INSPIRED PRACTICALITY

WE'RE HON.

Our office furniture is your trusty workplace sidekick. Whether the pressure is on, or the rest of the office is gone, we're right there with you. To help you work smarter, more comfortably and on your terms.

We didn't get to be the most recognized name in office furniture overnight. Since 1944, our members have helped doers like you achieve more everyday victories. The bold idea successfully sold to the tough manager happens in our chairs. The click of our file cabinet drawer signals another project well done. Cleaning off the top of our table, just to get it dirty again.

We believe the right office furniture makes you more productive and successful.

Please note: Consent of The HON Company must be obtained before any warranty work is performed. To obtain consent, please take the following steps:

1. Contact the Dealer from whom the product was purchased within 30 days of discovery of the defect. Be prepared to affirm that you are the original purchaser of the product and to provide the serial number(s) from the product in question.
2. Your Dealer will gather all pertinent information regarding the claim, inspect the product and contact a HON Company customer service representative. (Please allow a reasonable amount of time for inspection and review.)
3. If The HON Company affirms that the product in question is eligible under the conditions of the warranty as stated above, the customer service representative or another representative of the Company will determine whether to provide replacement parts, authorize repairs or replace the product.

ENVIRONMENTAL STATEMENT

Clearing the air.

In 2006, The HON Company became the world's first office furniture manufacturer to have products certified under the Indoor Advantage™ program. Virtually all manufactured products emit chemical compounds into the air. Indoor Advantage™ certification helps assure customers that certified products will help improve the air quality within their offices and workspaces.

Developed by SCS Global Services, Indoor Advantage™ evaluates products against indoor air quality standards, like ANSI/BIFMA Furniture Emissions Standard, X7.1. The ANSI/BIFMA X7.1 standard allows manufacturers to test individual components, as well as complete products for emissions from volatile organic compounds (VOCs). This allows us to identify problematic materials and phase them out of our products.

Indoor Advantage™ certified products meet the LEED v4 credits for low-emitting materials.

Indoor Advantage™ offers two levels of certification:

On the level®.

level®, the BIFMA e3 Sustainability Standard, was developed in response to increasing demand for proof that manufacturers were living up to their environmental claims. level® is a multi-attribute sustainability certification label for products that have met criteria in four categories of impact: Materials, Energy and Atmosphere, Human and Ecosystem Health, and Social Responsibility.

level® offers three levels of certification:

Products that meet these specifications are identified throughout this publication with the following icons:

Certified SCS Indoor Advantage™

level® certified to the BIFMA e3 Sustainability Standard

- Formal, full height modesty panels on factory-configured (i.e., built-up; assembled) desks, credenzas, and returns.
- Drawer and door fronts over end panels.
- Top-between-end panels (behind door fronts) on stack-on and wall mount storage, and 68 $\frac{1}{4}$ "H & 81 $\frac{1}{4}$ "H storage and combination storage cabinets, wardrobes, and towers.
- Option choices include:
 - Handle design
 - Worksurface grommet
 - Wood or frosted doors on overhead storage
 - Finish (worksurface/chassis/drawer front/door as single option)

CONSTRUCTION

- Chassis & Pedestal Construction
 - All wood pedestals are made with veneer end panels and fronts which are constructed with $\frac{3}{4}$ " thick balanced 3-ply panels.
 - End panels are connected with an inset top, back, and bottom cross-tie which is made of $\frac{1}{16}$ " thick 45lb particleboard. Panels are secured with cam fasteners in conjunction with pressed hardwood biscuits that are adhered with PVA (white polyvinyl acetate) glue.
 - A threaded steel glide plate is attached to the inset bottom panel on the pedestal to provide a durable connection between the glide and the bottom of the pedestal.
 - Steel glide plates are attached to single end panels with screws. End panels are pre-bored to accept the stem of the glide.
- Overhead / Storage Construction
 - All wood panels are constructed with $\frac{3}{4}$ " thick balanced 3-ply panels.
 - Top, end, and bottom panels are secured with cam fasteners in conjunction with pressed hardwood biscuits that are adhered with PVA (white polyvinyl acetate) glue.
 - All units have inset back panels; backs are unfinished and covered gator-ply material.
 - Back panels are connected using pocket bores and wood screws.
 - Stack-on storage attaches to worksurface with double-sided adhesive tape.

- Wall mount cabinets are mounted to the wall with a spade and "z" bracket attachment method. Steel barrel nuts and spade brackets are securely mounted through the back of wall mount cabinets.
- All units ship with a "z" bracket. This bracket is mounted to the wall by field installers.
- Wall mount cabinet attachment requires individual cabinets be secured by a minimum of two wall mounting locations/studs.
- The cabinets are designed for interior and perimeter walls that are constructed with wood or metal studs. Installers are responsible for selecting and supplying appropriate fasteners for all conditions.
- The HON Company is not responsible for any liabilities resulting from wall mounted cabinets that are not properly installed per instructions.
- Hinges
 - Units with doors include 95° self-closing hinges. Hinges are adjustable.
- Filing
 - The file hanging system is an integral part of the drawer.
 - A highly durable black plastic extrusion is securely fastened into a route on the top of the drawer.
 - The extrusion, coupled with steel rails, allow side to side and front to back filing in file and lateral drawers.
 - The plastic extrusion was designed to promote optimum filing capacity within the drawer while providing a reliable and maintenance free filing system.
- Aluminum Frame Frosted Glass Doors
 - Extruded aluminum mitered frame is clear anodized silver aluminum.
 - Frame is $\frac{7}{8}$ " thick and 1 $\frac{3}{4}$ " high. Frosted glass is inset within the frame.
 - All frosted glass should be cleaned with a soft lint free cloth and non-ammonia based cleaner only.
- Height Adjustable Worksurfaces
 - Worksurfaces are actual widths. A 1" clearance gap is required for any height adjustable top on all sides.
 - Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
 - Adjacent worksurfaces need to be self supporting. A wall mount bracket may be used.

CENTERPIECE™ VENEER ORDERING/DESIGN INFORMATION

MATERIALS

- Veneer and Finish
 - Natural veneer is subject to nature's quality control. Each species will exhibit difference in grain pattern and tone. This is to be expected and, in fact, contributes to the beauty and individuality of each product. Flat Cut veneers emphasize the variations of wood by exhibiting cathedrals in the grain pattern. Worksurfaces, desktops, and table tops are protected by an advanced UV-cured finish coating in an open pore low sheen finish, applied by state-of-the-art finishing equipment. The finish meets the EPA's stringent requirements for VOC emissions and air quality. Cured in a specially designed ultra-violet oven, the finish fuses to the wood, forming a durable shield that provides a high level of scratch, stain, chemical, and heat resistance, plus a high level of clarity. Regular dusting and occasional cleaning are recommended to maintain your wood finish. To clean, dampen a soft cloth with lukewarm water and gently wipe the wood in the direction of the grain. A mild solution of Murphy's oil soap and water may also be used. Avoid cleaners with oil, waxes, or silicones as they may create a hazy look.
 - Wood owes its inherent beauty to variations in color, grain, and texture; therefore, these variations are not considered defects. There may be minor variations from one piece of furniture to the next even though they are ordered and finished at the same time. Exposure to light and the aging process will cause a darkening of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. The HON Company does not guarantee the exact matching of grain, pattern, and color. Finishes do not cover any of the natural characteristics of the wood, including nature's colorations and pitch pockets. Merchandise will not be replaced because of these natural variations.
- All exposed surfaces utilize select plain sliced Cherry, Maple, or Walnut veneers. Veneers are carefully selected and slip-matched to assure balance and consistency.
- Finish process provides exceptional depth, clarity, durability, and chemical-resistance throughout the life of the product.
- Eight rich finishes to choose from — Bourbon Cherry, Cognac, Harvest, Mahogany, Mocha, Natural Maple, Pinnacle, and Shaker Cherry.
- Tops / Worksurfaces
 - 1 $\frac{3}{16}$ " thick balanced 3-ply panels with 45lb. particleboard substrate
 - Flat edge detail
 - $\frac{3}{32}$ " thick natural solid external hardwood band on the user sides

SUSTAINABILITY

- LEED EQ compliant finishes.
- Open pore low sheen water base UV finish on writable worksurfaces.
- Low-emitting, low sheen, solvent based conversion varnish finish on non-writing surfaces.
- 19.43% Post-Consumer content and 56.23% Pre-Consumer content; overall recycled content of 47.54% (based on ANSI/BIFMA M7.1-2011 standard private office freestanding casegoods workstation system configurations A2.2.5).

PRODUCT AND PACKAGE TESTING

- Meets or exceeds ANSI/BIFMA and ISTA performance standards.

DRAWER SPECIFICATIONS

- Drawers
 - All drawers are 5-sided construction, which allows easy drawer alignment or replacement of drawer fronts. Drawer fronts are attached with screws for easy removal.
 - Drawer fronts feature matched veneer within each pedestal set.
 - The drawers are miterfold construction and are fastened together with dowel joinery for maximum drawer strength.
 - The drawer side material is 3-ply 12mm vinyl-wrapped particleboard in a natural cherry color.
 - The bottom material is a 3-ply substrate consisting of vinyl-wrapped high-density fiberboard core.
 - Optional pencil tray is available for order.
- Drawer Slides
 - Box and file drawers feature full extension, precision steel ball bearing suspensions for a smooth, quiet range of motion; the slides are load rated for 100 lbs.
 - Fully progressive action with dampened start/stop.
 - Lateral file suspensions are load rated for 150 lbs and include an anti-tip mechanism that prevents more than one drawer from being opened at the same time.

VENEER ORDERING/DESIGN INFORMATION

- Suspensions are silver, steel, roll-formed, zinc plated, and high-grade.
- All suspensions are warranted for the lifetime of the product.

LEVELING GLIDES

- Glides provide 1½” of vertical leveling adjustment to compensate for uneven floors. Glide bottom is durable non-rust nylon.

CORE REMOVABLE LOCKS

- Satin (silver) face locks are standard on desk, credenza, return, stack-on and wall mount storage with doors, mobile pedestal, bookcase hutch with door, lateral file, bookcase with lateral file, storage cabinet with lateral file, wardrobe, wardrobe/storage cabinet, storage tower, and modular pedestal models. Each pedestal is independently locked.
- Locks are factory installed. Lock is option SA.
- On individual models that have multiple locks, such as a double pedestal desk and storage tower, the locks are keyed alike.
- Models with hinged door below the worksurface do not lock. This includes: Hinged Door Full Storage Credenza, Modular Hinged Door Pedestal, and Hinged Door Cabinets.
- Glass doors do not lock.
- Hinged doors on 5 high laterals do not lock.
- Keying
 - Keying is random from the factory.
 - Locks feature a removable cylinder (core) that can be interchanged as needed; allows all furniture pieces within an individual workstation to be accessed with one key for convenience, and allows locks to be differentiated between workstations and offices for security. Makes re-keying quick and easy.
 - For field installable lock core kits, specify HF27S (satin) or HF27B (black) plus the key number.

CORD MANAGEMENT

- Capabilities include optional worksurface grommets.
- Desks specified with worksurface grommets include cutout in kneewell side of pedestal(s) to route and hide cords.
- Under worksurface wire managers are sold separately. These units hide and route cords horizontally around a station.
- Grommet
 - 2-piece round plastic grommet. Grommet cap is inset in a plastic sleeve. Sleeve measures 3” outside dimension x 1” thick.
 - Cap has two cord access holes. Black plastic finish only.
 - Component can be replaced with grommet-mount power hub (HGRMTAC) or power/USB hub (HGRMTUSB2).

WORKSURFACE/TOP EDGE DETAILS

- Three options; two contoured profiles and one smooth, flat edge.
- For beaded (B) and tri-oval (V) edge shapes, tops are profiled on the user and approach sides, and flat on the ends; the flat edges allow side-by-side placement of worksurfaces without gaps. **The only exceptions are return, bridge, corner unit, extended corner worksurface, and rectangle worksurface with vertical grain models, tops on these items are profiled on the user's side and flat banded on the approach side and ends.**
 - Bookcases have profiled edge on the front, user side only.
 - The reception station transaction counter and the L-reception station with transaction counter (for the desk) models, have profiled edgeband on the approach and user sides.
 - The L-reception station with the transaction counter models, on which the counter runs around the entire perimeter of the L-configuration, have a profiled edge on the front of the transaction counter on the desk approach side only.

CORD MANAGEMENT GROMMETS

- Grommets are standard on desk, credenza, return, bridge, jetty peninsula, and corner unit models. Specification logic includes the grommet finish for tops; choose from Black (P) or Platinum (T1). Grommets in modesty and end panels are Black only.
- Grommets are optional on modular component worksurfaces, full-length (27⁷/₈"H) modesty panels, end panels (1¹/₈", L-shaped) and the sides of support storage pedestals. On worksurfaces, choose from Black (P), Platinum (T1), or no grommet(s) (X). On modesty, end, and side panels the options are grommet Black (P) or no grommet (X).
- See cord management chart on page 104 for details.

NOTES: Two field installable end panels (1-right; 1-left) for use in ganging two stack-on storage units. Combining stack-on allows users to span longer worksurfaces, including 84" (2 - 42"W), 96" (2 - 48"W), 120" (2 - 60"W), and 144" (2 - 72"W). Narrow, space-saving panel size replaces the full 15"D end panels to expand worksurface space. The 4¼" right end panel is to replace the standard 15"D right end panel on one stack-on storage unit, the 4¼" left end panel is to replace the standard 15"D left end panel on a separate, adjacent stack-on storage unit that is in linear alignment with the first unit. Kit includes: (2) narrow end panel supports; European-style fasteners; dowels; joint connector bolts with sleeve nuts (for ganging stack-on storage units). Can be used to connect up to two stack-on storage units in a line (requires 1 kit). Can be specified in a woodgrain or solid laminate color only.

NOTES: Two field installable end panels (1-right; 1-left) for use in ganging two stack-on storage units. Combining stack-on allows users to span longer worksurfaces, including 84" (2 - 42"W), 96" (2 - 48"W), 120" (2 - 60"W), and 144" (2 - 72"W). Narrow, space-saving panel size replaces the full 15"D end panels to expand worksurface space. The 4 1/4" right end panel is to replace the standard 15"D right end panel on one stack-on storage unit, the 4 1/4" left end panel is to replace the standard 15"D left end panel on a separate, adjacent stack-on storage unit that is in linear alignment with the first unit. Kit includes: (2) narrow end panel supports; European-style fasteners; dowels; joint connector bolts with sleeve nuts (for ganging stack-on storage units). Can be used to connect up to two stack-on storage units in a line (requires 1 kit). Can be specified in a woodgrain or solid laminate color only.

NOTES: See chart on page 104 for cord management options.

- When grommets are specified for 30"D and 36"D rectangle worksurfaces, pre-drilled holes will not be included for a 4½" diameter support column.

NOTES:

- Grain direction on all rectangle worksurfaces runs horizontal (side-to-side) except as follows: 30"W - 36"W - 42"W - 48"W - 54"W - 60"W x 24"D tops can be specified with horizontal (side-to-side) or vertical (front-to-back) grain.
- 42"W and 48"W x 20"D tops are available with vertical (front-to-back) grain only.
- 48" - 72"W x 24" - 30"D worksurfaces are compatible for use with height adjustable electric base model HHAB3S2L.
- For standing-height requirements, use worksurface with 41"H O-leg, end panel, L-shaped end panel, or pedestal supports.
- For mobile desks and tables, use post leg with casters.
- For paper organizers, see page 175.
- Attachment of above privacy screen models requires a minimum 1" clear space/overhang on the underside of worksurface.
- Attachment of above/below privacy screen models requires a minimum 2" clear space/overhang on the underside of the worksurface.
- Steel external support channel can be attached to the underside of worksurfaces that are subjected to heavier loads. Channel is recommended to provide extra support on unsupported spans of 54"W or greater or per user preference. Ordered separately from worksurface.
- If using a 54"W or 60"W floating modesty panel, it is not necessary to specify an external support channel.
- When using an external support channel under the worksurface, the depth clearance for center drawers and keyboard platforms decreases by 8".
- See "External Channel (Recommended Use)" chart on page 152.

NOTES: Can be used in a host of applications, including as a desk, credenza, return, bridge, stationary or mobile table surface, in U- or L-shaped configurations, as part of a work wall layout with an island extension, or with the height adjustable electric base. The conference overhang dimension on the approach side of worksurfaces varies depending on the supports and modesty panels specified. Top can be positioned with a cantilevered conference overhang on one end when used with select worksurface supports, including an O-leg or 9½"W modular pedestal. For return applications in which there is an unsupported span wider than 54", such as a 72"W x 24"D worksurface supported by a 15¾"W modular pedestal (= 56¼") or a 60"W x 24"D worksurface supported by a 1½" thick end panel (= 58⅞"), use internal support panel model HNL11SUPP. For bridges wider than 54", use internal support panel HNL11SUPP. When using a 30"W, 36"W, 42"W, or 48"W rectangle worksurface as a bridge, no support legs are needed. When specifying a 84"W, 90"W, or 96"W worksurface, cannot use two O-legs for the supports. In these applications, the maximum number of supports that can be an O-leg is one; must choose from a 15¾" or wider modular pedestal for use as the additional support component. For applications requiring connection to an adjoining worksurface, two flat brackets are included with 24"D and 20"D worksurfaces that are ≤48"W; one flat bracket is included with 24"D worksurfaces that are ≥54"W. Underside of worksurface includes pilot mounting holes for O-leg, 1½" thick laminate end panel, pedestals, and flat brackets. See chart on page 104 for cord management options.

ⓘ When grommets are specified for 30"D and 36"D rectangle worksurfaces, pre-drilled holes will not be included for attachment of a 4½" diameter support column.

NOTES:

- Grain direction on all rectangle worksurfaces runs horizontal (side-to-side) except as follows: 30"W - 36"W - 42"W - 48"W - 54"W - 60"W x 24"D tops can be specified with horizontal (side-to-side) or vertical (front-to-back) grain.
- 42"W and 48"W x 20"D tops are available with vertical (front-to-back) grain only.
- 48" - 72"W x 24" - 30"D worksurfaces are compatible for use with height adjustable electric base model HHAB3S2L.
- For standing-height requirements, use worksurface with 41"H O-leg, end panel, L-shaped end panel, or pedestal supports.
- For mobile desks and tables, use post leg with casters.
- For paper organizers, see page 175.
- ⓘ Attachment of above/below privacy screen models requires a minimum 1" clear space/overhang on the underside of worksurface.

NOTES: For use with modular worksurface and support components. Component is 3/4" thick. Full-to-floor sizes can be specified with or without grommet; see chart on page 104 for cord management options. For standing-height applications, a worksurface supported by 1 1/8" thick x 41"H laminate end panel(s) and/or 41"H support pedestal(s), the recommended modesty panel length extends 27 1/8" below the underside of the top, leaving 13" of wall access; 9 1/2" and 15 3/4" W x 13"H backs are available to enclose the balance of the pedestal back. Worksurfaces supported by a 1 1/8" thick x 41"H laminate end panel and 41"H support pedestal, or by two 41"H support pedestals, can be used with a 10" modesty panel to increase the amount of wall access, however in this application the pedestal(s) should be positioned against a wall, as there is not a 30 7/8"H panel to cover the back of the pedestal that is exposed below the modesty panel. The 10"H modesty panel is not recommended for use in a standing-height shell, where both supports are 41"H laminate end panels; for this solution use the 27 1/8"H modesty panel. For standing-height applications with the worksurface supported by 41"H O-legs or L-shaped end panels, use the appropriate floating modesty panel size.

NOTES:

- Provide approach-side kneespace privacy for user seated at desks, credenzas, returns, and bridges.
- Full-width laminate panel can be specified in 6" increments from 30"-96"W, and in full-length (27 1/8"H) or short (10"H).
- Formal, full-length, 27 1/8"H models extend from the underside of the worksurface to the floor.
- 10"H sizes allow quick and easy access to wall power outlets.
- 30"W and 36"W x 27 1/8"H are sized to serve as a modesty panel, or pedestal back for respective 30"W and 36"W support storage pedestal models.

! The full-width panel designs are specifically for use when the worksurface supports are two 1 1/8" thick end panels, two support storage pedestals, or one 1 1/8" thick end panel and one support storage pedestal; not for use with O-legs or L-shaped end panels.

SUPPORT STORAGE PEDESTALS — 28½”H

- Non-handed, interchangeable design reconfigures easily.
- For use with component top and modesty/back panels or pedestal top and back panels.
 - Pedestals are not fully enclosed and require a component top/worksurface and modesty/back panel or a pedestal back, both of which must be ordered separately.
 - Pedestal’s front and side panels are finished.
- The pedestal depth dimension is less than the like-size depth of the component top, to accommodate addition of a modesty/back panel.
 - 29½”D pedestals can be used under 30” or 36”D worksurfaces; 23½”D pedestals can be used under 24” or 30”D worksurfaces.
 - When specifying a 29½”D pedestal with ¾” modesty panel under a 36”D worksurface, or a 23½”D pedestal with a ¾” modesty panel under a 30”D worksurface, there will be a 6” approach side overhang.
- Bottom of side panels are edgebanded for added strength and to seal out moisture.
- Drawers:
 - Operate on steel ball-bearing suspensions to ensure smooth, quiet, long-lasting operation; full extension allows easy access to contents.
 - Fronts are edgebanded on all four sides.
 - Feature 5-sided construction for added strength and easy alignment or replacement of drawer fronts.

- Interchangeable core removable locks are located on front of all modular storage products, except the storage cabinet.
- Finish of lock is determined by, and aligned with, the handle finish specified.
- Locks feature a removable cylinder that can be interchanged as needed; allows users to access all furniture pieces in an office with a single key for convenience and security. Makes re-keying quick and easy. Keyed alike cores must be ordered separately by specification of the key number (removable lock core kit models available in Black [model HF23B] or Satin [model HF23S]).
- Ship fully assembled.
- Chassis and drawer front colors are specified separately; can be selected with common woodgrain or solid laminate color, or with different, complementary chassis and drawer/door colors.
- See chart on page 104 for cord management options. If the pedestal grommet option is chosen, two cutouts, one per end/side panel, each with a black plastic cap, are included.

SUPPORT STORAGE PEDESTALS — 41”H STANDING-HEIGHT

- Same as above except — not to be used freestanding; top and back are not enclosed.
 - Rear of pedestal can be enclosed with a full, 40¾”H back panel or with a 27¾”H modesty panel combined with a lower, 13”H pedestal back component. Pedestal back and modesty panel must be ordered separately.

VOI® SPECIFYING/DESIGN GUIDE

This Specifying Guide is designed to walk you through the steps when choosing the Voi desks elements that will meet your particular workplace needs. From private office to open plan, there are endless combinations that will fit your style and need.

Regardless of the application, Voi presents an integrated, unified aesthetic for the entire workplace.

The step-by-step instructions make it easy to specify elements that personalize workspaces and achieve the right mix of functionality and style.

Worksurface

- A variety of sizes meet a range of footprint requirements, from private offices to open plan areas.

Accessories

- From layering shelves to storage cubes, markerboards and the box drawer organizer, Voi accessories allow personalization to meet individual needs.

Above the Worksurface Storage

- Voi has many above the worksurface storage options that can be used in many applications: wall mounted, panel mounted, and conventional stack-on storage options are available to make an efficient use of vertical space.
- Choose from sliding door units or overhead cabinets with four doors.
- The O-leg can be used in stack-on storage applications to create a more contemporary look.
- The storage cube accessory can be used in the storage applications listed above.

Below the Worksurface Storage

- A wide variety of conventional storage options are available: lateral files, bookcases, support bookcases, mobile pedestals, personal wardrobes, and storage towers.
- Many contemporary storage options are available: low credenzas and floor credenza work in conjunction with the worksurfaces to create layered surfaces that optimize space, different storage, staging, and display needs.

Support

- A combination of many supports can be used with the worksurfaces: O-leg, end panel, pedestal, slim pedestal, support bookcase, lateral/multi file.
- O-legs work in many of the Voi desks applications and provide a light-scale, contemporary look.
- O-legs can be used in a variety of heights so surfaces can be layered.
- End panels are also available and provide a more conventional look.
- A variety of modular storage options can be specified based on your storage needs: box/box/file pedestal, file/file pedestal, slim profile pedestal, lateral files and multfiles.

Modesty Panel/Privacy Screens

- Full height, ½ height and floating modesty panel options are available to enhance privacy.
- Mixed material options are available in laminate and frosted translucent.
- Select the size that works with the supports.
- Above and above/below privacy screens are available to create an element of privacy in an open plan area.

Steps for specification:

1. Select the right worksurface.
Choose the worksurface shape and size that best fits your office layout.

- Bookcase Support can only be used exterior facing.
- Telescoping ball-bearing slides used on box and file drawers. Lateral drawers use a progressive ball-bearing slide.
- When specifying a 30"D support on a 36"D worksurface, there will be a 6" overhang.
- All modular pedestals have an easy attach method to the worksurface for quick assembly.
- Pass-thru openings in the sides of the Power-Ready Pedestals and Lateral Files allow hardwire conduit to run under the worksurfaces, through the case in a continuous run.
- One double-depth O-leg can replace two regular O-legs in teaming applications.
- Shared O-legs create cleaner aesthetic where two legs are used side-by-side.
- 2" adjustable glides on O-leg supports.
- Standing-Height Support Pedestals bottom two file drawers are locking.
- Standing-Height Bookcase Support contains easy-access, fixed storage shelves.

Tips

- Mixed material and laminate floating modesty panels create a lighter scale look by attaching to the top of the worksurface.
- Choose from a variety of materials to create your desired look.
- Laminate modesty panels to create a more conventional look.
- 54"W and 60"W Floating Modesty panels eliminate the need for an external channel.
- Above Privacy Screens provide a division between two worksurfaces and create a division of space in an open plan area.
- Modesty panels cannot be used as a support.
- See modesty panel chart to choose proper modesty size depending on support options.

4. Select Above the Worksurface Storage (Stack-on Storage) or Overhead Cabinets

Abound and Accelerate

Tips

- Select sliding or hinged doors.
- Specify O-leg separately for a contemporary look.
- Optional storage shelf works in conjunction with the O-leg design to provide additional storage space. Only works with 65"H O-legs.
- O-legs come in two sizes to make a 50"H or 65"H stack-on storage unit.
- Wall-mount brackets carry a \$150 upcharge and are specified in the model ordering logic.
- Use shared overhead and attachments in small footprint applications.
- Shared overhead must be ordered as left or right to determine open storage location.
- Shared overhead panel mount brackets and overhead post legs allow overhead to span over all panels systems or run down the spine wall, centered on top of the panel.
- Use the 65"H for a more conventional design. 65"H and 50"H aligns with Abound and Accelerate.
- Stack-on Storage must be placed over two full-height supports. Cannot be placed over non-supported sections such as returns using a flat bracket or tower-to-worksurface bracket.
- If the end panel conventional look is preferred, order the built-up stack-on storage models.
- There are two types of tackboards for use on Overhead Cabinet and Stack-on Storage.

5. Select the right storage.

Choose from a variety of below the worksurface, as well as traditional, storage options.

Laterals and Storage Cabinet

2-Drawer Lateral, 4-Drawer Lateral, Storage Cabinet

36"W x 24"D x 29½"H, 36"W x 20"D x 29½"H,

Mobile Credenza

30"W x 20"D x 21½"H

Mobile Pedestal

15¾"W x 20¼"D x 21¼"H

Tips

- Small credenza models can be used in small footprint applications.
- Can use pedestal or credenza seat cushions on smaller credenza models.
- Low credenzas work in conjunction with worksurface 7" O-leg designed to create a unique layering design.
- Bookcase/laterals and other conventional storage components provide additional storage space.
- Must specify chassis and drawer front color separately.
- Low Credenzas, Laterals and Mobile Pedestals have seat cushions to create additional seating in the workspace.
- Storage and Personal Tower models offer conventional storage as well as wardrobes with a coat rod.
- Using a seat cushion with a power-ready credenza will cover one grommet.
- Specify appropriate power pack for credenza length.
- A worksurface-to-tower bracket kit allows the attachment of worksurfaces to Storage and Personal Tower models.
- Telescoping ball-bearing slides used on box and file drawers. Lateral drawers use a progressive ball-bearing slide.
- Cannot route software power through lockable storage units.

6. Select Accessories to add color, additional storage and organization to your workspace.

- Use the Drawer Organizer to keep small items in order. Also offered in the same bright Storage Cube colors.
- Layering shelves are great for filing and piling or in conjunction with the lower credenza.
- Optimize shared overhead capabilities by adding the Markerboard for Shared Overhead.

VOI® SPECIFYING/DESIGN GUIDE

VOI® AND SYSTEMS INTEGRATION

Worksurface Applications

Either Voi or Systems worksurfaces can be used with Voi in an open plan application. There are several support options:

- A. Completely panel supported.
- B. Combination of panel supported and another worksurface support such as:
 - Bookcase support
 - Pedestal (Brigade®, Flagship®, Contain®, or Voi®)
 - Systems open leg
 - Voi O-leg
 - End panel (Systems or Voi)
 - Tower to worksurface bracket
 - Support column
 - Systems round post leg
 - Voi post leg
- C. Freestanding:
 - Bookcase support
 - Two pedestals (Brigade®, Flagship®, Contain®, or Voi®)
 - Two Voi O-legs
 - One Voi O-leg and one Voi O-leg support for lower credenzas
 - Two end panels (metal or Voi)—requires metal or Voi modesty panel

Additional application guidelines for worksurfaces:

- Systems worksurfaces are available with grommets or no grommets.
- When Voi lower credenzas are used along the spine wall and are placed adjacent to the wing wall, one electrical/data cutout on the wing wall will be blocked.
- When Voi credenzas are used along the wing wall and are placed adjacent to the spine wall, one electrical/data cutout on the spine wall will be blocked.
- When the Voi O-leg support for credenzas is used, it is recommended to also panel attach the worksurface with the worksurface anti-dislodgement bracket kit HWSA2.
- When the Voi O-leg support is used with panels, it is recommended to also panel attach the O-leg to the panel with the O-leg to panel bracket kit HLSPPBL (left) and/or HLSPBR (right). This bracket will provide additional workstation rigidity.
- When the Voi end panel support is used with panels, it is recommended to use the end panel support with panel bracket model. This model will provide additional workstation rigidity.
- The worksurface to tower bracket kit, HSTB2W1, will work with Voi towers, Voi worksurfaces, and systems worksurfaces.

Application Guidelines—Combination of Panel Supported and Another Worksurface Support

- For applications where 1) the worksurface is perpendicular to the spine wall; 2) the worksurface is panel supported off the spine wall; and 3) there are Voi credenzas placed under the worksurface along the spine: there is not enough clearance to use standard worksurface cantilevers to attach the worksurface to the spine. Use the worksurface anti-dislodgement bracket kit HWSA2 to panel attach the worksurface in lieu of cantilevers.

Panel Mounted Stack-on Storage Applications

- The Voi stack-on storage cabinets can be used on Abound and Accelerate as panel mounted overheads.
- The sliding door stack-on storage units are available in 36", 42", 48" widths in addition to 60", 66", 72", and 78" widths.
- The 4 door stack-on storage units are only available in 36", 42", 48", 60", 66", 72", and 78" widths.
- The storage units require a storage to panel bracket kit, model HLSPMB. This model includes one left hand, one right hand, and one center bracket. The brackets are available in all Core and Choice/Metallic paint colors.
- The storage cabinets do not have off modular capabilities.
- For proper installation and support, the storage units must follow the following specification rules:
 - There should be a storage unit of the same construction on each side of a given panel.
 - The storage units on opposite sides of a given panel should be in the same location vertically and horizontally.
 - Only one storage unit per panel, per side.
 - The wing panel adjacent to the spine wall needs to be the same height as the spine wall.

NOTES:

- Systems worksurfaces can be used with all Voi components.
- Worksurfaces are abrasion- and stain-resistant laminate over durable 1/8" solid core high performance particleboard: resists wrapping.
- There is one 3" grommet in 36"W and 42"W worksurfaces and two in 48"W-84"W worksurfaces.
- One flat bracket ships with each worksurface.
- When attaching tops to panels, refer to Systems section of this pricer.
- Square edge detail.
- When using a floating modesty panel or an external channel under the worksurface, the depth clearance for keyboard trays and center drawers decreases by 8". See accessory matrix in accessory section of the pricer.
- 3" Power Hub model HGRMTAC can be interchanged with 3" standard grommet.
- ! Voi® worksurfaces cannot be used with Abode™ Desks components.
- ! Grommets in worksurfaces must be specified. If grommets are specified, grommets come in predetermined location.
- ! Edgeband option only on all Voi worksurfaces. For edgeband options, see matrix on page 258.
- ! When specifying an 84" Worksurface, cannot use two O-legs, must use at least one additional support such as a pedestal or lateral file.
- ! When using a worksurface as a bridge, no additional supports are needed. One support is required for returns, two supports are required for desks and credenzas.
- ! Lateral file or multi-files must be used with surfaces 24"D and 60"W or greater.
- ! Depending on your support combination, an external channel may be required for extra support on unsupported spans greater than 54"W. Please see the matrix on page 259 for more details.
- ! If using a 54"W or 60"W floating modesty, it is not necessary to spec an external channel.
- ! When attaching worksurfaces to panels, one or more of the following are required: anti-dislodgement brackets, end panel, support leg and/or cantilevers. Cantilevers and anti-dislodgement brackets must be ordered separately when attaching worksurfaces to panels.
- ! A return worksurface is considered 48"W or shorter. Longer returns cannot be supported by a flat bracket only.

NOTES: Steel channel can be attached to the underside of worksurfaces that are subjected to heavier loads. Channel is recommended for unsupported spans of 54"W or greater or per user preference. When using an external support channel under the worksurface, the depth clearance for center drawers and keyboard platforms decreases by 8". See chart below for support channel compatibility information.

! Specify: Model.P (black only)

! When specifying a 54"W or 60"W Floating Modesty Panel, it is not necessary to specify an external channel.

NOTES:

- Easy-care, scratch-, spill- and stain-resistant laminate over 1/8" solid core high-performance particleboard.
- Grain direction on all worksurfaces runs horizontal.
- Versatile component tops combine with under-surface support options to form freestanding desks or credenzas, U- or L-shaped configurations, or work wall layouts with an island extension.
- One flat bracket ships with each worksurface for applications requiring connection to an adjoining worksurface.
- For end panels, legs, columns and bases, see the Worksurface Supports listing on pages 316-317.
- When using a floating modesty panel or an external channel under the worksurface, the depth clearance for keyboard trays and center drawers decreases by 8". See accessory matrix in accessory section of the pricer.

! Worksurfaces are subject to slight bowing. The magnitude of the deflection is dependent upon the weight, placement, and duration of the load.

! When using a worksurface as a bridge, no additional supports are needed. One support is required for returns, two supports are required for desks and credenzas.

! External channel support is recommended for extended unsupported spans or heavily loaded worksurfaces. See above and below for details.

NOTES: Ship fully assembled with mounting hardware, 1/pack. Non-handed. O-leg glides have 2" adjustability. For shared components such as modesty panels and privacy screens see pages 268-270. O-leg installation requires 6" of clearance from the worksurface end. For standing-height O-leg sizes, see page 318. Shared O-legs create a cleaner aesthetic in all applications where two legs are used side-by-side. Will have 6" overhang when using 30"D O-legs with a 36"D worksurface.

IMPORTANT: The O-leg attachment bracket interferes with placement of 10500 Series modular pedestals and 28½"H mobile pedestals, preventing them from being positioned directly next to (flush with) the O-leg. Box/file mobile pedestal (model H105106) and mobile printer/fax cart model (H105679) can be positioned along side the O-leg.

WORKING WITH ABODE™ COMPONENTS

Configurations

End Panels and Support Legs

Each are available in two options: freestanding or panel-mount. The only difference between the two options are the panel-mount models come with a left- or right-handed bracket to attach the support to a panel in a systems application.

The 11"D end panel is used to support peninsulas.

Corner Desk Legs

Corner desk legs have a 90-degree bend and welded construction. The strong construction allows gussets or half-height modesty panels to be used with corner legs.

Bridge Kits

Bridge kits include: two flat brackets, two modesty panel-to-end panel attachment brackets, and two tie straps. This kit is used when attaching a bridge unit between two rectangular worksurfaces.

There are some bridge instances where only half of a bridge kit is needed (e.g., using a bridge between a rectangular worksurface and a corner or peninsula). A return kit may be ordered for these instances.

Support Column

Support columns are used to support one end of curvilinear worksurfaces. Includes column, worksurface bracket kit HWSA2, attaching hardware, and adjustable glides.

Return Kits

Return kits include: one flat bracket, one modesty panel-to-end panel attachment bracket, and one tie strap. These are used when attaching a return to a primary desk. Return kits can also be used in some bridge applications — one example is shown below when using a peninsula.

Desk-to-Panel Attachment Kits

Desk-to-panel attachment kits are used to connect a worksurface and modesty panel perpendicular to a panel of corresponding width. Opposing end of worksurface must be attached with an end panel, support leg, or corner leg mounted directly under this worksurface.

When using a corner or corner cove worksurface with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk, use corner w/desk attachment kit. Hand of unit is determined from the user's side of the desk (right-hand unit attaches to right side of modesty).

Corner w/Desk Panel Attachment Kit

Corner w/desk panel attachment kit connects the rear corner of a corner or corner cove worksurface and modesty panel to a panel when the opposing end of the worksurface shares a support leg with an adjacent freestanding desk and the support leg is mounted under the freestanding desk. Hand of unit is determined from the user's side of the desk (left-hand unit attaches to left side of modesty).

Corner Worksurfaces

Corner worksurfaces accommodate 90-degree corner desk legs.

In-Line Connections of Desks

Shared leg can be used at in-line connections to support adjacent rectangular desks.

Pedestals and Storage

Pedestals must be ordered smaller than the depth of the worksurface. For example, 18" D peds should be used with 24" D worksurfaces. 18" D or 23" D pedestals can be used with 30" D worksurfaces. Using 18" D laterals or personal files provide additional storage options under 24" D worksurfaces.

Modesty Panels

The following are some general guidelines for Abode™ modesty panels:

- **Desk:** Modesty panel width is the same width as the worksurface
- **Return:** Modesty panel width is 6" greater than the width of the worksurface
- **Bridge connecting two rectangular worksurfaces:** Modesty panel width is 12" greater than the width of the bridge worksurface
- **Bridge connecting a rectangular worksurface and corner or peninsula:** Modesty panel width is 6" greater than the width of the worksurface
- **Corner connecting to an adjacent worksurface:** Modesty panel width is the same width as the worksurface.

Stand-Alone Corner Modesty Panels

Stand-alone corner modesty panels are used only when one or both sides of a corner or corner cove worksurface are freestanding and NOT attached to another worksurface. Specify the width the same as the width of the worksurface.

Gussets "G"

Gussets can be used in place of a modesty panel with desks 36" W to 60" W. Gussets can also be used with corner desk legs.

Reminder: Panel frame top caps must be ordered separately. Please refer to page 473. Do not specify top caps when putting frameless glass on top of the panel frame or when using a countertop worksurface.

ABOUT® FRAMES OVERVIEW

Stacking connection provides a solid metal-to-metal connection, allowing the stacking frame to accept hang-on components, per configuration guidelines.

Construction and Features

Specifications—formed, steel vertical members, with tubular steel horizontal members are welded into a sturdy, structural panel frame. Panel frames are shipped with base pathway covers installed.

Tiles, Panel Top Caps, and Segment Bars are ordered separately.

Additional design and specification information available at hon.com.

ABOUND[®] FRAMES OVERVIEW

FRAME DIMENSIONS (ACTUAL)

Depth: 2⁵/₈" (use 2³/₄" to calculate intersections in length of panel run)

Widths: 24", 30", 36", 42", 48", 60"

Heights*: Painted trim: 34¹/₂", 42", 49¹/₂", 64¹/₂"

Stacking Frames: 15"H, 30"H

*with levelers fully retracted

Stacking frames can be added to the top of any 35"H, 50"H or 65"H frame. Adding stacking frames to 42"H frames is not recommended due to inconsistencies in segmentation. 15"H and 30"H stacking frames can be used to add up to 45" of additional height to a standard frame. Do not combine differing frame widths in a single stack.

NOTE: When stacking on 42¹/₂"H frames, panel slots will be off by 1/2" compared to any other height panel. When stacking on 42¹/₂"H frames, hanging accessories will be 1/2" off in height compared to accessories hanging on panels at any height other than 42¹/₂"H.

BUILDING HORIZONTALLY WITH ABOUND FRAMES

Important planning guidelines: For adequate stability, one of two methods of stabilization must be adhered to:

Method 1—Opposing returns:

A parent run must be a minimum of 48" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels running in opposing directions on each end of run.

Method 2—Single-sided returns:

A parent run must be a minimum of 48" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels totaling at least 60% of its length, extending in one direction. Return panels must not be any more than 30" shorter in height than parent run. When using 120° connections, 12" must be added to length of return panels as determined by methods 1 and 2. Any run under 100" must have a minimum combined length of 60" of return panels.

INTERSECTING CONNECTIONS

“L”, “T”, “X”, “Y2” and “Y3” connector kits are used when connecting frames at intersecting runs. For “L”, “T” and “X” connector kits, add $2\frac{3}{4}$ ” to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.

Wall starter kits provide a means to affix a panel run to a permanent building wall. Kit adds $1\frac{1}{2}$ ” to length of panel run.

Segment bars — horizontal cross members required between tile segments. Must be specified on each side of frame. One Segment Bar is needed for each reveal between tiles.

Extended straight connector kit “S” can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate “T” or “X” intersections. (Add $2\frac{3}{4}$ ” to the length of the run for every extended straight connector used.)

IN-LINE CONNECTIONS

Direct connections between same height frames in a continuous run are accomplished with provided hardware. There is no incremental increase in dimension along the run.

END OF RUN

Finished end trim must be specified for the unconnected sides of panel frames. The Abound end trim adds $\frac{3}{8}$ ” to the length of the panel run. When adding a stacking frame, order finished end trim in the height that matches the stacking frame height. Move the end cap from the standard frame end trim to the stacking frame end trim.

IN-LINE VARIABLE HEIGHT TRIM

In-line connections between different height panels require trim to cover the exposed frame of the taller panel. The bottom of the trim is contoured to match the profile of the frame top cap.

Multiple-height connections are accomplished by combining standard height panel connectors (35”H, 42”H, 50”H and 65”H) with shorter connectors (7”H, 15”H, 22”H and 30”H). Start from the bottom-up — select the standard connector that corresponds to the height and connection type of the shortest panel, then use the shorter connectors to build up to each subsequent panel height. (See examples.)

In variable height “T” connections — as shown above — you would use the connectors as indicated.

Example above represents Abound variable height “L” for 65” to 50” connection over connector.

VARIABLE HEIGHT CONNECTION TRIM

L, X and T connections between different height panels require trim to cover the exposed frame of the taller panel. The bottom of the trim is flat to match the profile of the Universal Connector top cap. Models are designated as “Variable Height Finished End over Connector Trim”. For variable height connections in a Y configuration, contact the HON Product Solutions group.

OPTIONAL STIFFENER SUPPORT

Stiffener supports can be used to provide additional rigidity to a panel when fabric tiles are on both sides of the frame. May also be used for routing power/data at non-standard heights.

ABOUND[®] CONNECTOR OVERVIEW

CONNECTOR KITS — ABOUND

- “L” 90° Connector Kit
- “T” 3-way Connector Kit
- “X” 4-way Connector Kit
- “S” “S” Extended Straight Connector Kit
- “Y2” 2-way 120° Connector Kit
- “Y3” 3-way 120° Connector Kit
- “W” Wall Starter Kit
- “F” End Trim Kit
- “V” Variable Height Finished End
- “FT” Variable Height Finished End over Connector

- Abound Connector Kits include universal connector block(s), bracket clips and painted metal trim.
- The universal connector block can be used for an L, T, X, or Extended Straight connections, simplifying staging and installation at the project site as well as future reconfigurations.
- Bracket clips are attached to the connector blocks as needed based upon connection type.
- While the connectors themselves are universal, Abound connector kits must be specified by connection type (X, L, T, S, 120 degree) in order to receive the correct type of trim.

ABOUND[®] TILE OVERVIEW

Abound tiles come in a variety of styles.

*Aesthetics of opposing tile surface and/or frame interior should be considered when selecting light-colored sheer materials.

ABOUND[®] SPECIFYING/DESIGN GUIDE

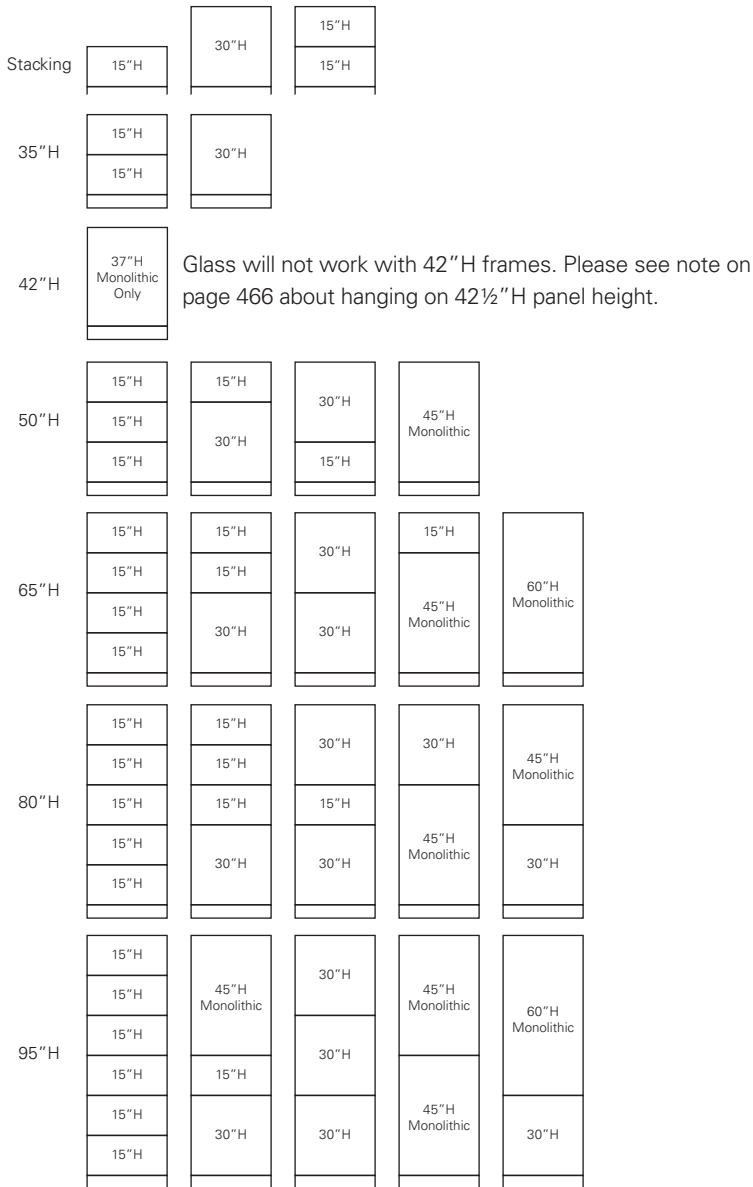

Tile Heights

Monolithic tiles are 5" shorter than frame heights to account for top trim and base raceway.

Typical Tile Height Configurations

Segment bars are required between any two tiles — order separately based on tile configuration on each side of frame. Note: Most CAD specification programs will calculate quantity of segment bars required.

*Additional tile combinations to those shown above are possible; heights above 65" require stacking frames - maximum height is 110".

To calculate the total height of tile(s) required, deduct 5" (height of base/top trim) from the total nominal panel height.

EXAMPLE: 65"H Frame takes 2 30"H tiles. $65 - 5 = 2 \times 30$ or $45 + 15$

Tiles can be ordered in the size that matches the frame height plus the stacker height.

EXAMPLE: If you are using a 35"H frame plus a 30"H stacker, you can order 2 - 30"H tiles or 1 - 60"H tile.

Door panels include frame, 42"W door, hinges and attaching hardware. Two 7½"H fabric tiles for the top of the door frame are required and ordered separately (HRVD0742T).

Sliding doors are available in 50", 65", and 80"H models and can mount to 30", 36", 42", and 48"W panels. The doors provide a 36"W opening and are 42"W, nominally. The doors ship non-handed. A Mounting Bracket Kit must be ordered for each door corresponding to the mounting panel's width (30", 36", 42", or 48"W).

Plains Tiles and Hard-surface Tiles include tile and Custom Bracket Kit.

Electrical and Data

Abound String-in Capacity

Openings in frame sides permit electrical data and communication cables to be run between frames in Abound. Using tackable acoustical tiles, the beltline pathway accommodates up to 62 cables (.25" dia) or 46 cables with electrical components installed.

DO NOT run electrical equipment or extension cords through cable openings in frame sides. Use beltline or base-mounted electrical system for all electrical supply.

Cables can enter/exit panel through underside of base pathway at juncture between frames. Openings are sized as follows (in sq. in.):

Straight connection	6.0
"S" Extended Straight Connection	10.0
"L" 90° Connection	8.9
"T" Connection	15.9
"X" Connection	17.9
"Y" Connection	—

When leveling glides are fully retracted, panel-to-floor clearance is 7/16". This may affect the volume of cabling that can be fed into the frame from the bottom of the pathway.

Vertical Capacity

Vertical Capacity Through Panel Frames

- A 60% fill ratio is achievable; however, when electrical components are installed in the beltline area, cabling capacity through the beltline area will be limited to approximately 45% fill ratio.

ACCELERATE® PANELS OVERVIEW

INTERSECTING CONNECTIONS

“L”, “T” and “X” connector kits are used when connecting frames at intersecting runs. For “L”, “T” and “X” connector kits, add 2¼” to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.

Wall starter kits provide a means to affix a panel run to a permanent building wall. Kit adds 7⁄8” to length of panel run.

STACKING PANELS

Stackers add 15” to the height of the base panel and can be ordered separately or as part of the panel model, see pages 512 and 515.

When adding stackers to an existing panel, a new connector must be ordered, to the tallest panel height.

Please note that Stacking Panels are not to be used freestanding and must match the panel width of the panel it is stacking on.

Cannot use a stacking panel on a Top Tier Glass Panel model.

Stackers ship with pins to connect stacker to post connector for added rigidity.

Stackers can be stacked up to 80”H on a base panel. Overheads can be placed on the first stacker only, up to 65”H. Voi overheads are not to be placed on stackers.

Top View		
Panel	S	Panel
	← 2¼”	
Panel	S	Panel

Extended straight connector kit “S” can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate “T” or “X” intersections. (Add 2¼” to the length of the run for every extended straight connector used.)

IN-LINE CONNECTIONS

There is no incremental increase in dimension along the panel run when using an in-line connector kit.

END OF RUN

Finished end trim must be specified for the unconnected sides of panel. When adding a stacking panel, order finished end trim in the height that matches the total stacked height. Move the end cap from the standard frame end trim to the stacking frame end trim.

Accelerate® frameless glass is single pane, 3⁄8” thick laminate safety glass, available in clear or frosted glass.

Frameless glass can only be used on the tallest panel in a typical, not at inline or post connectors with variable height. Frameless glass is not allowed on top of glass stackers or glass header panels and hanging or stacking on frameless glass is not permitted.

Frameless glass can span multiple panels with one piece of glass, creating a clean, seamless look.

IN-LINE VARIABLE HEIGHT TRIM
In-line connections between different height panels require trim to cover the exposed frame of the taller panel.

VARIABLE HEIGHT CONNECTOR TRIM

L, X and T connections between different height panels require trim to cover the exposed connector. The bottom of the trim is flat to match the profile of the top cap. Models are designated as “Variable Height Connector Trim”. For variable height connections in a Y configuration, contact the Accelerate Specials Department.

Multiple-height connections are accomplished by combining standard height panel connectors (35”H, 42”H, 50”H and 65”H) with shorter trim kits (7”H, 15”H, 22”H and 30”H). Start from the top-down — select the standard connector that corresponds to the height and connection type of the tallest panel. (See examples.)

ACCELERATE® PANELS OVERVIEW

Example 1

Connectors required:
1-50"H "T" Connector
2-15"H Connector VH Kit
2-35"H End Trim
1-65"H End Trim

In variable height "T" connections — as shown above — you would use the connectors as indicated.

Example 2

Connectors required:
1-50"H "X" Connector
2-7½"H Connector VH Kit
2-50"H End Trim
2-42"H End Trim

Example 3

Connectors required:
1-65"H "T" Connector
1-15"H Connector VH Kit
1-22½"H Connector VH Kit
1-65"H End Trim
1-50"H End Trim
1-42"H End Trim

Example above represents Accelerate variable height "L" for 65" to 50".

TOP CAPS

Top caps must be specified as a separate model from the panel. Top caps can span more than one panel when panels are connected in an in-line.

ACCELERATE® WORKING WITH PANELS

PANELS

- Accelerate® Panels are 2½" thick and available in 4 heights / 8 widths.

NOTE: Actual panel height varies depending on position of levelers.

PANEL SPECIFICATION AND INSTALLATION NOTES

Definitions:

Parent Panel Run – Panels (or a single panel) configured in a straight line intended to divide space. It is usually longer than the panels used to stabilize it.

Return Panels – Panels attached to a parent run for the purpose of stabilizing it. Return panels may also have the effect of dividing space.

Note: Return panels must be no more than 30" lower than the maximum height of the parent panel run. When stacking, the maximum height allowed is 80". This includes frameless glass. If attaching overhead storage, return panels must be the same height as parent run.

Method 1: Opposing Returns

Method 2: Single-Sided

A parent panel run must be a minimum of 4 feet and a maximum of 12 feet, and must have a minimum of two return panels extended in opposing directions on each side of the parent run.

SYSTEMS OVERHEAD AND SHELVES SPECIFYING

SPECIFICATION GUIDELINES

In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side. When suspending overhead storage off-module only one storage unit per panel side is allowed.

When overhead storage units are suspended from stacking frames, the following guidelines should be adhered to:

A maximum of two overhead storage units can be suspended from each side of stacking frames on any given panel.

Overhead Storage cabinets and the **Open Shelf** can also be mounted to a maximum height of 65"H on all systems. Voi overheads not to be mounted on Accelerate stackers.

No limitation to the number of units on structural frames when units are spaced 12" apart and when the run is supported with return panels of equal height to the spine wall on each side of storage shelves or overhead storage cabinets.

Storage shelf and overhead width must correspond with width of panel(s). It is possible to span two panels when combined panel width equals cabinet or shelf width.

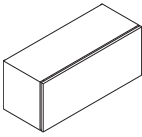

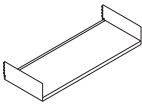

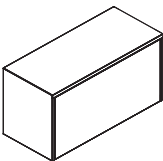

Overhead Cabinets can be mounted on a panel equal to or up to 18" narrower than cabinet.

Not applicable for ETA overheads, Voi overheads, and shelves.

ABOUND® Electrical and Data

Abound® features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway and beltline. The open structure of the frame allows voice and data cables to be routed both vertically and horizontally.

THE ABOUND ELECTRICAL SYSTEMS

Abound offers a choice of three electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals

All three systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian). See pages 540-541 for a detailed explanation of each electrical system.

Abound frames and electrical components are UL Listed. Electrical components are also CSA certified.

Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.

Abound's electrical harnesses are UL listed and are considered raceways themselves as defined by the National Electrical Code. This means there is no separation requirement between the electrical harnesses and communications cables per Sec. 800-52 of the National Electrical Code. Communication cables may be placed next to Abound's electrical components without a metal septum and will still meet the guidelines of the Telecommunications Industry Association for separation of power and data.

IN-FEEDS

Power in-feed cables deliver power from building to system. In-feed cables are housed in conduit to separate electrical system from communications and data lines.

Integrated power and communications poles provide capacity for routing power supply directly through the top of any structural or stacking frame using same width trim/connector kit in place of top cap. Avoid glass or translucent tiles in upper position of frames with integrated power poles. Power pole has a cavity on each side of a center septum. When using a ceiling power in-feed, consider that the in-feed must connect into an electrical harness located in an adjacent panel. (See pages 542-543 for cable capacity.)

Ceiling power in-feed connects to a prewired electrical harness in the beltline or base pathway, traverses through an adjacent panel and terminates in the junction box at the top of the integrated power pole. For use with integrated power pole models HEP65 and HEP35. No portion of the flex cable can be exposed after installation.

Sealtight base pathway power in-feed attaches to a receptacle opening at the base pathway. A heavy rubber sheathing shields conduit, allowing in-feed to be exposed.

Hardwire (New York Code) power in-feed (model H871400) is used when local electrical codes require hardwire entry. When used in 24"W, 30"W and 36"W panels, power can be routed only in one direction. When used in 42", 48"W and 60"W panels, an electrical pass-thru cable or harness for that panel width can be used to route power back in the opposite direction. Unit must connect to a power or pass-thru harness positioned in the base pathway area of an adjacent panel. Customer to furnish all cabling and wiring from power entry to power source. Junction box can be positioned at any duplex receptacle location.

HARDWARE (CHICAGO CODE) JUNCTION BOX

Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all metallic components. Concealed mounting is the only option at beltline. For the base pathway, junction box (model HH873500) clips directly into receptacle locations. Customer must furnish conduit, wiring, standard duplex receptacles with metal covers for the beltline and designer-type receptacles for the base pathway. Power entry can be routed from the ceiling, via an Abound power pole, or from the floor into a junction box (model HH873500).

ABOUND[®] Electrical and Data

POWER

Power blocks on electrical power harness and pass-thru harness accept duplex receptacles.

Electrical power harnesses are used to distribute power in panels. Abound electrical can be located at base pathway or beltline only. Connectors at both ends of power harnesses allow power distribution in either direction.

Electrical pass-thru harnesses have capacity to handle one duplex receptacle on each side of the panel when exposed.

A 60" pass-thru harness can be used to jump up to a single duplex receptacle per side at beltline and connecting to a power harness at base pathway.

Electrical power harnesses and pass-thru cables cannot be routed at 90° at beltline once frames are connected to connector blocks.

Electrical pass-thru cables distribute power through any panel where receptacles are not required. Cable length cannot be stretched.

Electrical jumper cables connect power from base pathway or beltline to a harness located on any horizontal member as needed. Jumper cable plugs into power block end of electrical power harness or electrical pass-thru harness.

Model HH871366 is 66" to jump up to 30 inches vertically – base pathway to beltline or beltline to base pathway.

Jumper can also be used from beltline to adjacent beltline at 90° juncture.

POWER BLOCKS

Base pathway mounting: Power blocks snap directly onto brackets in base pathway area.

Beltline electrical mounting: For ported receptacles at beltline mount power blocks onto Electrical Mounting Brackets which screw into the panel frame. Electrical Mounting Brackets must be ordered separately. Data/Electrical Port Tiles must be used where exposed receptacles will be located.

RECEPTACLES

Duplex receptacles snap into power blocks of power harnesses or pass-through harnesses. Duplexes are available in multiple colors. Each receptacle is labeled to indicate which circuit it will be connected to.

OPTIONAL STIFFENER SUPPORT
Stiffener supports can be used to provide additional rigidity to a panel when fabric tiles are on both sides of the frame. May also be used for routing power/data at non-standard heights.

All electrical power harnesses and pass-thru harnesses will stretch 3½", allowing them to span "T" and "X" intersections and "S" extended straight connections.

ACCELERATE® Electrical and Data

Accelerate® features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway. See Systems electrical pages 544-549 for electrical models to be used with Accelerate® Systems products.

ACCELERATE® Electrical and Data

THE ACCELERATE ELECTRICAL SYSTEMS

Accelerate offers a choice of three electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals

All three systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian). See pages 540-541 for a detailed explanation of each electrical system.

Accelerate panels and electrical components are UL Listed. Electrical components are also CSA certified.

Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.

Accelerate's electrical harnesses are UL listed and are considered raceways themselves as defined by the National Electrical Code. This means there is no separation requirement between the electrical harnesses and communications cables per Sec. 800-52 of the National Electrical Code. Communication cables may be placed next to Accelerate's electrical components without a metal septum and will still meet the guidelines of the Telecommunications Industry Association for separation of power and data.

See Systems electrical pages 544-549 for electrical models to be used with Accelerate® Systems products.

DUPLEX RECEPTACLES

For Duplex Receptacle models that can be used on Accelerate® panel systems, please see page 547.

All Systems electrical components can be found on pages 544-549.

LIGHTING

Task lights can be recessed under storage cabinets or storage shelves.

Task lights in four sizes are available to correspond to cabinet or shelf width. They have 9' power cords in black, connected in the right rear corner. All models feature electronic ballast for longer bulb life and cooler operating temperature. Task lights with a fused plug to meet Chicago electrical code are also available.

Recommendation: Provide a separate circuit for task lights for proper long-term operation without RF interference to computers that may be in use.

LED TASK LIGHTS

No finish specification required. Attaches magnetically to underside of overhead storage, or attaches with provided screws.

Occupancy sensor attaches to a single or starter LED light and will automatically turn the light off after no motion is detected for 30 minutes.

Just like all the LED light models, the occupancy sensor features a soft-touch on/off switch. LED task lights have a lifetime of 50,000 hours and have a dimmer feature that allows the user to adjust the amount of light output.

Daisy chain options are available. To use the daisy chain application, must start with model HLED17A or HLED31A.

VOICE/DATA RECEPTACLES

Abound not only provides space for large volumes of voice and data cables, it also offers several means of mounting commercially available voice and data components.

Commercially available modular data faceplates can be mounted in vacant base receptacle openings or can be mounted in data/electrical port tiles above or below the worksurface.

Cable management troughs attach to worksurfaces with provided screws. The graphite metal troughs are designed with cord access cut outs. These cut outs give users access to inside the trough without having to detach it from the worksurface.

SYSTEMS ELECTRICAL SPECIFYING INFORMATION

To Order:

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:

- **The Four-circuit system (4-Hot/2-Neutral/2-Ground)**
 - 3 + 1 option
 - 2 + 2 option
- **The Three-circuit system (3-Hot/3-Neutral/2-Ground)**

2. Determine location, quantity and circuit of duplexes.
3. Determine the appropriate choice and use of Isolated, Isolated/Dedicated and Separate Neutral circuits.
4. Specify appropriate Power Harnesses* and Pass-Thru Cables.*
5. Determine the location, quantity and type of Power In-feed needed.

* Select Power Harness models (HH8712XX) and Pass-Thru Cables (HH8711XX) with the last two digits being 1" (or 2") smaller than the associate panel width.

Electrical System Options

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power in-feed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals.

Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

Four-circuit, 3 + 1 Receptacle Option

The 3 + 1 option is the electrical standard used by The HON Company for many years in most of their systems products. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment.

Four-circuit, 2 + 2 Receptacle Option

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

SYSTEMS ELECTRICAL SPECIFYING INFORMATION

Three-circuit, separate neutrals

The Three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/dedicated. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

Two 8-wire, 20 AMP (15 AMP Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground (10 gauge neutral wires)	3 + 1	Common Circuit-1 HH873501	Common Circuit-2 (1) HH873502	Common Circuit-3 HH873503	Iso/Dedicated Circuit-4 HH873504
	2 + 2	Common Circuit-1 HH873501	Common Circuit-2 HH873502	Isolated Circuit-3 HH873506	Isolated Circuit-4 HH873504

(1) Circuit-2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system from being connected to components of another system.
- HON Cat. Nos. are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

Typical power usage by the most commonly specified office equipment.

Top pathway accepts up to 8 voice/data cables (.25" dia.).

Circuit Usage

Strategy 1

Circuits to Equipment

Assign specific uses for each of the circuits:

- For example, in a four-circuit system:
 - Circuit 1* — Calculators, fans, etc.
 - Circuit 2* — Task lights (could be wired to wall switch)
 - Circuit 3* — Computer monitors
 - Circuit 4* — CPUs

Strategy 2

Circuits to Workstations

Assign specific workstations to each of the three available circuits. Use circuit 4 for power-sensitive electronic equipment.

Placement of pedestals and lateral files may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

Abound® Lay-In Cable Capacity

Top View
3 cables
Variable height junctions accept up to 3 voice/data cables (.25" dia.).

Abound® Cable Capacity

56 cables
Abound® base pathway accepts up to 56 voice/data cables (.25" dia.) (6.03 sq. in.) at 60% fill.

SYSTEMS

Working with Worksurfaces and Supports

Worksurfaces are 1½" thick with particle-board core and with top surfaces finished in high-pressure laminate. Bottom surfaces are covered with a backer sheet.

Worksurface bracket kits support worksurface by attaching to an adjacent return panel the same width as the worksurface depth. Brackets allow one end of a worksurface to be supported by a panel return.

Cantilever brackets can be inserted into panel reveals in 1" vertical increments. Left or right handed. One size is used for both 24"D and 30"D worksurfaces. 18" Cantilever brackets are used for 18"D worksurfaces. DO NOT USE cantilever brackets at the end of a worksurface where no return panel is positioned or in worksurface runs longer than 72"W.

Wire management grommets are standard in most worksurfaces (unless "no grommet" worksurfaces selected).

Corner worksurfaces optimize use of space, and provide a convenient location for computer and monitor.

Flat brackets can be used to connect one worksurface perpendicular to another worksurface.

End-panel supports are used at the end of a run when no return panel is present. Straight worksurfaces adjacent to 120° connections must be supported by full end panels. Leveling glides provide 2¾" of adjustment.

Support legs are used to support worksurfaces only in a shared position.

Primary worksurfaces are available in 18", 24" and 30" depths. Nominal worksurface width is equal to nominal panel width. Other support hardware is ordered separately.

Corner worksurfaces with woodgrain laminate have grain direction diagonal to adjacent worksurfaces. One rear center support bracket is included. All other support hardware is ordered separately.

Wire management grommets are standard in most worksurfaces. Worksurfaces less than 48"W have one grommet centered on edge of worksurface. Rectangular worksurfaces over 42"W have two grommets. Peninsulas have one grommet. Corner Worksurfaces have one grommet (one on each back edge). D-Shaped worksurfaces and countertops do not have grommets.

Edgeband is available on laminate tops in standard colors (customer specified) to match or complement solid, patterned, or woodgrain laminates.

Optional width worksurfaces are available for use with panel runs having a TEE or Extended Straight connection.

Worksurfaces can be configured at 29 1/2" with end-panel supports and support legs, or at various heights on 1" increments using specific product configurations.

Worksurface support options include:

- Open leg models
- Support column
- Flat brackets
- Worksurface bracket kit
- Cantilever bracket
- Universal support leg
- End-panel support
- Freestanding pedestal

Other worksurface supports include:

- Support columns
- External channel supports
- Support pedestals
- Pedestals with panel-to-pedestal bracket
- Desking freestanding shared leg

Support Guidelines:

- Unsupported panel runs greater than 72"W need floor support for improved stability.
- Worksurface bracket kit should be used to tie panels to worksurfaces for added stability.
- A panel run without a return needs a floor support.
- Unsupported worksurface spans of 60"W-84"W require an external worksurface support channel. It is recommended for 48"W-60"W.
- Cantilevers only to be used on worksurface runs 48"W or less.

Worksurface bracket kit allows one end of a worksurface to be supported by a return panel. Return panel width must be the same as the depth of the worksurface.

Flat brackets can be used to connect one worksurface perpendicular to another worksurface.

Universal support legs are used to support worksurfaces only in a shared position.

Cantilever brackets are left or right handed. They can be inserted into panel reveals in 1" vertical increments. One size is used for both 24" and 30"D worksurfaces. 18" Cantilever brackets are used for 18"D worksurfaces. Both left and right brackets are required in shared applications.

End-panel supports are used in place of return panels at the end of worksurface runs. Straight worksurfaces adjacent to 120° connections must be supported by full end panels. End-panel supports are ordered for right- or left-handed application. Leveling glides provide 1/2" of adjustment.

Important: Do not use cantilever brackets at the end of a worksurface where no 90° return panel is positioned.

- Do not use to support worksurfaces from which a hanging pedestal is suspended, or which a peninsula worksurface is attached.
- Do not use to support worksurfaces supported with permanent wall hanger kit.

SYSTEMS

Working with Worksurfaces and Supports

Open Leg models are used to support various worksurface configurations and include attaching hardware and leveling glides.

D-Shaped, Peninsula and Jetty worksurfaces require support columns (ordered separately).

Countertops are available in straight or corner configurations.

Corner shelves are available in Edgeband. Attachment brackets are included.

- Unsupported worksurface spans of 60"W-84"W require an external worksurface support channel. It is recommended for 48"W-60"W.

EMPOWER[®] ELECTRICAL SPECIFYING INFORMATION

To Order:

- Determine which electrical system you will use after consulting your electrician and computer support personnel:
 - The Four-circuit system (4-Hot/2-Neutral/2-Ground)**
 - 3 + 1 option
 - 2 + 2 option
 - The Three-circuit system (3-Hot/3-Neutral/2-Ground)**
- Determine location, quantity and circuit of duplexes.
- Determine the appropriate choice and use of Isolated, Isolated/Dedicated and Separate Neutral circuits.
- Specify appropriate Power Harnesses* and Pass-Thru Cables.*
- Determine the location, quantity and type of Power In-feed needed.

* Select Power Harness models (HH8712XX) and Pass-Thru Cables (HH8711XX) with the last two digits being the same as the associated worksurface width.

Electrical System Options

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power in-feed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals.

Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

Four-circuit, 3 + 1 Receptacle Option

The 3 + 1 option is the electrical standard used by The HON Company for many years in most of their systems products. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment.

Four-circuit, 2 + 2 Receptacle Option

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

EMPOWER[®] ELECTRICAL SPECIFYING INFORMATION

Three-circuit, separate neutrals

The Three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/dedicated. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

Two 8-wire, 20 AMP (15 AMP Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	3 + 1	Common Circuit-1 HH873501	Common Circuit-2 (1) HH873502	Common Circuit-3 HH873503	Iso/Dedicated Circuit-4 HH873504
	(10 gauge neutral wires)	2 + 2	Common Circuit-1 HH873501	Common Circuit-2 HH873502	Isolated Circuit-3 HH873506
Three-circuit 3-Hot/3-Neutral/2-Ground	w/separate neutrals	Common Circuit-1 HH873501A	Common Circuit-2 HH873502A	Iso/Dedicated Circuit-3 HH873503A	N/A
(12 gauge neutral wires)					

(1) Circuit-2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system from being connected to components of another system.
- HON Cat. Nos. are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

Typical power usage by the most commonly specified office equipment.

OVERVIEW OF PERSONAL STORAGE AND PEDESTALS

LATERAL FILES

Advantages:

a) The most efficient means of conventional filing; b) Ideal for active filing in workstations, where higher volume capacity is necessary and retrieval is frequent

Considerations:

2-drawer steel lateral files fit under standard-height worksurfaces when using panel systems.

VERTICAL FILES

Advantages:

a) Economical; b) The most widely used filing method; c) requires minimal floor space

Considerations:

Vertical files are best suited for long-term storage, where retrieval is less frequent. For larger banks of files, lateral files are more space-efficient than vertical files.

SHELF FILES

Advantages:

a) The highest density method of filing; b) Specially designed for end-tab long-term filing

Considerations:

Ideal for medical or dental offices, available as open shelves or with flipper doors.

BOOKCASES

Advantages:

a) These units are ideal for binders, reference books or other items; b) Available with your choice of fixed or movable shelves

Considerations:

If working with panel systems, it is more attractive to specify units that are lower than the panel height.

FILING TECHNIQUES

Type	Standing Files	Hanging Files	End-tab Files
Advantages	Inexpensive. Uses existing file folders.	Easier organization and identification of the file folders. Files viewed from top. Remaining files hold their place when folders are removed. Easier to re-stock.	Easiest and fastest file identification. Files viewed from side. Preferred solution for health care, insurance and other critical files with frequent retrieval. Easiest to re-stock.

500 SERIES

500 Series Lateral Files.

500 SERIES

Economical 500 Series lateral files from HON offer features not often found on competitors' files, such as a tamper-resistant enclosed base and factory-installed counterweights on two- and four-drawer cabinets to stabilize the center of gravity when a drawer is opened. Even the two-sided lock system stands out among higher-priced rivals.

FEATURES

- Lateral files have counterweights for stability and a two-sided lock mechanism that resists tampering.
- Removable lock core can be changed as security needs require.
- Leveling glides compensate for uneven floors.
- Heavy-duty Steel ball-bearing drawer suspensions operate easily and quietly.
- Four vertical reinforcements keep the cabinet sturdy and the drawers gliding smoothly.
- Drawer handle design coordinates with HON Metro Classic Steel desks.

TABLES

SIN 711-1

Specification guide for IQ Electrical on Huddle tables

Determine table width, the type of power access being used (3'' grommet or 4x8 pop-up) and the desired number per table (Columns 1, 2 or 3). The table will then identify the type and quantity of components needed per table along with the maximum table run. Note that this is in addition to the Power base in-feed which is needed for each run. For example, a 48''W table with two 3'' power grommets per table will require (1) HQH5-3 harness and (1) HQH1-3 harness per table with a maximum run of four tables.

4-TRAC ELECTRICAL SYSTEM

4-Trac Electrical System

The 4-Trac Electrical System is a UL-recognized Manufactured Wiring System that seamlessly passes power from one worksurface to another. This low-profile non-sequential electrical system allows tables to be “daisy-chained” together in any desired order and allows users to reconfigure quickly due to simple connectable/disconnectable links.

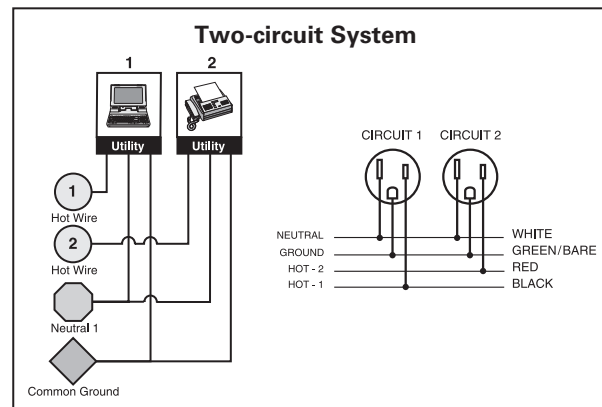

- Meets requirements of UL 183 and National Electric Code Article 604
- 4-Wires, 2-circuits, 20 Amps each (Circuit 1 and Circuit 2 only)
- 13 Duplex Receptacles per circuit, 26, 15 Amp Duplex receptacle per power in-feed
- Electrical system attaches directly to underside of worksurface with included brackets
- Up to twelve tables can be linked together

TABLES

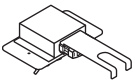

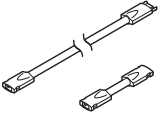

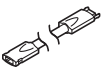

Steps for Electrical Specifications:

- Determine how many rows of tables are needed and order the following:
 - One HMAPLATE per row (or power in-feed)
 - One HMAPOWER48 per row (or power in-feed)
- Order one power harness per table in each row
 - For 1-6 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harnesses (ex. If powering six 24x60 tables order six sets of HMAPOWER60)
 - For 7-12 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harness for first six tables and Circuit 2 Power Harness for remaining tables (ex. If powering eight 24x60 tables, order six sets of HMAPOWER60 and two sets of HMAPOWER602)
- Order one set of ganging hardware per table (ex. HMAGANG)
- Determine which accessories are needed:
 - Power Hub model HGRMTAC — to access power at worksurface.
 - Data Grommet model HGRMTDATA — to access data at worksurface.
 - Wire Management strips model HBTMS — for vertical and horizontal wire management.

Specification guide for IQ Electrical on Motivate® tables

Determine table width, the type of power access being used (3'' grommet or 4x8 pop-up) and the desired number per table (Columns 1, 2 or 3). The table will then identify the type and quantity of components needed per table along with the maximum table run. Note that this is in addition to the Power base in-feed which is needed for each run. For example, a 48''W table with two 3'' power grommets per table will require (1) HQH5-3 harness and (1) HQH1-3 harness per table with a maximum run of four tables.

4-TRAC ELECTRICAL SYSTEM

4-Trac Electrical System

The 4-Trac Electrical System is a UL-recognized Manufactured Wiring System that seamlessly passes power from one worksurface to another. This low-profile non-sequential electrical system allows tables to be “daisy-chained” together in any desired order and allows users to reconfigure quickly due to simple connectable/disconnectable links.

- Meets requirements of UL 183 and National Electric Code Article 604
- 4-Wires, 2-circuits, 20 Amps each (Circuit 1 and Circuit 2 only)
- 13 Duplex Receptacles per circuit, 26, 15 Amp Duplex receptacle per power in-feed
- Electrical system attaches directly to underside of worksurface with included brackets
- Up to twelve tables can be linked together

TABLES

Steps for Electrical Specifications:

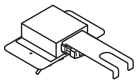

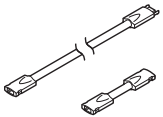

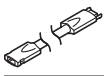

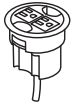

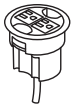

- Determine how many rows of tables are needed and order the following:
 - One HMAPLATE per row (or power in-feed)
 - One HMACABLE per row (or power in-feed)
- Order one power harness per table in each row
 - For 1-6 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harnesses (ex. If powering six 24x60 tables order six sets of HMAPOWER60)
 - For 7-12 tables in a row (see illustration 1)
 - Order Circuit 1 Power Harness for first six tables and Circuit 2 Power Harness for remaining tables (ex. If powering eight 24x60 tables, order six sets of HMAPOWER60 and two sets of HMAPOWER602)
- Order one set of ganging hardware per table (ex. HMAGANG)
- Determine which accessories are needed:
 - Power Hub model HGRMTAC — to access power at worksurface.
 - Data Grommet model HGRMTDATA — to access data at worksurface.
 - Wire Management strips model HBTMS — for vertical and horizontal wire management.

PRESIDE® SPECIFYING INFORMATION

Specify Preside tables with two steps—select a top and select a base.

1. Select desired top size, shape, and edge profile.

Multi-piece Tops:

Multi-piece tops are made of 108", 120", 144" and 168" two-piece "starter-sections" in rectangle, boat, arc end, or racetrack shapes in 48" or 54" depths. For tables up to 20', models are preconfigured for you. If you need a table top longer than 20', add as many 72" adder sections as you need. The examples below illustrate preconfigured sizes as well as how starter section and adder section tops can be used to create tables in virtually any length. Please note that 2-piece tops, in woodgrain colors, will not have exact grain alignment in the center where the two halves meet, a reasonable match can be expected. For tops utilizing an adder section, there will not be a grain match for those pieces.

PRESIDE® SPECIFYING INFORMATION

2. Select desired base style and identify model that coincides with top length.

Bases for Tops in Preconfigured Sizes

Bases include the appropriate number of supports for tables up to 20'. Simply identify the length of the table top in inches and specify the base with the same length in the model number. The example below illustrates how to select a base for a preconfigured size top.

Examples of Base for Preconfigured Top Size

Example top: HTLC48240 Top Description: 240" Rectangle Top
 Example base: HTLHP240 Base Description: Hollow Panel Base for 240" Top

Example: HTLHP240

Bases for Tops in User Configured Modular Sizes

If you need a table top longer than 20', add as many 72" adder section bases as needed. The examples below illustrate preconfigured sizes as well as how starter section and adder section bases can be used to create tables in any desired length.

SMARTLINK® SPECIFYING INFORMATION

MODULAR STORAGE

SmartLink® Modular Storage is comprised of cases, accessories and support rails. However, only the cases and accessories need to be specified. The following guidelines should help you plan and specify SmartLink Storage.

Planning Notes

Cases

- A laminate top with a soft feel vinyl edge provides a classic look with exceptional durability.
- Storage cases do NOT include accessories. Accessories are specified and sold separately.
- Case configurations are based off of 12"W or 30"W columns.
- Internal case configurations cannot be changed (i.e., cannot change an HLSF52-3 to a HLSF52-21).
- Cases are designed to allow the users to create a variety of accessory configurations using different tray heights and shelves.
- Cases must be specified with or without locking doors.
- Door models may be converted to non-door models in the field.

Accessories

- Accessories include trays in 3", 6" and 12" heights, shelves in 12" and 30" widths and a 12"W coat rod.
- All accessories are sold and specified separately as kits and include 1 pair of storage rails per tray or shelf.
- The support rails simple "no tool" attachment method allows users to easily install and change rail (tray or shelf) positions as needed.
- Kits include:

Accessory	Quantity Per Kit	Where Used
3"H trays	7 trays / 14 support rails	12"W columns only
6"H trays	4 trays / 8 support rails	12"W columns only
12"H trays	2 trays / 4 support rails	12"W columns only
12"W shelf	2 shelves / 4 support rails	12"W columns only
30"W shelf	2 shelves / 4 support rails	30"W columns only
Coat Rod	1 coat rod	12"W columns — Full Height case only

- Cabinet Whiteboard Bracket kit is available which allows whiteboards to be mounted to the back of the full height cabinets. Kit includes upper and lower rails with integrated marker tray and attachment hardware. Use wall rail sliding whiteboards. Rails will accept one (1) 48" x 48" board or two (2) 24" x 48" boards.

Specification Notes

- Number of accessory openings
SmartLink storage cases are available in six (6) standard case types that feature combinations of 12" or 30" internal column widths. The following illustration shows the number of openings by column width for each case configuration.

SMARTLINK[®] SPECIFYING INFORMATION

- Openings used by Accessory type:

Accessory	Openings used per Accessory
3"H tray	1
6"H tray	2
12"H tray	4
12"W shelf	1
30"W shelf	1

- Any combination of trays or shelves (of common width) can be used as long as the openings used equal the total number of openings available per column. The following illustrations show a variety of tray configuration options. Numbers shown in the opening refers to the tray size.

Using the information above, follow these guidelines to help determine accessory quantities.

- Determine the total number of available "openings" by width (12", 30") for each case type.
Example: HLSF52T-3F has 3 columns of 16 openings, total 48 openings
- On a PER COLUMN basis, determine the desired tray/shelf configurations total number of openings used so they equal the total openings available per column. Total accessory quantities per case then multiply by the total number of like cases.
Example: If each column will have 2-12" trays, 2-6" trays and 4-3" trays. The number of openings used for this column combination is 16. Assuming all three columns are the same total tray quantities for this case will be 12-3", 6-6" and 6-12".
- Once total tray and shelf quantities are determined, simply divide by the kit quantity to determine the number of kits required.
Example: 3" trays = $12 \div 7 = 2$ kits, 6" trays = $6 \div 4 = 2$ kits, 12" trays = $6 \div 2 = 3$ kits

Shelf Spacing

The clearance between shelves is approximately $3\frac{3}{8}$ " for every support rail that is not used between shelves. The following illustration shows the clearance between shelves when 0-4 support rail positions are not utilized.

SMARTLINK® SPECIFYING INFORMATION

WALL RAIL SYSTEM

The SmartLink® wall rail is a multi-layered, multi-functional system that can accommodate a variety of presentation boards and accessories. The multiple tracks allow boards to be easily positioned and changed to support today's interactive learning environments.

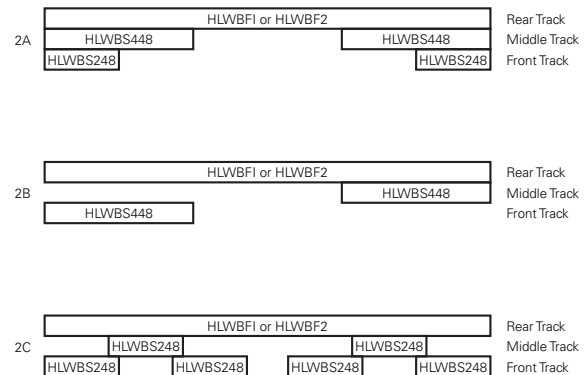

Planning Notes

- Installation of the wall rail system over existing white or chalkboards is not recommended.
- The rail and wall bracket provide three separate tracks for the Learning boards. The REAR or wall/bracket track is occupied by the fixed wall board. The MIDDLE and FRONT tracks are for sliding boards.
- To allow for greater utilization of the rear fixed board a maximum width of 96" of sliding boards on the middle or front track is recommended.

The illustration below shows the overall wall space requirements for the rail system and recommended mounting height for use in K-12 classroom applications.

Sliding boards are removable and reversible so a wide variety of layouts are possible. The following illustrations highlight a couple of the more common applications. Layouts 2A and 2B provide the greatest amount of board space and overall flexibility. When used with rail mounted worksurfaces, use 24"W boards on the front rail as shown in 2C in front of each worksurface to provide information specific to that work area. Boards could then be added to the middle rail for information/work to be shared between the stations.

Specification Notes

- Boards are specified individually.
- Hardware to mount to the wall brackets is not provided by HON and MUST BE SOURCED LOCALLY.
- Learning board only applications require two (2) HLWR-12 rails to be specified.
- REFER TO PRODUCT INSTALLATION INSTRUCTIONS FOR DETAILED INSTALLATION INFORMATION.

SPECIFICATION TIP: Consider available kneespace when specifying under desk storage Wire Book Box. Available kneespace will vary significantly given set desk height. Use the following example to calculate the available and usable kneespace.

EXAMPLE: HLDV-M3A Student Desk, HLDA-15 Wire Book Box

(user set desk height – top thickness – seat height = available kneespace)

(29"H – 1" thickness – 18" seat height = 10" available kneespace)

(available kneespace – book basket/box height = usable kneespace)

(10" available kneespace – 5" basket height = 5" usable kneespace)

- For keyed alike locks:
 - Order standard product which will be shipped with factory installed locks and random numbered cores or omit lock option where offered.
 - Order the appropriate quantity of like numbered cores required for each workstation or keyed area.
 - Simply replace the factory installed cores with the replacement cores after product has been installed.
- To install new core:
 - Lock must be in the unlocked position.
 - Insert core removal key and pull core straight out.
 - Insert new core with core removable key, hold core into lock and withdraw core removal key.
 - Retain original core for future use.
- To provide normal lead times, key numbers cannot be specified on HON products at time of order. This also eliminates need for tagging and tracking each product's lock number during installation.
- Black removable lock core kit used on laminate casegoods.
- Chrome removable lock core kit used on metal casegoods.

BORN IN THE USA. MADE IN THE USA.

At the end of World War II, HON began designing and manufacturing products for the home and office from Iowa, the heartland of America. These practical solutions inspired productivity and helped workers everywhere chase the American dream. Nearly 75 years later, we remain committed to designing, engineering and assembling all HON products right here in America. This gives us the chance to oversee every step of a product's life cycle, while also supporting a robust American workforce.

Why should you care about buying American? Besides the obvious benefit of helping workers and companies in our own country thrive, HON customers get confidence. Because we have direct oversight of every stage of product development, we know we're making durable products of the highest quality. This allows us to offer the strongest warranty in the industry, the HON Full Lifetime Warranty. A promise other furniture manufacturers aren't willing to make.

SEATING FUNCTIONS

Work/task chairs need to be adjusted to deliver optimum support. Cross-reference the letter key below to identify the chairs in this section that best meet your needs.

PROPORTIONAL ADJUSTMENTS

These controls adapt the dimensions of the chair to fit the user.

A. Pneumatic seat height adjustment — Regulates height of chair relative to floor.

B. Back height adjustment — Positions lumbar support within a fixed range.

C. Seat depth adjustment — Positions chair back relative to seat.

D. Seat glide mechanism — Seat cushion travels forward and back, then locks into position.

ARM OPTIONS

These adjustments accommodate different sized users and support keyboarding.

Q. Adjustable height arms — Provide improved upper-torso support. Can be adjusted periodically to relieve strain and provide variety.

R. Adjustable width arms (patented) — Quick-adjust design places arms close to body for keyboarding, or out to sides for ease of entry.

S. Height and width adjustable arms — Controls both height and width of arms for optimum comfort.

T. Loop arms — Largely specified for aesthetics. Frequently used in management settings.

B-A. All-adjustable arms — Arms adjust in height, width, and depth.

SEATING FUNCTIONS

POSTURE CONTROLS

The controls modify the position and angle of the seat and back to respond to changing tasks.

E. 360° Swivel

F. Tilt — Pivot point located directly above center of chair base.

G. Mid-range knee tilt — Pivot point located slightly ahead of center of chair base. Allows user to recline at a slightly more relaxed angle than conventional tilt.

H. Knee tilt — Pivot point located near front edge of chair. Allows user to keep feet flat on floor while chair reclines.

I. Synchronized knee tilt — Back reclines at a 2-to-1 ratio to seat angle. Pivot point located near front edge of chair.

J. Synchro-tilt — Back reclines at a 2-to-1 ratio to seat angle. Allows user to recline while keeping seat cushion relatively level to floor.

K. Tilt tension — Controls rate and ease of recline.

L. Tilt lock — Locks out tilt function when chair is in upright position.

M. Posture mechanism/lock — Back angle adjusts independently of seat, and can be locked in an infinite number of positions within a fixed range.

N. Multi-task control — Adjusts seat and back angles independently with a single lever (infinite locking within a fixed range).

O. Asynchronous control — High performance system with three levers to modify: angle of back relative to seat, tilt (free float or infinite locking) and forward tilt.

W. Integral lumbar support — Easily adjusts to enhance comfort.

X. Dual-clutch posture control — Adjusts seat and back angles independently with two levers (infinite locking within a fixed range).

A-C. Synchronized tilt — Back reclines at a 2.5 to 1 ratio to seat angle. Variable lock.

A-D. Side tilt tension — Controls rate and ease of recline. Conveniently located on the right side.

A-E. Back reclines at a 2 to 1 ratio to seat angle. Back angle adjusts independently of seat and can be locked in infinite number of positions within a fixed range.

FIRE CODE/COMPLIANT SEATING

FIRE SAFETY WITHOUT COMPROMISE

Elevate Fire Safety to a Higher Standard

- You asked for more seating choices that meet the CAL 133 standard. Here they are. Many of The HON Company's most popular chair models are now available in an array of fabrics that include an advanced barrier of fire protection. This barrier helps HON chairs comply with CAL 133 (California Technical Bulletin 133), the industry's most stringent test for fire-retardant furniture.

Definitive Protection

- The resilient filling materials used in upholstered seating manufactured by The HON Company meet or exceed the flame retardant requirements of the State of California, Department of Consumer Affairs, Bureau of Electronic and Home Appliance Repair, Home Furnishings and Thermal Insulation Technical Bulletin 117-2013. The label attached to the seat bottom indicates compliance with these requirements.
- For public buildings with at least 10 chairs in use, CAL 133 sets the bar as the accepted standard of fire safety. The CAL-TB 117-2013 standard referenced above evaluates the fire resistance of fabric, but only CAL 133 tests the entire assembled chair. Result: Greater assurance that your seating will not accelerate an actual fire.

How to Order

- To ensure that the chairs you order comply with CAL 133, specify one of the fabrics listed here on any of the seating models from the pages that follow. Then simply add "FC" to the model number when ordering.

SPECIFYING EXAMPLE: H7808FC.NR62.T.

A standard upcharge of \$90 will be applied per seat model for all single seat chairs.

For Lounge Seating, the following upcharges will apply: (Please note, the lounge upcharges do not apply to the Ignition® or Versant® seating lines. For these models, the \$90 per seat applies.)

Single Seat/Club Lounge: \$250 list

2-Seat/Love Seat Lounge: \$325 list

3-Seat/Sofa: \$400 list

MOISTURE BARRIER

- This extra layer of protection prevents moisture from penetrating the foam to improve cleanability and extend product longevity. Moisture barrier is available as an option for the seat only. The recliner gets moisture barrier on seat and footrest.
- Moisture barrier is not available for the fire code models.**

How to Order

- Fire Code:** To ensure that the chairs you order comply with CAL 133, specify one of the fabrics listed here on any of the seating models from the pages that follow. Then simply add "FC" to the model number when ordering.

SPECIFYING EXAMPLE: HHCG11FC.S.AI90.P6N.

- Moisture Barrier:** When specifying Moisture Barrier simply add "MB" to the model number when ordering.

SPECIFYING EXAMPLE: HHCG11MB.S.AI90.P6N.
