WHEN RESPONDING TO SOLICITATION, INSERT NAME AND ADDRESS IN SPACE ABOVE LABELED 'VENDOR'

SOLICITATION NUMBER: DEP16303

Addendum Number: 02

The purpose of this addendum is to modify the solicitation identified as (“Solicitation”) to reflect the change(s) identified and described below.

Applicable Addendum Category:

- Modify bid opening date and time
- Modify specifications of product or service being sought
- Attachment of vendor questions and responses
- Attachment of pre-bid sign-in sheet
- Correction of error
- Other

Description of Modification to Solicitation:

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.
2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

ATTACHMENT A

Addendum 2 – Questions asked during and after Pre-Bid Conference
 Clarifications/Corrections to Bid Schedule, Scope of Work, Specifications and Drawings
 DEP16303
 WOCAP ENERGY RESOURCES, INC. S-26-85 AND J.E.B., INC. S-61-82

The following questions were identified at the Pre-Bid Conference (PBC). The answers provided herein take precedence over verbal answers at the PBC should there be any conflicts between the two.

DISCUSSED AT TAILGATE OF TRUCK OVERLOOKING SITE AT J.E.B., INC.

1. Question: How deep are the underdrains?

Answer: The drawings and specifications address size and location of underdrains along ponds.

DISCUSSED AT SLUDGE CELL

2. Q: Do the dewatering tubes permanently distribute water?

A: The dewatering tubes are bags that the sludge is pumped into. The cell leaks and in lieu of rehabbing the cell we are installing the tubes.

3. Q: What are we going to do with the little bit of sludge that is in the bottom of the existing cell?

A: Sludge does not have to be removed. The specs address the surface requirements.

DISCUSSED AT THE PROPOSED BORROW AREA

4. Q: What is the borrow area for?

A: The material that you will need to construct the underdrains and any fill material needed in the pond areas. Also any unsuitable material can be disposed of in the former pond area adjacent to the proposed borrow area. Any clearing and grubbing necessary to obtain borrow material shall be incidental to the bid item for which the borrow material is being used.

Note: Borrow area is adjacent to the existing sludge disposal cells and to be accessed from the county road via existing access road that will be upgraded. Upgrading of access road at no additional cost to DEP with exception of any stone to be placed shall be paid for under the Incidental Stone bid item and any pipes installed shall be paid under the Conveyance Pipe-18 Inch bid item.

DISCUSSED AT THE AQUA FIX SITE

5. Q: Does this get sandblasted and painted?

A: See the revised specifications.

6. Q: Do you want the inside of the Aquafix structure and the exterior of the silo within the structure painted?

A: See revised specifications.

DISCUSSED AT TAILGATE OF TRUCK JUST BELOW HIGHWALL AREA AT WOCAP S-26-85

7. Q: Where is the borrow area for the existing highwall?

A: You can use material from the area directly in front of highwall. You must leave the landowner a minimum 12 foot access road from the toe of the fill to any embankment that you cut. If you need any additional material, it will have to come from the area near where the proposed ponds will be.

8. Q: Is the highwall to be backfilled on a 2:1 slope?

A: Yes.

9. Q: How much real estate do we have to work with on top of the high wall?

A: None, you must backfill the highwall to the tree line where the rock is outcropping.

DISCUSSED AT RAW WATER HOLDING POND ONE

10. Q: Does the contractor have to treat the water?

A: No. You shall divert the water after coordinating with the DEP agent on site and the agent will treat the water.

DISCUSSED AT PROPOSED POND EIGHT AREA

11. Q: Do you have measurements on your ponds?

A: Yes. They are in the specifications and drawings.

12. Q: Do you have elevations of ponds?

A: Yes. They will be revised and sent out in an addendum.

13. Q: Moving the silo, would it be acceptable, once it is taken off the pad, taken to another location to modify it and bring it back?

A: Yes, see revised specifications.

14. Q: Are all underdrains non-calcareous?

A: Yes, the stone must be clean sandstone.

DISCUSSED AT TAILGATE LOCATED BELOW HIGH WALL AT END OF PRE-BID

15. Q: Is the type of sandstone found on the existing highwall acceptable?

A: We are not going to remove any of the sandstone from this highwall area. However this type of sandstone may be acceptable if it meets the specifications for the intended use.

16. Q: Do we have to line the new ponds?

A: Yes. We are lining all of the ponds we are constructing. We will also be lining Raw Water Holding Pond One. The three existing ponds that we are converting to sludge cells will not be lined. One of the existing ponds is lined but we will be removing the liner and installing an underdrain.

CLARIFICATION: Possible future installation of gas line in area of J.E.B.

CLARIFICATION: The areas located on the pond embankments at J.E.B. will be cleared and grubbed. This is mainly some small trees growing above the treatment ponds. This clearing and grubbing shall be incidental to the Clean and Modify Settling Pond bid items.

CLARIFICATION: We have not finalized the easement agreement with the landowner on the new treatment area at WOCAP. We anticipate that happening soon. The WVDEP will flag the easement boundary once and it will be the contractor's responsibility to stay within the boundary. WVDEP will furnish the successful bidder with a copy of the Easement Agreement, plat and legal description of the property at the Pre-Construction meeting.

CLARIFICATION: There will be a period of time during the construction activities at WOCAP when the AquaFix unit is being moved and/or modified that the WVDEP will be treating water with caustic soda. This will require advance coordination between the contractor and WVDEP agent on site.

CLARIFICATION: Please be aware that some bid items on the Bid Schedule have maximum percentages and if exceeded, your bid will be thrown out. Also, these percentages are subject to change for different projects.

CORRECTIONS/CLARIFICATIONS TO RFQ NOT DISCUSSED AT PRE-BID

CLARIFICATION: Borrow area for Wocap shall be obtained in area within the Clearing and Grubbing limits as indicated on the drawings. Contractor is responsible for obtaining suitable borrow material. As indicated by onsite test pits contractor may have to drill/shoot rock in order to obtain adequate fill material. The contractor is responsible for all necessary permits.

REVISED BID SCHEDULE: Bid Schedules for both permits and Total Project Costs sheet have been revised.

REVISED SCOPE OF WORK: The following Scope of Work #'s have been revised: 23, 25, 26, 28, 35, 37, 53, 54, 73, 75, 77, 88. Revised Scope #'s have the designation "R" such as 23.-R.

REVISED SPECIFICATIONS: The following specifications have been revised: Sections 6.0.2.4, 6.0.2.5, 10.0, 12.0, 13.0, 19.0, 23.0, 23.2, 25.0, 36.0.2.4, 36.0.2.5, 39.0, 44.0, 49.0, 51.0, 54.7, 63.4, 70.0 Revised specifications have the designation "R" such as 10.0-R. Note: Detectable Underground Utility Marking Tape specification has been added.

REVISED DRAWINGS: The following drawings have been revised: 2, 3, 4, 6, 8, 9, 10, 13, 15, 16, 17, 18, 19, 20, 21 and 26. Revised drawings have the designation "R" such as 2-R.

The Revised Scope of Work, Bid Schedule, Specifications and Drawings are available upon request from Dianna Wright at the Philippi Office 304-457-4588 ext. 43276 or 304-457-3219.
