Addendum One ISCP0029- Technical Questions Feedback

RFQ Description: This RFQ is to purchase a Core Switch to support connectivity from the Capitol Complex.

Other Questions from Vendors

1. Does the manufacturer and Business Partner need to be registered (listed, qualified) with the State Contract Office?

The vendor will need to be registered with the State's necessary entities listed on the purchasing website via the vendor portal.

2. Will WVOT accept bids that include exceptions to the Mandatory Requirements?

No. all re requirements listed are essential to network operability.

3. Will WVOT accept equipment that does not support EIGRP?

No, with the current infrastructure built around the EIGRP protocol the implementation of OSPF or any other protocol would not be equal as it is not compatible with our mandatory requirements. Immediate implementation of other protocols would cause loss of connectivity and outages to the state network. The use of other protocols would also require significant unplanned user intervention and reassessment of more than 400 remote site needs owing to the lack of compatibility. In addition, this immediate and unplanned network change would cause multiple outages and additional costs for facilities, which operate 24/7/365 such as Jails, State Hospitals, etc.

4. Will WVOT accept equipment that does not support MPLS or MPLS Traffic Engineering Fast Reroute?

No. This is a requisite to achieve network functionality for operations.

5. What is the definition of (Section 4, 3.1.6) must be "fully compatible" mean?

This switch must integrate with the system outlined without modification to our existing network infrastructure.

6. What is the definition of (Section 4, 3.1.6) must be "interoperable" with the existing equipment and architecture mean?

Same as above.

7. Is WVOT strictly looking for Cisco equipment or are they open to a replacement technology?

Addendum One ISCP0029- Technical Questions Feedback

WVOT has and will continue to incorporate other vendors hardware into our intranet, however hardware that provides core connectivity must meet the outlined mandatory requirements.

- 8. **On this RFQ, they specify in 3.1.1 that they want standard 3 year manufacturer warranty, however on the pricing page they list 1 year of Enhanced Smartnet. Can you clarify if they want 3 years of Enhanced or just 1 year with the remaining standard warranty.**

That was a typo and will be corrected to read 3 years.

***** End of Questions
