Addendum I

WWV14893

Q 1. Could you please clarify the question below and explain how it pertains to a printer. Do you want the resources to reside on the color printer or the Fiery controller?

3.1.35 The system must have the option of storing and retrieving all required LCDSM resources either on a centralized system or a secured network repository.

A1. Line Control Data Stream/Metacode resources define the fonts, graphics and data layout for the printed output. The resources should reside on the Fiery Controller.

Q 2. Could you let me know what manufacturer and model the State is looking for as that would make it easier to get the agency exactly what they would like.

A1. Under WV State Purchasing Policy and Guidelines the agency specification cannot be brand specific, this may eliminate vendors from the competitive bidding process.

Please see the rule shown below.

4.4.1.1 A "Brand Name(s) or Equal" Specification is based upon one (1) or more manufacturer's commodity description(s), model number(s) and quality level. The manufacturer's commodity numbers must be easily identified in a current publication that is available to most vendors. Commodity descriptions must be sufficiently detailed, and specify only the required features needed for the application. Unless a feature or requirement is specifically listed on the requisition, it shall not be used to disqualify a vendor.
