor has properly registered with any State agency that may require registration.

repository. The service provider is responsible for any costs associated with the fingerprint-based state and federal background inquiry.

After the contract for such services has been approved, but before any such employees are permitted to be on the grounds or in the buildings of the Capitol complex or have access to sensitive or critical information, the service provider shall submit a list of all persons who will be physically present and working at the Capitol complex to the Director of the Division of Protective Services for purposes of verifying compliance with this provision.

The State reserves the right to prohibit a service provider's employees from accessing sensitive or critical information or to be present at the Capitol complex based upon results addressed from a criminal background check.

52. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open heath, basic oxygen, electric furnace, Bessemer or other steel making process.

The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:

- a. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
- b. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

53. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance

with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a “substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products.

This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

Vendors quoting this project **SHALL** comply with the below Specifications:

PART I: SUMMARY OF PROJECT, STANDARD SPECIFICATIONS, AND REQUIREMENTS**PART 1 GENERAL****1.01 DESCRIPTION**

- A. At Denmar Correctional Center, there are two existing water storage tanks. It is believed the first water storage tank was constructed in 1953. The estimated size of the tank is thirty feet (30') in diameter by twenty-eight and a half feet (28.5') tall and will hold an estimated 149,407 gallons. The estimated weight of the first tank is around twelve (12) to thirteen (13) tons. It is believed the second water tank was constructed in 1972. The estimated size of the tank is thirty-four feet (34') in diameter by twenty-four feet (24') tall and will hold an estimated 126,895 gallons. The estimated weight of the second tank is around twelve (12) to thirteen (13) tons. It is unknown when the two (2) foundations were constructed. At this time, we can only assume it was when the water tanks were installed. The elevation of the foundation to the tank that was built in 1953 is about four feet (4') lower than the tank that was built in 1972. The elevation of the top of both tanks is about the same.
- B. The water is pumped from the Greenbrier River and goes through a treatment plant. The water is then pumped up to the two (2) storage tanks. The water then goes to the Facility as needed. The existing pipe is six inch (6") ductile iron with cement inside. There is one (1) pipe from the treatment plant that feeds water to both tanks. The water storage tanks are filled up by gravity and area of least resistance. There is one (1) pipe from the

two water storage tanks that goes to the Facility. Each water storage tank has one (1) drain pipe that extends about fifty feet (50') to sixty feet (60') from the water storage tanks.

- C. The Facility cannot do without both storage tanks at the same time. The contractor must do the project in the following construction project sequence:
- 1) On water storage tank #1, the facility will drain the tank below the areas where the wooden pegs are driven in the metal tank. Contractor must provide and weld metal plates large enough to cover the existing holes in the metal tank where the wooden pegs are located. **This must be done as soon as the contract has been encumbered.**
 - 2) Prior to construction, the existing 149,407 gallon water storage tank (shown as tank #1 on the drawing) must be filled completely full with water.
 - 3) Drain the existing 126,895 gallon water storage tank (shown as tank #2 on the drawing) once tank #1 have been completely filled.
 - 4) The existing water line to the existing water storage tank #2 must be cut and plugged.
 - 5) The existing water storage tank #2 must be removed. This includes the metal tank, foundation, and associated piping, and piping connections.
 - 6) All disassembled pieces from storage tank #2 must be set aside at the location as specified on the drawings.
 - 7) Excavate and grade the area where the new 300,000 gallon water storage tank will be located including relocating the existing gravel road as shown on the contract drawings.
 - 8) Construct the new water storage tank, including the foundation, valve vault, 8" PVC overflow piping, storage tank, liquid level indicator, and rock rip rap outfall as shown on the contract drawings.
 - 9) Connect the new water storage tank to existing water piping with new valves as shown on the contract drawings.
 - 10) The new water storage tank must be disinfected completely and tested prior to filling with water.
 - 11) The existing water storage tank #1 must be removed. This includes the storage tank, foundation, assorted piping, and piping connections.

- 12) All disassembled pieces from storage tank #1 must be set aside at the location as specified on the contract drawings.
 - 13) The site area must be re-graded including reseeding.
 - 14) The new gravel access road and storm drain piping must be constructed as shown on the contract drawings.
 - 15) A chain link fence and lighting must be installed as shown on the contract drawings.
- D. It is the responsibility of the contractor to dispose of all the items from the existing metal storage tanks, foundations (other than concrete), pipes, and accessories at no cost of the owner.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceed five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (*W. Va. Code §61-5-3*) that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.
