Region IX: Nicholas, Fayette, Greenbrier, Summers and Monroe counties.

Region X: Raleigh, Wyoming, McDowell and Mercer counties.

It is preferred the required information be submitted with the bid. Failure to provide the required information at the request of the Purchasing Division shall result in disqualification of the bid.

UNLEADED GASOLINE shall comply with the most recent ASTM D 4814-07a or the most current edition of the Standard Specifications for Automotive Gasoline. The minimum anti-knock octane for Unleaded Gasoline is 87. E-10, Ethanol Blend (87 Octane minimum) shall be an acceptable substitute fuel for unleaded gasoline. Whenever E-10 is delivered, it must be noted as E-10 Blended Fuel on the vendor's invoice.

**FUEL TW011 - Tank Wagon Delivery of:
Gasoline, E-10, Diesel, Winterized Diesel, & Heating Fuels
Specifications**

8

**TYPE II +10F
TYPE II ULTRA LOW SULFUR**

Diesel Fuel Oil shall be an ultra low sulfur all-purpose diesel fuel oil intended for the use in all automotive type diesel engines under all normal conditions of service. Fuel shall be free from water, grit, acid, and fibrous or other foreign matter likely to clog or injure pumps, nozzles, or valves.

SPECIAL REQUIREMENT OF THE DIVISION OF HIGHWAYS: During the period of November 1 to February 28, diesel motor fuels shall be blended with a permissible diesel additive to reduce operability parameters (cloud point, cold filter plug point) and to increase winter operability, maintaining state/federal mandated regulatory specifications for on-road diesel fuel.

HEATING OIL: These specifications cover the grades #1, #2, #4, and #5 fuel oils for various types of fuel burning equipment. Must meet specifications of ASTM Heating Oil D396-09 or the latest edition.

The fuel oils herein specified shall be hydrogen oils free from grit, acid and fibrous or other foreign matter likely to clog or injure the burner or valves. If required, the oil shall be strained by being drawn through filter or wire of 16 mesh to the inch. (U.S. Standard sieve 16, ASTM 1, 190 microns). The clearance area through the strainers shall be at least twice the area of the suction pipe and strainers shall be in duplicate.

The various grades of fuel oil shall conform to the detailed requirements for Fuel Oils "National Bureau of Standards" CS-12-48, dated September 25, 1948, or the latest edition: It is the intent of these specifications that failure to meet any requirements of a given grade does not automatically place an oil in the next grade unless in fact it meets all requirements of the lower grade.

The technical requirements of the National Bureau of Standards Commercial Standard CS-12-48 are identical in substance with tentative specifications for fuel oil, American Society of Testing Materials D396-48T latest edition.

All fuel oil not meeting specifications is not acceptable to any of the localities and must be removed from tank at vendor's expense. No additional product may be added to change the grade of the product.

No allowances shall be made for any reproducibility factors in the prescribed test methods. The supplier will allow samples to be taken prior to discharging of product into localities tanks. Samples will be taken without prior notices.

PRICING: The State of West Virginia will accept bids only by Region locations. Vendors must bid a firm fixed mark-up price per gallon on fuel delivery with product price tied to the OIL PRICE INFORMATION SERVICE (OPIS) publication. Average rack price from OPIS report + State Excise Tax for Motor Fuel (if applicable) + Federal UGT Fee.
+ Vendors mark-up as quoted in contract
= price per gallon delivered.

Deliveries shall include a legible metered delivery ticket which has been processed through a meter certified and sealed by the State of West Virginia, Division of Weights and Measures, and stamped with quantities, location, time (a.m./p.m.) date, driver and product. When bulk deliveries are made the driver shall stick the tank before and after product is delivered and enter the readings onto the delivery ticket.

A copy of the delivery ticket, signed by both the driver and a person from the receiving facility, should be left at the location receiving the fuel.

Delivery tickets must include the location where delivery was made, the product(s) delivered, the blended percentages, the number of gallons delivered, and the rack price or prices for blended fuels.
