

Application Of The Reduced West Virginia Consumer Sales and Service Tax To Food

The Sales Tax and Use Tax is 2% on the sales, purchases and uses of food and food ingredients intended for human consumption. However, the reduced rate of tax does not apply to sales, purchases and uses by consumers of prepared food, food sold through vending machines and soft drinks. The purpose of this publication is to explain and clarify the application of the Sales and Use Taxes to sales of food.

Please note that applicable definitions are found at the end of this document.

A number of items sold by grocery stores, supermarkets, and similar type businesses are classified in this document under the headings "Food Items" and "Prepared Food Items." II. PREPARED FOOD ITEMS

The Sales Tax rate of 6% applies to the sale of prepared food items listed below **if prepared by the seller**:

All food sold in a heated state or heated by the seller
 Bakery items if sold with eating utensils provided by the seller

Bakery items sold in a heated state

- (1) All food sold with eating utensils provided by the seller including plates, knives, forks, spoons, glasses, cups, napkins or straws. Food is considered to be sold with eating utensils provided by the seller when the food is intended for consumption with the utensils provided. Prepared Food Items therefore includes all food sold by an eating establishment that sells meals, sandwiches, or other food for consumption on or off the premises. Additionally, Prepared Food Items includes self-service food such as salad bars or drink islands. The presence of self-service utensils in a facility does not change Food Items (taxable at 2%) into Prepared Food Items (taxable at 6%) unless it is intended that the food be consumed with those utensils. Further, items provided solely pursuant to sanitary statutes or regulations and not for purposes of consumption do not qualify as utensils.
- (2) Prepared Food Items remain taxable at 6% if previously heated by the seller and are ready to eat without further cooking by the purchaser.
- (3) Food that is only sliced, repackaged or pasteurized by the seller is not considered to be prepared Food and remains taxable at 2%.
- (4) Two or more food ingredients that are mixed or combined by the seller and then sold as a single food item.

Heated food sold in combination with unheated food is taxable at 6%. For example, hot chicken prepared by the seller with a pint of potato salad that was not prepared by the seller is sold for a single price.

- (5) Food sold by a seller whose proper primary NAICS classification is 311, food manufacturing (except subsector 3118, bakeries), if:
 - (a) sold with eating utensils provided by the seller; or
If the manufacturer, rather than the seller, provides an eating utensil with the food, such food is not considered to be provided with eating utensils. For example, a box of crackers and cheese that includes a spreader is subject to the 2% rate because the spreader is not provided by the seller.
 - (b) sold in a heated state

If these conditions in (a) and/or (b) exist, these items would be classified as Prepared Food and therefore taxable at the Sales and Use Tax rate of 6%.

Example:

Popcorn prepared by the seller and sold with a drink and candy for one price is a bundled transaction subject to the 6% rate. However, if the popcorn, drink and candy are sold individually, the popcorn and drink are subject to the 6% rate while the candy is subject to the 2% rate effective January 1, 2012.
