NewHeights™ Technical Data

Bring your day to NewHeights™ with our height adjustable workstations. Our sit-to-stand workstations increase circulation, comfort and productivity. They are perfect for shared workstations and assist in meeting ADA requirements.

Call centers, offices, schools, hospitals and libraries are ideal applications for these workstations. We will also retrofit them to existing worksurfaces.

Available in electric, crank, gas and fixed height

- Electric base adjusts quickly and quietly with the gentle push of a button.
- Gas lift base, with a paddle lever, adjusts instantly for lighter applications.
- Crank height units are the solution when an affordable sit-to-stand workstation is required.
- Fixed height units are perfect when a specific height is needed.

Base with Split Worksurface

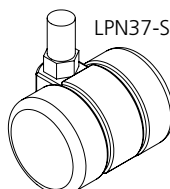

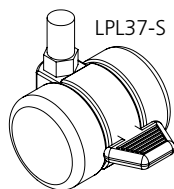

- Allows for even more adjustability. Computer monitor and keyboard height adjust independently.
- Split worksurface mechanism may be purchased separately.

Made from recycled materials, no VOC's

Designed and manufactured in the U.S.A. by a U.S. company

What is thermally fused?

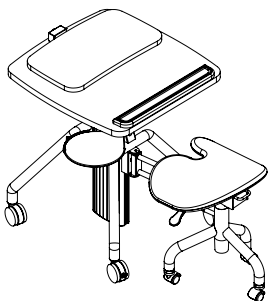

Thermally fused is made by fusing a paper weighing between 60 and 130 g/m2 directly to a substrate. There is no kraft paper used, and the resulting panel is ready for finishing.

What is thermofoil?

Thermofoil is a plastic material which is thermoformed to the profile of an underlying engineered wood core such as medium-density fiberboard. Thermofoil typically has a high-quality sheen and may incorporate metallic elements in its finish.

Power Management - Perimeter

- Perimeter is the electrical distribution system that can deliver a "plug and play" solution.
- Perimeter is the first UL 962 approved power system to offer true flexibility and simplicity in re-configuration for office and learning spaces.
- Smart Box Power Infeed (PSIF120) - a component that has a standard NEMA 5-15P 15 amp plug on one end of the cord and a Special Connector on the opposite end of the cord. This device powers the system.
- Just plug in the Smart Box into a standard wall outlet and then add up to eight Power Modules. To reconfigure, unplug the Smart Box, disconnect the Jumper Cables and move the furniture. Then reconnect the Jumper Cables and plug in the Power Box. It is that easy.

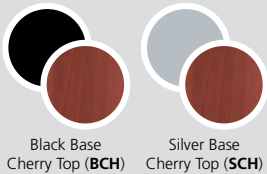

Simplify your workstation solutions with R-Style™ custom furniture. Start with the sleek style of our components, then add your desired worksurface for a unique, free-standing workstation.

We'll help you create a custom workstation that works for you. You supply the design and measurements of the laminate worksurface, and we'll recommend the R-Style™ bases and supports.

R-Style™ Office Series – a fresh look in affordable office furnishings. From mobile pedestals to standalone training tables to complete desk systems. Mix and match R-Style™ components to meet your individual needs. Call customer service for customization and pricing information.

- Standard width: 36", 48", 60", 72", 96"

RStyle Power Management - Perimeter

- Perimeter is the electrical distribution system that can deliver a "plug and play" solution.
- Perimeter is the first UL 962 approved power system to offer true flexibility and simplicity in re-configuration for office and learning spaces.
- Smart Box Power Infeed (PSIF120) - a component that has a standard NEMA 5-15P 15 amp plug on one end of the cord and a Special Connector on the opposite end of the cord. This device powers the system.
- Just plug in the Smart Box into a standard wall outlet and then add up to eight Power Modules. To reconfigure, unplug the Smart Box, disconnect the Jumper Cables and move the furniture. Then reconnect the Jumper Cables and plug in the Power Box. It is that easy.

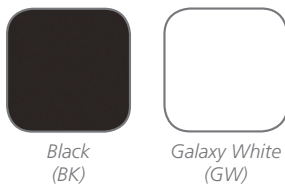

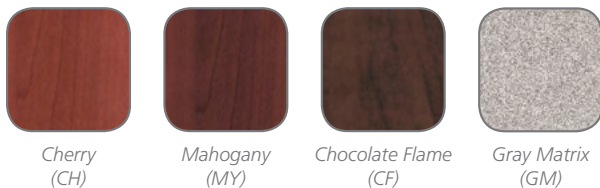

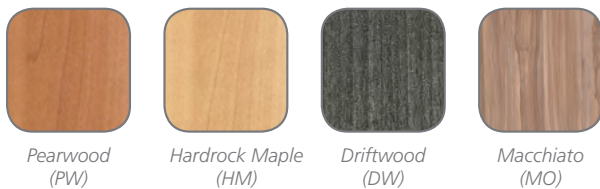

Daisy chain up to eight power/data modules per power feed.

Myriad™ Keyboard with Mouse and Articulating Arm Systems

Myriad™ is the only product with a quick-connect hook and slot system. One thumbscrew needed to lock the tray and articulating arm together – cuts installation time up to **40%**.

Myriad™ keyboard trays are made of steel for long-lasting strength and powder coated with a rich, wrinkle finish for added durability. A raised lip keeps your keyboard and mouse in place and a contoured palm support is standard for the keyboard.

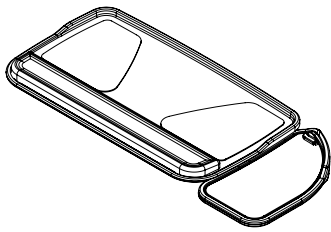

Myriad™ keyboard trays are designed to retrofit virtually any existing articulating arm, when used with our hook and slot adapter plate. Available with or without mouse tray.

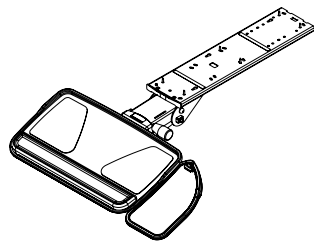

Myriad™ trays are designed to fit all workstation applications.

VerSIT™ - Mobile Desk with Soft Casters

VerSIT™ provides a comfortable point-of-care mobile workstation ideal for extended shifts that are typical for many healthcare workers.

VerSIT™, height adjustable mobile workstation with unique built-in compact seating, allows multiple users the ability to choose an adjustable worksurface height for standing or sitting as time permits.

VerSIT™ empowers on-the-move healthcare workers with convenient access to shared resources resulting in increased availability, shortened response times, and improved productivity.

VerSIT™ Specifications:

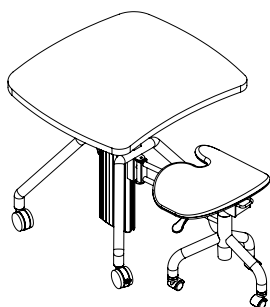

- Gas-spring height adjustable worksurface • 25 lbs. worksurface lift capacity
- Worksurface home position adjusts from 26" - 30", and provides 17" vertical travel
- Pneumatic height adjustable saddle seat with 250 lbs. seat capacity
- Comfortable, built-in saddle seat with whisper-quiet self-locking casters that easily adjust to unique users and tasks
- Seat retracts to home position allowing for easy room-to-room and floor-to-floor transport of single self-contained unit
- Height adjustable seat offers the flexibility to create a supportive atmosphere with patients via positive eye contact; travels from 19" to 26"
- Available in multiple sizes and colors; custom worksurfaces available to coordinate with existing design
- Add-on accessories available including; CPU holder, retractable power cord, monitor arm, lockable notebook station, storage bin and more
- Adjustable height between the two-tier worksurface: 1-1/4" to 1-7/8"
- Worksurface: 10 standard thermally-fused options, white thermofoil, high-pressure laminate and custom colors available (*see Finishes page*)

What is thermally fused?

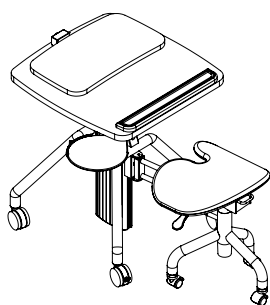

Thermally fused is made by fusing a paper weighing between 60 and 130 g/m2 directly to a substrate. There is no kraft paper used, and the resulting panel is ready for finishing.

What is thermofoil?

Thermofoil is a plastic material which is thermoformed to the profile of an underlying engineered wood core such as medium-density fiberboard. Thermofoil typically has a high-quality sheen and may incorporate metallic elements in its finish.
