5.0 Substitution Requests

5.01 Celcore and/or Elastizell as substitute for Lightweight Insulating Concrete Specification system 07 2200: **Not Approved** EPS Expanded polystyrene does not appear to be a component of the lightweight insulating concrete manufacturer's system. It is difficult to evaluate a system without all of the components. Section 1.4 of 07 2200 item 3.

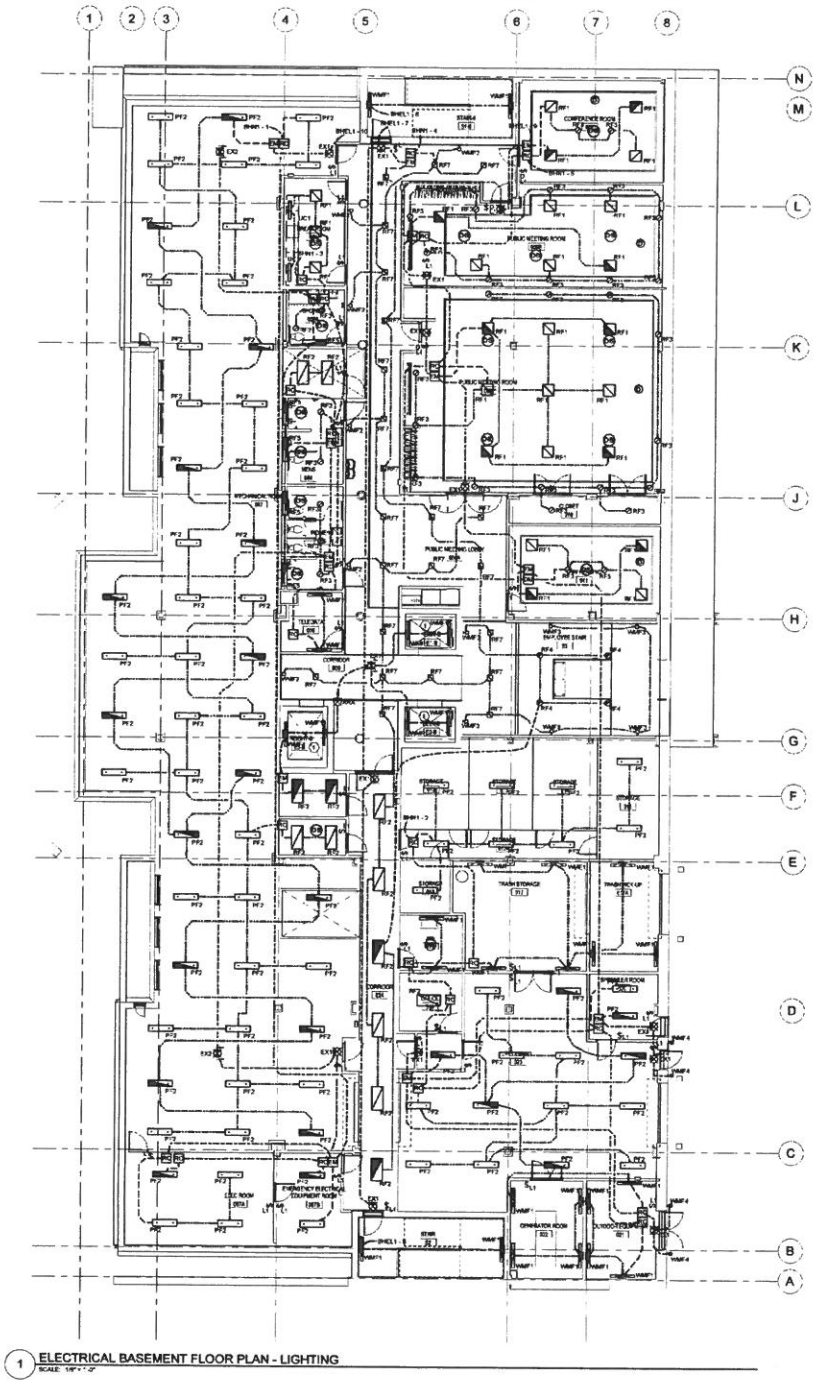

5.02 SOPREMA as substitute for Modified Bituminous Membrane Roofing Specification 07 5200: **Not Approved as submitted.** While Soprema may have systems that are similar they are not equal as submitted. Modified Soprema G, Elastophene Sanded, Elastophene FR GR SG, appear to be of the most Basic and economical solutions for Soprema. While the warranties and method of attachment is the same, Soprema's own literature states this is a Basic System and not Optimal. This is not the Premium system desired.

5.02 If a product or manufacturer has been accepted to the lists of approved manufacturers through addenda, it does not relieve the manufacturer of the shop drawing submittal process to ensure total compliance with the performance specification.
