- *New York City (NYC) electrical applications require field installation of PDA.*
- *New York Port Authority (NYPA) electrical applications require metal raceway covers. To order, specify NYC powered panels without raceway cover and separately specify metal covers through Haworth e-Parts.*
- *Some building codes may restrict the use of panel heights greater than 69″(1753mm). Consult your local code authority to assure that the furniture layout is compliant.*
- *For International Power, specify non-powered panels and use Power Logic components. See Specification Guide for more information on Power Logic.*
- *For Chicago power, specify non-powered panels without a base raceway cover and separately specify Chicago power retrofit kit.*

NOTES:

- *Powered panels with raceway covers ship with receptacle ports in the base raceway cover. Receptacle ports on the raceway cover measure 2.35″(60mm) top-to-bottom and 2.88″(73mm) side-to-side.*
- *Non-powered panels ship without receptacle ports in the base raceway cover.*
- *Powered panels with Power Distribution Assemblies (PDA) but without raceway covers require separately specified base raceway covers for power and communication port locations other than the standard powered base raceway cover.*
- *New York City (NYC) electrical applications require field installation of PDA.*
- *New York Port Authority (NYPA) electrical applications require metal raceway covers. To order, specify NYC powered panels without raceway cover and separately specify metal covers through Haworth e-Parts.*
- *Some building codes may restrict the use of panel heights greater than 69″(1753mm). Consult your local code authority to assure that the furniture layout is compliant.*
- *For International Power, specify non-powered panels and use Power Logic components. See Specification Guide for more information on Power Logic.*
- *For Chicago power, specify non-powered panels without a base raceway cover and separately specify Chicago power retrofit kit.*

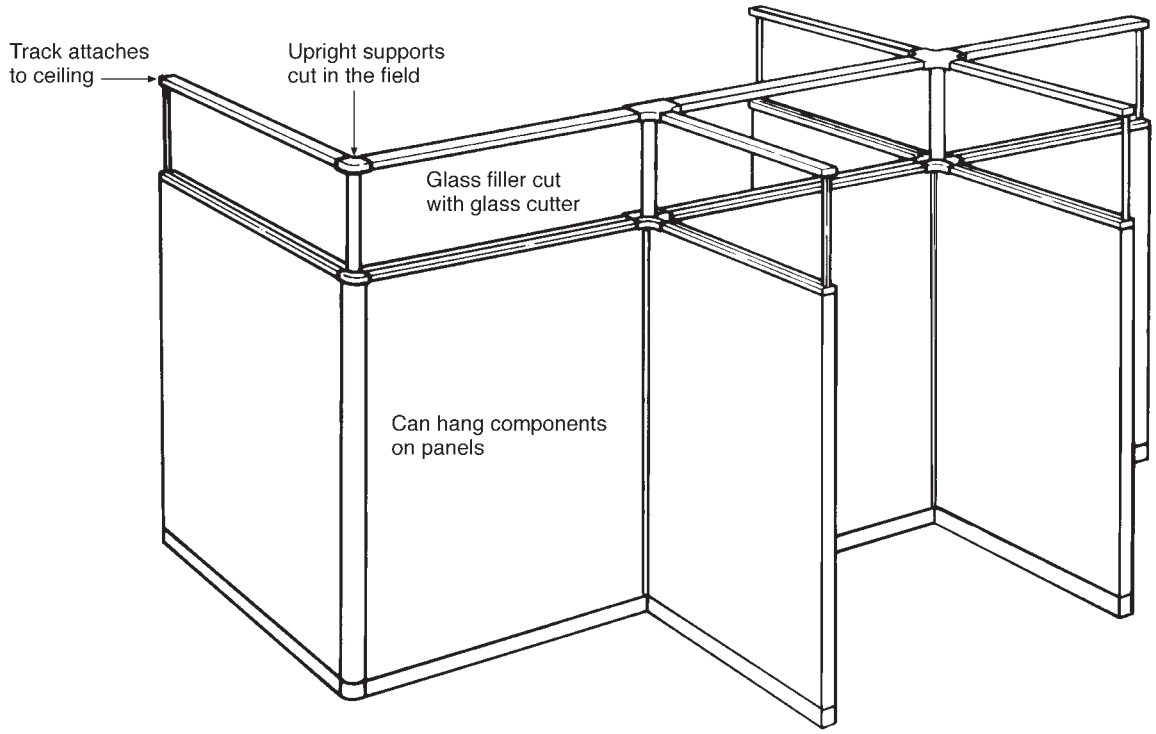
Clerestory Kits

for use with UniGroup Too, UniGroup, PLACES

Clerestory Illustration



Planning and Specification

1. To determine how many lineal feet of straight track are needed, divide the total lineal feet of panels that require Clerestory by ten and round-off to the next highest whole number. Order that quantity of Straight Track SPCL-1616.
2. Examine your floor plan to determine the type and quantities of corner kits you will require. Note that only 90° angles are possible; other angles cannot be accommodated.
3. If mounting Clerestory on straight panel runs that include doors or glazed panels, a maximum combination of four lineal feet of glazed panels or glazed panels with a door is permitted per 12′(3658mm) panel run.
4. Follow normal support and load values for UniGroup Too, UniGroup and PLACES panels as defined in Haworth Installation Procedures.
5. Be sure that sprinkler, HVAC and lighting locations are taken into consideration when planning for Clerestory; it does form a floor-to-ceiling barrier.
6. Consult Installation Instructions #7021-6201 for specific installation information.

NOTES:

- Installation instructions available on Source Book.

- Not to be used with top feed modules.

- Ceiling bracket designed to fit 1" (25mm) grid.

- For UniGroup Too applications, 90° finish posts must be replaced with UniGroup 90° finish posts so radius aesthetic matches 2-way corner pieces. Field cut to size.

- Installation of clerestory kits on PLACES panels will reduce the cabling capacity of the upper panel raceway and restrict access.

Code Compliance

Where Clerestory is used with UniGroup Too, UniGroup and PLACES panels that feature The Power Base electrical system, electrical components do not comply with UL 183 requirements for floor-to-ceiling partitions; the electrical components do comply with UL 1286 requirements for panel systems. Verify acceptance of this exception and check local codes.

Clerestory Kits

for use with UniGroup Too, UniGroup, PLACES

Application Guidelines

- Clerestory is designed to be used with 80″(2032mm) or 82″(2083mm) high UniGroup Too, UniGroup and PLACES panels where there is a maximum ceiling height of 10′(3048mm), OR with 64″(1626mm) or 68″(1727mm)-high panels where there is a maximum ceiling height of 9′(2743mm). Be sure that Clerestory complies with local building codes before ordering and installing the product.
- All aluminum and plastic components (such as corner moldings) are available color-matched to UniGroup Too, UniGroup and PLACES panel trim colors. **Not available in Metallic finishes.**
- Note: Laminated safety glass is required for use in all Clerestory applications; consult installation instructions glass specification directions (purchase all required glass locally).
- Minimum thickness of glass is 0.220″(6mm).
- Maximum thickness of glass is 0.275″(7mm).

Power Logic offers a system of single circuit power cords and receptacle modules that fit into our non-powered base raceway. Receptacle modules are offered with two sockets (3 and 4 socket versions also available). Each receptacle module has sockets, switches and fuses that are appropriate for each country around the world. Contact the Power Logic regional sales office in your area to help with planning details to assure local electrical code compliance. Contact Power Logic via the Haworth/Power Logic website, (www.powerlogic.net), or through their corporate offices in Cape Town, South Africa at 27-21-704-1450. Power Logic also offers power solutions for desktop, conference table or freestanding power applications.

Specification Tips

- **Worksurface support specific to product line and worksurface edge guidelines; must be separately specified; refer to Specification Guide for support and load.**
  - –Cantilever bracket
  - –Side brackets
  - –Worksurface support panel
  - –Worksurface support column or leg
  - –Attached lower storage (for worksurfaces greater than 36″ wide)
- For T-mold and edgeband
  - –18″(457mm) specify the standard mini cantilever bracket for radius end.
  - –24″(610mm)-30″(762mm) specify standard cantilever bracket for radius end.
- When using snap-n-fit cantilevers for 18″(457mm) and 24″(610mm) requires mini snap-n-fit cantilever, 30″(762mm) requires standard snap-n-fit cantilever.
- For Cascade edge, for aesthetic reasons, use:
  - –Side brackets (PLACES and UniGroup) and column support or leg.
- For worksurfaces less than 42″(1067mm) wide, suggested pedestal style is mobile.
- Knife edge requires use of worksurface supports for that application; worksurface support panel and/or side bracket for use with knife edge.
- Mini cantilever brackets are for use with 18″(457mm) deep worksurfaces with knife edge only.

Features

- Includes worksurface and tie plate.
- Laminate with:
  - –Full perimeter T-mold (T), or
  - –3mm edgeband (J) or knife edge (F) on user edge and 1mm edgeband on sides and back, or
  - –Cascade (V) on user edge and 1mm edgeband on sides and back.
- Worksurfaces predrilled to accept most support options.
- Optional wireway along back edges of worksurface is color-matched to solid side/back edge trim. When wood grain edge trim laminate is specified, wireway will be Charcoal. Refer to Specification Guide for wireway details.
- **Installed worksurfaces without wireway will not allow clearance for power plug.**
- Depths and widths shown in nominal dimensions.

■ Available on RUSH with Standard Core.

Specification Tips

- **Corner bracket is required and must be separately specified.**
- **Worksurface support specific to product line and worksurface edge guidelines; must be separately specified; refer to Specification Guide for support and load.**
  - –Corner bracket - REQUIRED
  - –Cantilever bracket
  - –Worksurface support panel
  - –Support post or support column
  - –Side brackets
  - –Attached lower storage
- Intermediate support is required for unsupported worksurface span greater than 60″(1524mm).
- Knife edge requires use of worksurface supports for that application; worksurface support panel and/or side bracket for use with knife edge.
- Mini cantilever brackets are for use with 18″(457mm) deep worksurfaces with knife edge only.
- Recommend the KU4A-0023-■ N or KU3A-0023-■ keyboard pad for 36″(914mm)-wide corners.

Note: Separately specified worksurface reinforcement channels provide additional support for worksurfaces with 50″(1270mm) spans that are heavily loaded and not otherwise supported by mid-span cantilevers, worksurface support panels, columns, legs or attached lower storage.

■ Available on RUSH with Standard Core.

Specification Tips

- 90° Merger is suggested alternative to using two perpendicular rectangular worksurfaces.
- **Corner bracket is required and must be separately specified.**
- **Worksurface support specific to product line and worksurface edge guidelines; must be separately specified; refer to Specification Guide for support and load.**
  –Corner bracket - REQUIRED
  –Cantilever bracket
  –Worksurface support panel
  –Side brackets
- Knife edge requires use of worksurface supports for that application; worksurface support panel and/or side bracket for use with knife edge.
- Mini cantilever brackets are for use with 18″(457mm) deep worksurfaces with knife edge only.
- **Not designed for use with an adjustable keyboard pad.**

Specification Tips

- **Worksurface support specific to product line and worksurface edge guidelines; must be separately specified; refer to Specification Guide for support and load.**
  - –Worksurface support post or column
  - –21″(533mm)adjustable height disc base
  - –Attached lower storage
- In addition to the required floor support, separately specify the appropriate support options. Select one or more of the following:
  - –Cantilever bracket
  - –Worksurface support panel
  - –Convergent bracket
- Knife edge requires use of worksurface supports for that application; worksurface support panel and/or side bracket for use with knife edge.
- Mini cantilever brackets are for use with 18″(457mm) deep worksurfaces with knife edge only.
- Recommend the KU4A-0023-■ N or KU3A-0023-■ keyboard pad for 36″(914mm)-wide corners.

Note: Separately specified worksurface reinforcement channels provide additional support for worksurfaces with 50″(1270mm) spans that are heavily loaded and not otherwise supported by mid-span cantilevers, worksurface support panels, columns, legs or attached lower storage.

WURR-W

Features

- Includes worksurface and tie plate.
- Wood veneer worksurface with:
  - –3mm edgeband (K) or knife edge (U) on user edge and 1mm edgeband on side and back, or
  - –Cascade (M) on user edge and 1mm edgeband on side and back.
- Worksurfaces predrilled to accept most support options.
- Optional wireway will be Charcoal. Refer to Specification Guide for wireway details.
- **Installed worksurfaces without wireway will not allow clearance for power plug.**
- Depths and widths shown in nominal dimensions.

Specification Tips

- **Worksurface support specific to product line and worksurface edge guidelines; must be separately specified; refer to Specification Guide for support and load.**
  - –Cantilever bracket
  - –Side brackets
  - –Worksurface support panel
  - –Worksurface support column or leg
  - –Attached lower storage (for worksurfaces greater than 36″ wide)
- For edgeband:
  - –18″(457mm) and 24″(610mm) specify the standard mini cantilever bracket for radius end.
  - –30″(762mm) specify standard cantilever bracket for radius end.
- When using snap-n-fit cantilevers 18″(457mm) and 24″(610mm) requires mini snap-n-fit cantilever, 30″(762mm) requires standard snap-n-fit cantilever.
- For Cascade edge, for aesthetic reasons, use:
  - –Side bracket and column support or leg.
- Knife edge requires use of worksurface supports for that application; worksurface support panel use with knife edge, or side/corner bracket.
- Mini cantilever brackets are for use with 18″(457mm) deep worksurfaces with knife edge only.
- For worksurfaces less than 42″(1067mm) wide, suggested pedestal style is mobile.

Note: Separately specified worksurface reinforcement channels provide additional support for worksurfaces with 50″(1270mm) spans that are heavily loaded and not otherwise supported by mid-span cantilevers, worksurface support panels, columns, legs or attached lower storage.

Features

- Includes metal, u-shaped channel and mounting screws.
- Field installed, field located and drilled per installation instructions.
- Worksurface reinforcement channels provide additional support for laminate or wood worksurfaces with 50″ or larger spans that are heavily loaded and not otherwise supported by mid-span cantilevers, worksurface supports, legs, or under-worksurface storage.

■ Available on RUSH.

To Order, Specify:

1) Product number.
(No finish specification required.)

Application Guidelines

Laminate or Wood Panel Hung Worksurface Applications (for standard 29″ high worksurfaces)

General Application/Number:

- 54″ wide with two suspended pedestals or stationary pedestals over 27″ in height, use WUAR-1600-PH.
- 60″ wide top with two suspended pedestals or stationary pedestals over 27″ in height, use WUAR-2400-PH.
- 54″ wide top with one suspended pedestal or stationary pedestal over 27″ in height, use WUAR-3200-PH.
- 60″ wide top with one suspended pedestal or stationary pedestal over 27″ in height, use WUAR-3900-PH.
- 54″ wide top – no suspended pedestal or stationary pedestal over 27″ in height, use WUAR-4700-PH.
- 60″ wide top – no suspended pedestal or stationary pedestal over 27″ in height, use WUAR-5400-PH.

Worksurface reinforcement channels can provide additional strengthening to 50″ and greater worksurfaces on like-sized panels where heavy loads are anticipated. Depending on application, heavily loaded worksurfaces may not need a worksurface reinforcement channel when:

- Support is provided by a third cantilever on 50″ and greater worksurfaces (spanning multiple panels) or by using other under-worksurface support methods.
- Fixed/attached pedestals provide under- worksurface support.
- Panel hung worksurfaces wider than 60″ require more than two cantilevers.

Laminate or Wood Convergent Tops and Convergent Freestanding Units

- 72″ UniGroup Too, UniGroup and PLACES convergent worksurfaces and wrap-around convergent worksurfaces, panel hung, or freestanding, use WUAR-3900-PH.

Application Guidelines for using Worksurface Reinforcement Channel with Under-Worksurface Storage

For UniGroup Too, UniGroup, PLACES worksurfaces at the standard 29″ height.

- All pedestals under 25″ in height can be used under a worksurface with a worksurface reinforcement channel.
- Mobile pedestals over 27″ in height cannot be used under a worksurface with a worksurface reinforcement channel. By increasing worksurface height to 30″, mobile pedestals can be used with a worksurface reinforcement channel.
- Stationary pedestals can be used in applications with worksurface reinforcement channels. Refer to Laminate or Wood Panel Hung Worksurface Applications matrix information above regarding suspended and stationary pedestals.
- In most applications, lateral files or fixed pedestals supply adequate support so that worksurface reinforcement channels are not needed.

Because of the natural properties of wood, variations of grain pattern and finish color can be expected. Haworth carefully selects each material used in the manufacturing of products to ensure consistent and acceptable color and finish. Wood also will change color due to lighting conditions. Haworth controls this by using surface finishes to reduce color change. However, color change may be more evident in light-colored finishes.

COM Yardage Requirements

Procedure

To confirm approval of or request new approval for COM's, contact the **Haworth Inquiry Center (1.800.426.8562), or http://hub.Haworth.com, or www.haworth.com > surface collection > COM Library** to determine if the COM you have selected has already been tested and approved for use on our product.

If the fabric is approved, and the directional orientation (directional rightway, directional railroad, or non-directional) of the tested fabric has been confirmed, then refer to the appropriate column in the chart for yardage requirements.

Steps to follow to calculate fabric usage:

1) Identify product type and size.
2) Determine method in which fabric is to be cut (directional rightway, directional railroad or non-directional).
3) Determine fabric roll width.
4) Find corresponding fabric usage value from the table.
5) Calculate fabric required using the formula below:
   Fabric usage = number of units x number of sides with fabric x fabric usage (from tables) + C (constant).

Constant — Compose®, PREMISE®, PLACES® and UniGroup®

Product	C
Panels	2.5
Tackboards, Tackstrips	1.5
Inserts	1.5
Desktop Screens	1.5
OSUs and Flipper Doors	1.5
LFBs and VSUs	1.5
Trim Covers (Finish Post, End of Run)	1.5
Stackable Pads	1.5
Add-ons and Wainscot Panels	1.5

Constant — RACE®

Product	C
Desktop Screens	1.5
RACE Privacy Screens*	0.0
RACE Pads	0.0

*Includes fabric for both sides. Sizes 51″-78″ include two screens.

6) Repeat steps 1-5 for each product type, size and fabric.
7) Add all values together to find total number of linear yards required for the order. Add the appropriate percentage shown below to the total yardage to accommodate fabric flaws, wrinkles and other imperfections.

Up to 500 yards	Add 10%
501 to 1000 yards	Add 5%
More than 1000 yards	Add 3%

North American Terms of Sale

These Terms of Sale are part of a quotation, bid response, or other sales document issued by Haworth, Inc., Haworth, Ltd. ("Haworth").

These Terms of Sale do not cover products manufactured in North America shipping to non-North American countries nor do they cover products manufactured in non-North American countries shipping to North America. For those terms of sale, please contact Haworth's Global Trade and Compliance Department at 616.393.3000 or through Haworth.com.

A. Ordering Information

Haworth sells its products on the terms set forth in these standard Terms of Sale:

ORDERS MUST BE SUBMITTED IN WRITING OR ELECTRONICALLY (Lynx) AS REPRESENTED BY A VALID PURCHASE ORDER, WHICH INCLUDES PRODUCT TOTAL.

An order is not binding upon Haworth until Haworth issues an order acknowledgment to the customer (the "Customer"), which will include price information and an anticipated delivery date.

1. Order Changes/Cancellations

For Specials, Customer's Own Material (C.O.M.), finish matches, custom colors, custom products, Master lock and key orders, and RUSH orders, no changes or cancellations are allowed 24 hours after order placement. All other products require approval for changes or cancellations. A change/cancellation fee may apply. Contact Order Services for applicable charges.

Ship-to addresses changed within five (5) business days of delivery will incur fees to cover administrative costs due to re-labeling of product and/or reconsignment fees with the carrier.

Order cancellations are complete annulments of orders. Order changes are the deletion of line items or a change in size, color, quantity, ship-to address, or scope of work. There is no penalty for additions; however, any change may cause the order or the line items affected to be rescheduled. Order changes involving additional product and services which increase the value must be accompanied by an amended Purchase Order or other document as agreed.

ALL CHANGES MUST BE IN WRITING, REGARDLESS OF THE (DOLLAR) VALUE. CHANGES ARE NOT BINDING UPON HAWORTH UNTIL HAWORTH ISSUES AN ACKNOWLEDGMENT OF THE CHANGE.

2. C.O.M. (Customer's Own Material)

A Customer who requests a fabric, surface or finish material (C.O.M.) not in Haworth's standard finish offering must first confirm approval of or request new approval for the C.O.M.

Haworth will determine feasibility of the material for manufacturability. For a description of the procedure to submit C.O.M. samples, contact Haworth's Order Services department. For testing information, see the C.O.M. section of the catalog, or call Haworth Order Services.

If Haworth agrees to use the C.O.M., (1) Haworth shall have no responsibility for the condition, quality, value, performance, physical properties, or any other aspect of the C.O.M.; and (2) Haworth shall have no liability for any damages, injuries, or losses to the Customer or to any third party that shall be caused by any C.O.M., and the Customer shall hold Haworth harmless for all such liability.

Advance payments or other payment security may be required by Haworth. The account balance must be at or below the credit limit and current at all times (no past-due balances). Haworth reserves the right to delay or cancel any delivery to a Customer whose Haworth account balance is over the credit limit and/or past due. For walls and floors a deposit will be required.

Customer hereby authorizes any credit references to answer Haworth's inquiries and provide such credit information and documentation as Haworth may request.

The Customer hereby releases and holds Haworth harmless for any inconvenience whatsoever, caused by any temporary or permanent withdrawal or restriction of credit privileges hereunder, or the enforcement of any of the provisions contained in this paragraph.

3. Past-Due Charges

Past-due balances will be increased by a maximum of 1.5% per month, or 18% annually, without forfeit of Haworth's right to immediate payment.

4. Applicable Prices

The price of any product sold to Customer by Haworth will be based upon the North American Price List (Catalog).

Prices and discounts are subject to change without notice or approval. In the event of an adjustment to pricing, National Sales Agreement (NSA) Customers will be notified in advance according to the terms of the NSA.

Applicable prices and currency exchange rates are those in effect at the time of the RECEIPT of an **ORDER**; Haworth reserves the right to use the published pricing effective at the time of shipment, if the requested delivery date is more than 120 days after the order receipt date.

North American Terms of Sale

Haworth Flooring products are sold using the North American price list in US dollars. Currency exchange rates at the time of the transaction will be used to convert the USD amount into the alternate currency. Should the currency exchange rate between the USD and alternate currency change between a quote and the receipt of an order, the alternate currency amount will also change to equal the current, equivalent USD amount.

5. C.O.M. (Customer's Own Material) Charges

Refer to appropriate Customer's Own Material (C.O.M.) form for applicable surface material charges.

6. Taxes

Haworth prices do not include customs duty, sales, use, value added or similar taxes. Any federal, state/provincial or other taxes or assessments based upon the sale or delivery of products or services sold applicable to the customer at present or later imposed by federal, state/provincial or municipal agencies, shall be added and paid by the customer. Customer is responsible for all such taxes.

NOTE: For all countries a valid sales tax exemption certificate must be approved by and on file with Haworth prior to product shipment. Otherwise, sales tax will be due and payable to Haworth when such tax is invoiced to Customer.

7. Services

If, as a result of Customer request, the Haworth dealer or Haworth subsidiary provides planning/design services, storage, project management, special handling, set-up, installation and/or other services, the Customer will be charged at the local Haworth dealer/subsidiary's prevailing rates.

8. Termination by Haworth

Haworth may immediately terminate an order upon written notice in the event bankruptcy or insolvency proceedings are instituted by or against the Customer, or the Customer is adjudicated as bankrupt, becomes insolvent, makes an assignment for the benefit of creditors, or proposes or makes any arrangements for the liquidation of its debts, or a receiver or receiver and manager is appointed with respect to all or any part of the assets of the Customer.

Haworth has the right to determine the carrier, method of shipment and routing. Haworth will contract with the insurer and provide minimal insurance coverage (CIF @ 110%) made payable to the Customer. Customer is responsible to obtain greater insurance if so desired.

Customer bears all risk of loss or damage to the goods when the goods are effectively at the disposal of the Customer on board the vessel at the named port of destination. Proof of delivery is a clean on board bill of lading. Customer will be responsible for all on-carriage from the receiving port to the final destination.

3. Canada

All deliveries will be DDP (Delivered Duty Paid) (ICC Incoterms 2010). Haworth's catalog prices include delivery to Customer's named place, not unloaded from any arriving means of transport. Customer bears all risk of loss or damage to the goods when they are delivered to the Customer's named facility not unloaded. Haworth requires the Customer to report all freight damage and/or loss to both the carrier and to Haworth.

NOTE: Under all delivery terms (U.S.A. and Canada), any additional expense resulting from Customer's request for expedited transportation, special services, packaging, handling, routing, and/or shipping method will be billed to Customer.

4. Mexico

All deliveries will be DAP (Delivered to Place) (ICC Incoterms 2010). Haworth's catalog prices include freight charges for normal surface transportation to a United States point of exportation within the 48 contiguous states. Haworth has the right to determine the carrier, method of shipment and routing.

Customer bears all risk of loss or damage to the goods when the goods are delivered to the named United States point of exportation. Haworth will provide customs clearance facilitation and arrangement of local delivery through an Authorized Dealer in Mexico, on a separately negotiated basis. Otherwise the Customer will be responsible for all customs clearance formalities and on-carriage from the United States point of exportation to the final destination in Mexico.

5. Delivery Dates and Delay

If Haworth cannot deliver products as scheduled due to causes beyond its reasonable control (such as casualty, labor disputes, or accident; inability to obtain necessary labor, material or transportation; or changes requested by the Customer), the delivery date will be extended to compensate for the delay as determined by Haworth.

6. Delivery Shortages and Damage

Product shortages and damage must be noted on delivery receipts at the time of delivery and reported to the carrier for correction.

Claims against Haworth for shortages, errors, or damage must be made within ten (10) days of the date of delivery or the Customer waives the right to make such a claim. Signed Bill of Ladings or Delivery Receipt must be sent in with claims. See the Haworth/Haworth Dealers Roles and Responsibilities document for further details.

7. Storage

Haworth may transfer product to storage at the Customer's risk and expense if the Customer is unable or unwilling to take delivery of product as originally scheduled. Upon such transfer to storage, the Customer assumes risk of loss. Haworth will invoice the Customer for storage fees and the Customer will make payments in accordance with Haworth's standard payment terms.

PRODUCT NON-OBSOLESCENCE AND WARRANTY POLICY

This North American Haworth Product Non-Obsolescence and Warranty Policy (the "policy") applies to products manufactured after May 8, 2015. For products manufactured before this date please refer to the policy published in the NA Price List when purchased or contact your local Authorized Haworth Dealer. All Haworth products are warranted for 24 hour / 7 day use over the length of the Applicable Warranty Period as set forth below.

Haworth, Inc. or Haworth, Ltd., (each called "Haworth") will make a good faith effort to maintain product compatibility within our various generations of integrated product platforms to provide our customers with spaces that adapt to change. Under our non-obsolescence policy, we commit to provide our customers with products of comparable function or operational characteristics for a term equal to the Applicable Warranty Period. Haworth fabrics and finishes must be updated periodically to maintain the market appeal of our products and respond to the demands and changing preferences of our customers. As a result, we or the manufacturer may discontinue some fabrics and finishes before expiration of the Applicable Warranty Period.

If a new product purchased or leased from Haworth or from an Authorized Haworth Dealer proves to be defective (as defined below) while the product is still in the possession of the initial purchaser or lessee and if they, within the Applicable Warranty Period, inform Haworth of the defect by contacting the local Authorized Haworth Dealer, then, except as provided below, Haworth will, at Haworth's option, either repair or replace the product, at Haworth's expense, or refund the purchase price of the product. Except as provided below, a product shall be considered "defective" if Haworth finds that it is defective in material or workmanship and if the defect materially impairs the use of the product to the purchaser or lessee. The applicable warranty period begins on the day the product is manufactured. If a product that the purchaser or lessee references in a notice of defect was not installed by a Haworth Certified installer and/or reconfigured by a Haworth-trained installer, then the product may not be considered defective and Haworth will not be obligated to repair or replace it or to refund its price.

Haworth shall not have tort liability with respect to a product, and Haworth shall not be liable for any consequential, economic, indirect, special, punitive or incidental damages arising from a product defect. Haworth shall not be liable for repair or product placement due to improper installation or any defect in materials used for installation which are not manufactured, sold or supplied by Haworth.
