**Addendum #1 - Questions During Pre-Bid Meeting  
Pleasant Valley (Brown) HW & Portals  
DEP16367**

The following comments and questions were identified from the Pre-Bid Conference. The answers provided herein take precedence over verbal answers at the PBC should there be any conflict between the two.

**Questions:**

- Q.** How is the row of wattles above the highwall to be installed?
- A.** There are several locations along the bench that the contractor can access the top of the highwall to install the wattles.
- 
- Q.** What is the water quality of the mine discharge?
- A.** It ranges from PH 2.81 to 4.73.
- 
- Q.** Are there piezometers on the project that need to be closed?
- A.** Yes
- 
- Q.** The Contractors expressed concern that the reforestation seed mixture would not produce sufficient vegetative cover to allow for the release of the NPDES Stormwater Permit. This concern has been addressed in the following manner:
- A.** The Permanent Reforestation Seed Grass Mixture has been revisited and revised to increase the rate of application from 50 lbs. per acre to 90 lbs. per acre and the mixture blend adjusted to increase the percentage of perennial grasses.

Under Section 6.2.3.2 second paragraph "The reforestation seed mixture shall consist of both a permanent reforestation grass seed mixture at a rate of 90 lbs. per acre and a permanent reforestation tree seed mixture at a rate of 14 to 18 lbs. per acre."

Addendum #1 – Pleasant Valley (Brown) HW & Portals  
 DEP16367
