SOLICITATION NUMBER: DEP16305

Addendum Number: 02

The purpose of this addendum is to modify the solicitation identified as (“Solicitation”) to reflect the change(s) identified and described below.

Applicable Addendum Category:

- Modify bid opening date and time
- Modify specifications of product or service being sought
- Attachment of vendor questions and responses
- Attachment of pre-bid sign-in sheet
- Correction of error
- Other

Description of Modification to Solicitation:

Provide Technical questions & Answers
Provide pre-bid sign-in sheets
Provide revised bid schedule

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.
2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

ATTACHMENT A

**Addendum - Questions During Pre-Bid Conference
For DEP16305
Roblee Coal Company
Permit D-49-82**

The following questions were identified at the Pre-Bid Conference (PBC) conducted on-site on November 12, 2013. The answers and clarifications provided herein take precedence over verbal answers at the PBC and previously provided specifications and descriptions provided in the Solicitation should there be any conflicts between the two.

Q1: What about the natural gas line relocation?

A1: Bid Schedule Items 11.2 “Gas Line Relocation” and Item 11.3 “Gas Line Excavation” have been removed from the Bid Schedule. Any work performed on the 8” high pressure gas line, i.e. cutting, welding, relocating, bending, etc., will be performed by Dominion Transmission Inc. with the invoice passed directly through to the WVDEP Office of Special Reclamation under Bid Schedule Item 11.1 “Utilities”, which is a “NO BID” item. The Contractor will still be required to find the exact vertical and horizontal location of the gas line, under the direct supervision of a Dominion Gas Transmission Inspector, in accordance with procedures in the WVDEP Specifications and attached Dominion Transmission Specifications where conflicts exist between planned pipes/ditches and the gas line. Every effort shall be made to resolve conflicts between proposed pipes/ditches and the gas line and gas company clearances and proposed pipes/ditches by modifying the pipe/ditch profile grade where feasible and approved by the Engineer and Dominion Transmission Inc.

Q2: Are any quantities available, or will they be provided for incidental items such as: scaling of the highwall, sub-base preparation, pond cleanout and other items?

A2: Approximately 30,000 to 35,000 cubic yards of coal and coal refuse will be scaled off the high wall and placed in compacted lifts at the base of the highwall fill as detailed in the specifications and on the plans. The Method of Measurement for this task and all costs associated with successfully scaling the coal and coal refuse and placing it in compacted lifts at the base of the highwall shall be a lump sum pay Item 8.1 “Coal Refuse Highwall Placement”. All coal/coal refuse shall be covered with 12”, minimum, of soil cover to support vegetation.

The dimensions of the ponds are in the plans, but the actual amount of sediment in the ponds when they will be cleaned is unknown. This item is incidental to the primary work. Actual quantities may vary. Prospective bidders are required to examine the locations of the work and to determine in their own way, the difficulties which may be encountered in the prosecution of the same.

Q3: Does all of the existing refuse backfilled against the high wall need to be brought down?

**Addendum - Questions During Pre-Bid Conference
For DEP16323
Ed-E Development Co., Inc.
Permit S-10-81**

- A3:** Yes, the refuse backfilled against the high wall needs to be brought down and laid in lifts and compacted according to the plans and specifications.
- Q4:** Where does the work start and end?
- A4:** The work on the highwall starts approximately at where the trees are up by the road above the highwall on the west end of the highwall, and goes to approximately where the other trees are up by the road on the east end of the highwall. The mound visible to the west is the general area for the borrow material. Reference is made to the plans, sheets 2, 6 and 7, which show the location of the work to be done on the highwall.

REVISIONS

REVISED BID SCHEDULE

The BID SCHEDULE has been revised, and Items 11.2 and 11.3 have been removed, see Q & A #1. A new schedule has been included and labeled "Revised".

Item 8.1 "Coal Refuse Highwall Placement" has been added.

REVISED SPECIFICATIONS

8.6.3-R The method of measurement for excavating coal, coal refuse, and other materials from against the highwall and providing a level compacted base for highwall backfill operations is a lump sum pay Item 8.1 "Coal Refuse Highwall Placement". The method of measurement for proof rolling, compacting, or undercutting and compacting the area that forms the base of the highwall fill is a lump sum pay Item 8.1 "Coal Refuse Highwall Placement".
