Kristy,

Your emergency request is approved. Please follow all emergency purchase procedures outlined in the Purchasing Division Procedures Handbook. Please forward all supporting documentation to this office for processing within 30 days of this approval.

Thanks,

Tara

Tara & Frank,

I am requesting an emergency purchase on behalf of our District 2 Headquarters to install a slip liner for a section of pipe that is deteriorating and on the verge of collapse. This pipe is under approximately 150 feet of fill. The pipe is located in Logan at Crawley Creek. If the pipe collapses before the slip liner is installed, DOH will have to bore out the pipe and replace the entire run of pipe. If this happens the cost will exceed 2 Million.

If an emergency is approved, we will need to issue possibly 3 separate purchase orders. The cost of the slip liner is approximately \$113,864.00, the cost for the grout and pump rental is approximately \$28,000 and the cost for the concrete and pump rental is approximately \$25,000. DOH will be coordinating the work to ensure the entire project has been completed.

Please let me know if you have any questions or if you need any additional information to consider this emergency request.

Thank you.

Kristy James

Kristy, 2 possibly 3 vendors total.

1. Slip liner = \$113,863.20
2. Grout and Pump rental = \$28,000.00
3. Concrete and pump rental = \$25,000.00 =

The pipe is located at 2 locations in Crawley Creek - Logan

Thank You
Brian Conrad

Brian,

I will get this submitted to Purchasing for permission to proceed with the emergency. I just need to know a couple of things. The cost for the grout and pump rental and the concrete and pump rental, will these items all be provided by the same vendor? Purchasing just need to know how many purchases we are looking at. They may also request the location of this pipe. Could you provide this as well?

Thanks

District 2 has a run of pipe that is deteriorating and collapsing. This pipe is under 150 feet of fill. If the pipe is allowed to collapse it would require a pipe bore which would result in an estimated cost of 2 million dollars. We can prevent the collapse if we can have the approval to purchase and install pipe slip liner with grout. We are looking at an estimated cost of:

1. Slip liner = \$113,863.20
2. Grout and Pump rental = \$28,000.00
3. Concrete and pump rental = \$25,000.00

Due to the weight of the fill, the pipe is collapsing , we are losing our window of opportunity to put in the liners , eventually we will not be able to utilize liners and will have to bore. Please let me know if we can proceed ?

Thank You
