I just received an emergency request for galvanized pipe with bands for an emergency bridge repair for District 1. During a recent inspection of three bridges where there had been a lot of recent high water issues, District 1 discovered that some of the pipes were collapsing which caused one bridge to be closed completely, the other two bridges are below standard and need to be repaired before the next weather event with high water.

The District is expecting this emergency to be around \$60,000.00.

Thank you,

Dusty Smith
