ATTACHMENT A

1Q. Regarding the current Active Directory infrastructure – is the Active Directory information replicated between Domain Controllers at both locations where each of the SSL-VPN appliances are to be installed?

1A. Yes

2Q. Servers with what Server Operating System(s) are used to host your Active Directory infrastructure?

2A. Windows 2008 R2 Standard

3Q. Are the two locations at which the SSL-VPN appliances are required to be installed linked via a metro LAN – that is to say, could both SSL-VPN appliances installed one at each site, communicate with the same, solitary server on the LAN for authentication purposes?

3A. Yes.

4Q. Is there a Domain Controller at each of the two locations (or at one location if it can be queried from both locations) that has an SSL certificate installed that would be suitable for secure LDAP communication across the internal network?

4A. We have two (2) Domain Controllers. The Primary Domain Controller is located in the state's data center at the Capitol, which is where one of the VPN hardware appliances will need to be installed. The Backup Domain Controller is located in Charleston at Tax's IT headquarters, but the 2nd VPN hardware appliance will be installed at disaster recovery site to be named later.
