HON FULL LIFETIME WARRANTY

YOUR HON FULL LIFETIME WARRANTY

Every time you purchase a HON product, you're making an investment in your future. We're proud to play a part in that future, and you can trust us to do our best for as long as you need us.

The HON Full Lifetime Warranty is our assurance to you that the HON desks, workstations, seating, tables, or storage you purchase will be free from defective material or workmanship for the life of the product.

In the unlikely event that any HON product or component covered by the HON Full Lifetime Warranty should fail under normal workplace use as a result of defective material or workmanship, HON promises to repair it. If we are unable to repair it, we will replace it with comparable product, or if preferred, we will refund the purchase price.

WHAT'S COVERED BY THE HON FULL LIFETIME WARRANTY?

Your HON Full Lifetime Warranty applies to product manufactured after January 1, 2011. All HON product lines, materials, and components are covered by the HON Full Lifetime Warranty except for the items described below.

The specific product lines, materials, and components listed below are covered under HON's Full 12-Year, Full 10-Year, and Full 5-Year Warranties (from date of purchase).

HON'S FULL 12-YEAR WARRANTY

- Electrical components (LED task lights, lamps and ballasts are not covered)
- Seating *ilira*®-stretch
- Seating controls
- Pneumatic Cylinders
- Wood Seating
- Accessories
- Laminate Surfaces
- Veneer Surfaces

HON'S FULL 10-YEAR WARRANTY

- Soothe™ Patient Recliner Mechanism
- Signal seating upholstery fabric

HON'S FULL 5-YEAR WARRANTY

- All LED task lights
- Panel and seating textiles
- Electric Height Adjustable Bases (Including Memory Control)
- Soothe™ Patient Recliner Central Lock Mechanism
- Soothe™ Patient Recliner Pivoting Arm

These warranties apply to HON products sold within the United States of America, U.S. Territories, and Canada, as well as U.S. Military and Federal Agency purchases (regardless of location).

IS ANYTHING NOT COVERED?

There are a few exclusions to the HON Full Lifetime Warranty and to the 12-, 10-, and 5-year warranties. These exclusions are:

- All *basyx* by HON® products (these products are covered under a separate *basyx* by HON® warranty).
- Color-fastness or matching of colors, woodgrains, or textures occurring in wood, leather, or other materials that naturally exhibit inherent color variations.
- Customer's own materials (COM) selected by and used at the request of the user.
- Modifications or attachments to the product that are not approved by The HON Company and product failures resulting from such modifications or attachments.
- Product normal wear and tear, which are to be expected over the course of ownership.
- Products that were not installed, used, or maintained in accordance with product instructions and warnings.
- Products used for rental purposes.
- Damage caused by cleaning chemicals.
- Dye transfer caused by external contaminants (including clothing and accessory dyes such as those used on denim jeans) may migrate to lighter colors. This phenomenon is increased by humidity and temperature and is irreversible.

WARRANTY REQUESTS OR QUESTIONS?

Your HON dealer is our mutual partner in supporting your warranty requests. To obtain service under this warranty, please contact your HON dealer. If you are not sure who your dealer is, please call HON Customer Support at 800.833.3964.

THAT'S YOUR HON FULL LIFETIME WARRANTY AS AN OWNER OF HON PRODUCT, THE WARRANTY EXPLAINED HERE IS YOUR SOLE AND EXCLUSIVE REMEDY. THERE ARE SOME EXCEPTIONS IF YOU PURCHASED THE PRODUCT FOR HOME OR PERSONAL USE WHICH ARE EXPLAINED BELOW. TO THE EXTENT ALLOWED BY LAW, THE HON COMPANY MAKES NO OTHER WARRANTY, EITHER EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THE HON COMPANY WILL NOT BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES.

A WORD ABOUT PURCHASES FOR HOME OR PERSONAL USE

Please note, this section only applies if you purchased your HON product for your home or for your own personal or family use. HON's warranties give you specific legal rights and you may have other rights, which vary from state to state. As a consumer purchaser, the complete exclusion of implied warranties noted in the above paragraph does not apply to you, however, to the extent allowed by applicable state law, the implied warranties are limited to the applicable term of the warranty. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion or limitation may not apply to you.

LIMITED 5-YEAR WARRANTY

The HON Company promises to repair or replace any *basyx* by HON® product or component that is found to be defective in material or workmanship within five (5) years from the date of original purchase so long as you, the original purchaser, still own it. This is your sole and exclusive remedy. This warranty is subject to the provisions below. It applies to product manufactured after January 1, 2013.

Limitations:

- Upholstery on chairs is warranted for two years from date of purchase.
- Damage caused by the carrier in-transit is handled under separate terms.

Exclusions:

This warranty does not apply and no other warranty applies to:

- Normal wear and tear, which are to be expected over the course of ownership.
- Modifications or attachments to the product that are not approved by The HON Company.
- Products that were not installed, used or maintained in accordance with product instructions and warnings.
- Products used for rental purposes.

Seating Usage

Normal commercial use for seating is identified as the equivalent of a single shift, forty-(40) hour workweek. To the extent that a seating product is used in a manner exceeding this, the applicable warranty period will be reduced in a pro-rata manner.

A word about color variations, fabrics and finishes:

The HON Company does not warrant the color-fastness or matching of colors, grains or textures of covering materials.

Customer's Own Material (COM)

Not available on *basyx* by HON® product.

TO THE EXTENT ALLOWED BY LAW, THE HON COMPANY MAKES NO OTHER WARRANTY, EITHER EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THE HON COMPANY WILL NOT BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES.

Notice to purchasers for home or personal use:

Federal law does not permit the exclusion of certain implied warranties for consumer products. Therefore, if you are purchasing this product for home or personal use, the exclusion of implied warranties noted in the above paragraph does not apply to you. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

This warranty applies only to products sold within the United States of America and the Commonwealth of Canada.

To obtain service under this warranty:

Your *basyx* by HON® Dealer is our mutual partner in supporting your warranty requests. By following the procedures outlined below, you can be assured of the best level of service. Please note: Consent of The HON Company must be obtained before any warranty work is performed. To obtain consent, please take the following steps:

1. Contact the Dealer from whom the product was purchased within 30 days of discovery of the defect. Be prepared to affirm that you are the original purchaser of the product and to provide the serial number(s) from the product in question.
2. Your Dealer will gather all pertinent information regarding the claim, inspect the product and contact a HON Company customer service representative. (Please allow a reasonable amount of time for inspection and review.)
3. If The HON Company affirms that the product in question is eligible under the conditions of the warranty as stated above, the customer service representative or another representative of the Company will determine whether to provide replacement parts, authorize repairs or replace the product.

Carded Partnership Textiles

Carded Partnership Textiles is the result of The HON Company's partnership with textile industry leaders CF Stinson, Maharam, Momentum and Ultrafabrics, LLC. The extensive collection of design-driven upholstery fabrics create a superior offering at a great value. Carded Partnership Textiles significantly updates HON's offering, expanding it with fresh and exciting fabrics.

- **Fabric Warranty:** Carded Partnership Textiles are covered by HON's Full Lifetime Warranty.
- **Lead-times:** Orders specified with Carded Partnership Textiles will be acknowledged based on standard HON product lead times.
- **Availability:** HON will regularly introduce new Carded Partnership Textiles and reserves the right to change the offering at any time.
- **Fabric Samples:** Carded Partnership Textiles are carded jointly by HON and the supplier.
- **Fabric Memo Samples:** Please contact the supplier directly for memo samples:
CF Stinson: (800) 841-6279
Maharam: (800) 645-3943
Momentum: (800) 366-6839
Ultrafabrics: (877) 309-6648
- Find fabric designators and series availability on pages 447-455, 462-463 and 480-481.

HON COM Pattern Match

- **Seat to Back COM Pattern Match** provides alignment of patterns or stripes on chair front surfaces. Additional yardage may be required depending on pattern repeat. If Seat to Back COM Pattern Match is needed, please contact HON Customer Support/Tailored Solutions. Upcharges are limited to the following product series: Endorse™ Lounge Seating, Flock® Collaborative Seating, Invitation® Lounge Seating, Park Avenue Collection® Lounge Seating, Perpetual® Modular Seating, Soothe™ Seating.
Single Chair \$45.00 ea. list upcharge
Two-seat Chair \$60.00 ea. list upcharge
Three-seat Chair \$75.00 ea. list upcharge
- **Chair to Chair COM Pattern Match** provides identical pattern alignment from unit to unit and is available with an upcharge. Chair to Chair COM Pattern Match is reviewed on a case by case basis as several factors are reviewed to determine additional yardage required, including repeat and pattern direction. If Chair to Chair COM Pattern Match is needed, please contact HON Customer Support/Tailored Solutions.

Non-carded Partnership Textiles

HON also offers its products in pre-approved fabrics from CF Stinson, Maharam, Momentum and Ultrafabrics, LLC. Simple to specify, these fabrics have been tested to HON's (COM) criteria for manufacturing feasibility. Each Non-carded Partnership Textile has been given a HON fabric designator and grade to make the ordering process convenient. You select the fabric and HON delivers a hassle-free experience. For a complete listing, please visit hon.com/Fabrics-Finishes.

- **Fabric Warranty:** Non-carded Partnership Textiles are covered by HON's Full Lifetime Warranty.
- **Lead-times:** Orders specified with Non-carded Partnership Textiles will be acknowledged based on the fabric supplier's delivery schedule.
- **Availability:** CF Stinson, Maharam, Momentum and Ultrafabrics, LLC reserve the right to discontinue patterns and colors from this program.
- **Fabric Memo Samples:** Please contact the supplier directly:

The HON Company has established paint grades to allow customers flexibility and ease in doing business with HON. HON has three paint grades Core, Choice and Custom.

Core Paint Colors

HON has established core paints which are available on all core products. Core products are identified throughout the pricer by the symbol ©. The core colors are Black, Charcoal, Greige, Light Gray, Muslin, Putty, Loft and Shadow.

ColorCorrect®

In addition to the 8 core colors and 3 standard Choice colors, HON offers the ColorCorrect program. Under The ColorCorrect program customers can order 22 of the industry's most popular colors. Still can't find the color that is just right for you? Refer to the details below regarding the Custom Paint Color program.

Choice Paint Colors (Industry Standard)

The HON Company has matched 22 of the industry's most popular paint colors. HON also offers two Metallic colors, Champagne (T4) and Platinum (T1) and one standard choice paint, Brilliant White (WHIT). These colors have HON codes assigned to them and are available on specified HON brand metal casegoods. Please see individual pricer pages for eligible series and up charges for Choice paints. Choice paints are listed in the pricer pages under the column Choice/Metallic. Up charges vary by product (all standard discounts/competitive project pricing applies). No minimum quantity required. If you are matching existing office furniture and are unsure of the name or if the color is a match, a painted metal sample is available upon request from HON Literature Fulfillment.

Custom Paint Colors

With The HON Company's state of the art color matching equipment just about any color can be matched. A sample of the exact color desired is required for matching and approval. An exception to this match/approval process is if an existing Sherwin Williams® or PANTONE® color code is provided.

For each newly requested paint, a net fee of \$500 will be charged to cover costs associated with the matching process.

For existing, previously matched paints, there is no matching fee, however there is a \$100 net fee for sample panels required for the approval process. Refer to MyProjects on the HON Portal for a list of approved Custom paints.

For all Custom paint requests, HON will send a production sample for the customer to review and approve. Once the signed paint sample is received at HON the order can be entered. Please see individual pricer pages for eligible series and up charges per unit for Custom paints. Custom paint prices are listed in the pricer pages under the column Custom. Up charges vary by product (all standard discounts/competitive project pricing applies). A quantity of 10 like-model minimum order is required for Custom paints. For complete program details, access Tailored Solutions on the HON Ready Portal at honready.hon.com.

Some custom colors could fall outside of this program due to production costs or not meeting HON quality standards. This could include Sherwin Williams developed colorants. The HON Company may apply additional charges to some colors which are costly to apply, and deny some orders on colors that cannot meet our high quality standards. We will notify the customer upon completion of our evaluation if a change in price is required or if the request is denied.

Environmental Statement

CLEARING THE AIR.

In 2006, The HON Company became the world's first office furniture manufacturer to have products certified by the Indoor Advantage™ Program. Virtually all manufactured products emit chemical compounds into the air. Indoor Advantage evaluates these compounds to help improve the air quality within enclosed indoor environments.

Developed by Scientific Certification Systems (SCS), Indoor Advantage subjects products to specific indoor air quality standards. Further, Indoor Advantage tests individual components as well as overall assemblies, and provides detailed analysis of a comprehensive range of all chemicals rather than simple pass/fail for only the most common. This enables us to help our suppliers reduce the environmental impact of their products and processes, too.

SCS offers two levels of certification:

Indoor Advantage™ certifies conformance with LEED-CI criteria for EQ4-5, as well as BIFMA X7.1 Low-Emitting Furniture and Seating.

INDOOR AIR QUALITY

On the level™

level, the BIFMA e3 sustainability standard, was developed in response to the increasing demand for proof that manufacturers are living up to their environmental claims. level Certification is based on four sustainability attributes: Materials, Energy and Atmosphere, Human and Ecosystem Health, and Social Responsibility.

The HON Company has received level™ 2 certification for 60 product lines. That means more than 80 percent of our product volume has earned this important certification.

The level certification is a multi-attribute certification label for products that have met environmental, social and quality standards.

the sustainability certification program for furniture

Laminate Casegoods and Systems are certified as a typical workstation. Individual models contribute to the overall workstation certification.

Products that meet these specifications are identified throughout this publication with the following icons:

HON DAILY

HON Daily makes it easy

Small business owners get pulled in many directions on a daily basis. When they find a trusted resource that can take one of their tasks off their plate, they welcome the help. You can be that resource for small business clients.

Meet HON Daily, a comprehensive office furniture program that caters to small and medium-sized businesses. In the past, these clients have been a challenge. They typically buy less furniture, yet require a higher level of service. Not anymore. HON Daily streamlines the buying process, making it easy for customers to specify and buy HON furniture. You'll complete small orders more efficiently — and make more money doing it.

GSA Contract Information

Model numbers identified with the verbiage “**Open Market**” are not offered on HON's GSA contract GS-27F-0015S. Model numbers identified with the following verbiage “Must be purchased with a configurable end product. If ordered separately, not on GSA contract” is to mean that these configurable components or options:

- Have no functionality or capability without being integrated into an end product, and
- Are not separately orderable; an eligible Schedule ordering activity may only purchase them with a configured system that is on contract.

EDGE PROFILES

Tops have both shaped and flat edges (specified on model-by-model basis).

- The flat edges allow side-by-side placement of worksurfaces without gapping. The tops of corner units are shaped on one side (the user's side). All other sides are flat-edge for snug fit with other model(s).
- The tops of credenzas, returns, bridges, freestanding corner units, lateral files, stack-on storage, stack-on organizers, bookcases, tower organizers, the tower bookcase, the storage cabinet, wardrobe/storage cabinets and slide-out collaborative surface are shaped on the user's side.
- The tops of conference and occasional tables are shaped on all sides.
- The tops of peninsulas are shaped on all sides except above the end panel or at point of attachment in the case of models HVN371R and HVN371L.
- Double pedestal desks have shaped edges on all four sides. Single pedestal desks have shaped edges on three sides.

DRAWER/DOOR HANDLES

Announce handles were designed to be easy to grasp. Handles are metal.

- Drawer/door handles are available in one style and one finish/color.
- Handles are located on all pedestal drawer fronts (pencil, media, box and file drawers), on lateral file drawer fronts, on storage tower, mobile pedestal, mobile seat pedestal, storage cabinet and the wardrobe/storage cabinets. All handles have horizontal orientation except those on the following models: HVN753R, HVN753L, HVN614X, HVN615X, HVN614G.

NOTE: Handles are not used on stack-on or wall-mounted storage doors or tower organizer doors.

VENEER MATERIALS AND FINISHES

- All exterior surfaces utilize slip-matched cherry or maple veneer except the backs of 2- and 5-shelf bookcases, wall mount storage cabinets, storage tower, towers organizer and tower bookcases.
- All veneer is carefully selected and matched to assure consistency.
- All veneer surfaces are finished in a multi-step process to a rich satin sheen. Finish is stain- and mar-resistant for lasting beauty and for easy care and maintenance.
- Due to the natural, unique characteristics of wood, minor variations in finish color, grain, and texture may be visible.

Tops

All tops feature 3-ply balanced panel and solid core construction; balanced panel construction resists warping.

- Tops are 1 1/8" thick, including occasional tables and conference table tops.
- Tops are available in one edge profile shape (Knife Edge).
- All double pedestal desk tops have shaped edges on all four sides. All single pedestal desks will be shaped on three sides — user, approach and pedestal sides.
- All credenzas, returns, bookcases, and laterals have shaped edges on user side only.
- Optional grommets available in Matte Chrome (1) — see grommet location by model for locations, when specified.

Cord Management

- Optional cord management grommet located in tops of returns, credenzas (except credenza with storage), freestanding corner unit and the following bridge models: HVN349X, HVN343X, HVN336X, HVN349M, HVN343M and HVN336M.
- After installation, stack-on storage models feature a 1¼" gap at bottom of back panel for cord management.
- Models HVN303X, HVN171R, HVN171L, HVN182R, HVN182L, HVN122R, HVN122L, HVN271D, HVN271R, HVN271L, HVN272R, HVN272L, HVN273R and HVN273L all have wall/outlet access panels built-in to the back of the unit. **Not recommended for open office plan due to access panels.**
- Optional cord management grommets are available in Matte Chrome for standard positioning on bridges, credenzas and return models. The holes are bored and the hardware is ordered and shipped separately.

Locking

Locks standard on all desk, credenza, and return pedestals, lateral file drawers, mobile pedestals, the storage cabinet with doors and the wardrobe/storage cabinets. Key numbers are randomly assigned; units with multiple pedestals are keyed alike. Core removable locks allow for units to be quickly and easily re-keyed. Removable lock core replacement kit HF27 is available for Announce products manufactured after November, 2009; for Announce products made prior to that date use model HF23B.

Leveling Glides

Adjustable hex leveling glides allow floor-standing furniture to be easily leveled without lifting the unit; glides have a ¾" adjustable range.

Drawers

All drawers are five-sided construction. Five-sided construction allows easy drawer alignment or removal of drawer fronts.

- Drawer fronts are ¾" construction.
- Drawer fronts are vertically matched in sets to assure continuous grain pattern.
- Top pencil drawer comes standard with pencil tray.
- Media drawer comes with (2) easily applied media rails which help to organize and hold CD's and DVD's (black only, does not have to be specified).
- Hangrails are standard in all file drawers.

Drawer Suspension

Drawers operate on high quality steel ball-bearing suspensions to ensure quiet, smooth, long lasting operation.

- Full extension pencil, media and file drawers allow complete and easy access to all contents.

Filing

File drawers standard with hangrails for the following filing scenarios:

- Filing capabilities on 72"W desks: side-to-side letter (2 deep) or legal (1 deep) filing.
- Filing capabilities on 72"W credenzas, 48"W returns, and 42"W returns: front-to-back letter filing; or side-to-side letter and legal filing (1 deep).
- Filing capabilities for the file drawer on credenzas and returns with multi-file: front-to-back letter filing; or side-to-side letter and legal filing (1 deep).
- Filing capabilities on Lateral Files are 30½" of filing with two rows of front-to-back letter or legal, or one row side-to-side letter or legal.

Components used are listed on pages 20-29. Order components individually.
Other configurations are possible, including various sizes of some components.

The concepts of luxury and utility are not mutually exclusive with the Park Avenue Collection. Form and function culminate in an elegant, gratifying experience that sets the standard for unsurpassed personal satisfaction. Each piece reflects a work of art by experienced craftsmen.

The Park Avenue Collection provides avenues of expression for the most demanding tastes. Edge treatments, drawer handle choices, as well as storage modularity, are key components of the series that bring personalized productivity and efficiency to higher levels.

Park Avenue offers a variety of superb workspace arrangements for virtually any office environment. From executive offices to reception stations, choices in privacy, storage and seating are abundant. The virtuoso Park Avenue Collection composes an elegant environment for guests and staff. Created with painstaking care to strict performance standards, Park Avenue reflects a commitment to enduring quality, durability and sophisticated beauty.

- Multiple edge profiles, drawer handle options and finishes.
- Rich, hand finished slip-matched veneers.
- Includes conference, reception and modular storage options for the entire office.
- Cord management grommets allow routing and hiding of wires and cables.
- All file drawers include hangrails for letter- or legal-filing.
- Full extension drawers operate on smooth gliding, long-lasting precision ball-bearing suspensions.
- Core removable locks allow for units to be quickly and easily re-keyed. (For Park Avenue Veneer, use replacement kit HF27 for units manufactured after November 2009; or HF23B for products made prior to that date.)
- All models meet or exceed ANSI/BIFMA and ISTA performance standards.
- Covered by The HON Full Lifetime Warranty.

Caring for veneer...

- Wipe the surfaces once per week using a clean, water-dampened soft cloth. **Always wipe in the direction of the grain.**
- Make sure the wood is not exposed to harsh solvents. **We do not recommend commercial products containing high amounts of wax or silicon** as they can leave a residue and may alter the appearance of the wood over time.
- Clean up spills right away.
- **Use a desk pad** to prevent damage from writing instruments.
- **Use felt or cork pads** on the bottom of contact points of accessory items to avoid scratching the finish.
- **Avoid placing water glasses or hot coffee cups** directly on the surface.

Color Changes...

Color change is a natural phenomenon of wood. Woods change color with prolonged exposure to ultraviolet light coming from windows and fluorescent lighting. Cherry wood veneer color changes are most rapid, taking on a darker “golden” tone with age. Walnut will lighten with “golden” hues. As a rule, lighter colored finishes (i.e. Bourbon Cherry) are more apt to show these color changes compared to darker finishes (i.e. Mahogany and Walnut). Darker colors act as a “sun block” and reduce the aging effect. **We recommend that for the first year, you occasionally move the items kept on your desk, such as desk pads, telephones and in/out baskets, to a different location on the surface to allow uniform amounts of light to reach all surface areas.** This will help prevent light or dark spots from occurring. All wood manufacturers have the same issues, so the same care can be applied to any veneer product.

Leveling the unit...

- With the unit in final position, make sure all adjustable glides are fully inserted.
- Make sure the unit is level from end-to-end and front-to-back to insure proper drawer alignment.
- Once leveled, stand on the user’s side and visually check for proper spacing between drawer fronts and for even matching of drawers, vertically and horizontally.
- If there is a noticeable difference in drawer spacing, raise one corner of the unit approximately $\frac{3}{8}$ ”, turning the adjustment glide. Visually check for spacing.
- If spacing becomes worse with adjustment, adjust glide back to the original position. Then adjust the opposite corner by $\frac{3}{8}$ ”.
- File and box drawer fronts (without hardware) can be adjusted for alignment by slightly loosening the two screws on the inside of the drawer front, tapping the front into position with a soft mallet, then re-tightening the screws.

Drawer alignment and operation...

- Check to see if the unit is level.
- If not, adjust the leveling glides before loading drawers with material.
- Check leveling again after loading the drawers.
- If furniture is moved, re-level.
- Maintain smooth drawer operation by lubricating the area housing ball-bearings every 3 to 6 months with a jelly-type, petroleum-based lubricant.
- To re-seat drawer slides, occasionally pull the file drawer slides to their fullest extension and tug firmly several times to insure they are completely extended (the ball-bearings tend to “creep” to the position most commonly used and may not allow free operation to the fullest extension without occasional re-seating).

Door hinge adjustments...

- The concealed “European designed” hinges on HON doors allow easy three-way adjustment of door alignment.
- To raise or lower the door, locate the recessed Phillips screw farthest to the rear of the hinge. Rotate this screw to adjust the height of the door. You do not need to loosen the center locking screw to make this adjustment.
- To adjust the side-to-side gap between the doors, adjust the Phillips screw closest to the door on the surface of the hinge body. You do not need to loosen the center locking screw to make this adjustment.
- To adjust the in-out pitch of the door faces, adjust the center screw to the correct position.

Edge Profiles

Tops have both shaped and flat edges (except for conference and occasional tables). Shaped edges are softened to improve user comfort. Flat edges allow side-by-side placement of worksurfaces without gapping. Desks, with the exception of reception desks and peninsulas, are shaped on the user's side and the approach side. The tops of corner units are shaped on three sides (the user's side and the two 24"D sides).

The tops of reception desks are shaped on the user's side. The tops of credenzas, returns, bridges, lateral files, stack-on storage, stack-on organizers, bookcases, tower organizers, the tower bookcase, the storage cabinet, wardrobe/storage cabinets, and 24"D and 14¾"D modular tops are shaped on the user's side. The tops of transaction counters are shaped on the approach side. The tops of conference and occasional tables are shaped on all sides.

Arrive Veneer desks line blends style and value with superb wood craftsmanship. Its design offers a fresh, clean style with subtle details.

Styling

The versatile desks line is well suited for private offices, conference rooms or commons areas. An array of products ranging from single and double pedestal desks, credenzas, returns, storage, filing bookcases, tables and conference solutions, make your office design options seem almost endless.

The sleek cove edge provides a clean aesthetic while the two handle and mixed material options allow you to customize your look.

Materials/Construction

All exterior surfaces feature slip matched veneer and vertical grain. Veneer surfaces are finished in a multi-step process to a rich satin sheen. Finish is stain and mar-resistant for lasting beauty and easy care and maintenance.

All drawers operate on steel ball-bearing suspensions. Five-sided drawer construction, high drawer sides and hangrails meet all your filing needs.

Core removable locks allow for units to be quickly and easily re-keyed; use replacement kit HF27.

Desks/Credenzas/Storage

Double and single pedestal desks are offered in both bow and rectangle top options with file/file or box/box/file drawers. The table desk includes a center drawer.

Grommets and wire access on desks, credenzas, returns and bridges allow easy routing of wires and cords.

Choose from credenza models — Credenzas with kneespace, with storage, with lateral or multfiles or a single pedestal credenza.

Customize your storage preferences with the multitude of options such as stack-on storage, storage tower organizers, personal storage cabinets, lateral files, bookcases, bookcase hutches and wall-mount storage. Models specified with standard back, which are not fully finished, are recommended for use against a wall.

VENEER MATERIALS AND FINISHES

- Due to the natural, unique characteristics of wood, minor variations in finish color, grain, and texture may be visible.
- Wood ages naturally over time and environmental factors affect the color — it is best to purchase all veneer pieces at the same time so they age at the same rate.
- All exterior surfaces utilize slip-matched cherry or maple veneer except wall mount storage cabinets and storage tower.
- All veneer is carefully selected and matched to assure consistency.
- All veneer surfaces are finished in a multi-step process to a rich satin sheen. Finish is stain- and mar-resistant for lasting beauty and easy care and maintenance.

TOPS

- All tops are 3-ply balanced panel and solid core construction; balanced panel construction resists warping.
- Tops are 1 $\frac{1}{8}$ " thick.

DRAWER/DOOR PULLS

- Drawer fronts are $\frac{3}{4}$ " construction.
- Voi® utilizes vertical grain except on top surfaces.
- Drawer fronts are matched in sets to assure continuous grain pattern.
- Drawers operate on high quality steel ball-bearing suspensions to ensure quiet, smooth, long lasting operation.

For Veneer Care and Maintenance see page 31.

This Specifying Guide is designed to walk you through the steps when choosing the Voi desks elements that will meet your particular workplace needs. From private office to open plan, there are endless combinations that will fit your style and need.

Regardless of the application, Voi presents an integrated, unified aesthetic for the entire workplace.

The step-by-step instructions make it easy to specify elements that personalize workspaces and achieve the right mix of functionality and style.

Worksurface

- A variety of shapes and sizes meet a range of footprint requirements, from private offices to open plan areas.

Accessories

- From layering shelves to storage cubes, markerboards and the box drawer organizer, Voi accessories allow personalization to meet individual needs.

Above the Worksurface Storage

- Voi has many above the worksurface storage options that can be used in many applications: wall mounted, panel mounted, and conventional stack-on storage options are available to make an efficient use of vertical space.
- Choose from sliding door units or overhead cabinets with four doors.
- The O-leg can be used in stack-on storage applications to create a more contemporary look.
- Mixed material options are available for the overhead cabinet with doors including: frosted glass, frosted translucent and Plains tiles.
- The storage cube accessory can be used in the storage applications listed above.

Below the Worksurface Storage

- A wide variety of conventional storage options are available: lateral files, bookcases, support bookcases, mobile pedestals, personal wardrobes, and storage towers.
- Many contemporary storage options are available: low credenzas and floor credenza work in conjunction with the worksurfaces to create layered surfaces that optimize space, different storage, staging, and display needs.

Support

- A combination of many supports can be used with the worksurfaces: O-leg, end panel, pedestal, slim pedestal, support bookcase, lateral/multi file.
- O-legs work in many of the Voi desks applications and provide a light-scale, contemporary look.
- O-legs can be used in a variety of heights so surfaces can be layered.
- End panels are also available and provide a more conventional look.
- A variety of modular storage options can be specified based on your storage needs: box/box/file pedestal, file/file pedestal, slim profile pedestal, lateral files and multfiles.

Modesty Panel/Privacy Screens

- Full height, ½ height and floating modesty panel options are available to enhance privacy.
- Mixed material options are available in laminate and frosted translucent.
- Select the size that works with the supports.
- Above and above/below privacy screens are available to create an element of privacy in an open plan area.

Steps for specification:

1. Select the right worksurface.
Choose the worksurface shape and size that best fits your office layout.

Rectangle Worksurface
Depths: 20", 24", 30", 36"
Widths: 36", 42", 48", 54", 60", 66", 72", 84"

Rudder Worksurface
Depths: 24", 30"
Widths: 72"

Wedge Worksurface
Depths: 24", 30"
Widths: 60", 66", 72"

Tips

- Rectangle worksurfaces available in both laminate and veneer.
- Rudder worksurfaces are used like peninsulas.
- The Rudder worksurface cannot be a free-standing unit. It must be used as a return or peninsula with a single post leg.
- T-mold is not an option on Voi worksurfaces; edgeband only.
- 3" Grommets are available in Black (P), Brilliant White (WHIT), Greige (T5) and Platinum (T1).
- Select grommet or no grommets. If grommets are specified they ship in a predetermined location. No grommets in 24"W and 30"W worksurfaces. One grommet in 36"W and 42"W worksurfaces. Two grommets in 48"-84"W worksurfaces.
- Abound or Accelerate worksurfaces can be used.
- O-leg panel applications cannot be used with T-mold worksurfaces.
- Edgeband color is limited and is based on the worksurface color selection. See chart on page 86.
- HWSA2 bracket kit and HCTL182/HCT242 cantilever models must be specified in addition to the worksurfaces to work with panels.

2. Select the supports.

Countless combinations of support options meet a variety of support and storage needs.

O-Leg and Shared Support for Low Credenza
20"D x 7"H, 24"D x 7"H, 30"D x 7"H
7"H only O-legs attach to worksurface and sit on top of credenzas.

O-Leg and Shared Support for Worksurfaces
20"D x 28½"H, 24"D x 28½"H, 30"D x 28½"H
28½"H, 24"D x 41"H, 30"D x 41"H, 48"D x 28½"H,
60"D x 28½"H O-legs provide support for the worksurface.

O-Leg-to-Panel Attachment Bracket
Left handed bracket (quantity 1)
Right handed bracket (quantity 1)

Post Leg
28½"H, 2" square

End Panel Support
16"W x 20"D x 28½"H,
16"W x 24"D x 28½"H,
16"W x 30"D x 28½"H

Laminated End Panel Support With Panel Attachment Bracket
24"D x 28½"H, 30"D x 28"H

B/B/F Standard and Power-Ready Pedestals
16"W x 20"D x 28½"H,
16"W x 24"D x 28½"H,
16"W x 30"D x 28½"H

F/F Standard and Power-Ready Pedestals
16"W x 20"D x 28½"H,
16"W x 24"D x 28½"H,
16"W x 30"D x 28½"H

B/B/F Standard and Power-Ready Slim Profile Pedestals
9½"W x 24"D x 28½"H,
9½"W x 30"D x 28½"H

Standing Height Pedestals
9½"W x 24"D x 41"H,
9½"W x 30"D x 41"H

2 Drawer Standard and Power-Ready Lateral with Pulls
30"W x 24"D x 28½"H

Multi-Drawer Standard and Power-Ready File Center
30"W x 24"D x 28½"H

Bookcase Support
30"W x 12"D x 28½"H,
24"W x 12"D x 28½"H

Standing Height Support Storage
12"W x 30"D x 41"H,
12"W x 24"D x 41"H

Standing Height Towers
12"W x 30"D x 50"H,
12"W x 24"D x 50"H

Tips

- Supports available in laminate and limited models in veneer.
- When using an O-leg in open plan, panel supported, applications, you must specify an O-leg to panel attachment bracket separately (available in 28"H and 41"H).
- Bookcase Support can only be used exterior facing.
- Telescoping ball-bearing slides used on box and file drawers. Lateral drawers use a progressive ball-bearing slide.
- O-leg and panel applications cannot be used with T-mold.
- When specifying a 30"D support on a 36"D worksurface, there will be a 6" overhang.
- All modular pedestals have an easy attach method to the worksurface for quick assembly.
- Pass-thru openings in the sides of the Power-Ready Pedestals and Lateral Files allow hardware conduit to run under the worksurfaces, through the case in a continuous run.
- One double-depth O-leg can replace two regular O-legs in teaming applications.
- Shared O-legs create cleaner aesthetic where two legs are used side-by-side.
- 2" adjustable glides on O-leg supports.
- Standing-Height Support Pedestals bottom two file drawers are locking.
- Standing-Height Bookcase Support contains easy-access, fixed storage shelves.

3. Select the modesty panel/privacy screen that works in conjunction with the supports you have specified.

14" H Full Width/Half-height Laminate Modesty Panel
 28", 34", 40" W
 (Modesty Size)
28" H Full-to-Floor/ Full Length Laminate Modesty Panel
 28", 34", 40" W
 (Modesty Size)

Laminate Floating Modesty Panel
 30" W x 14" H, 36" W x 14" H, 42" W x 14" H, 48" W x 14" H, 54" W x 14" H, 60" W x 14" H

Mixed Material Floating Modesty Panel
 30" W x 14" H, 36" W x 14" H, 42" W x 14" H, 48" W x 14" H, 54" W x 14" H, 60" W x 14" H
 Available in Frosted Translucent only

Above/Below Privacy Screen
 30" W x 28" H, 36" W x 28" H, 42" W x 28" H, 48" W x 28" H, 54" W x 28" H, 60" W x 28" H
 Available in Frosted Translucent only

Above Privacy Screen
 30" W x 13" H, 36" W x 13" H, 42" W x 13" H, 48" W x 13" H, 54" W x 13" H, 60" W x 13" H
 Available in Frosted Glass only

Above/Below Fabric Screen
 36" W x 35" H, 42" W x 35" H, 48" W x 35" H, 54" W x 35" H, 60" W x 35" H, 66" W x 35" H, 72" W x 35" H

Above Fabric Screen
 20" W x 20" H, 20" W x 13" H, 24" W x 20" H, 24" W x 13" H, 30" W x 20" H, 30" W x 13" H, 36" W x 20" H, 36" W x 13" H

Above Polymer or Glass (Side) Screen
 20" W x 13" H, 24" W x 13" H, 30" W x 13" H, 36" W x 13" H

Tips

- Mixed material and laminate floating modesty panels create a lighter scale look by attaching to the top of the worksurface.
- Choose from a variety of materials to create your desired look.
- Laminate modesty panels to create a more conventional look.
- 54" W and 60" W Floating Modesty panels eliminate the need for an external channel.
- Above Privacy Screens provide a division between two worksurfaces and create a division of space in an open plan area.
- Modesty panels cannot be used as a support.
- See modesty panel chart to choose proper modesty size depending on support options.

4. Select Above the Worksurface Storage (Stack-on Storage) or Overhead Cabinets

Select the above the worksurface storage that meets your storage criteria, choose from overhead cabinets, panel mounted storage, conventional or contemporary stack-on storage.

14 1/4" D x 14" H Shared Overhead Cabinet with One Sliding Door
 60", 72"

14 1/4" Overhead Cabinet with 4 Laminate Doors with or without Cubbie or 4 Frosted Metal Doors with or without Cubbie
 36", 42", 48" and 60" with 4 Laminate or Frosted Doors
 60", 66", 72" and 78" with Laminate or Frosted Doors and Cubbie

14 1/4" D x 35" H Stack-on Storage, Built-up, with Sliding Doors
 72" W only

14 1/4" D x 35" H Stack-on Storage, Built-up, 4 Frosted Metal Doors with Cubbie
 72" W only with Laminate or Frosted Doors and Cubbie

O-Leg Support for Overhead Cabinet
 50"-14 1/8" D x 5 1/2" H
 65"-14 1/8" D x 20 1/2" H

Post Legs for Shared Storage
 14" H and 22" H

Steel Shelf for Stack-on Storage
 72" W, 66" W, 60" W

Tackboard for Overhead Cabinet Applications
Tackboard for Built-up Stack-on Storage
 72" W only

Panel Mount Bracket for Shared Overhead
 Abound and Accelerate

Tips

- Overhead available in both laminate and veneer.
- Select sliding or hinged doors.
- When selecting the door material for the 4 hinged door models, choose from Champagne or Platinum Metallic of polymer frame with Frosted glass or Frosted Acrylic.
- Specify O-leg separately for a contemporary look.
- Optional storage shelf works in conjunction with the O-leg design to provide additional storage space. Only works with 65" H O-legs.
- O-legs come in two sizes to make a 50" H or 65" H stack-on storage unit.
- Wall-mount brackets carry a \$150 upcharge and are specified the model ordering logic.
- Use shared overhead and attachments in small footprint applications.
- Shared overhead must be ordered as left or right to determine open storage location.
- Shared overhead panel mount brackets and overhead post legs allow overhead to span over all panels systems or run down the spine wall, centered on top of the panel.
- Use the 65" H for a more conventional design. 65" H and 50" H aligns with Abound and Accelerate.
- Stack-on Storage must be placed over two full-height supports. Cannot be placed over non-supported sections such as returns using a flat bracket or tower-to-worksurface bracket.
- If the end panel conventional look is preferred, order the built-up stack-on storage models.
- There are two types of tackboards for use on Overhead Cabinet and Stack-on Storage.

5. Select the right storage.
Choose from a variety of below the worksurface, as well as traditional, storage options.

Laterals and Storage Cabinet

2-Drawer Lateral, 4-Drawer Lateral, Storage Cabinet
36"W x 24"D x 29½"H, 36"W x 20"D x 29½"H,
36"W x 24"D x 57"H, 36"W x 20"D x 57"H,
36"W x 24"D x 29½"H, 36"W x 20"D x 29½"H

Storage Towers

18"W x 20"D, 18"W x 24"D, 24"W x 20"D, 24"W x 24"D, 50"H and 65"H

Bookshelves

36"W x 13"D x 29½"H (2 Shelf)
36"W x 13"D x 50"H (3 Shelf)
36"W x 13"D x 65"H (4 Shelf)

Bookcase Hutch without Doors

36"W x 14"D x 35"H

Credenzas

Credenza: 24"D x 72"W x 29½"H
Low Credenzas: 20"D x 21½"H x 30", 36", 60", 72"W
Low Credenzas with a variety of door/drawer options

Mobile Credenza

30"W x 20"D x 21½"H

Mobile Pedestal

15¾"W x 20½"D x 21½"H

Tips

- Small credenza models can be used in small footprint applications.
- Can use pedestal or credenza seat cushions on smaller credenza models.
- Various storage models available in both laminate and veneer options.
- Low credenzas work in conjunction with worksurface 7" O-leg designed to create a unique layering design.
- Bookcase/laterals and other conventional storage components provide additional storage space.
- Must specify chassis and drawer front color separately.
- Low Credenzas, Laterals and Mobile Pedestals have seat cushions to create additional seating in the workspace.
- Storage and Personal Tower models offer conventional storage as well as wardrobes with a coat rod.
- Using a seat cushion with a power-ready credenza will cover one grommet.
- Specify appropriate power pack for credenza length.
- A worksurface-to-tower bracket kit allows the attachment of worksurfaces to Storage and Personal Tower models.
- Telescoping ball-bearing slides used on box and file drawers. Lateral drawers use a progressive ball-bearing slide.
- Cannot route softwire power through lockable storage units.

6. Select Accessories to add color, additional storage and organization to your workspace.

Layering Shelf

60"W x 14¼"D x 5½"H
72"W x 14¼"D x 5½"H

Seat Cushion for Credenzas and Mobile Credenza/Pedestal

Pedestal Cushion
15⅞"W x 20"D x 2"H
Credenza Cushion
20"W x 30"D x 2"H, 20"W x 36"D x 2"H

Storage Cube

12" x 12"

Drawer Organizer

12"W x 14½"D x 1½"H

Markerboard for Shared Overhead

30"W x 15"D for use with 60"W Shared Overhead
36"W x 15"D for use with 72"W Shared Overhead

Markerboard

48"W x 31"H

LED Task Light

Wire Management Tray

HLSLWMTRAY
24"W x 2¾"D x 2¾"H

Tips

- Choose from five bright Storage Cube colors for a colorful design element while providing additional storage.
- Use the Drawer Organizer to keep small items in order. Also offered in the same bright Storage Cube colors.
- Layering shelves are great for filing and piling or in conjunction with the lower credenza.
- Optimize shared overhead capabilities by adding the Markerboard for Shared Overhead.

Voi® and Systems Integration

Worksurface Applications

Either Voi or Systems worksurfaces can be used with Voi in an open plan application. There are several support options:

- A. Completely panel supported.
- B. Combination of panel supported and another worksurface support such as:
 - Bookcase support
 - Pedestal (Brigade®, Flagship® or Voi®)
 - Systems open leg
 - Voi O-leg
 - End panel (Systems or Voi)
 - Tower to worksurface bracket
 - Support column
 - Systems round post leg
 - Voi post leg
- C. Freestanding:
 - Bookcase support
 - Two pedestals (Brigade®, Flagship® or Voi®)
 - Two Voi O-legs
 - One Voi O-leg and one Voi O-leg support for lower credenzas
 - Two end panels (metal or Voi)—requires metal or Voi modesty panel

Additional application guidelines for worksurfaces:

- Systems worksurfaces are available with t-mold or edgeband edges.
- Systems worksurfaces are available with grommets, wire management scallops, or no grommets.
- When Voi lower credenzas are used along the spine wall and are placed adjacent to the wing wall, one electrical/data cutout on the wing wall will be blocked.
- When Voi credenzas are used along the wing wall and are placed adjacent to the spine wall, one electrical/data cutout on the spine wall will be blocked.
- When the Voi O-leg support for credenzas is used, it is recommended to also panel attach the worksurface with the worksurface anti-dislodgement bracket kit HMWA2.
- When the Voi O-leg support is used with panels, it is recommended to also panel attach the O-leg to the panel with the O-leg to panel bracket kit HLPBPL (left) and/or HLPBPR (right). This bracket will provide additional workstation rigidity. The bracket is designed to work with edgeband worksurfaces only.
- When the Voi end panel support is used with panels, it is recommended to use the end panel support with panel bracket model. This model will provide additional workstation rigidity.
- The worksurface to tower bracket kit, HSTB2W1, will work with Voi towers, Voi worksurfaces, and systems worksurfaces.

Application Guidelines—Combination of Panel Supported and Another Worksurface Support

- For applications where 1) the worksurface is perpendicular to the spine wall; 2) the worksurface is panel supported off the spine wall; and 3) there are Voi credenzas placed under the worksurface along the spine: there is not enough clearance to use standard worksurface cantilevers to attach the worksurface to the spine. Use the worksurface anti-dislodgement bracket kit HMWA2 to panel attach the worksurface in lieu of cantilevers. Select the 'omit cantilever' option if systems worksurfaces are being used and the cantilevers are not needed elsewhere on the worksurface.
- The Voi O-leg-to-panel bracket is designed to work with edgeband worksurfaces. Use of the Voi O-leg with t-mold worksurfaces will prevent the attachment of the leg to the panel.

Panel Mounted Stack-on Storage Applications

- The Voi stack-on storage cabinets can be used on Abound and Accelerate as panel mounted overheads.
- The sliding door stack-on storage units are available in 36", 42", 48" widths in addition to 60", 66", 72", and 78" widths.
- The 4 door stack-on storage units are only available in 36", 42", 48", 60", 66", 72", and 78" widths.
- The storage units require a storage to panel bracket kit, model HLSLPMB. This model includes one left hand and one right hand bracket. The brackets are available in all Core and Choice/Metallic paint colors.
- The storage cabinets do not have off modular capabilities.
- The storage cabinets cannot be upmounted.
- For proper installation and support, the storage units must follow the following specification rules:
 - There should be a storage unit of the same construction on each side of a given panel.
 - The storage units on opposite sides of a given panel should be in the same location vertically and horizontally.
 - Only one storage unit per panel, per side.
 - The wing panel adjacent to the spine wall needs to be the same height as the spine wall.

- ▶ Systems worksurfaces can be used with all Voi components.
- ▶ Worksurfaces are abrasion- and stain-resistant laminate over durable 1½" solid core high performance particleboard; resists wrapping.
- ▶ There is one 3" grommet in 36"W and 42"W worksurfaces and two in 48"W-84"W worksurfaces.
- ▶ One flat bracket ships with each worksurface.

- ▶ When attaching tops to panels, refer to Systems section of this pricer.
- ▶ Square edge detail.
- ▶ When using a floating modesty panel or an external channel under the worksurface, the depth clearance for keyboard trays and center drawers decreases by 8". See accessory matrix in accessory section of the pricer.
- ▶ 3" Power Hub model HGRMTAC can be interchanged with 3" standard grommet.

- ▲ **Voi® worksurfaces cannot be used with Abode™ Desks components.**
- ▲ **Grommets in worksurfaces must be specified. If grommets are specified, grommets come in predetermined location.**
- ▲ **Edgeband option only on all Voi worksurfaces. For edgeband options, see matrix on page 86.**
- ▲ **When specifying an 84" Worksurface, cannot use two O-legs, must use at least one additional support such as a pedestal or lateral file.**

- ▲ **When using a worksurface as a bridge, no additional supports are needed. One support is required for returns, two supports are required for desks and credenzas.**
- ▲ **Lateral file or multi-files must be used with surfaces 24"D and 60"W or greater.**
- ▲ **Scallops are not available on Voi worksurfaces.**
- ▲ **Depending on your support combination, an external channel may be required for extra support on unsupported spans greater than 54"W. Please see the matrix below for more details.**

- ▲ **If using a 54"W or 60"W floating modesty, it is not necessary to spec an external channel.**
- ▲ **When attaching worksurfaces to panels, one or more of the following are required: anti-dislodgement brackets, end panel, support leg and/or cantilevers. Cantilevers and anti-dislodgement brackets must be ordered separately when attaching worksurfaces to panels.**

- ▶ Systems worksurfaces can be used with all Voi components.
- ▶ Worksurfaces are abrasion- and stain-resistant laminate over durable 1 1/8" solid core high performance particleboard: resists wrapping.
- ▶ There is one 3" grommet in 36"W and 42"W worksurfaces and two in 48"W-84"W worksurfaces.
- ▶ One flat bracket ships with each worksurface.
- ▶ When attaching tops to panels, refer to Systems section of this pricer.
- ▶ Square edge detail.
- ▶ When using a floating modesty panel or an external channel under the worksurface, the depth clearance for keyboard trays and center drawers decreases by 8". See accessory matrix in accessory section of the pricer.
- ▶ 3" Power Hub model HGRMTAC can be interchanged with 3" standard grommet.
- ⚠ **Voi® worksurfaces cannot be used with Abode™ Desks components.**
- ⚠ **Grommets in worksurfaces must be specified. If grommets are specified, grommets come in predetermined location.**
- ⚠ **Edgeband option only on all Voi worksurfaces.**
- ⚠ **When specifying an 84" Worksurface, cannot use two O-legs, must use at least one additional support such as a pedestal or lateral file.**
- ⚠ **When using a worksurface as a bridge, no additional supports are needed. One support is required for returns, two supports are required for desks and credenzas.**
- ⚠ **Lateral file or multi-files must be used with surfaces 24"D and 60"W or greater.**
- ⚠ **Scallops are not available on Voi worksurfaces.**
- ⚠ **Depending on your support combination, an external channel may be required for extra support on unsupported spans greater than 54"W. Please see page 85 for models and a matrix to aid in specifying.**
- ⚠ **If using a 54"W or 60"W floating modesty, it is not necessary to spec an external channel.**
- ⚠ **When attaching worksurfaces to panels, one or more of the following are required: anti-dislodgement brackets, end panel, support leg and/or cantilevers. Cantilevers and anti-dislodgement brackets must be ordered separately when attaching worksurfaces to panels.**

- ▶ **NEW!** Voi® Double-Depth O-Leg Supports. Available January 2016.
- ▶ A variety of pedestals, end panels, and O-legs can be combined to create a conventional or contemporary desk.

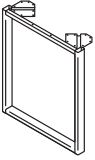

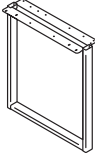

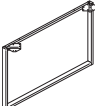

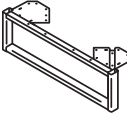

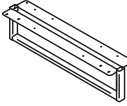

- ▶ O-leg ships fully assembled with mounting hardware.
- ▶ Shared O-Legs create a cleaner aesthetic in all applications where two legs are used side-by-side.
- ▶ The bracket on the O-leg will span both worksurfaces to provide the same support with the look of a single O-leg.

- ▶ Voi square support column is interchangeable with the Systems worksurface round support column: HCNLEG29.
- ▶ Will have a 6" overhang when using 30" worksurface supports with a 36" D worksurface.

- ▶ Glides on O-Leg Support for Worksurfaces and Post Leg Base have 2" of adjustability. No glides on 7" H O-leg. Glides on end panels have 1 1/4" adjustability.
- ▶ O-leg supports can be used with laminate and veneer models.

- ⚠ **O-legs may only be attached to worksurfaces, not storage units.**
- ⚠ **Post leg can only be used to support peninsula, not as primary supports for a top.**

▶ Above privacy screens are intended to be attached between users sitting side-by-side but will create 1/8" spacing between the worksurfaces.

▶ Ships complete with attachment brackets.
▶ All brackets are Platinum.
▶ Above Privacy Screen attaches to top and side of worksurface with adhesive banding.

▶ Lower attachment brackets may be shifted to attach to support components.
▶ Above/Below privacy screen extends 20" above and 13" below worksurface.

⚠ Above/Below Fabric Privacy Screens can attach to worksurfaces that are either 0-leg supported on both sides, or worksurfaces that are supported by a support pedestal on one side and an 0-leg on the other. They cannot be attached to worksurfaces supported by support pedestals on both sides, unless additional hardware is specified.

⚠ Above screens must attach to edgeband and top of surface.
⚠ Above/Below privacy screens must be ordered the same width as the worksurface it is being used with to properly attach.

Edge Profiles

Tops have both shaped and flat edges (except for conference tables). Flat edges allow side-by-side placement of worksurfaces without gaps. The tops of desks, peninsulas and the reception station/transaction counter are shaped on the user's side and the approach side.

Return, credenza, bridge, corner unit, stack-on storage, wall mounted storage cabinet, mobile pedestal, lateral file, storage cabinet, bookcase hutch, bookcase, end cap bookshelf, storage/file cabinet, storage cabinet/lateral file, wardrobe/storage cabinet, modular return, modular credenza and tower bookcase tops are shaped on the user's side.

The tops of conference tables are shaped on all sides.

***NOTE:** The above products do not have a handle option. They do, however, have a top grommet that requires color specification. Consequently, for these products, the handle designator field becomes a grommet finish designator. For grommet finish, A = Black; B = Brushed Brass; C = Satin Nickel.

*NOTE: The jetty and boomerang peninsulas, bridges, corner units, modular credenza top/back components, modular return top/back components, and modular extended corner top/back/end panel components do not have a handle option. They do, however, have a top grommet that requires color specification. Consequently, for these products, the handle designator field becomes a grommet finish designator. For grommet finish, A = Black; B = Brushed Brass; C = Satin Nickel.

HOW TO SPECIFY

Note: Color specification requires two characters, except for the following which require one color code character only:

- modesty panels (for peninsulas)
- modular pedestals
- modular end panels
- shared 10500 Series™ solutions (transaction counter organizer, vertical paper manager)

Styling

Park Avenue Laminate combines the sophisticated style of Park Avenue Veneer with the hard-working attributes of laminate. The upscale design features clean form with uninterrupted, rigid lines, sweeping curves and precise fits. Tops are available in three different edge profiles / shapes. The edge detailing conveys the beauty of real wood but offers superior durability. Drawer / door handles can be specified from three designs and three finishes. The insert for worksurface cord grommet covers is color matched to drawer / door handle finishes. All desk, credenza, and return models feature full-to-the-floor pedestals to maximize storage space and formal, full-length modesty panels. All vertical components, including drawer and door fronts, modesty panels, and stack-on storage enclosures have vertical grain. The option of frosted / nickel doors and modesty panel provides an attractive blend of materials and an enhanced look.

Materials / Construction

Tops and end panels are scratch- and stain-resistant laminate over durable 1 1/8" solid core high-performance particleboard. Profiled and flat edges are scuff and impact resistant. Laminate surfaces are designed to withstand the daily wear-and-tear in today's offices, including hot and cold spills. The chassis is constructed with European-designed fasteners, enabling the tops or end panels to be replaced, if necessary. These strong metal-to-metal connections ensure a long life cycle. All fasteners are positioned by computer to maintain rigorous dimensional standards and precise positioning. Drawers operate on steel ball-bearing suspensions for smooth, quiet, long-lasting operation.

Storage in Desks

Pencil/media/file pedestals store and organize CD's, in addition to conventional supplies and paper media. The top drawer holds supplies. The middle drawer features a media organizer to hold blank CD's (flat storage), standard and slim profile CD jewel cases, VHS tapes, 3 1/2" or Zip® disks, and other miscellaneous items. The organizer stores CD jewel cases in the "label up" position for easier identification and cataloging. The media organizer can be easily removed so drawer can be re-purposed for other storage needs. The organizer features legs for angled positioning on desktops or in HON stack-on storage units. The bottom drawer is for files and includes hangrails for side-to-side letter or legal filing; and front-to-back for letter filing.

File/file pedestals accept hanging folders; hangrails are included in all drawers, for side-to-side letter or legal filing; and front-to-back for letter filing.

Cord Management

Park Avenue Laminate is designed with a host of cord management features. Worksurface grommets route and hide wires and cables. The sides / end panels of desk, credenza and return storage pedestals are designed with a cord pass-through grommet to allow connections between workstations. And, all return, bridge and credenza modesty panels contain a cord pass-through to facilitate reaching wall electrical outlets.

Security

Interchangeable core removable locks are located on the front of all desk, credenza and return pedestals, mobile pedestals, lateral files, storage/file cabinet and storage cabinet/lateral file with laminate doors, and the wardrobe/storage cabinet. All drawers / doors on these units are equipped with a removable cylinder that can be interchanged as needed, allowing users to access all furniture pieces in an office with a single key for convenience and security. Makes re-keying quick and easy.

Product Performance

All models meet or exceed ANSI/BIFMA and ISTA performance standards.

Edge Detail

- ▶ Upscale design with clean, uninterrupted lines, precise fits, and vertically matched woodgrain.
- ▶ Tops are available in three decorative, durable edge designs (see page 127).
- ▶ Drawer / door handles are available in three styles and three finishes (see page 127).
- ▶ Media drawer can be used to store CD's or conventional supplies.
- ▶ For components that can be shared with Park Avenue Laminate Series, see pages 133-140.
- ▶ Tops are abrasion- and stain-resistant laminate over durable 1 1/8" solid core high-performance particleboard; resists warping.
- ▶ Full-to-the-floor pedestals maximize storage space.
- ▶ Formal, full-height modesty panels feature vertical woodgrain direction.
- ▶ Drawers operate on steel ball-bearing suspensions to ensure smooth, quiet, long-lasting operation.
- ▶ File drawers extend fully and include hangrails for side-to-side letter and legal filing; and front-to-back for letter filing.
- ▶ Drawer fronts have vertical woodgrain and are matched in sets to assure continuous grain pattern.
- ▶ Cord management grommets facilitate routing and hiding wires/cables and reaching wall electrical outlets.
- ▶ Desk, return and credenza models ship assembled.

▶ Shared components shown on this page can be used with full pedestal models shown on pages 131-132 and modular components shown on pages 141-148.
▶ For Task Light models see page 148.

▶ Stack-ons provide convenient off-the-worksurface storage without consuming valuable floor space.
▶ Stack-on storage units have an enclosed back. Back features cutouts to facilitate routing cords and reaching wall electrical outlets.

▶ Stack-on storage models are equipped with self-closing, adjustable hinged doors and valance to hide task light.
▶ Available with laminate doors or frosted doors with silver frame.
▶ Stack-on storage units ship fully assembled.

▶ Vertical paper manager (HLVPM1) is available as an option. See page 139.
▶ Tackboard is sized 3/4" narrower than back panel of stack-on storage unit, allowing 3/8" on each side to route task light cord.

⚠ **Frosted door units do not have a lock option.**
⚠ **Removable lock core kit for stack-on and wall mount storage is model HF27, see page 684.**

- ▶ Wall mounted storage cabinet attachment requires individual cabinets be secured by a minimum of two wall mounting locations/studs.
- ▶ Wall attachment methodology: horizontally mounted, interlocking brackets.
- ▶ Wall mounted storage cabinet door design overlaps end panels so that when multiple units are placed side-by-side they appear as one continuous unit.
- ▶ Wall mounted storage cabinets are designed for interior and perimeter walls that are constructed with wood or metal studs.
- ▶ Available with laminate doors or frosted doors with silver frame.
- ▶ End cap bookshelf is ideal for books, photos and mementos.
- ▶ Vertical paper manager (HLVPM1) is available as an option. See page 139.
- ⚠ **Frosted door units do not have a lock option.**
- ⚠ **The HON Company is not responsible for any liabilities resulting from wall mounted storage cabinets that are not properly installed.**
- ⚠ **Removable lock core kit for stack-on and wall mount storage is model HF27, see page 684.**

- ▶ Modular return top components have a shaped edge profile on the user's side (see page 127 for edge options).
- ▶ Component tops are 1 1/8" thick.

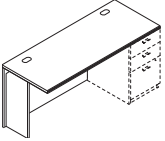

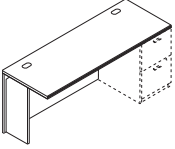

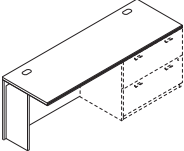

- ▶ Drawer and door fronts, backs/modesty panels and stack-on storage, feature vertical grain.
- ▶ Component backs/modesty panels provide finished back for modular pedestals or an enclosed kneewell.

- ▶ The depth of end panels are 3/4" less than the depth of the component tops to accommodate the modesty panel.
- ▶ Top/back components feature cord management grommets to facilitate routing and hiding wires/cables and reaching wall electrical outlets.
- ▶ For wall mounted storage cabinet options see page 136.

⚠ For customers who wish to specify their storage solutions, see storage pedestal options on page 141. End panel is required if there is not a modular storage pedestal to support the top (see page 146).

⚠ Modular return top/back components must be used in conjunction with either modular storage pedestal(s) or an end panel component.

- ▶ Stack-on storage sizes are available for modular credenza and modular return components.
- ▶ Stack-ons provide convenient off-the-worksurface storage without consuming valuable floor space.

- ▶ Stack-on storage units ship fully assembled.
- ▶ Stack-on storage units have an enclosed back. Back features cutouts to facilitate routing cords and reaching wall electrical outlets.
- ▶ Available with laminate doors or frosted doors with silver frame.

- ▶ Stack-on storage models are equipped with self-closing, adjustable hinged doors and a valance to hide task light.
- ▶ Tackboard is sized 3/4" narrower than back panel of stack-on storage unit, allowing 3/8" on each side to route task light cord.

- ▶ For fabric covered tackboards, task lights and tower bookcases, see page 148.
- ▶ Vertical paper manager (HLVPM1) is available as an option. See page 148.

- ⚠ **Frosted doors do not have a lock option.**

- ▶ Choose from standard or tops with cord/power cutouts.
 - ▶ If the cut-out option is selected, 144"L and 120"L tops have two cutouts each and 96"L, 72"L, 48" round and 42" round have one cut-out, centered in the top. Each cutout carries a \$70 upcharge.
 - ▶ Tops and bases ordered separately and shipped in separate cartons, **E**♦.
 - ▶ 120"L and 144"L tops ship in two pieces to facilitate handling and installation; these top sizes in woodgrain colors will not have exact grain alignment in the center where the two halves meet.
 - ▶ 96" and 72"L tops are one piece.
 - ▶ Tops with bases are 29½"H.
 - ▶ Tops are abrasion- and stain-resistant laminate over 1⅛" thick solid core high-performance particleboard.
 - ▶ Tops are shaped on all sides.
 - ▶ Durable, profiled edges.
 - ▶ Underside of tops are sealed to resist warping.
 - ▶ Two piece tops are secured and supported by steel or wood stretchers, worksurface connectors and flat brackets to facilitate alignment and minimize deflection.
 - ▶ Underside of tops feature alignment guide for base placement.
 - ▶ Pop-up Port, model HTPWRGROM1 and Flip-top Port, model HTPWRGROM2 must be purchased separately.
 - ▶ Flip-top Port option is not available with round tops; Pop-up Port only.
 - ▶ Optional cutouts are available to accommodate power ports. One centered cutout per top section.

Valido® Laminate Modular Desks

GSA SIN 711-2

► Non-handed desk, credenza, and return shells, combined with a variety of under-the-worksurface storage solutions, maximize office layout flexibility. Shells and pedestals can be reconfigured quickly and easily when user preferences or space needs change.

► For storage components see pages 155-156.
 ► Tops are abrasion- and stain-resistant laminate over extra-thick 1½" solid core high-performance particleboard; resists warping.
 ► "Ribbon" edge profile; shape is on all four sides.
 ► Full height modesty panels.

► Cord management grommets, for routing and hiding wires and cables, are located in the tops of desk and return shells.
 ► 3" round worksurface grommet can be replaced with optional Power Hub (model HGRMTAC) to bring the ease of plug-and-play to the desktop. See page 228.
 ► Credenza shells have a cord pass-through grommet in the top center of the modesty panel.

► The narrow design of the kneespace clearance end panel kits replace full end panels to provide added kneespace.
 ► Adjustable hex leveling glides allow floor-standing furniture to be easily leveled; glides have ¾" adjustable range.
 ► For conference table options, see the Preside® table tops and bases on pages 596-601. Order edge option "K".

Valido® Modular Returns

GSA SIN 711-2

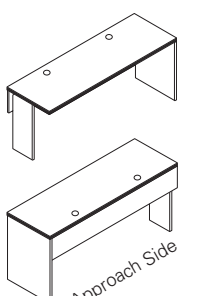

- ▶ Non-handed desk, credenza, and return shells, combined with a variety of under-the-worksurface storage solutions, maximize office layout flexibility. Shells and pedestals can be reconfigured quickly and easily when user preferences or space needs change.
- ▶ For storage components see pages 155-156.
- ▶ Tops are abrasion- and stain-resistant laminate over extra-thick 1½" solid core high-performance particleboard; resists warping.
- ▶ "Ribbon" edge profile; shape is on all four sides.
- ▶ Cord management grommets, for routing and hiding wires and cables, are located in the tops of desk and return shells.
- ▶ Credenza shells have a cord pass-through grommet in the top center of the modesty panel.
- ▶ The narrow design of the kneespace clearance end panel kits replace full end panels to provide added kneespace.
- ▶ Adjustable hex leveling glides allow floor-standing furniture to be easily leveled; glides have ¼" adjustable range.
- ▶ Credenza Shells available with Full or 10" Modesty Panel options.
- ▶ For conference table options, see the Preside® table tops and bases on pages 596-601. Order edge option "K".
- ▶ For work-in-process paper management tools, see page 172.

Valido® Laminate Wood Desks — 3/4 Pedestals

GSA SIN 711-2

- ▶ For components that can be shared with Valido/11500 Series, see pages 161-172.
- ▶ Tops are abrasion- and stain-resistant laminate over extra-thick 1/2" solid core high-performance particleboard; resists warping.
- ▶ Formal, full height modesty panels.
- ▶ Cord management grommets, for routing and hiding wires and cables, are located in the tops of desks, returns, bridges and corner units.
- ▶ All drawers are 5-sided construction, which allows easy drawer alignment or replacement of drawer fronts.
- ▶ Drawers operate on full extension, ball-bearing suspensions to ensure smooth, quiet, long-lasting operation.
- ▶ See page 152 for handle design/finish options.
- ▶ File drawer design includes integrated hangrails for side-to-side letter or legal filing; and front-to-back for letter filing.
- ▶ For conference table options, see the Preside™ table tops and bases on pages 596-601. Order edge option "K".

- ▶ Shared components shown on this page can be used with modular components shown on pages 152-156, full pedestal models shown on pages 157-158, and 3/4 pedestal models shown on pages 159-160.
- ▶ Back enclosure features full-width 1 1/8" slot at the bottom to facilitate routing cords and reaching wall electrical outlets.
- ▶ Tackboard is sized 3/4" narrower than stack-on storage back enclosure, allowing 3/8" on each side to route task light cord.
- ▶ Wall mounted storage cabinet attachment requires individual cabinets be secured by a minimum of two wall mounting locations/studs.
- ▶ Wall mounted storage cabinets are designed for interior and perimeter walls that are constructed with wood or metal studs.
- ▶ Wall attachment methodology: horizontally mounted, interlocking brackets.
- ▶ Wall mounted storage cabinet door design overlaps end panels so that when multiple units are placed side-by-side they appear as one continuous unit.

► Desk, credenza, and return shells, combined with a variety of under-the-worksurface storage solutions, maximize office layout flexibility. Products can be reconfigured quickly and easily when user preferences or space needs change.

► Worksurfaces and end panels feature contract-grade scratch, stain and spill resistant laminate over durable 1/8" solid core high-performance particleboard; resists warping.
 ► Contoured hardwood trim; stained to match laminate.
 ► User friendly waterfall-shaped edges and round corners.

► 3" round cord management grommets, for routing and hiding wires and cables, are located in the tops of desk, credenza, and return shells. Grommets also serve as anchor points for stack-on storage and organizers.

► Grommet can be replaced with optional Power Hub for easy plug-and-play. See page 194.

- ▶ 42”H shells help support a healthy work style by allowing users to switch between sitting and standing.
- ▶ Non-handed desk and return shells maximize office layout flexibility. Products can be reconfigured quickly and easily when user preferences or space needs change.
- ▶ Tops and end panels are abrasion- and stain-resistant laminate over durable 1½” solid core high-performance particleboard; resists warping.
- ▶ For additional components see pages 213-229.
- ▶ Mobile pedestals, shown on page 220, work well in a variety of applications and configurations.

10500 Series™ Worksurfaces

GSA SIN as Noted

- ▶ Easy-care, scratch-, spill- and stain-resistant laminate over 1½" solid core high-performance particleboard.
- ▶ Grain direction on all worksurfaces runs horizontal.
- ▶ Versatile component tops combine with under-surface support options to form freestanding desks or credenzas, U- or L-shaped configurations, or work wall layouts with an island extension.
- ▶ One flat bracket ships with each worksurface for applications requiring connection to an adjoining worksurface.
- ▶ For end panels, legs, columns and bases, see the Worksurface Supports listing on pages 203-204.
- ▶ When using a floating modesty panel or an external channel under the worksurface, the depth clearance for keyboard trays and center drawers decreases by 8". See accessory matrix in accessory section of the pricer.
- ⚠ **Worksurfaces are subject to slight bowing. The magnitude of the deflection is dependent upon the weight, placement, and duration of the load.**
- ⚠ **When using a worksurface as a bridge, no additional supports are needed. One support is required for returns, two supports are required for desks and credenzas.**
- ⚠ **External channel support is recommended for extended unsupported spans or heavily loaded worksurfaces. See below for details.**

► **NEW!** Standing-Height and Double-Depth O-Leg Supports. Available January 2016.

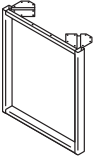

► O-leg glides have 2" adjustability.
 ► For shared components such as modesty panels and privacy screens see pages 98-99.

► O-leg ships fully assembled with mounting hardware.
 ► O-leg installation requires 6" of clearance from the worksurface end.

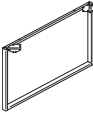

► For standing-height O-leg sizes, see page 205.
 ► Shared O-legs create a cleaner aesthetic in all applications where two legs are used side-by-side.

► Will have 6" overhang when using 30"D O-legs with a 36"D worksurface.
 ▲ **O-legs may only be attached to worksurfaces, not storage units.**

 O-Leg 30"D x 28½"H 24"D x 28½"H NOTES: Ship fully assembled, 1/pack. Non-handed. IMPORTANT: The O-leg attachment bracket interferes with placement of 10500 Series modular pedestals and 28¾"H mobile pedestals, preventing them from being positioned directly next to (flush with) the O-leg. Box/file mobile pedestal (model H105106) and mobile printer/fax cart model (H105679) can be positioned along side the O-leg. SPECIFYING EXAMPLE: HLSL24280.T1	HLSL30280	19	5.4	\$ 298	\$ 302

GSA SIN 711-8

- ▶ Pedestals can be reconfigured quickly and easily when user preferences or space needs change.
- ▶ Locking units equipped with interchangeable core removable locks.
- ▶ Pedestal models ship assembled unless designated. **E♦A**
- ▶ Mobile pedestals shown on page 220, work well in a variety of configurations.
- ▶ Narrow Pedestal features a compact design that is ideal for use in U and L-shaped layouts for smaller spaces such as a 5' x 8' U-shaped workstation or a 5' x 5' L-shaped workstation.
- ▶ **Keyed alike cores must be ordered separately — see model HF23B on page 684 — makes re-keying quick and easy.**
- ▶ **Access strip (filler) required when box/box file, file/file, and or pencil/media/file pedestals are configured side-by-side to allow access for opening the drawers.**
- ▶ **Access strip is required when CPU storage pedestal is used next to B/F, B/B/F, or F/F or P/M/F pedestals (finger pull is on side of door front). See below.**
- ▶ **Modular pedestals can be specified as one color only; not available in two-tone laminate combination or in a pattern laminate.**

	Two field installable end panels (1-right; 1-left) for use in ganging two 10500 or Valido® Series stack-on storage units. Narrow design replaces the full 14 ⁵ / ₈ "D end panels to expand worksurface space. The narrow right end panel replaces the standard 14 ⁵ / ₈ "D right end panel on one stack-on storage unit, the narrow left end panel replaces the standard 14 ⁵ / ₈ "D left end panel on a separate, adjacent stack-on storage unit that is in line alignment with the first unit. Kit includes: (2) narrow end panel supports; European-style fasteners; dowels; joint connector bolts with sleeve nuts (for ganging stack-on storage units). NOTES: Can be used to connect up to two stack-on storage units in a line (requires 1 kit). Not available in two-tone laminate.

NOTES: Door design overlaps end panels so that when multiple units are placed side-by-side they appear as one continuous unit. Product placement can be aligned to match the height of storage cabinets, wardrobes and towers. Equipped with self-closing, adjustable side-hinged doors. The 30", 36", and 42"W units have two doors; the 48"W has three doors. Frosted door units do not have a lock option. Wall attachment methodology: horizontally mounted, interlocking brackets.

Tackboard widths differ slightly from wall mounted storage cabinet widths. For applications where multiple wall mounted storage cabinets are placed side-by-side, the preferred tackboard width may be to utilize a larger tackboard size.

NOTES: To use the daisy chain application, must start with model HLED17A or HLED31A. No finish specification required. Attaches magnetically to underside of overhead storage, or attaches with provided screws or double-sided tape. Occupancy sensor attaches to a single or starter LED light and will automatically turn the light off after no motion is detected for 30 minutes. Just like all the LED light models, the occupancy sensor features a soft-touch on/off switch. LED task lights have a lifetime of 50,000 hours and have a dimmer feature that allows the user to adjust the amount of light output.

Traditional Edge Detail

- ▶ 18th century elegance, 21st century engineering.
- ▶ Tops are premium abrasion- and stain-resistant high pressure, high-gloss laminate over durable 1 1/8" solid core high-performance particleboard.
- ▶ Solid wood edge profile.
- ▶ Antique brass drawer pulls; hand-applied raised decorative molding, and plinth style base.
- ▶ Pullout reference/writing shelf is standard on all desk pedestals.
- ▶ Desk, credenza, and return drawers are 5-sided construction, which allows easy drawer alignment or replacement of drawer fronts.
- ▶ Center drawer on desks equipped with built-in pencil tray and central locking (locks all drawers).
- ▶ Drawers operate on full extension, ball-bearing suspensions to ensure smooth, quiet, long-lasting operation.
- ▶ File drawer design includes integrated hangrails for side-to-side letter or legal filing; and front-to-back for letter filing.
- ▶ Locking units equipped with interchangeable core removable locks.
- ▶ 94000 Series™ products produced after 10/26/98 have been improved with a thicker top. Joining with older products before that date may cause misalignment.
- ▶ Adjustable hex leveling glides allow floor-standing furniture to be easily leveled without lifting the unit; glides have 3/4" adjustable range.

Panel Frame

Open Base Panel Frame

Stacking Frames

Reminder: Panel frame top caps must be ordered separately. Please refer to page 271. Do not specify top caps when putting frameless glass on top of the panel frame or when using a countertop work surface.

About® Frames Overview

Stacking connection provides a solid metal-to-metal connection, allowing the stacking frame to accept hang-on components, per configuration guidelines.

Construction and Features

Specifications—formed, steel vertical members, with tubular steel horizontal members are welded into a sturdy, structural panel frame. Panel frames are shipped with top cap and base pathway covers installed.

Tiles, Panel Top Caps, and Segment Bars are ordered separately.

Additional design and specification information available at hon.com.

Frame Dimensions (Actual)

Depth: 2⁵/₈" (use 2³/₄" to calculate intersections in length of panel run)

Widths: 24", 30", 36", 42", 48", 60"

Heights*: Painted trim: 34¹/₂", 42", 49¹/₂", 64¹/₂"

Stacking Frames: 15"H, 30"H

*with levelers fully retracted

Stacking frames can be added to the top of any 35"H, 50"H or 65"H frame. Adding stacking frames to 42"H frames is not recommended due to inconsistencies in segmentation. 15"H and 30"H stacking frames can be used to add up to 45" of additional height to a standard frame. Do not combine differing frame widths in a single stack.

NOTE: Do not stack on 42''H frames because of stack up/ segmentation mismatch. Glass will not work with 42''H frames.

Building horizontally with Abound frames

Important planning guidelines: For adequate stability, one of two methods of stabilization must be adhered to:

Method 1—Opposing returns:

A parent run must be a minimum of 48" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels running in opposing directions on each end of run.

Method 2—Single-sided returns:

A parent run must be a minimum of 48" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels totaling at least 60% of its length, extending in one direction. Return panels must not be any more than 30" shorter in height than parent run. When using 120° connections, 12" must be added to length of return panels as determined by methods 1 and 2. Any run under 100" must have a minimum combined length of 60" of return panels.

Abound® Frames Overview

Intersecting connections

"L", "T", "X", "Y2" and "Y3" connector kits are used when connecting frames at intersecting runs. For "L", "T" and "X" connector kits, add 2 3/4" to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.

Wall starter kits provide a means to affix a panel run to a permanent building wall. Kit adds 1 1/2" to length of panel run.

Segment Bars — horizontal cross members required between tile segments. Must be specified on each side of frame. One Segment Bar is needed for each reveal between tiles.

Extended straight connector kit "S" can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate "T" or "X" intersections. (Add 2 3/4" to the length of the run for every extended straight connector used.)

In-line connections

Direct connections between same height frames in a continuous run are accomplished with provided hardware. There is no incremental increase in dimension along the run.

End of Run

Finished end trim must be specified for the unconnected sides of panel frames. The Abound end trim adds 3/8" to the length of the panel run. When adding a stacking frame, order finished end trim in the height that matches the stacking frame height. Move the end cap from the standard frame end trim to the stacking frame end trim.

In-line Variable Height Trim In-line connections between different height panels require trim to cover the exposed frame of the taller panel. The bottom of the trim is contoured to match the profile of the frame top cap.

Multiple-height connections are accomplished by combining standard height panel connectors (35"H, 42"H, 50"H and 65"H) with shorter connectors (7"H, 15"H, 22"H and 30"H). Start from the bottom-up — select the standard connector that corresponds to the height and connection type of the shortest panel, then use the shorter connectors to build up to each subsequent panel height. (See examples.)

In variable height "T" connections — as shown above — you would use the connectors as indicated.

Example above represents Abound variable height "L" for 65" to 50" connection over universal top cap.

Variable Height Connection Trim

L, X and T connections between different height panels require trim to cover the exposed frame of the taller panel. The bottom of the trim is flat to match the profile of the Universal Connector top cap. Models are designated as "Variable Height Finished End over Connector Trim". For variable height connections in a Y configuration, contact the HON Product Solutions group.

Optional Stiffener Support

Stiffener supports can be used to provide additional rigidity to a panel when fabric tiles are on both sides of the frame. May also be used for routing power/data at non-standard heights.

Connector Kits — Abound

- "L" 90° Connector Kit
- "T" 3-way Connector Kit
- "X" 4-way Connector Kit
- "S" "S" Extended Straight Connector Kit
- "Y2" 2-way 120° Connector Kit
- "Y3" 3-way 120° Connector Kit
- "W" Wall Starter Kit
- "F" End Trim Kit
- "V" Variable Height Finished End
- "FT" Variable Height Finished End over Connector

- Abound Connector Kits include universal connector block(s), bracket clips and painted metal trim.
- The universal connector block can be used for an L, T, X, or Extended Straight connections, simplifying staging and installation at the project site as well as future reconfigurations.
- Bracket clips are attached to the connector blocks as needed based upon connection type.
- While the connectors themselves are universal, Abound connector kits must be specified by connection type (X, L, T, S, 120 degree) in order to receive the correct type of trim.

Abound® Tile Overview

Abound tiles come in a variety of styles.

*Aesthetics of opposing tile surface and/or frame interior should be considered when selecting SecureFit or light colored sheer materials.

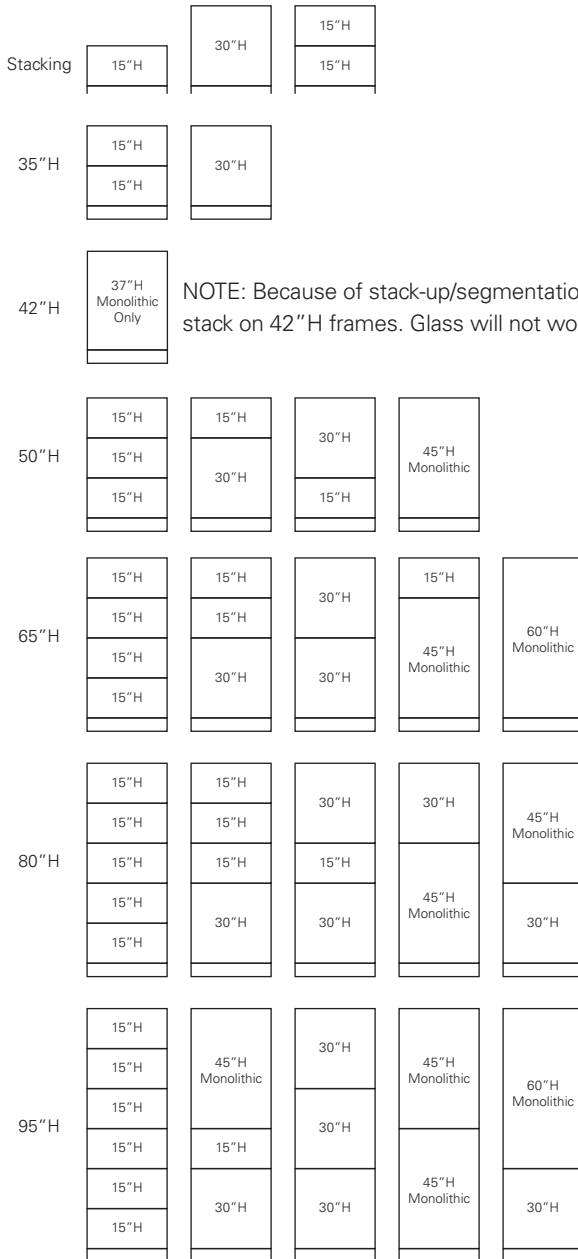

Tile Heights

Monolithic tiles are 5" shorter than frame heights to account for top trim and base raceway.

Typical Tile Height Configurations

Segment bars are required between any two tiles — order separately based on tile configuration on each side of frame. Note: Most CAD specification programs will calculate quantity of segment bars required.

NOTE: Because of stack-up/segmentation mismatch, cannot stack on 42" H frames. Glass will not work with 42" H frames.

*Additional tile combinations to those shown above are possible; heights above 65" require stacking frames - maximum height is 110".

To calculate the total height of tiles(s) required, deduct 5" (height of base/top trim) from the total nominal panel height.
EXAMPLE: 65" H Frame takes 2 30" H tiles. $65 - 5 = 2 \times 30$ or $45 + 15$

Tiles can be ordered in the size that matches the frame height plus the stacker height.
EXAMPLE: If you are using a 35" H frame plus a 30" H stacker, you can order 2 - 30" H tiles or 1 - 60" H tile.

Door panels include frame, 42" W door, hinges and attaching hardware. Two 7 1/2" H fabric tiles for the top of the door frame are required and ordered separately (HRVD0742T).
 Sliding doors are available in 50", 65", and 80" H models and can mount to 30", 36", 42", and 48" W panels. The doors provide a 36" W opening and are 42" W, nominally. The doors ship non-handed. A Mounting Bracket Kit must be ordered for each door corresponding to the mounting panel's width (30", 36", 42", or 48" W).

Plains Tiles and Hard-surface Tiles include tile and Custom Bracket Kit.

Worksurfaces are 1¼" thick with particle-board core and with top surfaces finished in high-pressure laminate. Bottom surfaces are covered with a backer sheet.

Primary worksurfaces are available in 18", 24" and 30" depths. Nominal worksurface width is equal to nominal panel width. Other support hardware is ordered separately.

Corner Dual-Surface Worksurfaces provide maximum worksurface adjustability for seated individuals of all heights. Corner dual-surface worksurfaces can be mounted to panel at any basic product height. Corner worksurface must match exactly, the panel behind them. Requires adjustable height mechanism, ordered separately.

Corner worksurfaces with woodgrain laminate have grain direction diagonal to adjacent worksurfaces. One rear center support bracket is included. All other support hardware is ordered separately.

Wire management grommets are standard in most worksurfaces. Grommets are available in the same colors as t-mold and edgeband. Worksurfaces less than 48"W have one grommet/scalloped centered on edge of worksurface. Rectangular worksurfaces over 42"W have two grommets/scallops. Peninsulas have one grommet or scallop. Corner Worksurfaces have one grommet or two scallops (one on each back edge). D-Shaped worksurfaces and countertops do not have grommets or scallops.

Edgeband and T-Mold Edge trim is available on laminate tops in standard colors (customer specified) to match or complement solid, patterned, or woodgrain laminates.

Working with Worksurfaces and Supports

Optional width worksurfaces are available for use with panel runs having a TEE or Extended Straight connection.

Worksurfaces can be configured at 29 1/2" with end-panel supports and support legs, or at various heights on 1" increments using specific product configurations.

Worksurface support options include:

- Open leg models
- Support column
- Flat brackets
- Worksurface bracket kit
- Cantilever bracket
- Universal support leg
- End-panel support
- Freestanding pedestal

Worksurface bracket kit allows one end of a work surface to be supported by a return panel. Return panel width must be the same as the depth of the work surface.

Flat brackets can be used to connect one work surface perpendicular to another work surface.

Cantilever brackets are left or right handed. They can be inserted into panel reveals in 1" vertical increments. One size is used for both 24" and 30"D worksurfaces. 18" Cantilever brackets are used for 18"D worksurfaces. Both left and right brackets are required in shared applications.

Important: Do not use cantilever brackets at the end of a work surface where no 90° return panel is positioned.

Use with runs 72" or less – avoid installation on only one side of a straight connection except to support corner worksurfaces. Floor support is required for runs longer than 72".

DO NOT position at the end of a panel run where no 90 degree return panel is positioned.

DO NOT use to support worksurfaces from which a hanging pedestal is suspended, or to which a peninsula work surface is attached.

DO NOT use cantilever brackets to support worksurfaces supported with permanent wall hanger kit.

Universal support legs are used to support worksurfaces only in a shared position.

End-panel supports are used in place of return panels at the end of work surface runs. Straight worksurfaces adjacent to 120° connections must be supported by full end panels. End-panel supports are ordered for right- or left-handed application. Leveling glides provide 1 1/2" of adjustment.

Open Leg models are used to support various work surface configurations and include attaching hardware and leveling glides.

Freestanding pedestals can also be used to support one end of a panel-attached work surface in conjunction with work surface bracket.

D-Shaped, Peninsula and Jetty worksurfaces require support columns (ordered separately).

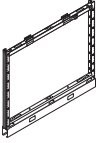

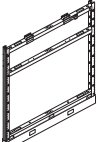

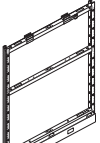

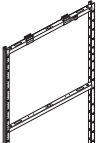

Countertops are available in straight or corner configurations.

Corner shelves are available in T-Mold or Edgeband options. Attachment brackets are included.

- ▶ Includes frame, baserail covers, attaching hardware and bottom segment bar.
- ▶ Frames, top caps and tiles are ordered and shipped separately.
- ▶ Frames are 2 $\frac{5}{8}$ " thick with a 5" H baserail.
- ▶ Frames are standard with two adjustable leveling glides which can be adjusted from the bottom of the glide or from the interior of frame.
- ▶ Two wire and data management openings standard per raceway, 24" panel has one opening.
- ▶ Lay-in wire management available in base. Horizontal cable routing available at beltline.
- ▶ Lay-in top pathway provides additional data cabling capacity.
- ▶ For worksurfaces that can be used with both Abound® and Accelerate® systems, see pages 314-327.
- ⚠ **Stacking not recommended with 42" frames.**

About® Stiffener Supports

GSA SIN 711-1

- ▶ Tile stiffener supports can be used to increase the stiffness of a panel and can also be used to mount power/data anywhere vertically on an About frame. Can only be used when there are fabric tiles on both sides of the frame.
 - ▶ Self-drilling screws included.
 - ▶ For worksurfaces that can be used with both About® and Accelerate® systems, see pages 314-327.
- ⚠ **Black only. No need to specify.**

- ▶ L, T and X Connectors are used when connecting frames at intersecting runs. Add 2 3/4" to the frame run for each connector.
- ▶ All connectors include a light-gap strip.
- ▶ Abound connectors utilize a universal connector block designed to make one connection to the panel.
- ▶ Bracket clips come standard.
- ▶ 7"H connectors include one connector block; 15"H, 22"H, 30"H include two connector blocks; 50"H includes three connector blocks and 65"H includes four connector blocks.
- ▶ Connectors ship complete with trim.
- ▶ No universal top cap with 7"H-30"H connectors. These are to be used where base height connectors are also used, therefore additional top caps are not necessary.
- ▶ Outer trim snaps easily into place.
- ▶ Extended Straight Connectors are used to keep a frame run dimensionally consistent with opposing frame runs. Add 2 3/4" to the length of the run with each Extended Straight Connector used.

Specification Guidelines

In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side. When suspending overhead storage off-module only one storage unit per panel side is allowed.

When overhead storage units are suspended from stacking frames, the following guidelines should be adhered to:

Stacking frames should be added to all the parent run panels, and to each return-panel run. Stacking panels added to return panel must match the parent run configuration.

A maximum of two overhead storage units should be suspended from each side of stacking frames on any given panel.

Overhead Storage cabinets and the **Open Shelf** can also be mounted to a maximum height of 65"H on Abound frames.

No limitation to the number of units on structural frames when units are spaced 12" apart and when the run is supported with return panels on each side of storage shelves or overhead storage cabinets.

Storage shelf and overhead width must correspond with width of panel(s). It is possible to span two panels when combined panel width equals cabinet or shelf width.

Abound Overhead Cabinets can be mounted on a panel equal to or up to 18" narrower than cabinet.

Only applies to Overhead models.

About® Overhead Storage

GSA SIN 711-1

▶ Overhead Storage Cabinets with doors are standard with a factory installed core removable lock located on the underside of the cabinet.

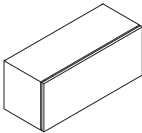

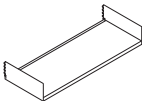

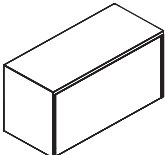

▶ All units feature an anti-dislodgement device.
▶ 60" units are one piece cabinet with two doors.

▶ Abound overheads have the ability to hang on either side of the frame.
▶ Omit lock option.
▶ Upmount kits can be used with all Abound overheads.

⚠ **Abound Overheads attach with off-modular brackets allowing the overhead to be used with the Accelerate® panel system. See pages 296-297 for overhead specifying.**

⚠ **Keyed alike cores must be ordered separately — see page 684.**

Abound® features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway and beltline. The open structure of the frame allows voice and data cables to be routed both vertically and horizontally.

The Abound electrical systems

Abound offers a choice of three electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals

All three systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian). See pages 305-306 for a detailed explanation of each electrical system.

Abound frames and electrical components are UL Listed. Electrical components are also CSA certified.

Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.

Abound's electrical harnesses are UL listed and are considered raceways themselves as defined by the National Electrical Code. This means there is no separation requirement between the electrical harnesses and communications cables per Sec. 800-52 of the National Electrical Code. Communication cables may be placed next to Abound's electrical components without a metal septum and will still meet the guidelines of the Telecommunications Industry Association for separation of power and data.

In-feeds

Power in-feed cables deliver power from building to system. In-feed cables are housed in conduit to separate electrical system from communications and data lines.

Integrated power and communications poles provide capacity for routing power supply directly through the top of any structural or stacking frame using same width trim/connector kit in place of top cap. Avoid glass or translucent tiles in upper position of frames with integrated power poles. Power pole has a cavity on each side of a center septum. When using a ceiling power in-feed, consider that the in-feed must connect into an electrical harness located in an adjacent panel. (See pages 307-309 for cable capacity.)

Ceiling power in-feed connects to a prewired electrical harness in the beltline or base pathway, traverses through an adjacent panel and terminates in the junction box at the top of the integrated power pole. For use with integrated power pole models HEP65 and HEP35. No portion of the flex cable can be exposed after installation.

Sealight base pathway power in-feed attaches to a receptacle opening at the base pathway. A heavy rubber sheathing shields conduit, allowing in-feed to be exposed.

Hardwire (New York Code) Power In-Feed (model H871400) is used when local electrical codes require hardwire entry. When used in 24"W, 30"W and 36"W panels, power can be routed only in one direction. When used in 42", 48"W and 60"W panels, an electrical pass-thru cable or harness for that panel width can be used to route power back in the opposite direction. Unit must connect to a power or pass-thru harness positioned in the base pathway area of an adjacent panel. Customer to furnish all cabling and wiring from power entry to power source. Junction box can be positioned at any duplex receptacle location.

Hardwire (Chicago Code) Junction Box

Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all metallic components. Concealed mounting is the only option at beltline. For the base pathway, junction box (model HH873500) clips directly into receptacle locations. Customer must furnish conduit, wiring, standard duplex receptacles with metal covers for the beltline and designer-type receptacles for the base pathway. Power entry can be routed from the ceiling, via an Abound power pole, or from the floor into a junction box (model HH873500).

Power

Power blocks on electrical power harness and pass-thru harness accept duplex receptacles.

Electrical power harnesses are used to distribute power in panels. Abound electrical can be located at base pathway or beltline only. Connectors at both ends of power harnesses allow power distribution in either direction.

Electrical pass-thru harnesses have capacity to handle one duplex receptacle on each side of the panel when exposed.

A 60" pass-thru harness can be used to jump up to a single duplex receptacle per side at beltline and connecting to a power harness at base pathway.

Electrical power harnesses and pass-thru cables cannot be routed at 90° at beltline once frames are connected to connector blocks.

Electrical pass-thru cables distribute power through any panel where receptacles are not required. Cable length cannot be stretched.

Electrical jumper cables connect power from base pathway or beltline to a harness located on any horizontal member as needed. Jumper cable plugs into power block end of electrical power harness or electrical pass-thru harness.

Model HH871366 is 66" to jumper up to 30 inches vertically – base pathway to beltline or beltline to base pathway.

Jumper can also be used from beltline to adjacent beltline at 90° juncture.

Power Blocks

Base pathway mounting: Power blocks snap directly onto brackets in base pathway area.

Beltline electrical mounting: For ported receptacles at beltline mount power blocks onto Electrical Mounting Brackets which screw into the panel frame. Electrical Mounting Brackets must be ordered separately. Data/Electrical Port Tiles must be used where exposed receptacles will be located.

Receptacles

Duplex receptacles snap into power blocks of power harnesses or pass-through harnesses. Duplexes are available in multiple colors. Each receptacle is labeled to indicate which circuit it will be connected to.

Optional Stiffener Support

Stiffener supports can be used to provide additional rigidity to a panel when fabric tiles are on both sides of the frame. May also be used for routing power/data at non-standard heights.

All electrical power harnesses and pass-thru harnesses will stretch 3 1/2", allowing them to span "T" and "X" intersections and "S" extended straight connections.

Systems Electrical and Data

**Lighting**

Task lights can be recessed under storage cabinets or storage shelves.

Task lights in four sizes are available to correspond to cabinet or shelf width. They have 9' power cords in black, connected in the right rear corner. All models feature electronic ballast for longer bulb life and cooler operating temperature. Task lights with a fused plug to meet Chicago electrical code are also available.

Recommendation: Provide a separate circuit for task lights for proper long-term operation without RF interference to computers that may be in use.

**LED Task Lights**

No finish specification required. Attaches magnetically to underside of overhead storage, or attaches with provided screws.

Occupancy sensor attaches to a single or starter LED light and will automatically turn the light off after no motion is detected for 30 minutes.

Just like all the LED light models, the occupancy sensor features a soft-touch on/off switch. LED task lights have a lifetime of 50,000 hours and have a dimmer feature that allows the user to adjust the amount of light output.

Daisy chain options are available. To use the daisy chain application, must start with model HLED17A or HLED31A.

Voice/Data Receptacles

Abound not only provides space for large volumes of voice and data cables, it also offers several means of mounting commercially available voice and data components.

Commercially available modular data faceplates can be mounted in vacant base receptacle openings or can be mounted in data/electrical port tiles above or below the worksurface.

Cable management troughs attach to worksurfaces with provided screws.

The graphite metal troughs are designed with cord access cut outs. These cut outs give users access to inside the trough without having to detach it from the worksurface.

To Order:

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:

- **The Four-circuit system (4-Hot/2-Neutral/2-Ground)**
 - 3 + 1 option
 - 2 + 2 option
- **The Three-circuit system (3-Hot/3-Neutral/2-Ground)**

2. Determine location, quantity and circuit of duplexes.
3. Determine the appropriate choice and use of Isolated, Isolated/Dedicated and Separate Neutral circuits.*
4. Specify appropriate Power Harnesses* and Pass-Thru Cables.*
5. Determine the location, quantity and type of Power In-feed needed.

* Select Power Harness models (HH8712XX) and Pass-Thru Cables (HH8711XX) with the last two digits being 1" (or 2") smaller than the associate panel width.

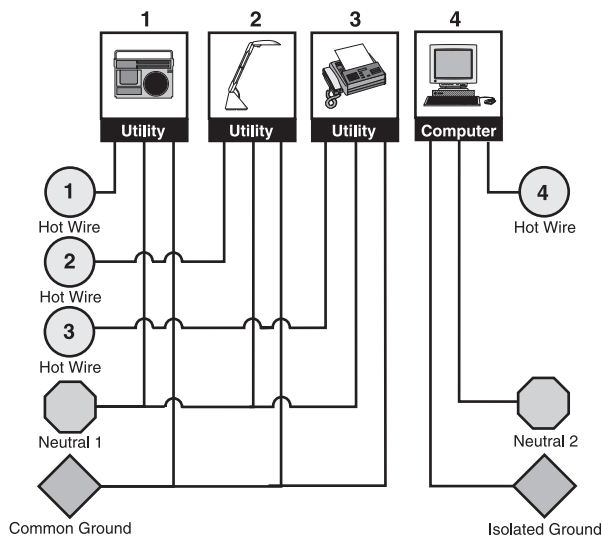

Electrical System Options

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals.

Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

Four-circuit, 3 + 1 Receptacle Option

The 3 + 1 option is the electrical standard used by The HON Company for many years in most of their systems products. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment.

Four-circuit, 2 + 2 Receptacle Option

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

Three-circuit, separate neutrals

The Three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/dedicated. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

Two 8-wire, 20 AMP (15 AMP Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity

Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system from being connected to components of another system.
- HON Cat. Nos. are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

(1) Circuit-2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Typical power usage by the most commonly specified office equipment.

(Required by some large copiers.)

- Abound panels are UL listed.
- Electrical components are UL Listed and CSA Certified.
- It is the customer's responsibility to ensure that use of the pre-wired electrical system, the number of receptacles used on a given circuit, and connection to a building power source, be in compliance with all local and national electrical codes.

- Contact Customer Service for additional information.
- Pedestals and Lateral Files, positioned under worksurfaces, may render some receptacles inaccessible, and may prohibit use of grommets.

- Four-circuit components and Three-circuit components (with suffix "A") cannot be used together. See pages 305-306.
- ⚠ **A licensed electrician must make connections to a building electrical supply.**

- ⚠ **Three-way panel connections require at least one power harness.**
- ⚠ **4-way panel connections require at least two power harnesses.**

Definition of components:

Electrical Power Harness

- Used to distribute power in panels.
- Power distribution in either direction.
- Specify Power Harness to match panel width.
- Double-sided: receptacles can be inserted into both sides of Power Blocks.
- ⚠ **Three-way panel connections require at least one power harness.**
- ⚠ **4-way panel connections require at least two power harnesses.**

Electrical Pass-Thru Cables

Pass-Thru Cable With Duplex Capacity:

- Use in panels where multiple receptacles are not required.
- Added feature: has capacity for one receptacle on each side of a panel. Feature offers future expansion and is an alternative to Power Harnesses.

Various Electrical Layouts

Straight Line

90 Degree Corner

"T" Connection

When ending power in two return panels, wiring pigtails must be returned to original panel run.

"X" or Cross Connection

To power a 4-way panel connection from one direction, specify at least two double block panel runs.

Duplex Receptacles

- 15 amp outlet configuration.
- Models HH871601 and HH871601A have a 20 amp outlet configuration.
- Fit back-to-back into the Power Block(s) of Power and Pass-Thru Harnesses.
- Labeled with the provided circuit. Circuits connected to the Isolated Ground are identified with an orange triangle; circuits that do not share a neutral or ground have an orange circuit number.

Power In-Feed (Base) Models HH879072 (72") and HH879168 (168")

- Used to connect the panel electrical system to the building electrical supply at a power block.
- Plugs into any receptacle position; can be rotated Left or Right.
- Conduit is UL listed Black Liquid-tight conduit (outside diameter is 1/8").
- ⚠ **A licensed electrician must make connections to a building electrical supply.**
- ⚠ **Must be positioned through a receptacle opening in the baserail cover, prior to an electrician connecting to the power source.**

Power In-Feed Model (Ceiling) HH871912 and HH871972

- Used to connect the panel electrical system to the building electrical supply.
- ⚠ **A licensed electrician must make connections to a building electrical supply.**
- ⚠ **Model uses UL recognized flex-cable conduit — no portion can be left exposed (i.e., must be in a power pole).**
- ⚠ **Power Pole HEP35/HEP36 must be ordered separately.**

Note: In-feed cables listed above may be field-cut to desired length.

Electrical Jumper Cables

- ⚠ **When used to connect power between the base pathway and the beltline area, the jumper must be connected to a power block at one end of a run, routed into an adjacent panel that does not contain a power harness, then routed back into the panel containing a power harness or pass-thru cable and connected to a power harness in the other pathway.**

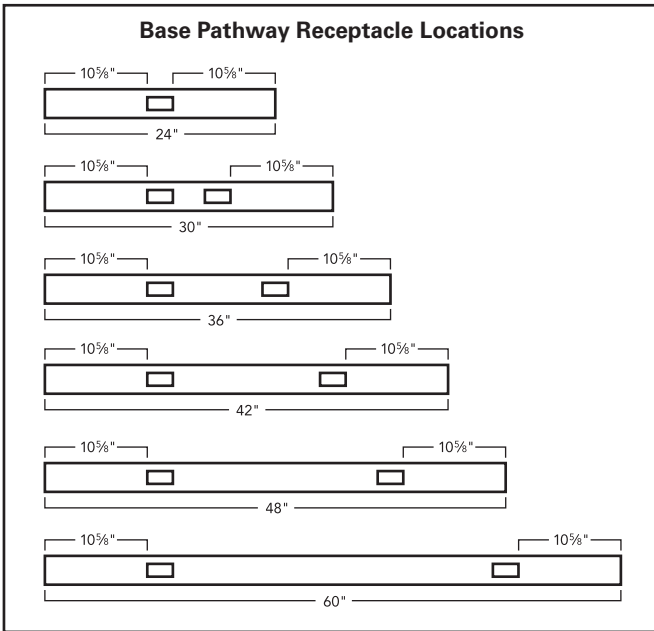

Electrical Mounting Brackets

- Use to mount ported receptacles at beltline.
- Screw into the panel frame.
- ⚠ **One mounting bracket required at beltline for each 24" W pass-thru or power harness. Two required for 30"-60" W power harness.**

Working with Cable Management

Base Pathway Receptacle Locations

Circuit Usage

Strategy 1

Circuits to Equipment

Assign specific uses for each of the circuits:

- For example, in a four-circuit system:
 - Circuit 1* — Calculators, fans, etc.
 - Circuit 2* — Task lights (could be wired to wall switch)
 - Circuit 3* — Computer monitors
 - Circuit 4* — CPUs

Strategy 2

Circuits to Workstations

Assign specific workstations to each of the three available circuits. Use circuit 4 for power-sensitive electronic equipment.

Placement of pedestals and lateral files may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

Lay-in Cable Capacity

The **top and base pathway** allow continuous voice and data lines to run through and between panels without interruption. Lay-in is provided for environments where systems furniture or cabling are subject to frequent change.

Top pathway accepts up to 8 voice/data cables (.25" dia.).

Variable height junctions accept up to 3 voice/data cables (.25" dia.).

Abound® **base pathway** accepts up to 44 voice/data cables (.25" dia.) (6.03 sq. in.) at 60% fill.

When electrical system shares base pathway, the cable capacity in Abound is reduced to 27 cables (2.25 sq. in.). Cable quantities listed are at 60% fill ratio.

Cable capacity of the power pole, in addition to electrical in-feed is 2.79 sq. in. on one side and 2.91 sq. in. on the other for a total capacity of 69 cables of .25" diameter.

About String-in Capacity

Openings in frame sides permit electrical data and communication cables to be run between frames in Abound. Using tackable acoustical tiles, the beltline pathway accommodates up to 62 cables (.25" dia) or 46 cables with electrical components installed.

DO NOT run electrical equipment or extension cords through cable openings in frame sides. Use beltline or base-mounted electrical system for all electrical supply.

Cables can enter/exit panel through underside of base pathway at juncture between frames. Openings are sized as follows (in sq. in.):

Straight connection	6.0
"S" Extended Straight Connection	10.0
"L" 90° Connection	8.9
"T" Connection	15.9
"X" Connection	17.9
"Y" Connection	—

When leveling glides are fully retracted, panel-to-floor clearance is 7/16". This may affect the volume of cabling that can be fed into the frame from the bottom of the pathway.

- A 60% fill ratio is achievable; however, when electrical components are installed in the beltline area, cabling capacity through the beltline area will be limited to approximately 45% fill ratio.

Vertical Capacity

Vertical Capacity Through panel Frames

	Panel Width	Qty. of .25" Cables at 45% Fill Ratio	Qty. of .25" Cables at 60% Fill Ratio	Total Space (sq. in.)
Abound	24" – 60"W	48	64	5.26

▶ Duplex receptacles on page 312. **△ Four-circuit components and three-circuit components (with "A" suffix) not designed to be used together. See pages 305-306.**

△ To connect power between the base pathway and the beltline area, four-circuit jumper cables (HH8713xx) must be connected to a power block at one end of a run, routed into an adjacent panel that contains no power harness, then routed back into the panel that contains a power harness (or pass-thru cable), and connected to a power harness in the other pathway.

NOTES: The use of an end panel at the end of a worksurface will increase the rigidity of the workstation. If the panel is a greater dimension than the worksurface, an end panel is required if the run of the worksurfaces is 8 feet or greater.

△ ***Must be connected into panel slots. When an installation of worksurfaces is 8 feet or greater, a full end panel or universal support leg must be used at 90 degree panel junctions or in a shared position to support adjoining worksurfaces.**

Systems Worksurface Supports

GSA SIN 711-1

Support Column

- Used to support one end of a peninsula, round or half-round worksurface. (Includes panel support brackets.)
- Levelers provide 1 1/2" vertical adjustment.

Flat Brackets

- Flat Brackets can be used to connect one worksurface perpendicular to another worksurface.

Worksurface Bracket Kit

- Used to connect the end of a worksurface to a panel of the same width.

The supports included on this page can be used with Systems Worksurfaces.

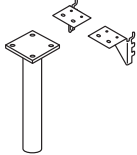

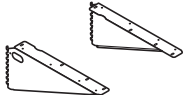

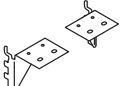

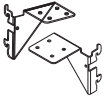

Worksurfaces should not be supported with Cantilever brackets when using Permanent-Wall Hanger Kit.

Accessory Cantilever

- Use with runs 72" or less – avoid installation on only one side of a straight connection except to support corner worksurfaces. Floor support is required for runs longer than 72".
- DO NOT position at the end of a panel run where no 90 degree return panel is positioned.

- DO NOT use to support worksurfaces from which a hanging pedestal is suspended, or to which a peninsula worksurface is attached.
- DO NOT use cantilever brackets to support worksurfaces supported with permanent wall hanger kit.

WORKING WITH ABODE™ COMPONENTS

Configurations

End Panels and Support Legs

Each are available in two options: freestanding or panel-mount. The only difference between the two options are the panel-mount models come with a left- or right-handed bracket to attach the support to a panel in a systems application.

The 11"D end panel is used to support peninsulas.

Corner Desk Legs

Corner desk legs have a 90-degree bend and welded construction. The strong construction allows gussets or half-height modesty panels to be used with corner legs.

Bridge Kits

Bridge kits include: two flat brackets, two modesty panel-to-end panel attachment brackets, and two tie straps. This kit is used when attaching a bridge unit between two rectangular worksurfaces.

There are some bridge instances where only half of a bridge kit is needed (e.g., using a bridge between a rectangular worksurface and a corner or peninsula). A return kit may be ordered for these instances.

Support Column

Support columns are used to support one end of curvilinear worksurfaces. Includes column, worksurface bracket kit HWSA2, attaching hardware, and adjustable glides.

Return Kits

Return kits include: one flat bracket, one modesty panel-to-end panel attachment bracket, and one tie strap. These are used when attaching a return to a primary desk. Return kits can also be used in some bridge applications — one example is shown below when using a peninsula.

Desk-to-Panel Attachment Kits

Desk-to-panel attachment kits are used to connect a worksurface and modesty panel perpendicular to a panel of corresponding width. Opposing end of worksurface must be attached with an end panel, support leg, or corner leg mounted directly under this worksurface.

When using a corner or corner cove worksurface with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk, use corner w/desk attachment kit. Hand of unit is determined from the user's side of the desk (right-hand unit attaches to right side of modesty).

Corner w/Desk Panel Attachment Kit

Corner w/desk panel attachment kit connects the rear corner of a corner or corner cove worksurface and modesty panel to a panel when the opposing end of the worksurface shares a support leg with an adjacent freestanding desk and the support leg is mounted under the freestanding desk. Hand of unit is determined from the user's side of the desk (left-hand unit attaches to left side of modesty).

Corner Worksurfaces

Corner worksurfaces accommodate 90-degree corner desk legs.

In-Line Connections of Desks

Shared leg can be used at in-line connections to support adjacent rectangular desks.

Pedestals and Storage

Pedestals must be ordered smaller than the depth of the worksurface. For example, 20"D peds should be used with 24"D worksurfaces. 20"D or 23"D pedestals can be used with 30"D worksurfaces. Using 18"D laterals or personal files provide additional storage options under 24"D worksurfaces.

Modesty Panels

The following are some general guidelines for Abode™ modesty panels:

- **Desk:** Modesty panel width is the same width as the worksurface
- **Return:** Modesty panel width is 6" greater than the width of the worksurface
- **Bridge connecting two rectangular worksurfaces:** Modesty panel width is 12" greater than the width of the bridge worksurface
- **Bridge connecting a rectangular worksurface and corner or peninsula:** Modesty panel width is 6" greater than the width of the worksurface
- **Corner connecting to an adjacent worksurface:** Modesty panel width is the same width as the worksurface.

Stand-Alone Corner Modesty Panels

Stand-alone corner modesty panels are used only when one or both sides of a corner or corner cove worksurface are freestanding and NOT attached to another worksurface. Specify the width the same as the width of the worksurface.

Gussets "G"

Gussets can be used in place of a modesty panel with desks 36"W to 60"W. Gussets can also be used with corner desk legs.

The following five pages contain examples of Abode™ workstations. Each “typical” is shown in 3D hidden line perspective. Along with each typical is a complete listing of all the components. Use the information and format to better understand the layout and specifying of Abode™.

Intersecting connections

"L", "T" and "X" connector kits are used when connecting frames at intersecting runs. For "L", "T" and "X" connector kits, add 2 1/4" to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.

Wall starter kits provide a means to affix a panel run to a permanent building wall. Kit adds 7/8" to length of panel run.

Stacking panels

Stackers add 15" to the height of the base panel and can be ordered separately or as part of the panel model, see pages 362 and 366.

When adding stackers to an existing panel, a new connector must be ordered, to the tallest panel height. Please note that Stacking Panels are not to be used freestanding and must match the panel width of the panel it is stacking on.

Cannot use a stacking panel on a Top Tier Glass Panel model.

Stackers ship with pins to connect stacker to post connector for added rigidity.

Stackers can be stacked up to 80"H on a base panel. Stackers are weight bearing and can accommodate overhead storage.

Extended straight connector kit "S" can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate "T" or "X" intersections. (Add 2 1/4" to the length of the run for every extended straight connector used.)

In-line connections

There is no incremental increase in dimension along the panel run when using an in-line connector kit.

End of run

Finished end trim must be specified for the unconnected sides of panel. When adding a stacking panel, order finished end trim in the height that matches the total stacked height. Move the end cap from the standard frame end trim to the stacking frame end trim.

Accelerate® frameless glass is single pane, 3/8" thick laminate safety glass, available in clear or frosted glass.

Frameless glass can only be used on the tallest panel in a typical, not at inline or post connectors with variable

height. Frameless glass is not allowed on top of glass stackers or glass header panels and hanging or stacking on frameless glass is not permitted.

Frameless glass can span multiple panels with one piece of glass, creating a clean, seamless look.

In-line Variable Height Trim In-line connections between different height panels require trim to cover the exposed frame of the taller panel.

Variable Height Connector Trim

L, X and T connections between different height panels require trim to cover the exposed connector. The bottom of the trim is flat to match the profile of the top cap. Models are designated as "Variable Height Connector Trim". For variable height connections in a Y configuration, contact the Accelerate Specials Department.

Multiple-height connections are accomplished by combining standard height panel connectors (35"H, 42"H, 50"H and 65"H) with shorter trim kits (7"H, 15"H, 22"H and 30"H). Start from the top-down — select the standard connector that corresponds to the height and connection type of the tallest panel. (See examples.)

Example 1

Connectors required:
1-50"H "T" Connector
2-15"H Connector VH Kit
2-35"H End Trim
1-65"H End Trim

In variable height "T" connections — as shown above — you would use the connectors as indicated.

Example 2

Connectors required:
1-50"H "X" Connector
2-7 1/2"H Connector VH Kit
2-50"H End Trim
2-42"H End Trim

Example 3

Connectors required:
1-65"H "T" Connector
1-15"H Connector VH Kit
1-22 1/2"H Connector VH Kit
1-65"H End Trim
1-50"H End Trim
1-42"H End Trim

Example above represents Accelerate variable height "L" for 65" to 50".

Tackable and Non-Tackable Panels

Non-tackable panels have a unique substrate which may cause a slight color variation with certain, light-colored fabrics.

Top Caps

Top caps must be specified as a separate model from the panel. Top caps can span more than one panel when panels are connected in an in-line.

Accelerate® Working with Panels

Panels

- Accelerate® Panels are 2 1/8" thick and available in 4 heights / 8 widths.

NOTE: Actual panel height varies depending on position of levelers.

The center of the duplex is always 12" from the end of the panel on all Accelerate® panels.

Panel Specification and Installation Notes

Definitions:

Parent Panel Run – Panels (or a single panel) configured in a straight line intended to divide space. It is usually longer than the panels used to stabilize it.

Return Panels – Panels attached to a parent run for the purpose of stabilizing it. Return panels may also have the effect of dividing space.

Note: Return panels must be no more than 30" lower than the maximum height of the parent panel run. When stacking, the maximum height allowed is 80". This includes frameless glass. If attaching overhead storage, return panels must be the same height as parent run.

Method 1: Opposing Returns

A parent panel run must be a minimum of 4 feet and a maximum of 10 feet, and must have a minimum of two return panels extended in opposing directions on each side of the parent run.

Worksurfaces are 1¼" thick with particle-board core and with top surfaces finished in high-pressure laminate. Bottom surfaces are covered with a backer sheet.

Primary worksurfaces are available in 18", 24" and 30" depths. Nominal worksurface width is equal to nominal panel width. Other support hardware is ordered separately.

Corner Dual-Surface Worksurfaces provide maximum worksurface adjustability for seated individuals of all heights. Corner dual-surface worksurfaces can be mounted to panel at any basic product height. Corner worksurface must match exactly, the panel behind them. Requires adjustable height mechanism, ordered separately.

Corner worksurfaces with woodgrain laminate have grain direction diagonal to adjacent worksurfaces. One rear center support bracket is included. All other support hardware is ordered separately.

Wire management grommets are standard in most worksurfaces. Grommets are available in the same colors as t-mold and edgeband. Worksurfaces less than 48"W have one grommet/scalloped centered on edge of worksurface. Rectangular worksurfaces over 42"W have two grommets/scallops. Peninsulas have one grommet or scallop. Corner Worksurfaces have one grommet or two scallops (one on each back edge). D-Shaped worksurfaces and countertops do not have grommets or scallops.

Edgeband and T-Mold Edge trim is available on laminate tops in standard colors (customer specified) to match or complement solid, patterned, or woodgrain laminates.

Additional Models for Use with Connector Kits

- FE** Finished End Covers
- WS** Wall Starter Kit
- WT** Wall Track

Panel-to-Panel Connector

- Attaches same height, panel-to-panel in a straight run with screws.
- Ensures alignment on panels in a straight run.

Wall Starter Kit (see page 369)

- Anchor devices are not supplied with the wall starter kit. Refer to Accelerate® Installation Instructions for appropriate hardware.
- Adds 7/8" to length of run.

Optional width worksurfaces are available for use with panel runs having a TEE or Extended Straight connection.

Worksurfaces can be configured at 29 1/2" with end-panel supports and support legs, or at various heights on 1" increments using specific product configurations.

Worksurface support options include:

- Open leg models
- Support column
- Flat brackets
- Worksurface bracket kit
- Cantilever bracket
- Universal support leg
- End-panel support
- Freestanding pedestal

Other worksurface supports include:

- Support columns
- External channel supports
- Support pedestals
- Pedestals with panel-to-pedestal bracket
- Desking freestanding shared leg

Support Guidelines:

- Unsupported panel runs greater than 72"W need floor support for improved stability.
- Worksurface bracket kit should be used to tie panels to worksurfaces for added stability.
- A panel run without a return needs a floor support.
- Unsupported worksurface spans of 60"W-84"W require an external worksurface support channel. It is recommended for 48"W-60"W.
- Cantilevers only to be used on worksurface runs 48"W or less.

Worksurface bracket kit allows one end of a worksurface to be supported by a return panel. Return panel width must be the same as the depth of the worksurface.

Flat brackets can be used to connect one worksurface perpendicular to another work-surface.

Cantilever brackets are left or right handed. They can be inserted into panel reveals in 1" vertical increments. One size is used for both 24" and 30"D worksurfaces. 18" Cantilever brackets are used for 18"D worksurfaces. Both left and right brackets are required in shared applications.

- Important:** Do not use cantilever brackets at the end of a worksurface where no 90° return panel is positioned.
- Do not use to support worksurfaces from which a hanging pedestal is suspended, or which a peninsula worksurface is attached.
 - Do not use to support worksurfaces supported with permanent wall hanger kit.

Universal support legs are used to support worksurfaces only in a shared position.

End-panel supports are used in place of return panels at the end of worksurface runs. Straight worksurfaces adjacent to 120° connections must be supported by full end panels. End-panel supports are ordered for right- or left-handed application. Leveling glides provide 1 1/2" of adjustment.

Open Leg models are used to support various worksurface configurations and include attaching hardware and leveling glides.

D-Shaped, Peninsula and Jetty worksurfaces require support columns (ordered separately).

Countertops are available in straight or corner configurations. Mounting hardware is included.

Corner shelves are available in T-Mold or Edgeband options. Attachment brackets are included.

- Unsupported worksurface spans of 60"W-84"W require an external worksurface support channel. It is recommended for 48"W-60"W.

Accelerate® Electrical and Data

Accelerate® features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway. See Systems electrical pages 310-313 for electrical models to be used with Accelerate® Systems products.

The Accelerate electrical systems

Accelerate offers a choice of three electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals

All three systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian). See pages 305-306 for a detailed explanation of each electrical system.

Accelerate panels and electrical components are UL Listed. Electrical components are also CSA certified.

Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.

Accelerate's electrical harnesses are UL listed and are considered raceways themselves as defined by the National Electrical Code. This means there is no separation requirement between the electrical harnesses and communications cables per Sec. 800-52 of the National Electrical Code. Communication cables may be placed next to Accelerate's electrical components without a metal septum and will still meet the guidelines of the Telecommunications Industry Association for separation of power and data.

In-feeds

Power in-feed cables deliver power from building to system. In-feed cables are housed in conduit to separate electrical system from communications and data lines.

Integrated power and communications poles provide capacity for routing power supply directly through the top of any connector. Power pole has a cavity on each side of a center septum. When using a ceiling power in-feed, consider that the in-feed must connect into an electrical harness located in an adjacent panel. (See pages 307-309 for cable capacity.)

Ceiling power in-feed connects to a prewired electrical harness in the beltline or base pathway, traverses through an adjacent panel and terminates in the junction box at the top of the integrated power pole. For use with integrated power pole models HECPP. No portion of the flex cable can be exposed after installation.

Sealtight base pathway power in-feed attaches to a receptacle opening at the base pathway. A heavy rubber sheathing shields conduit, allowing in-feed to be exposed.

Hardwire (New York Code) Power In-Feed (model H871400) is used when local electrical codes require hardwire entry. When used in 24"W, 30"W and 36"W panels, power can be routed only in one direction. When used in 42", 48"W and 60"W panels, an electrical pass-thru cable or harness for that panel width can be used to route power back in the opposite direction. Unit must connect to a power or pass-thru harness positioned in the base pathway area of an adjacent panel. Customer to furnish all cabling and wiring from power entry to power source. Junction box can be positioned at any duplex receptacle location.

Hardwire (Chicago Code) Junction Box

Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all metallic components. Concealed mounting is the only option at beltline. For the base pathway, junction box (model HH871500) clips directly into receptacle locations. Customer must furnish conduit, wiring, standard duplex receptacles with metal covers for the beltline and designer-type receptacles for the base pathway. Power entry can be routed from the ceiling, via an Accelerate power pole, or from the floor into a junction box (model HH871500). See Systems electrical pages 310-313 for electrical models to be used with Accelerate® Systems products.

Duplex Receptacles

For Duplex Receptacle models that can be used on Accelerate® panel systems, please see page 312.

All Systems electrical components can be found on page 310.

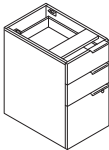

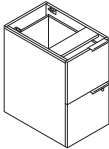

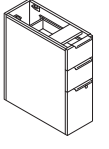

Voi® Laminate Support Pedestals

 - ▶ Voi® Support and Power-Ready Pedestals can be used with worksurfaces.
 - ▶ A variety of pedestals, end panels, and O-legs can be combined to create a conventional or contemporary desk.
 - ▶ Chassis and drawer front woodgrain and solid laminates are specified separately (see SIF options below).
 - ▶ File drawers accept hanging folders in letter or legal size.
 - ▶ Multiple handle locations possible per customer preference.
 - ▶ Ships with one handle per drawer.
 - ▶ Drawer Organizer model HLSDRWORG works with box drawers.
 - ▶ Box and file drawers operate on ball-bearing suspension with full extension.
 - ▶ Adjustable hex leveling glides allow floor-standing furniture to be easily leveled without lifting the unit; glides have 1/4" adjustable range.
- ⚠ **Locking units equipped with HON "One Key" interchangeable core removable locks. Keyed alike core must be ordered separately.**
- ⚠ **Pedestals ship fully assembled but must attach to a worksurface with a quick release bracket, provided. Pedestals are non-handed and are interchangeable.**

- ▶ Overall case depth is 19"D including the sliding door.
- ▶ Use Shared Overhead and attachments in small footprint applications.

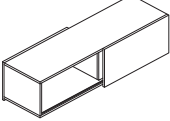

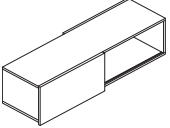

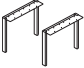

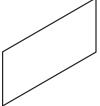

- ▶ Sliding door is 15"H, providing a 1" valance below the case which can be used as a finger pull if desired.

- ▶ Shared Overhead panel mount brackets and overhead post legs allow overhead to span over all panel systems or run down the spine wall, centered on top of the panel.

- ▶ Post legs can attach to all low credenza models and all worksurface models.
- ▶ Markerboard insert is laminate with black edges, no frame.

⚠ **Overhead units do not lock.**
 ⚠ **Shared Overhead must be ordered as left or right to determine open storage location.**

FEATURES

Panels

- Use Versé as a privacy panel (stand alone) to create space division.

QuickConnect (See page 368 for more details on this hardware.)

- Our QuickConnect connectors allow for easy installation. Simply snap on the connectors at the top and bottom of the panel and slide the panels together. There are only two connectors to specify for almost all configurations.

Storage

- Shelving capabilities. Each shelf width must match width of panel.

PANEL DIMENSIONS AND GROWTH ALLOWANCES

- All panel runs must be supported at each end of the panel run and supported at least every 8' within the panel run (maximum of 8' between supports).
- Support can be in the form of an adjustable wall bracket or return panel at 90° to the run.
- When using an "L" configuration, the return panel must measure at least 60% (minimum 36") of the unsupported run.
- When using a "T" configuration, each return panel must measure at least 20% of the unsupported run.
- Return panels can be no more than 24" lower than the panel height in the unsupported run.
- When used in conjunction with hanging shelves, panel width must match width of shelf.

VERSÉ PANELS

Includes

- Adjustable glides with all panels.

What Do I Need?

- QuickConnect Connectors.

Special Notes

- Versé panels feature a soft, padded look.
- Panels packed two per carton when possible.

CONNECTING HARDWARE

Versé QuickConnect User Instructions

- Versé QuickConnect is easy to install. Simply snap on the connectors at the top and bottom of the panel and slide the panels together. There are only two connectors to specify for almost all configurations, including multi-height connections.
- 180° Straight Connector – use when connecting two panels together for a straight connection or for multi-height straight connections.
- 90° Corner Connector – use for 2-way, 3-way and 4-way corner connections. Only one pair is needed per corner connection or for multi-height corner connections.

Connection Type	Connectors Needed
Straight	1 pair – 180°
2-way (L)	1 pair – 90°
3-way (T)	2 pair – 90°
4-way (X)	3 pair – 90°

HARDWARE

Special Notes

- Connectors add to the overall dimensions of the panel installation.
- These connector dimensions are important when space planning and sizing your panel layout.
- All hardware items may ship by a parcel service.
- Use HBV-PBS bracket with freestanding furniture for optimal workstation rigidity.

SHELVES

- Steel shelves are 14 ½" high.
- End brackets included.
- Must match panel width.
- Easy assembly; no tools required.

LATERAL FILES

Advantages:

a) The most efficient means of conventional filing; b) Ideal for active filing in workstations, where higher volume capacity is necessary and retrieval is frequent

Considerations:

2-drawer steel lateral files fit under standard-height worksurfaces when using panel systems.

VERTICAL FILES

Advantages:

a) Economical; b) The most widely used filing method; c) requires minimal floor space

Considerations:

Vertical files are best suited for long-term storage, where retrieval is less frequent. For larger banks of files, lateral files are more space-efficient than vertical files.

SHELF FILES

Advantages:

a) The highest density method of filing; b) Specially designed for end-tab long-term filing

Considerations:

Ideal for medical or dental offices, available as open shelves or with flipper doors.

BOOKCASES

Advantages:

a) These units are ideal for binders, reference books or other items; b) Available with your choice of fixed or movable shelves

Considerations:

If working with panel systems, it is more attractive to specify units that are lower than the panel height.

FILING TECHNIQUES

Type	Standing Files	Hanging Files	End-tab Files
Advantages	Inexpensive. Uses existing file folders.	Easier organization and identification of the file folders. Files viewed from top. Remaining files hold their place when folders are removed. Easier to re-stock.	Easiest and fastest file identification. Files viewed from side. Preferred solution for health care, insurance and other critical files with frequent retrieval. Easiest to re-stock.
Requirements	Follower block or Dividers	Hangrails or high-drawer sides	Front-access shelves
Can be used in	<ul style="list-style-type: none"> Vertical files (front-to-back only) Lateral files (side-to-side only in drawers or roll-out shelves) Shelf files (side-to-side only) 	<ul style="list-style-type: none"> Vertical files (front-to-back only) Lateral files (front-to-back or side-to-side in drawers or roll-out shelves) 	<ul style="list-style-type: none"> Lateral files (side-to-side only in roll-out shelves or fixed shelves) Shelf files (side-to-side only — ideal for high-density)

LATERAL FILING OPTIONS

Front-to-back filing:

30" wide files*: 30½" of filing with letter/letter rows.

36" wide files*: 30½" of filing with letter/letter, legal/legal, or letter/legal rows.

42" wide files**: 45¼" of filing with 3 rows letter or 30½" of 2 rows legal, or 2 standard printout rows.

Side-to-side filing:

30" wide files: 27" of filing with letter or legal.

36" wide files: 33" of filing with letter or legal.

42" wide files: 39" of filing with letter or legal.

Combination filing:

(front-to-back with side-to-side in one drawer)

30" wide files: not recommended.

36" wide files: 15¼" of front-to-back filing and 20¼" of side-to-side legal filing.

42" wide files: 15¼" of front-to-back filing and 26¼" of side-to-side legal filing.

Metal Credenzas with Panel Frames

Guidelines for using Contain[®] Credenzas in place of standard panel systems configurations

GSA Reference Page

Side-mounted Credenzas

Use 1 storage-to-panel bracket set.

The minimum credenza size is 22"H x 36"W x 18"D.

With a mid-run floor support, the maximum panel run is 144".

Without a mid-run panel attached floor support, the maximum panel run is 96".

Overheads and shelves cannot be used with 22"H side mounted credenzas.

Worksurfaces (if specified) must be mounted on the same side of the parent run as the credenzas.

Panel frame maximum height is 68".

Counterweight is required, if using unit with drawers.

Back-mounted Credenzas — Modular

Use 2 storage-to-panel bracket sets per Credenza — 2 LH and 2 RH.

The minimum credenza size is 22"H x 36"W x 18"D.

The maximum panel run between back-mounted credenzas is 60".

Overheads and shelves cannot be used with 22"H back mounted credenzas.

Worksurfaces (if specified) must be mounted on the same side of the parent run as the credenzas.

Panel frame maximum height is 68".

Counterweights are required in a single side run configuration as shown.

Side-mounted Credenzas — with Return Panel

Use 1 storage-to-panel bracket on Credenza LH or RH of set.

The minimum credenza size is 22"H x 36"W x 18"D.

The minimum size for panel return is 35"H x 36"W.

With a mid-run panel attached floor support, the maximum panel run is 144".

Without a mid-run floor support, the maximum panel run is 96".

Overheads and shelves cannot be used with 22"H side mounted credenzas.

Worksurfaces (if specified) must be mounted on the same side of the parent run as the credenzas.

Panel frame maximum height is 68".

Counterweight is required, if using unit with drawers.

Mid-run floor support options include:

Work/task chairs need to be adjusted to deliver optimum support. Cross-reference the letter key below to identify the chairs in this section that best meet your needs.

PROPORTIONAL ADJUSTMENTS

These controls adapt the dimensions of the chair to fit the user.

A. Pneumatic seat height adjustment — Regulates height of chair relative to floor.

B. Back height adjustment — Positions lumbar support within a fixed range.

C. Seat depth adjustment — Positions chair back relative to seat.

D. Seat glide mechanism — Seat cushion travels forward and back, then locks into position.

ARM OPTIONS

These adjustments accommodate different sized users and support keyboarding.

Q. Adjustable height arms — Provide improved upper-torso support. Can be adjusted periodically to relieve strain and provide variety.

R. Adjustable width arms (patented) — Quick-adjust design places arms close to body for keyboarding, or out to sides for ease of entry.

S. Height and width adjustable arms — Controls both height and width of arms for optimum comfort.

T. Loop arms — Largely specified for aesthetics. Frequently used in management settings.

B-A. All-adjustable arms — Arms adjust in height, width, and depth.

POSTURE CONTROLS

The controls modify the position and angle of the seat and back to respond to changing tasks.

E. 360° Swivel

F. Tilt — Pivot point located directly above center of chair base.

G. Mid-range knee tilt — Pivot point located slightly ahead of center of chair base. Allows user to recline at a slightly more relaxed angle than conventional tilt.

H. Knee tilt — Pivot point located near front edge of chair. Allows user to keep feet flat on floor while chair reclines.

I. Synchronized knee tilt — Back reclines at a 2-to-1 ratio to seat angle. Pivot point located near front edge of chair.

J. Synchro-tilt — Back reclines at a 2-to-1 ratio to seat angle. Allows user to recline while keeping seat cushion relatively level to floor.

K. Tilt tension — Controls rate and ease of recline.

L. Tilt lock — Locks out tilt function when chair is in upright position.

M. Posture mechanism/lock — Back angle adjusts independently of seat, and can be locked in an infinite number of positions within a fixed range.

N. Multi-task control — Adjusts seat and back angles independently with a single lever (infinite locking within a fixed range).

O. Asynchronous control — High performance system with three levers to modify:

- Angle of back relative to seat
- Tilt (free float or infinite locking)
- Forward tilt.

W. Integral lumbar support — Easily adjusts to enhance comfort.

X. Dual-clutch posture control — Adjusts seat and back angles independently with two levers (infinite locking within a fixed range).

A-C. Synchronized tilt — Back reclines at a 2.5 to 1 ratio to seat angle. Variable lock.

A-D. Side tilt tension — Controls rate and ease of recline. Conveniently located on the right side.

A-E. Back reclines at a 2 to 1 ratio to seat angle. Back angle adjusts independently of seat and can be locked in infinite number of positions within a fixed range.

Fire Safety Without Compromise

ELEVATE FIRE SAFETY TO A HIGHER STANDARD

- You asked for more seating choices that meet the CAL 133 standard. Here they are. Many of The HON Company's most popular chair models are now available in an array of fabrics that include an advanced barrier of fire protection. This barrier helps HON chairs comply with CAL 133 (California Technical Bulletin 133), the industry's most stringent test for fire-retardant furniture.

DEFINITIVE PROTECTION

- The resilient filling materials used in upholstered seating manufactured by The HON Company meet or exceed the flame retardant requirements of the State of California, Department of Consumer Affairs, Bureau of Electronic and Home Appliance Repair, Home Furnishings and Thermal Insulation Technical Bulletin 117-2013. The label attached to the seat bottom indicates compliance with these requirements.
- For public buildings with at least 10 chairs in use, CAL 133 sets the bar as the accepted standard of fire safety. The CAL-TB 117-2013 standard referenced above evaluates the fire resistance of fabric, but only CAL 133 tests the entire assembled chair.
Result: Greater assurance that your seating will not accelerate an actual fire.

HOW TO ORDER

- To ensure that the chairs you order comply with CAL 133, specify one of the fabrics listed here on any of the seating models from the pages that follow. Then simply add "FC" to the model number when ordering. **SPECIFYING EXAMPLE: H7808FC.NR62.T.**

A standard upcharge of \$90 will be applied per seat model for all single seat chairs.

For Lounge Seating, the following upcharges will apply: (Please note, the lounge upcharges do not apply to the Ignition® or Versant® seating lines. For these models, the \$90 per seat applies.)

Single Seat/Club Lounge: \$250 list

2-Seat/Love Seat Lounge: \$325 list

3-Seat/Sofa: \$400 list

Moisture Barrier

- This extra layer of protection prevents moisture from penetrating the foam to improve cleanability and extend product longevity. Moisture barrier is available as an option for the seat only. The recliner gets moisture barrier on seat and footrest.
- Moisture barrier is not available for the fire code models.**

HOW TO ORDER

- Fire Code:** To ensure that the chairs you order comply with CAL 133, specify one of the fabrics listed here on any of the seating models from the pages that follow. Then simply add "FC" to the model number when ordering. **SPECIFYING EXAMPLE: HHCG11FC.S.AI90.P6N.**
- Moisture Barrier:** When specifying Moisture Barrier simply add "MB" to the model number when ordering. **SPECIFYING EXAMPLE: HHCG11MB.S.AI90.P6N.**

Riley™ Seating Specifying Information

Riley models can be ganged to create seating areas in Office, Education or Health care settings. Using Four different seating models as well as two table styles, the possibilities are limitless. Shown below are the Riley models and examples of ganged seating applications. *NOTE THAT ALL REFERENCES TO SIDE ARE FROM THE SEATED PERSPECTIVE.*

HWGN1

Guest Chair

- May be used as a standalone model or for use with table models HWGNC or HWGNT on either side.
- Not for use in ganging with other seating models. No chair connection on either side.

HWGN2

Starter Gang Chair

- May always be part of a ganged seating solution.
- May be used with HWGN3 or tables HWGNC or HWGNT on the left side.
- Left side no connection, right side holes.

HWGN3

In-Line Gang Chair

- Used for in-line positions only. Not for use in a starting or end position due to exposed connection points.
- Left side dowels & bracket, Right side holes.

HWGN4

End Gang Chair

- Connects only to HWGN2 or HWGN3.
- Must be used in the end position.
- Tables may be connected to the Right side.

HWGN5

Bariatric Single Seat

- Standalone model only.
- May not be ganged with other seating or table models.

HWGNC

Corner Ganging Table

- For use with models HWGN1 — Either side HWGN2 — Left side HWGN4 — Right side.

HWGNT

In-Line Ganging Table

- For use with models HWGN1 — Either side HWGN2 — Left side HWGN4 — Right side.

See below for Typical layouts using the models listed above.

- ▶ HWGN1 is a stand alone guest chair that can be used with tables on either side.
- ▶ Start with model HWGN2 for an in-line ganging layout. Add model HWGN3 in between and end with HWGN4 to complete the grouping.

- ▶ Coordinating ganging tables available for use with Riley series seating. See page 475.
- ▶ Catalyzed finish for enhanced stain and mar resistance.

EXAMPLE: H5901.H.AB10.T

► COM Ordering Information and pricing on page 6.
► Fire Code fabrics with FC foam meet requirements for CA Technical Bulletin 133.

Ordering codes are composed of: model number + upholstery/color code + frame color. Example: Use the following formula to construct ordering codes.

Options by Series

This table shows Ordering Codes for Frame Options by series. Color matched dual-wheel hooded casters are standard on all models. 2" black soft tread wheel casters are available at NO UPCHARGE but must be indicated when ordering (as shown above).

FIRE CODE (CAL133)

Refer to CAL133 Compliant Seating matrices on pages 459-461 for a list of compliant models and fabrics. Add FC to the base model number.

PATIENT RECLINER STANDARD FEATURES

1. PIVOT ARM

The pivoting transfer arm can be easily activated to move the arms up and out of the way during patient transfers or examinations.

2. INDIVIDUALLY LOCKING CASTERS

Casters lock independently to keep the recliner stationary during treatment.

3. CHAIR TRANSFERS

The seat height and pivot arm enable convenient caregiver assisted patient transfers.

4. INFINITE RECLINE

The chair back and footrest are designed to allow the patient or caregiver to select from an infinite number of configurations.

PATIENT RECLINER OPTIONS

Customize the functionality of your Soothe™ recliner with the following optional features.

CENTRAL LOCK

Foot activated pedal immediately locks the recliner in place.

PUSH HANDLE

Ergonomically designed to reduce back strain and support the caregiver as they reposition the chair.

FOLEY HOOK

A foley hook holds tubes, medical bags, and other equipment vital to treatment.

IV POLE MOUNT

Customize with an IV pole mount to limit patient transfers and save valuable floor space.

FOOT PLATFORM

Foot platform elevates patient's feet to accommodate users of all sizes.

MOISTURE BARRIER

This extra layer of protection prevents moisture from penetrating the foam to improve cleanability and extend product longevity.

Preside Base Compatibility

Bases compatible with 48"D and 54"D Rectangle, Boat, Racetrack, Soft Wedge, Arc End and Peninsula Tops

Bases compatible with 30"D and 36"D Rectangle, Boat, Racetrack, Soft Wedge, Arc End and Peninsula Tops

Bases compatible with Round and Square Tops

Bases that accommodate power and data

Power and data can be routed through select bases. Bases with removable doors provide easy access to concealed cabling and technology, such as wireless internet routers.

Bases with door accessibility

Bases with wire routing capabilities

Specify Preside tables with two steps—select a top and select a base.

1. Select desired top size, shape, and edge profile.

Multi-piece Tops:

Multi-piece tops are made of 108", 120", 144" and 168" two-piece "starter-sections" in rectangle, boat, arc end, or racetrack shapes in 48" or 54" depths. For tables up to 20', models are preconfigured for you. If you need a table top longer than 20', add as many 72" adder sections as you need. The examples below illustrate preconfigured sizes as well as how starter section and adder section tops can be used to create tables in virtually any length. Please note that 2-piece tops, in woodgrain colors, will not have exact grain alignment in the center where the two halves meet, a reasonable match can be expected. For tops utilizing an adder section, there will not be a grain match for those pieces.

2. Select desired base style and identify model that coincides with top length.**Bases for Tops in Preconfigured Sizes**

Bases include the appropriate number of supports for tables up to 20'. Simply identify the length of the table top in inches and specify the base with the same length in the model number. The example below illustrates how to select a base for a preconfigured size top.

Bases for Tops in User Configured Modular Sizes

If you need a table top longer than 20', add as many 72" adder bases as needed. The examples below illustrate preconfigured sizes as well as how starter section and adder section bases can be used to create tables in any desired length.

Preside® Veneer Table Tops

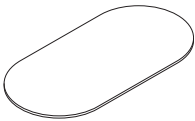

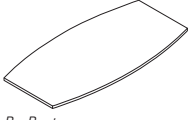

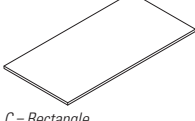

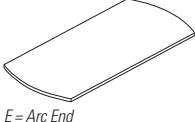

GSA SIN 711-11

- ▶ See base options on pages 590-593.
- ▶ Veneer tops are available in six different edge details. Specify G, C, J, T, H or V as the first option after the base model.
- ▶ Tops with G, C, J, T edge detail feature 1 1/8" edge thickness and finished MDF rim.
- ▶ Tops with H and V edge detail feature 1 1/2" edge thickness and feature hardwood rims.
- ▶ Tops are available in eight shapes: Racetrack (A), Boat (B), Rectangle (C), Arc End (E), Peninsula (F), Soft WEdge (G), Round (D), Square (S). Replace the (?) shown in each model with A, B, C, E, F, G, D or S to specify shape. Tops with traditional (T) edge available in rectangle, round and square shapes only.
- ▶ Table tops sit 29 1/2" above floor with glide half way seated.
- ▶ Tops 96" and greater, in woodgrain colors, will not have exact grain alignment in the center where the two halves meet, a reasonable match can be expected.
- ▶ Tops greater than 96" ship in multiple pieces to facilitate handling and installation. For details see page 581.
- ▶ Woodgrain pattern runs parallel to seam on multi-piece tops.
- ▶ Veneer color match for adder sections may vary depending on date of purchase.
- ▶ For best veneer color match, product should be specified on same order.
- ▶ Flip-top Port options are not available on Round or Square tops; Pop-up ports only.
- ▶ Cannot specify a Port option for 48" Round or Square Table Tops with Traditional edge.
- ▶ See page 585 for number of cutouts for each table top size.
- ▶ Optional cutouts are available to accommodate power ports. One centered cutout per top section. Power ports must be ordered separately. For power port specification details see page 595.
- ▶ Single and two-piece tops ship in one carton, three piece tops ship in two cartons.
- ▶ Underside of tops feature alignment guide for base placement.

- ▶ Veneer tops are available in six different edge details. Specify G, C, J, T, H or V as the first option after the base model.
- ▶ Tops with G, C, J, T edge detail feature 1/4" edge thickness and finished MDF rim.
- ▶ Tops with H and V edge detail feature 1/2" edge thickness and feature hardwood rims.
- ▶ See base options on pages 590-593.
- ▶ Tops are available in eight shapes: Racetrack (A), Boat (B), Rectangle (C), Arc End (E), Peninsula (F), Soft Wedge (G), Round (D), Square (S). Replace the (?) shown in each model with A, B, C, E, F, G, D or S to specify shape. Tops with traditional (T) edge available in rectangle, round and square shapes only.
- ▶ Table tops sit 29 1/2" above floor with glide half way seated.
- ▶ Tops 96" and greater, in woodgrain colors, will not have exact grain alignment in the center where the two halves meet, a reasonable match can be expected.
- ▶ Tops greater than 96" ship in multiple pieces to facilitate handling and installation. For details see page 581.
- ▶ Woodgrain pattern runs parallel to seam on multi-piece tops.
- ▶ Veneer color match for adder sections may vary depending on date of purchase.
- ▶ For best veneer color match, product should be specified on same order.
- ▶ Flip-top Port options are not available on Round or Square tops; Pop-up ports only.
- ▶ Cannot specify a Port option for 48" Round or Square Table Tops with Traditional edge.
- ▶ See page 585 for number of cutouts for each table top size.
- ▶ Optional cutouts are available to accommodate power ports. One centered cutout per top section. Power ports must be ordered separately. For power port specification details see page 595.
- ▶ Single and two-piece tops ship in one carton, three piece tops ship in two cartons.
- ▶ Underside of tops feature alignment guide for base placement.
- ⚠ **Tops with traditional edge available in Mahogany only.**
- ⚠ **Soft Wedge table tops are only available in G, C and J edge options.**

Specification guide for IQ Electrical on Motivate® tables

Determine table width, the type of power access being used (3" grommet or 4x8 pop-up) and the desired number per table (Columns 1, 2 or 3). The table will then identify the type and quantity of components needed per table along with the maximum table run. Note that this is in addition to the Power base in-feed which is needed for each run. For example, a 48"W table with two 3" power grommets per table will require (1) HQH5-3 harness and (1) HQH1-3 harness per table with a maximum run of four tables.

4-Trac Electrical System

HON

4-Trac Electrical System

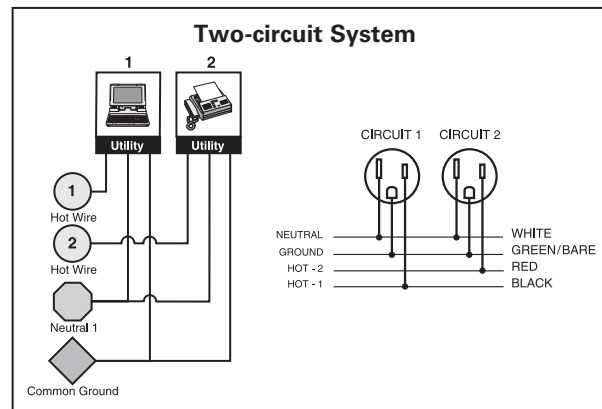

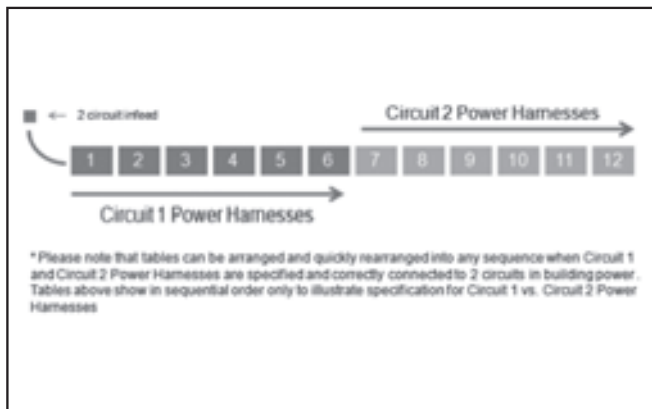

The 4-Trac Electrical System is a UL-recognized Manufactured Wiring System that seamlessly passes power from one worksurface to another. This low-profile non-sequential electrical system allows tables to be "daisy-chained" together in any desired order and allows users to reconfigure quickly due to simple connectable/disconnectable links.

- Meets requirements of UL 183 and National Electric Code Article 604
- 4-Wires, 2-circuits, 20 Amps each (Circuit 1 and Circuit 2 only)
- 13 Duplex Receptacles per circuit, 26, 15 Amp Duplex receptacle per power in-feed
- Electrical system attaches directly to underside of worksurface with included brackets
- Up to twelve tables can be linked together

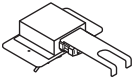

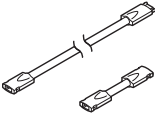

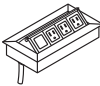

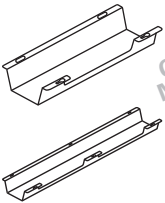

Steps for Electrical Specifications:

1. Determine how many rows of tables are needed and order the following:
 - One HHMAPLATE per row (or power in-feed)
 - One HHMACABLE per row (or power in-feed)
2. Order one power harness per table in each row
 - For 1-6 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harnesses (ex. If powering six 24x60 tables order six sets of HHMAPOWER60)
 - For 7-12 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harness for first six tables and Circuit 2 Power Harness for remaining tables (ex. If powering eight 24x60 tables, order six sets of HHMAPOWER60 and two sets of HHMAPOWER602)
3. Order one set of ganging hardware per table (ex. HMAGANG)
4. Determine which accessories are needed:
 - a. Power Hub model HGRMTAC — to access power at worksurface.
 - b. Data Grommet model HGRMTDATA — to access data at worksurface.
 - c. Wire Management strips model HBTMS — for vertical and horizontal wire management.
 - d. Wire Trough models HWTROUGH1, HWTROUGH2, HHWTROUGH34 or HHWTROUGH58 — oversized horizontal wire trough.

- ▶ Each power kit includes two duplex receptacles and attaches to the underside of the worksurface with included brackets.
- ▶ Power kits are compatible with various base types including Flip-Top and T-Leg.

4-Trac Electrical System

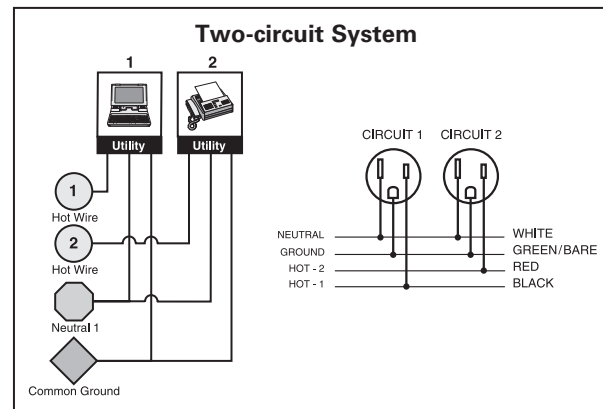

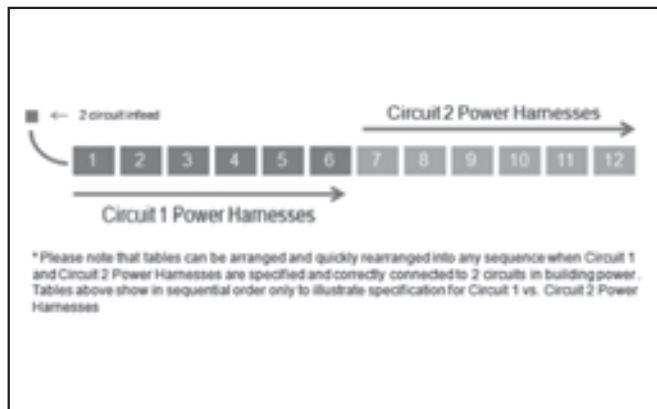

The 4-Trac Electrical System is a UL-recognized Manufactured Wiring System that seamlessly passes power from one worksurface to another. This low-profile non-sequential electrical system allows tables to be “daisy-chained” together in any desired order and allows users to reconfigure quickly due to simple connectable/disconnectable links.

- Meets requirements of UL 183 and National Electric Code Article 604
- 4-Wires, 2-circuits, 20 Amps each (Circuit 1 and Circuit 2 only)
- 13 Duplex Receptacles per circuit, 26, 15 Amp Duplex receptacle per power in-feed
- Electrical system attaches directly to underside of worksurface with included brackets
- Up to twelve tables can be linked together

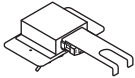

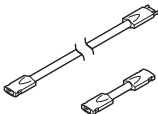

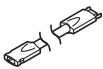

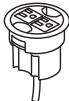

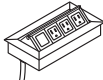

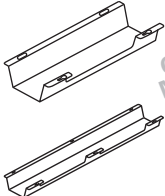

Steps for Electrical Specifications:

1. Determine how many rows of tables are needed and order the following:
 - One HHMAPLATE per row (or power in-feed)
 - One HHMACABLE per row (or power in-feed)
2. Order one power harness per table in each row
 - For 1-6 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harnesses (ex. If powering six 24x60 tables order six sets of HHMAPOWER60)
 - For 7-12 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harness for first six tables and Circuit 2 Power Harness for remaining tables (ex. If powering eight 24x60 tables, order six sets of HHMAPOWER60 and two sets of HHMAPOWER602)
3. Order one set of ganging hardware per table (ex. HMAGANG)
4. Determine which accessories are needed:
 - a. Power Hub model HGRMTAC — to access power at worksurface.
 - b. Data Grommet model HGRMTDATA — to access data at worksurface.
 - c. Wire Management strips model HBTMS — for vertical and horizontal wire management.
 - d. Wire Trough models HWTROUGH1, HWTROUGH2, HHWTROUGH34 or HHWTROUGH58 — oversized horizontal wire trough.

- ▶ Ganging Hardware must be ordered and installed on tables when using 4-trac electrical systems. See page 634 for Ganging Hardware.
- ▶ Each power kit includes two duplex receptacles and attaches to the underside of the worksurface with included brackets.
- ▶ Power kits are compatible with various base types including Flip-Top, T-Leg and Post-Leg.

Specification guide for IQ Electrical on Huddle tables

Determine table width, the type of power access being used (3" grommet or 4x8 pop-up) and the desired number per table (Columns 1, 2 or 3). The table will then identify the type and quantity of components needed per table along with the maximum table run. Note that this is in addition to the Power base in-feed which is needed for each run. For example, a 48"W table with two 3" power grommets per table will require (1) HQH5-3 harness and (1) HQH1-3 harness per table with a maximum run of four tables.

Laminate Occasional Tables

GSA SIN 711-11

► Durable material and construction make laminate occasional tables ideal for high traffic areas such as lobbies, reception rooms and lounges. Versatile design is also well suited to private offices.

► Coffee, Corner and End Tables feature top-over-apron styling with square corner detail, which complements many interiors and furniture designs, including the 10500 Series.
► Tables accommodate lamps, magazines, telephones, plants, laptops and more.

► Tops are abrasion- and stain-resistant laminate over 1 1/8" thick solid core high-performance particleboard.

► Cylinder and cube tables have recessed black plinth base with tack glides. Tops and sides are covered with laminate.

Standard Row Layout

While a variety of classroom configurations are possible, a standard row layout shown below with 25 student desks utilizes a footprint of 199" deep by 284" wide. A 30 student desk row layout (5 rows deep by 6 rows wide) will require a footprint of 199" deep by 348" wide.

These dimensions are based upon 36" W aisles. Actual dimensions should be based upon local building codes.

TEACHER STATION**SmartLink®**

The following planning and specifying information is intended to help you imagine and create stimulating SmartLink classrooms that can integrate technology while helping rooms stay adaptable, organized and attractive. With just four basic product categories, SmartLink offers you everything you need to create flexible, clutter-free learning environments for students of all ages.

Teacher stations are available in two sizes. Select from the standard double pedestal model (26 x 72) or the compact single pedestal model (24 x 60) based upon your specific storage, technology and space needs. A laminate top with a soft feel t-mold edge provides a classic look with exceptional durability.

Teacher Station – Standard Double Pedestal

HLT2672-23.C

Storage

- Box/box/file pedestal is always standard on the right-hand side. Pedestal is locking.
- Available kneespace is 33¹/₄"W x 20"D for all models.
- Trays and 12"W shelves are specified and sold separately.
- Non-locking Center Drawer (HD8X) may be field installed in the kneespace. Tops are pre-drilled to accept the drawer.
- Center drawers and CPU holders cannot be installed together.

Cable Management

- Both the left-hand and right-hand end panels may be removed to provide access to power and cable management within the side power cabinet.
- Grommets are standard in each removable end panel allow a power cord to exit and be plugged into a floor or wall outlet.
- Two "Smart Grommets" with a wireway cover are standard on each station's top surface.

Teacher Station – Compact Single Pedestal

HLT2460-L3

Storage

- Single pedestal desk available in Left-hand or Right-hand pedestal/storage configurations.
- Pedestal options include Box/Box/File locking.

Technology

- The pedestals end panel may be removed to provide access to power and cable management within the side power cabinet.
- A grommet is standard in the removable end panel to allow a power cord to exit and be plugged into a floor or wall outlet.
- Side power cabinet accommodates the HLPC-PK06 plug strip and may be secured in the base without hardware or tools.
- A single "Smart Grommet" with a wireway cover is standard on each station's top surface.

MODULAR STORAGE

SmartLink® Modular Storage is comprised of cases, accessories and support rails. However, only the cases and accessories need to be specified. The following guidelines should help you plan and specify SmartLink Storage.

Planning Notes

Cases

- A laminate top with a soft feel vinyl edge provides a classic look with exceptional durability.
- Storage cases do NOT include accessories. Accessories are specified and sold separately.
- Case configurations are based off of 12"W or 30"W columns.
- Internal case configurations cannot be changed (i.e., cannot change an HLSF52-3 to a HLSF52-21).
- Cases are designed to allow the users to create a variety of accessory configurations using different tray heights and shelves.
- Cases must be specified with or without locking doors.
- Door models may be converted to non-door models in the field.

Accessories

- Accessories include trays in 3", 6" and 12" heights, shelves in 12" and 30" widths and a 12"W coat rod.
- All accessories are sold and specified separately as kits and include 1 pair of storage rails per tray or shelf.
- The support rails simple "no tool" attachment method allows users to easily install and change rail (tray or shelf) positions as needed.
- Kits include:

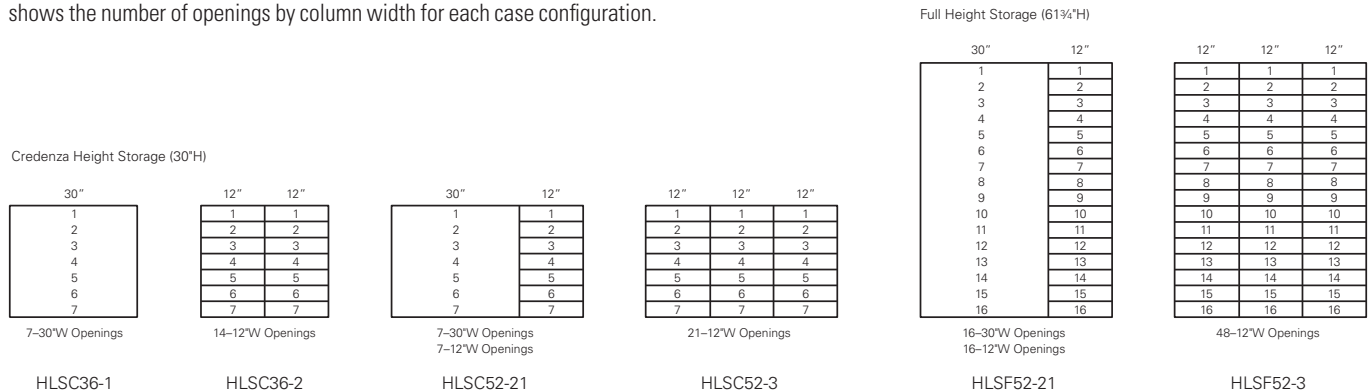

Accessory	Quantity Per Kit	Where Used
3"H trays	7 trays / 14 support rails	12"W columns only
6"H trays	4 trays / 8 support rails	12"W columns only
12"H trays	2 trays / 4 support rails	12"W columns only
12"W shelf	2 shelves / 4 support rails	12"W columns only
30"W shelf	2 shelves / 4 support rails	30"W columns only
Coat Rod	1 coat rod	12"W columns — Full Height case only

- Cabinet Whiteboard Bracket kit is available which allows whiteboards to be mounted to the back of the full height cabinets. Kit includes upper and lower rails with integrated marker tray and attachment hardware. Use wall rail sliding whiteboards. Rails will accept one (1) 48" x 48" board or two (2) 24" x 48" boards.

Specification Notes

- Number of accessory openings

SmartLink storage cases are available in six (6) standard case types that feature combinations of 12" or 30" internal column widths. The following illustration shows the number of openings by column width for each case configuration.

- Openings used by Accessory type:

Accessory	Openings used per Accessory
3"H tray	1
6"H tray	2
12"H tray	4
12"W shelf	1
30"W shelf	1

- Any combination of trays or shelves (of common width) can be used as long as the openings used equal the total number of openings available per column. The following illustrations show a variety of tray configuration options. Numbers shown in the opening refers to the tray size.

Using the information above, follow these guidelines to help determine accessory quantities.

- Determine the total number of available "openings" by width (12", 30") for each case type.
Example: HLSF52T-3F has 3 columns of 16 openings, total 48 openings
- On a PER COLUMN basis, determine the desired tray/self configurations total number of opening used so they equal the total openings available per column. Total accessory quantities per case then multiply by the total number of like cases.
Example: If each column will have 2-12" trays, 2-6" trays and 4-3" trays. The number of openings used for this column combination is 16. Assuming all three columns are the same total tray quantities for this case will be 12-3", 6-6" and 6-12".
- Once total tray and shelf quantities are determined, simply divide by the kit quantity to determine the number of kits required.
Example: 3" trays = $12 \div 7 = 2$ kits, 6" trays = $6 \div 4 = 2$ kits, 12" trays = $6 \div 2 = 3$ kits

• Shelf Spacing

The clearance between shelves is approximately 3¾" for every support rail that is not used between shelves. The following illustration shows the clearance between shelves when 0-4 support rail positions are not utilized.

WALL RAIL SYSTEM

The SmartLink® wall rail is a multi-layered, multi-functional system that can accommodate a variety of presentation boards and accessories. The multiple tracks allow boards to be easily positioned and changed to support today's interactive learning environments.

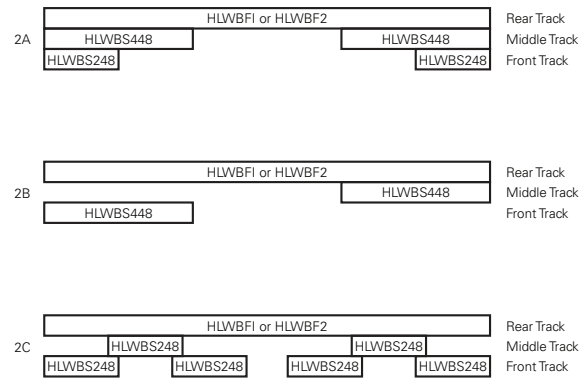

Planning Notes

- Installation of the wall rail system over existing white or chalkboards is not recommended.
- The rail and wall bracket provide three separate tracks for the Learning boards. The REAR or wall/bracket track is occupied by the fixed wall board. The MIDDLE and FRONT tracks are for sliding boards.
- To allow for greater utilization of the rear fixed board a maximum width of 96" of sliding boards on the middle or front track is recommended.

The illustration below shows the overall wall space requirements for the rail system and recommended mounting height for use in K-12 classroom applications.

Sliding boards are removable and reversible so a wide variety of layouts are possible. The following illustrations highlight a couple of the more common applications. Layouts 2A and 2B provide the greatest amount of board space and overall flexibility. When used with rail mounted worksurfaces, use 24"W boards on the front rail as shown in 2C in front of each worksurface to provide information specific to that work area. Boards could then be added to the middle rail for information/work to be shared between the stations.

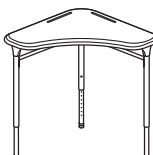

Specification Notes

- Boards are specified individually.
- Hardware to mount to the wall brackets is not provided by HON and MUST BE SOURCED LOCALLY.
- Learning board only applications require two (2) HLWR-12 rails to be specified.
- REFER TO PRODUCT INSTALLATION INSTRUCTIONS FOR DETAILED INSTALLATION INFORMATION.

- ▶ Laminate desk top constructed of 3/4" thick particleboard, high-pressure laminate top with SecurEdge for superior durability. Tamper and moisture resistant.

SPECIFICATION TIP: Consider available kneespace when specifying under desk storage accessories (HCLA45, HCLA50) for Accomplish and Proficiency adjustable desk models. Available kneespace will vary significantly, given set desk height and model of under-desk basket. Use the following example to easily calculate the available and usable kneespace.

EXAMPLE: HCL40 Accomplish Cantilever Desk, HCL18 Accomplish Chair, HCLA50 Wire Basket
 (user set desk height – top thickness – seat height = available kneespace)
 (29"H – 1" thickness – 18" seat height = 10" available kneespace)
 (available kneespace – book basket/box height = usable kneespace)
 (10" available kneespace – 5" basket height = 5" usable kneespace)

Core Removable Lock Kits

GSA SIN As Noted

- ▶ HON "One Key" interchangeable core removable locks are standard on most HON products. Look for the HON "One Key" icon.
- ▶ Keyed alike cores are listed below.
- ▶ If key number is not specified, number will be at random.
- ▶ For keyed alike locks:
 - Order standard product which will be shipped with factory installed locks and random numbered cores or omit lock option where offered.
 - Order the appropriate quantity of like numbered cores required for each workstation or keyed area.
 - Simply replace the factory installed cores with the replacement cores after product has been installed.
- ▶ To install new core:
 - Lock must be in the unlocked position.
 - Insert core removal key and pull core straight out.
 - Insert new core with core removable key, hold core into lock and withdraw core removal key.
 - Retain original core for future use.
- ▶ To provide normal lead times, key numbers cannot be specified on HON products at time of order. This also eliminates need for tagging and tracking each product's lock number during installation.
- ▶ Black removable lock core kit used on laminate casegoods.
- ▶ Chrome removable lock core kit used on metal casegoods.
- ▶ Removable lock core kit for all Arrive and Pennsylvania Avenue products; for Announce and Park Avenue Veneer products manufactured after November 2009 — see model HF27 on page 67.

What is a Bundled Solution?

A bundled solution is comprised of several individual components and is ordered with a single, all-encompassing number (SKU).

Why Bundles?

With bundles, you identify one SKU rather than multiple models/SKUs. Order one SKU and get everything you need!

How do you order a bundle?

Get everything in this picture with one number.

Still Prefer Ordering Individual Components?

You can do that! See the "bundle components" section for individual item SKUs.
