**DEP16565**  
**Marsh Run Portals**  
**Addendum #2**

Item 1: The contractor will have 180 days from the date of the Notice to Proceed to complete construction activities on the project. The \$250 per day liquated damage clause will be in effect after the 180 days. However, the total performance period will be 365 days from the date of the Notice to Proceed for invoicing purposes.

Item 2: On Plan Sheet D-3, the “Typical Underdrain Detail” shows No. 1 stone. This note should read “3”-6” non-calcareous stone”. Please also refer to Section 7 of the specifications for additional underdrain details.

Item 3: Q: Is a “Smart Ditch” an acceptable substitute for the ditches proposed on the project?

A: No. All ditches should be bid as per the project plans and specifications.

Item 4: Concerning the location of underdrains, some underdrains are shown on the project plans. Extensive excavation is not anticipated for the installation of the underdrains. The intent is to intercept and convey water that may be present prior to placing backfill material. Please see project plans for details and locations. Additional underdrains may be required at the direction of the Engineer. Underdrains are paid under Bid Item 7.7, “Underdrain (Per Linear Foot)”.

Item 5: Unless others approved by the Engineer, all organic material shall be burned on site. However, burning of the combustible material will not be permitted within close proximity to coal seams, structures, or on or near coal refuse. The Contractor shall obtain all permits and licenses required prior to burning the material. A plan showing the location of material to be burned and all fire control measures to be implemented, including copies of permits and licenses shall be submitted to the WVDEP’s representative at the site for approval. All timber 8” in diameter and larger at stump height shall be cut prior to clearing and grubbing operations. Timber shall be topped with branches removed and stacked and stockpiled in an appropriate manner in an accessible location approved by WVDEP on the property from which it was cut. Timber to be stockpiled shall not be pushed down by equipment prior to being cut nor can it be indiscriminately shoved into a stockpile.

Item 6: Please note that Marsh Run is a direct tributary of Cedar Creek, a known habitat for the endangered snuffbox mussel. The Contractor is reminded to take all necessary precautions during dewatering operations, and during the installation and maintenance of all erosion and sediment controls.
